2021 o l history paper: InJUSTICE Pedro Perez, 2024-10-18 InJUSTICE is Pedro Perez's

memoir chronicling his journey from poverty to the highest position in the New York State Police. In highly personal prose, Perez poignantly expresses how he adroitly and coolly challenged his fellow troopers' racial microaggressions and ultimately gained their respect. The book sheds light on institutional racism within the force and Perez's commitment to reform. He overcame racism and microaggressions to rise through the ranks. As a state trooper, Perez sought to reconcile the seeming contradiction between his progressive values, anti-racism, and identity (Perez identifies as an Afro-Caribbean Taino) and serving in an organization that stubbornly resisted opening its ranks to Black and Latino men and women. It concludes with Perez's argument for police reform and addressing the legacy of racism affecting police relations with racialized communities. Dr. Pedro Caban - Former Vice Provost for Diversity and Educational Equity at the State University of New York and Professor & Director of Undergraduate and Graduate Studies - Department of Latin American, Caribbean & U.S. Latino Studies

***** This book speaks to the individual fortitude that it takes for any person to be successful in a police culture. Add in what Pedro Perez had to navigate, around, the individual and systemic racism, that is omnipresent for non-white people in the NYSP and the United States. Factors that can make everyday task almost a miracle to accomplish for non-white people. Bravo my brother! Anthony Ellis - New York State Police Chief Inspector - Colonel (Retired)

***** Pedro Perez's book, InJUSTICE, expertly combines the story of his personal journey as a New York State Trooper of Afro-Caribbean descent with his account of his tireless efforts to make the NYSP a more just, equitable institution: one that protects the rights of all New Yorkers. Perez writes with courageous honesty about how the very same law enforcement agency that lifted him and his family from poverty also challenged him to reform its institutionalized racism from within, all while doing his best to protect and serve. This is a must read for anyone seeking to better understand the complexities of working in law enforcement as a member of a marginalized minority. It is an urgent call of conscience to all New Yorkers and Americans to make our vital law enforcement institutions instruments of genuine justice. Dan Ornstein - rabbi and author of Cain v Abel: A Jewish Courtroom Drama. *****

InJUSTICE is the unique story of how Perez escapes from a life of poverty by joining the New York State Police. As one of a handful of Puerto Rican and African American state troopers in the 1980s, the author vividly reveals the challenges that officers of color face. With intelligence, courage, humor, and a commitment to administering justice, Perez examines the tensions that arise from carrying out law enforcement in a society shaped by inequalities of class, gender, ethnicity, and race, while also sharing a moving personal story. Barbara Smith - Author, The Truth That Never Hurts: Writings on Race, Gender, and Freedom

***** WOW! Pedro Perez' memoir is an inspiring account of one man's grappling with (internally as well as externally) issues underlying injustice. Throughout his journey from childhood in Lower East Side Manhattan to the highest ranks of the New York State Troopers, Pedro Perez encounters all types of injustice including racism, gender bias, and poverty. His unique story of attempting systemic change

from within while experiencing the harmful effects of these injustices is nothing short of heroic. The brutal honesty in this book is both refreshing and intimidating. It is not simply a call for change, but a true account of one man answering that call. Will you join him? Kevin P. Tully - Mecklenburg County Public Defenders Office

