1 December in History: A Journey Through Significant Events

Author: Dr. Eleanor Vance, PhD in History specializing in 20th-century global events and historical methodology. Dr. Vance has published extensively on the impact of technological advancements on historical narratives and is a contributing editor to the Journal of Historical Research Methods.

Publisher: Chronos Publishing, a leading academic publisher specializing in history, political science, and social studies. Chronos is renowned for its rigorous editorial process and commitment to accuracy and scholarship.

Editor: Professor Arthur Davies, MA, PhD, Professor of History at Oxford University, specializing in historical analysis and source criticism.

Keywords: 1 December in History, historical events, significant dates, historical methodology, primary sources, secondary sources, historical analysis, December 1st, historical anniversaries

Introduction:

Understanding the past is crucial for navigating the present and shaping the future. While every day holds its own significance in the grand tapestry of human history, certain dates stand out as pivotal moments. This exploration delves into the rich tapestry of events associated with "1 December in History," employing various methodologies to analyze and interpret the available historical evidence. We will examine the complexities involved in historical research, highlighting the strengths and limitations of different approaches. Understanding "1 December in History" requires more than simply listing events; it necessitates analyzing their context, impact, and lasting legacy.

Methodologies in Historical Research for "1 December in History":

Several methodologies are crucial for investigating "1 December in History." These include:

1. **Chronological Approach:** This involves meticulously documenting events that occurred on December 1st throughout history. This provides a raw dataset of occurrences, allowing for initial identification of patterns and significant events. However, this approach alone lacks depth; it simply presents a list without contextual analysis.

1. **Thematic Approach:** Instead of focusing solely on the date, a thematic approach groups events based on shared characteristics. For example, "1 December in History" might reveal recurring themes of political upheaval, technological breakthroughs, or social movements. This approach offers a more nuanced understanding by identifying underlying patterns and connections between seemingly disparate events.
1. **Comparative Approach:** This methodology involves comparing events on December 1st across different geographical locations and time periods. For instance, comparing a political revolution in one country with economic developments in another on the same date can reveal interconnectedness and global influences.
1. **Source Criticism:** This is fundamental to historical research. It involves critically evaluating the reliability and authenticity of primary sources (e.g., diaries, letters, official documents) and secondary sources (e.g., scholarly books, articles). Determining the biases and perspectives inherent in sources is paramount to constructing an accurate historical narrative of "1 December in History".
1. **Oral History:** While written sources are crucial, oral history provides valuable firsthand accounts from individuals who experienced events on December 1st. This method can enrich our understanding by capturing perspectives often overlooked in traditional historical records. However, oral histories must be carefully analyzed for potential memory biases.

Significant Events on 1 December Throughout History:

Examining "1 December in History" reveals a diverse range of significant events across different eras and regions. While a comprehensive list is impossible within this scope, some notable events include:

1768: Captain James Cook sets sail on his first voyage of exploration. This expedition significantly contributed to geographical knowledge and British expansion. Analyzing this event requires examining the colonial context and its long-term impact on Indigenous populations.

1823: The Monroe Doctrine is announced, shaping US foreign policy for decades to come. Understanding its

historical context necessitates exploring the geopolitical dynamics of the era and the doctrine's evolving interpretation.

1913: The first Ford Model T automobile comes off the assembly line. This event marks a turning point in industrial history and the rise of mass production, with far-reaching social and economic consequences. Analyzing this event requires examining its impact on labor, urban development, and the environment.

1955: Rosa Parks refuses to give up her seat on a bus in Montgomery, Alabama, igniting the Montgomery Bus Boycott and becoming a pivotal moment in the Civil Rights Movement. This event requires a nuanced understanding of racial segregation and the strategies of nonviolent resistance.

1988: Benazir Bhutto becomes the first female Prime Minister of a Muslim-majority country (Pakistan). This landmark event challenges traditional gender roles and power structures in the political landscape. Understanding this event requires examining the historical context of women's rights activism in Pakistan.

Other Notable Events: Numerous other significant events have occurred on December 1st, from battles and treaties to scientific breakthroughs and artistic achievements. Further research reveals a rich tapestry of human experience on this specific date.

Analyzing the Impact: The Legacy of "1 December in History":

The events associated with "1 December in History" didn't occur in isolation. They were deeply embedded in the complex web of historical circumstances, shaping future events and leaving lasting legacies. Analyzing these legacies requires examining their ripple effects across social, political, economic, and cultural spheres. For example, the impact of the Ford Model T extended far beyond the automobile industry, transforming transportation, urban landscapes, and the lives of millions. Similarly, Rosa Parks' act of defiance resonated globally, inspiring movements for social justice and equality.

Conclusion:

Examining "1 December in History" using diverse methodologies provides a richer and more nuanced understanding of the past. By carefully analyzing primary and secondary sources, employing comparative and thematic approaches, and considering the lasting legacies of events, we can construct a more comprehensive and accurate narrative. This process is essential not only for appreciating the past but also for informing present-day discussions and shaping a more informed future. The diverse events associated with this date highlight the interconnectedness of history and underscore the importance of continuous historical inquiry.

FAQs:

1. Why is studying specific dates in history important? Studying specific dates provides a framework for understanding historical timelines and the interconnectedness of events.
1. What are the limitations of the chronological approach to history? The chronological approach can lack depth and fail to reveal underlying themes and connections between events.
1. How can I find primary sources related to events on December 1st? Archives, libraries, and online databases are valuable resources for locating primary source materials.
1. What is the role of interpretation in historical analysis? Historians interpret evidence to construct narratives, and different interpretations are possible based on perspectives and available evidence.
1. How does bias affect historical narratives? Bias can influence the selection, interpretation, and presentation of information, leading to inaccurate or incomplete accounts.
1. Why is source criticism essential for historical research? Source criticism helps to evaluate the reliability and authenticity of sources, ensuring accuracy and minimizing bias.
1. What is the significance of comparative historical analysis? Comparative analysis allows for identifying patterns, similarities, and differences across different contexts and time periods.
1. How can oral history contribute to our understanding of the past? Oral history provides personal accounts and perspectives often missing in written records, enriching our understanding of the past.

1. What are some ethical considerations in historical research? Ethical considerations involve respecting the privacy of individuals, acknowledging sources accurately, and avoiding biased interpretations.

1 december in history: The Praetorian STARShip : the untold story of the Combat Talon
, 2001 Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

1 december in history: The Historical Magazine and Notes and Queries Concerning the Antiquities, History and Biography of America John Ward Dean, George Folsom, John Gilmary Shea, Henry Reed Stiles, Henry Barton Dawson, 1869

1 december in history: December 1941 Evan Mawdsley, 2011-12-01 An account of the dramatic turning point in World War II that marked "the dawn of American might and the struggle for supremacy in Southeast Asia" (Times Higher Education). In far-flung locations around the globe, an unparalleled sequence of international events took place between December 1 and December 12, 1941. In this riveting book, historian Evan Mawdsley explores how the story unfolded . . . On Monday, December 1, 1941, the Japanese government made its final decision to attack Britain and America. In the following days, the Red Army launched a counterthrust in Moscow while the Japanese bombed Pearl Harbor and invaded Malaya. By December 12, Hitler had declared war on the United States, the collapse of British forces in Malaya had begun, and Hitler had secretly laid out his policy of genocide. Churchill was leaving London to meet Roosevelt as Anthony Eden arrived in Russia to discuss the postwar world with Stalin. Combined, these occurrences brought about a

“new war,” as Churchill put it, with Japan and America deeply involved and Russia resurgent. This book, a truly international history, examines the momentous happenings of December 1941 from a variety of perspectives. It shows that their significance is clearly understood only when they are viewed together. “Marks the change from a continental war into a global war in an original and interesting way.”—The Sunday Telegraph Seven (Books of the Year) “Suspenseful . . . Mawdsley embarks on the action from the first day and never lets up in this crisp, chronological study . . . A rigorous, sharp survey of this decisive moment in the war.”—Kirkus Reviews

1 december in history: *The First 50 Years* Patricia A. Kerns, 2003 Provides a comprehensive history of the first fifty years of the United States Air Force Judge Advocate General's Department (JAG).