2021 o l history paper: The Afghanistan Papers Craig Whitlock, The Washington Post, 2022-08-30 A Washington Post Best Book of 2021 The #1 New York Times bestselling investigative story of how three successive presidents and their military commanders deceived the public year after year about America's longest war, foreshadowing the Taliban's recapture of Afghanistan, by Washington Post reporter and three-time Pulitzer Prize finalist Craig Whitlock. Unlike the wars in Vietnam and Iraq, the US invasion of Afghanistan in 2001 had near-unanimous public support. At first, the goals were straightforward and clear: defeat al-Qaeda and prevent a repeat of 9/11. Yet soon after the United States and its allies removed the Taliban from power, the mission veered off course and US officials lost sight of their original objectives. Distracted by the war in Iraq, the US military become mired in an unwinnable guerrilla conflict in a country it did not understand. But no president wanted to admit failure, especially in a war that began as a just cause. Instead, the Bush, Obama, and Trump administrations sent more and more troops to Afghanistan and repeatedly said they were making progress, even though they knew there was no realistic prospect for an outright victory. Just as the Pentagon Papers changed the public's understanding of Vietnam, The Afghanistan Papers contains "fast-paced and vivid" (The New York Times Book Review) revelation after revelation from people who played a direct role in the war from leaders in the White House and the Pentagon to soldiers and aid workers on the front lines. In unvarnished language, they admit that the US government's strategies were a mess, that the nation-building project was a colossal failure, and that drugs and corruption gained a stranglehold over their allies in the Afghan government. All told, the account is based on interviews with more than 1,000 people who knew that the US government was presenting a distorted, and sometimes entirely fabricated, version of the facts on the ground. Documents unearthed by The Washington Post reveal that President Bush didn't know the name of his Afghanistan war commander—and didn't want to meet with him. Secretary of Defense Donald Rumsfeld admitted that he had "no visibility into who the bad guys are." His successor, Robert Gates, said: "We didn't know jack shit about al-Qaeda." The Afghanistan Papers is a "searing indictment of the deceit, blunders, and hubris of senior military and civilian officials" (Tom Bowman, NRP Pentagon Correspondent) that will supercharge a long-overdue reckoning over what went wrong and forever change the way the conflict is remembered.

2021 o l history paper: *The Grapes of Wrath. Featuring new 2021 illustrations* John Steinbeck, 2021-06-08 John Ernst Steinbeck Jr. has been called a giant of American letters". His magnum opus The Grapes of Wrath, which epitomises the harrowing events of the Clutch Plague era, stirred widespread sympathy for the plight of migrant workers. Featuring new original Illustrations by D. Fisher.

2021 o l history paper: *A History of the Ozarks, Volume 1* Brooks Blevins, 2018-06-28 Winner of the Missouri History Book Award, from the State Historical Society of Missouri Winner of the Arkansiana Award, from the Arkansas Library Association Geologic forces raised the Ozarks. Myth enshrouds these hills. Human beings shaped them and were shaped by them. The Ozarks reflect the epic tableau of the American people—the native Osage and would-be colonial conquerors, the determined settlers and on-the-make speculators, the endless labors of hardscrabble farmers and capitalism of visionary entrepreneurs. The Old Ozarks is the first volume of a monumental three-part history of the region and its inhabitants. Brooks Blevins begins in deep prehistory, charting how these highlands of granite, dolomite, and limestone came to exist. From there he turns to the political and economic motivations behind the eagerness of many peoples to possess the Ozarks. Blevins places these early proto-Ozarkers within the context of larger American history and the economic, social, and political forces that drove it forward. But he also tells the varied and colorful human stories that fill the region's storied past—and contribute to the powerful myths and

misunderstandings that even today distort our views of the Ozarks' places and people. A sweeping history in the grand tradition, *A History of the Ozarks, Volume 1: The Old Ozarks* is essential reading for anyone who cares about the highland heart of America.

2021 o l history paper: *Forbidden Knowledge* Hannah Marcus, 2020-09-25 “Wonderful . . . offers and provokes meditation on the timeless nature of censorship, its practices, its intentions and . . . its (unintended) outcomes.” —Times Higher Education *Forbidden Knowledge* explores the censorship of medical books from their proliferation in print through the prohibitions placed on them during the Counter-Reformation. How and why did books banned in Italy in the sixteenth century end up back on library shelves in the seventeenth? Historian Hannah Marcus uncovers how early modern physicians evaluated the utility of banned books and facilitated their continued circulation in conversation with Catholic authorities. Through extensive archival research, Marcus highlights how talk of scientific utility, once thought to have begun during the Scientific Revolution, in fact began earlier, emerging from ecclesiastical censorship and the desire to continue to use banned medical books. What’s more, this censorship in medicine, which preceded the Copernican debate in astronomy by sixty years, has had a lasting impact on how we talk about new and controversial developments in scientific knowledge. Beautiful illustrations accompany this masterful, timely book about the interplay between efforts at intellectual control and the utility of knowledge. “Marcus deftly explains the various contradictions that shaped the interactions between Catholic authorities and the medical and scientific communities of early modern Italy, showing how these dynamics defined the role of outside expertise in creating ‘Catholic Knowledge’ for centuries to come.” —Annals of Science “An important study that all scholars and advanced students of early modern Europe will want to read, especially those interested in early modern medicine, religion, and the history of the book. . . . Highly recommended.” —Choice

2021 o l history paper: *Ambassadors of Social Progress* Maria Cristina Galmarini, 2024-02-15 *Ambassadors of Social Progress* examines the ways in which blind activists from the Soviet Union and Eastern Europe entered the postwar international disability movement and shaped its content and its course. Maria Cristina Galmarini shows that the international work of socialist blind activists was defined by the larger politics of the Cold War and, in many respects, represented a field of competition with the West in which the East could shine. Yet, her study also reveals that socialist blind politics went beyond propaganda. When socialist activists joined the international blind movement, they initiated an exchange of experiences that profoundly impacted everyone involved. Not only did the international blind movement turn global disability welfare from philanthropy to self-advocacy, but it also gave East European and Soviet activists a new set of ideas and technologies to improve their own national movements. By analyzing the intersection of disability and politics, *Ambassadors of Social Progress* enables a deeper, bottom-up understanding of cultural relations during the Cold War. Galmarini significantly contributes to the little-studied history of disability in socialist Europe, and ultimately shows that disability activism did not start as an import from the West in the post-1989 period, but rather had a long and meaningful tradition that was rooted in the socialist system of welfare and needed to be reinvented when this system fell apart.

2021 o l history paper: *The Richness of the History of Mathematics* Karine Chemla, José Ferreirós, Lizhen Ji, Erhard Scholz, Chang Wang, 2023-11-27 This book, a tribute to historian of mathematics Jeremy Gray, offers an overview of the history of mathematics and its inseparable

connection to philosophy and other disciplines. Many different approaches to the study of the history of mathematics have been developed. Understanding this diversity is central to learning about these fields, but very few books deal with their richness and concrete suggestions for the “what, why and how” of these domains of inquiry. The editors and authors approach the basic question of what the history of mathematics is by means of concrete examples. For the “how” question, basic methodological issues are addressed, from the different perspectives of mathematicians and historians. Containing essays by leading scholars, this book provides a multitude of perspectives on mathematics, its role in culture and development, and connections with other sciences, making it an important resource for students and academics in the history and philosophy of mathematics.

2021 o l history paper: The Threat Lilia Giugni, 2022-11-17 Why has the digital revolution been damaging for so many women? And what can be done about it? The Threat explores today's digital capitalism through the prism of the women who are harmed by it globally. Some of them are victimised through digital devices. Others are exploited while producing them. And some don't even have access to the Internet, but are brutally raped in wars funded by the minerals that make our tablets work. With the help of individuals' stories and interviews, activist and academic Dr Lilia Giugni explores how millions of women across the world are violated, exploited and marginalised due to processes of technological change. She unpacks the tight intersections between technology, patriarchy and capitalism - exposing the profit-driven market in which our digital devices are designed and built, and the patriarchal society that shapes who gets to use them and how. Above all, Lilia Giugni gives us very practical ideas to help us take back the tech: turning technology into a truly emancipatory force and a leverage to create a better and more just future for women and for all. 'A brilliant and engaging exposé of how the forces of capitalism and patriarchy penetrate our digital world - and what women can do to fight back.' Hannah Jewell, author of ;100 Nasty Women of History

2021 o l history paper: **The Education of Blacks in the South, 1860-1935** James D.

Anderson, 2010-01-27 James Anderson critically reinterprets the history of southern black education from Reconstruction to the Great Depression. By placing black schooling within a political, cultural, and economic context, he offers fresh insights into black commitment to education, the peculiar significance of Tuskegee Institute, and the conflicting goals of various philanthropic groups, among other matters. Initially, ex-slaves attempted to create an educational system that would support and extend their emancipation, but their children were pushed into a system of industrial education that presupposed black political and economic subordination. This conception of education and social order--supported by northern industrial philanthropists, some black educators, and most southern school officials--conflicted with the aspirations of ex-slaves and their descendants, resulting at the turn of the century in a bitter national debate over the purposes of black education. Because blacks lacked economic and political power, white elites were able to control the structure and content of black elementary, secondary, normal, and college education during the first third of the twentieth century. Nonetheless, blacks persisted in their struggle to develop an educational system in accordance with their own needs and desires.