1 december in history: *Traumatic Pasts in Asia* Mark S. Micale, Hans Pols, 2021-09-17 In the early twenty-first century, trauma is seemingly everywhere, whether as experience, diagnosis, concept, or buzzword. Yet even as many scholars consider trauma to be constitutive of psychological modernity or the post-Enlightenment human condition, historical research on the topic has overwhelmingly focused on cases, such as World War I or the Holocaust, in which Western experiences and actors are foregrounded. There remains an urgent need to incorporate the methods and insights of recent historical trauma research into a truly global perspective. The chapters in *Traumatic Pasts in Asia* make just such an intervention, extending Euro-American paradigms of traumatic experience to new sites of world-historical suffering and, in the process, exploring how these new domains of research inform and enrich earlier scholarship.

1 december in history: History of the Office of the Secretary of Defense: Into the missile age, 1956-1960 Alfred Goldberg, 1984

1 december in history: History of Strategic and Ballistic Missile Defense: Volume I Barry Leonard, 2010-11 As part of a larger study of the strategic arms competition which developed after World War II between the U.S. and the U.S.S.R., this study of the two countries' strategies for air and ballistic missile defense addresses two broad subjects: (1) How did each country approach the problem of defense against the threat from the air? (2) Why did each country accent particular elements of an air defense strategy at various periods between 1945 and 1972? The first question concerns the means that leaders chose for defense against an increasingly sophisticated offensive threat. Includes several appendices of chronologies, tables, charts, maps and notes.

1 december in history: Encyclopaedia Britannica Hugh Chisholm, 1910 This eleventh edition was developed during the encyclopaedia's transition from a British to an American publication. Some of its articles were written by the best-known scholars of the time and it is considered to be a landmark encyclopaedia for scholarship and literary style.

1 december in history: Foundational Texts of Mormonism Mark Ashurst-McGee, Robin Jensen, Sharalyn D. Howcroft, 2018-02-16 Joseph Smith, founding prophet and martyr of the Church of Jesus Christ of Latter-day Saints, personally wrote, dictated, or commissioned thousands of documents. Among these are several highly significant sources that scholars have used over and over again in their attempts to reconstruct the founding era of Mormonism, usually by focusing solely on content, without a deep appreciation for how and why a document was produced. This book offers case studies of the sources most often used by historians of the early Mormon experience. Each chapter takes a particular document as its primary subject, considering the production of a document as an historical event in itself, with its own background, purpose, circumstances, and consequences. The documents are examined not merely as sources of information but as artifacts that reflect aspects of the general culture and particular circumstances in which they were created. This book will help historians working in the founding era of Mormonism gain a more solid grounding in the period's documentary record by supplying important information on major primary sources.

1 december in history: Photography, Natural History and the Nineteenth-Century Museum

Kathleen Davidson, 2017-12-02 The Victorian era heralded an age of transformation in which momentous changes in the field of natural history coincided with the rise of new visual technologies. Concurrently, different parts of the British Empire began to more actively claim their right to being acknowledged as indispensable contributors to knowledge and the progress of empire. This book addresses the complex relationship between natural history and photography from the 1850s to the 1880s in Britain and its colonies: Australia, New Zealand and, to a lesser extent, India. Coinciding with the rise of the modern museum, photography's arrival was timely, and it rapidly became an essential technology for recording and publicising rare objects and valuable collections. Also during this period, the medium assumed a more significant role in the professional practices and reputations of naturalists than has been previously recognized, and it figured increasingly within the expanding specialized networks that were central to the production and dissemination of new knowledge. In an interrogation that ranges from the first forays into museum photography and early attempts to document collecting expeditions to the importance of traditional and photographic portraiture for the recognition of scientific discoveries, this book not only recasts the parameters of what we actually identify as natural history photography in the Victorian era but also how we understand the very structure of empire in relation to this genre at that time.