2021 o l history paper: *Against the Seas* Mary Soderstrom, 2023-02-28 An incredible read.... While unflinching in her analysis, Soderstrom nevertheless gifts us with a message of hope and resilience. — MAUDE BARLOW, activist and author of *Still Hopeful: Lessons from a Lifetime of Activism*. What can we learn about coping with rising sea levels from ancient times? The scenario we are facing is scary: within a few decades, sea levels around the world may well rise by a metre or more as glaciers and ice caps melt due to climate change. Large parts of our coastal cities will be flooded, the basic outline of our world will be changed, and torrential rains will present their own challenges. But this is not the first time that people have had to cope with threatening waters, because sea levels have been rising for thousands of years, ever since the end of the last Ice Age. Stories told by the Indigenous people in Australia and on the Pacific coast of North America, and those found in the Bible and the Epic of Gilgamesh, as well as Roman and Chinese histories all bear witness to just how traumatic these experiences were. The responses to these challenges varied: people adapted by building dikes, canals, and seawalls; by resorting to prayer or magic; and, very often, by moving out of the way of the rushing waters. *Against the Seas* explores these stories as well as the various measures being taken today to combat rising waters, focusing on five regions: Indonesia, Shanghai, the Sundarbans of Bangladesh, the Salish Sea, and the estuary of the St. Lawrence River. What happened in the past and what is being tried today may help us in the future and, if nothing else, give us hope that we will survive.

2021 o l history paper: Paper Diver Gary L. Pinkerton, 2024-07-11 Harry E. Rieseberg's autobiographical writings include stories like being attacked by a giant octopus while recovering sunken treasure, defending himself from an attack by a 15-foot shark with only a diving knife, and surviving a hurricane and a severely broken leg while at sea--all captivating tales for audiences in the 1940s and 1950s, and all invented by a very successful charlatan. This is a biography of Harry E. Rieseberg, a shameless self-promoter who passed himself off as the world's greatest treasure salvor but who never got wet. His entire public persona was based on stories he retold in dozens of books and thousands of articles in which he made claims of feats that were fantasy but sold as fact. Despite the often-obvious facts of his fabrication, his books influenced a generation of legitimate divers and underwater archaeologists like Sir Robert Marx and Robert Stenuit. Thoroughly researched, this book uses sources including his personal records and letters to his agents to provide deep insight into the nature of his life and the way he created a false persona for popular consumption.

2021 o l history paper: Old Ways for New Days Melissa Nursey-Bray, Robert Palmer, Ann Marie Chischilly, Phil Rist, Lun Yin, 2022-09-01 This Open Access book provides a critical reflection into how indigenous cultures are attempting to adapt to climate change. Through detailed first-hand accounts, the book describes the unique challenges facing indigenous peoples in the context of climate change adaptation, governance, communication strategies, and institutional pressures. The book shows how current climate change terminologies and communication strategies often perpetuate the marginalisation of indigenous peoples and suggests that new approaches that prioritise Indigenous voices, agency and survival are required. The book first introduces readers to Indigenous peoples and their struggles related to climate change, describing the impacts of climate change on their everyday lives and the adaptation strategies currently undertaken to address them. These strategies are then detailed through case studies which focus on how Indigenous knowledge and practices have been used to respond to and cope with climate change in a variety of environments, including urban settings. The book discusses specific governance challenges facing Indigenous peoples, and presents new methods for engagement that will bridge existing communication gaps to ensure Indigenous peoples are central to the implementation of climate change adaptation measures. This book is intended for an audience of Indigenous peoples, adaptation practitioners, academics, students, policy makers and government workers.

2021 o l history paper: Linguistic Landscapes Jeffrey L. Kallen, 2023-06-22 Visible language is widespread and familiar in everyday life. We find it in shop signs, advertising billboards, street and place name signs, commercial logos and slogans, and visual arts. The field of linguistic landscapes draws on insights from sociolinguistics, language policy and semiotics to show how these public forms of language relate to multiple issues in language policy, language rights, language and education, language and culture, and globalization. Stretching from the earliest stone inscriptions, to posters and street signs, and to today's electronic media, linguistic landscapes sit at the crossroads of language, society, geography, and visual communication. Written by one of the pioneers of the field, this is the first book-length synthesis of this exciting, rapidly-developing field. Using photographic evidence from across three continents, it demonstrates the methodology and approaches used, and summarises its findings and developments so far. It also seeks to answer common questions from its critics, and to suggest new directions for further study.