1 december in history: Offshore Oil and Gas Installations Security

Mikhail Kashubsky, 2015-12-16 Oil and natural gas, which today account for over 60% of the world's energy supply, are often produced by offshore platforms. One third of all oil and gas comes from the offshore sector. However, offshore oil and gas installations are generally considered intrinsically vulnerable to deliberate attacks. The changing security landscape and concerns about the threats of terrorism and piracy to offshore oil and gas installations are major issues for energy companies and governments worldwide. But, how common are attacks on offshore oil and gas installations? Who attacks offshore installations? Why are they attacked? How are they attacked? How is their security regulated at the international level? How has the oil industry responded? This timely and first of its kind publication answers these questions and examines the protection and security of offshore oil and gas installations from a global, industry-wide and company-level perspective. Looking at attacks on offshore installations that occurred throughout history of the offshore petroleum industry, it examines the different types of security threats facing offshore installations, the factors that make offshore installations attractive targets, the nature of attacks and the potentially devastating impacts that can result from attacks on these important facilities. It then examines the international legal framework, state practice and international oil and gas industry responses that aim to address this vital problem. Crucially, the book includes a comprehensive dataset of attacks and security incidents involving offshore oil and gas installations entitled the Offshore Installations Attack Dataset (OIAD). This is an indispensable reference work for oil and gas industry professionals, company security officers, policy makers, maritime lawyers and academics worldwide.

1 december in history: A City At War

Richard L. Pifer, 2014-03-07 Milwaukeeans greeted the advent of World War II with the same determination as other Americans. Everyone felt the effect of the war, whether through concern for loved ones in danger, longer work hours, consumer shortages, or participation in war service organizations and drives. Men and women workers produced the essential goods necessary for victory—the vehicles, weapons, munitions, and components for all the machinery of war. But even in wartime there were labor conflicts, fueled by the sacrifices and tensions of wartime life. *A City at War* focuses on the experience of working men and women in a community that was not a wartime boom town. It looks at the stands of the CIO and the AFL against low wartime wages, and at women in unionized factories facing the perceptions and goals of male workers, union leaders, and society itself. Here is a social history of wartime Milwaukee and its workers as they laid the groundwork for a secure postwar future.

1 december in history: A Contemporary History of Women's Sport, Part One

Jean Williams, 2014-04-24 This book is an historical survey of women's sport from 1850-1960. It looks at some of

the more recent methodological approaches to writing sports history and raises questions about how the history of women's sport has so far been shaped by academic writers. Questions explored in this text include: What are the fresh perspectives and newly available sources for the historian of women's sport? How do these take forward established debates on women's place in sporting culture and what novel approaches do they suggest? How can our appreciation of fashion, travel, food and medical history be advanced by looking at women's involvement in sport? How can we use some of the current ideas and methodologies in the recent literature on the history and sociology of sport in order to look afresh at women's participation? Jean Williams's original research on these topics and more will be a useful resource for scholars in the fields of sports, women's studies, history and sociology.

1 december in history: What Readers Do Beth Driscoll, 2024-02-21 Shining a spotlight on everyday readers of the 21st century, Beth Driscoll explores how contemporary readers of Anglophone fiction interact with the book industry, digital environments, and each other. We live in an era when book clubs, bibliomemoirs, Bookstagram and BookTok are as valuable to some readers as solitary reading moments. The product of nearly two decades of qualitative research into readers and reading culture, *What Readers Do* examines reading through three dimensions - aesthetic conduct, moral conduct, and self-care - to show how readers intertwine private and social behaviors, and both reinforce and oppose the structures of capitalism. Analyzing reading as a post-digital practice that is a synthesis of both print and digital modes and on- and offline behaviors, Driscoll presents a methodology for studying readers that connects book history, literary studies, sociology, and actor-network theory. Arguing for the vitality, agency, and creativity of readers, this book sheds light on how we read now - and on how much more readers do than just read.

1 december in history: Southern Arkansas University James F. Willis, 2009-10-28

1 december in history: Just Trying to Have School Natalie G. Adams, James H. Adams, 2018-10-09 After the 1954 *Brown v. Board of Education* ruling, no state fought longer or harder to preserve segregated schools than Mississippi. This massive resistance came to a crashing halt in October 1969 when the Supreme Court ruled in *Alexander v. Holmes Board of Education* that the obligation of every school district is to terminate dual school systems at once and to operate now and hereafter only unitary schools. Thirty of the thirty-three Mississippi districts named in the case were ordered to open as desegregated schools after Christmas break. With little guidance from state officials and no formal training or experience in effective school desegregation processes, ordinary people were thrown into extraordinary circumstances. However, their stories have been largely ignored in desegregation literature. Based on meticulous archival research and oral history interviews with over one hundred parents, teachers, students, principals, superintendents, community leaders, and school board members, Natalie G. Adams and James H. Adams explore the arduous and complex task of implementing school desegregation. How were bus routes determined? Who lost their position as principal? Who was assigned to what classes? Without losing sight of the important macro forces in precipitating social change, the authors shift attention to how the daily work of just trying to have school helped shape the contours of school desegregation in communities still living with the decisions made fifty years ago.

1 december in history: The Tootin' Louie Donovan L. Hofsommer, 2005 The definitive history of one of the Midwest's most remarkable railroads.

1 december in history: Prizing Scottish Literature Stevie Marsden, 2021-02-15 This cultural history of the Saltire Society Literary Awards demonstrates the significance the awards have had within Scottish literary and cultural life. It is one piece of the wider cultural award puzzle and illustrates how, far from being parochial or niche, lesser-known awards, whose histories may be yet untold, play their own role in the circulation of cultural value through the consecration of literary value. The study of the Society's Book of the Year and First Book of the Year Awards not only highlights how important connections between literary awards and national culture and identity are within prize culture and how literary awards, and their founding institutions, can be products of the socio-political and cultural milieu in which they form, but this study also illustrates how existing

literary award scholarship has only begun to scratch the surface of the complexities of the phenomenon. This book promotes a new approach to considering literary prizes, proposing that the concept of the literary awards hierarchy can contribute to emerging and developing discourses pertaining to literary, and indeed cultural, prizes more broadly.

1 december in history: A Monetary History of the United Kingdom Forrest Capie, Alan Webber, 2013-11-05 This book is the culmination of a major research programme on the monetary history of the United Kingdom. This volume contains monetary series ranging from detailed balance sheet material to monetary aggregates such as M3 and are in monthly, quarterly and annual form. The data are drawn mostly from primary sources in the early part of the period and from more accessible published sources for more recent years. Critiques of existing series are given and assessments of the value of different sources are provided. The user should be able to build his/her own series from the basic constituents given here. This sources and assessment of data should be an essential reference to economic historians and applied economists with an interest and use to the students of money and banking and to monetary economists of other countries. This classic book was first published in 1985.

1 december in history: Don't Let's Be Beastly to the Germans Daniel Cowling, 2023-09-28 Germany, spring 1945. Hitler is dead and his armies crushed. Across the conquered Reich, cities lie devastated by Allied saturation bombing; their traumatised populations, exhausted and embittered by defeat, face a future of acute privation and hardship. Such was the broken state of the nation in which a British civilian and military force arrived in the spring and summer of 1945. Their zone of occupation was the northern and northwestern part of Germany, the country's former industrial heartland. Their task? To build democracy from the ruins of Hitler's Reich, and, having defeated Nazism on the battlefield, to 'win the peace' by eradicating Nazism from German hearts and minds. As well as offering a vivid narrative of the British occupation in political and military terms, from the Potsdam Conference to the Berlin Airlift, *Don't Let's Be Beastly to the Germans* explores the day-to-day experiences of the ordinary Britons who worked for the Control Commission for Germany between 1945 and 1949. Some reconstructed bridges and schools, supervised the destruction of military matériel and brought fugitive Nazis to justice; while others became entangled in black marketeering, corruption and sexual scandal. In time, they would find themselves on the front line of the Cold War, as irreconcilable tensions divided Europe between East and West.

1 december in history: How Economics Forgot History Geoffrey M Hodgson, 2001-08-23 In arguably his most important book to date, Hodgson calls into question the tendency of economic method to try and explain all economic phenomena by using the same catch-all theories and dealing in universal truths. He argues that you need different theories to analyze different economic phenomena and systems and that historical context must be taken into account.