2021 o l history paper: Women, Aging, and Art Frima Fox Hofrichter, Midori Yoshimoto, 2021-01-28 What images come to mind with the words "women", "aging", "old", even "elderly"? Are they stereotypes? Are there any positive associations? The thirteen contributions to this edited volume explore a broad range of images of old women, ranging from medieval "old wives" to contemporary re-imaginings of shamans and witches and empowering self-portraits. Works from medieval Europe to colonialtime Polynesia, present West Africa, Japan, and the Americas, in a multiplicity of media are explored in detail. These studies of varied representations of "old women" offer fresh perspectives and an engaging dialogue about society's values and preconceptions regarding the wisdom of our elders and the "golden years" in different times and cultures.

2021 o l history paper: Advanced Intelligent Computing Technology and Applications

De-Shuang Huang,

2021 o l history paper: Portrait of an English Migration William E. Van Vugt, 2021-03-15
Portrait of an English Migration recounts the history of those who left North Yorkshire for North America between the eighteenth century and the early twentieth century. Focusing on individual stories of migrants and their families, this book provides many personal glimpses of the migration experience of those who left England's largest county to build new lives in the United States and Canada. Exploring the local history, geography, and cultures of Yorkshire and the key places of settlement in North America, William Van Vugt deepens our understanding of the historic migration process: how local conditions and access to information influenced migration decisions, the role of local networks in migration patterns, and the significance of family connections, religious identities, and land ownership to the migrants themselves. He considers the extent to which English migrants shaped regional culture and contributed to economic development, addressing ongoing questions about identity and what it meant to be English in North America. Full of first-person accounts and stories from migrants themselves, Portrait of an English Migration is both a sweeping history of two centuries of migration and an intimate look at the lives of generations of Yorkshire people who crossed the ocean to make a new home.

2021 o l history paper: Digital Culture and Society Kate Orton-Johnson, 2024-02-23 This book provides a critical introduction to the ways in which digital technologies have enabled new types of interactions, experiences and collaborations across a range of platforms and media, profoundly shaping our socio-cultural landscapes. These discussions are grounded in classical sociological concepts; community, the self, gender, consumption, power and exclusion and inequality, to demonstrate the continuities that exist between sociological studies of 'real' world phenomena and their digital counterparts. Examining the various debates around methods in digital sociology in recent years, this book provides an accessible and engaging guide to using methodologies to study digital technology. From the moment we wake up until we go to bed, many of us constantly use digital technologies. Our mobile phones have become our maps, banks, newspapers and entertainment consoles. What's more, they allow us to be constantly connected with the people in our lives. This book will equip you to analyse digital media in your own work. The book offers a broad guide to the various areas of our lives that are impacted by digital technology, from the virtual communities that we form on social media to the impact that digital technology has on our identity through a 'sociology of selfies'. With chapters on leisure, work, privacy and methods, this is an essential introduction for students in the areas of sociology, digital media, and cultural studies. Learning features include: - Annotated further reading in every chapter - Case studies that illustrate theory - Learning objectives and questions throughout - Historical and theoretical context in every chapter

2021 o l history paper: Race and Crime Shaun L. Gabbidon, Helen Taylor Greene, 2024-09-03 Written by two of the most prominent criminologists in the field, Race and Crime, 6th Edition takes an incisive look at the intersection of race and ethnicity and the criminal justice system. A thought-provoking discussion of contemporary issues uniquely balances the historical context and modern data and research to offer students a panoramic perspective on race and crime. Accessible and reader friendly, this comprehensive text shows students how race and ethnicity have mattered and continue to matter in all aspects of the administration of justice.

2021 o l history paper: Stalin's Early Cold War Foreign Policy Jamil Hasanli, 2022-07-14 Immediately after the Allied WW2 victory in Europe, claims were made by the Soviet Union over the eastern regions of Turkey, to secure direct control over the Bosphorus, Dardanelles, and Turkish Straits. The detailed study of the international components of these events, featuring the veiled complexities of Stalin's anti-Turkish diplomacy, provides a key to understanding crucial aspects of these Soviet territorial claims. Iranian Azerbaijan became another hotspot of post-war confrontation between the western Allies and the USSR: Soviet policy towards Iran manifested in the desire to access their oil resources. A further direction emerging within Soviet post-war strategy was the Kurdish issue in the Near and Middle East. At the conjunction of Turkish and Iranian events, Soviet