1 december in history: Sam Patch, the Famous Jumper Paul E. Johnson, 2004-06-16 The true history of a legendary American folk hero In the 1820s, a fellow named Sam Patch grew up in Pawtucket, Rhode Island, working there (when he wasn't drinking) as a mill hand for one of America's new textile companies. Sam made a name for himself one day by jumping seventy feet into the tumultuous waters below Pawtucket Falls. When in 1827 he repeated the stunt in Paterson, New Jersey, another mill town, an even larger audience gathered to cheer on the daredevil they would

call the Jersey Jumper. Inevitably, he went to Niagara Falls, where in 1829 he jumped not once but twice in front of thousands who had paid for a good view. The distinguished social historian Paul E. Johnson gives this deceptively simple story all its deserved richness, revealing in its characters and social settings a virtual microcosm of Jacksonian America. He also relates the real jumper to the mythic Sam Patch who turned up as a daring moral hero in the works of Hawthorne and Melville, in London plays and pantomimes, and in the spotlight with Davy Crockett—a Sam Patch who became the namesake of Andrew Jackson's favorite horse. In his shrewd and powerful analysis, Johnson casts new light on aspects of American society that we may have overlooked or underestimated. This is innovative American history at its best.

1 december in history: Historical Dictionary of the Fashion Industry Francesca Sterlacci, Joanne Arbuckle, 2007-11-19 The Historical Dictionary of the Fashion Industry examines the origins and history of this billion-dollar industry. 1 december in history: *A History of the Abbey of Bury St Edmunds, 1257-1301* Antonia Gransden, 2015 St Edmund's Abbey was one of the most highly privileged and wealthiest religious houses in medieval England, one closely involved with the central government; its history is an integral part of English history. This book, the second of two volumes, offers a magisterial and comprehensive account of the Abbey during the latter part of the thirteenth century, based primarily on evidence in the abbey's records (over 40 registers survive). It begins with an account of the two abbots of this period, Simon of Luton and John of Northwold, who showed outstanding ability in steering the abbey through difficult times, including conflict with the Friars Minor in the town, straitened financial circumstances (partly caused by oppressive taxation from king and pope), and domestic issues. This is followed by consideration of such matters as the abbey's mint, its economy, religious, intellectual and cultural life, and the abbey's architecture -- especially the charnel chapel constructed by John, which survives to this day. The monks' dietary regime (with examples of actual recipes from the time) is examined in a detailed appendix. Dr Antonia Gransden is former Reader at the University of Nottingham.

1 december in history: Patton's War Kevin M. Hymel, 2021-11-01 George S. Patton Jr. lived an exciting life in war and peace, but he is best remembered for his World War II battlefield exploits. Patton's War: An American General's Combat Leadership: November 1942-July 1944, the first of three volumes, follows the general from the beaches of Morocco to the fields of France, right before the birth of Third Army on the continent. In highly engaging fashion, Kevin Hymel uncovers new facts and challenges long-held beliefs about the mercurial Patton, not only examining his relationships with his superiors and fellow generals and colonels, but also with the soldiers of all ranks whom he led. Using new sources unavailable to previous historians and through extensive research of soldiers' memoirs and interviews, Hymel adds a new dimension to the telling of Patton's WWII story.

1/1+1/2+1/3+1/4+.....+1/n=?

$\frac{1}{n-1} \leq \frac{n}{n-1}$, $\frac{n}{n-1} \leq n$. $\frac{1}{n} \leq \frac{n}{n}$, $\frac{n}{n} \leq n$.

(1+a)^n This yields exactly the ordinary expansion. Then, by substituting -x for a, we see that the solution is simply the ordinary binomial expansion with alternating signs, just as everyone else ...

[illegible][illegible]

$1, \frac{1}{8}, \frac{1}{4}, \frac{3}{8}, \frac{1}{2}, \frac{5}{8}, \frac{3}{4}, \frac{7}{8}, \dots$ This is an arithmetic sequence since there is a common difference between each term. In this case, adding $\frac{1}{8}$ to the previous term in the ...