secret service bodies and diplomatic institutions exploited their strengths and toyed with Kurdish minorities in the region. Their decisions placed the bordering regions of China, Turkey, and Iran squarely in the shadowy reaches of Moscow's policy. This research uses newly discovered archive material to illustrate the underlying intrigue behind Soviet ambition and intimately tracks how the Soviet Union was defeated in the first Cold War confrontation over its southern borders. It also links events of this period with the critical issue of Uyghur assimilation, and further contemporary developments highlighting Putin's policies, making it invaluable for both academic and general readers.

2021 o l history paper: Mindful Social Studies Natalie Keefer, Tori K. Flint, 2022-08-16

Mindful Social Studies: Frameworks for Social Emotional Learning and Critically Engaged Citizens situates the field of social studies education as uniquely poised to integrate anti-racist, equity, and asset-based pedagogies with contemplative, mindfulness-based strategies to promote the knowledge, skills, and dispositions students need to be effective citizens. Students' Social Emotional Learning (SEL) hinges upon their experience(s) engaging in authentic learning that strengthens cognitive skills, including critical thinking, self-awareness, reflection, compassion, empathy, and perspective taking. In this volume, the co-editors have curated reflective K-16 practitioner-style, research-focused, and theory-based chapters that explore social justice-orientated contemplative pedagogies, as well as mindfulness-related frameworks and strategies for teaching social studies and the social and behavioral sciences. In this book, chapter authors explore ways of cultivating specific mindfulness-related social studies dispositions and transformative rationales and approaches for critical mindfulness and SEL based on compelling arguments for meeting the needs of students, families, and educators in a dynamic and increasingly diverse society.

2021 o l history paper: Artificial Intelligence and Human-Computer Interaction Y. Ye, P.

Siarry, 2024-04-02 There is no denying the increasing importance of AI and human-computer interaction for societies worldwide. The potential for good in these fields is undeniable, but the challenges which arise during research and in practice must be carefully managed if this potential for good is to be realized without harm. This book presents the proceedings of ArtInHCI2023, the 1st International Conference on Artificial Intelligence and Human-Computer Interaction, held as an online event from 27-28 October 2023, and attended by around 70 participants from around the world. The aim of the conference was to promote academic exchange within and across disciplines, addressing theoretical and practical challenges and advancing current understanding and application. A total of 72 submissions were received for the conference, of which 41 were selected for presentation and publication following a thorough peer review process, resulting in an acceptance rate of 57%. Topics covered included deep learning, artificial neural networks, computer vision and pattern recognition and papers were focused on the challenges of research as well as application. Providing a fascinating overview of developments and innovation in the field, the book will be of interest to all those working with AI or human-computer interaction.

2021 o l history paper: Revising the Revolution Larry E. Holmes, 2021-06-01 The clash between scholarship and politics—between truth and propaganda—was ruthless for historians in Istpart, the Russian Communist Central Committee's official historical department. Istpart was tasked with preserving the documentary record, compiling memoirs, and upholding ideological conformism within the national narrative of the 1917 revolution. In *Revising the Revolution*, Larry E. Holmes examines the role of Istpart's historians, in both the Moscow office and a regional branch in Viatka, who initially believed they could adhere to the traditional standards of research and simultaneously provide a history useful to the party. However, they quickly realized that the party rejected any version of history that suggested nonideological or nonpolitical sources of truth. By 1928, Istpart had largely abandoned its mission to promote scholarly work on the 1917 revolution and instead advanced the party's master narrative. *Revising the Revolution* explores the battle for the Russian national narrative and the ways in which history can be used to centralize power.

2021 o l history paper: Data Mining and Exploration Chong Ho Alex Yu, 2022-10-27 This book introduces both conceptual and procedural aspects of cutting-edge data science methods, such as dynamic data visualization, artificial neural networks, ensemble methods, and text mining. There are at least two unique elements that can set the book apart from its rivals. First, most students in social sciences, engineering, and business took at least one class in introductory statistics before learning data science. However, usually these courses do not discuss the similarities and differences between traditional statistics and modern data science; as a result learners are disoriented by this seemingly drastic paradigm shift. In reaction, some traditionalists reject data science altogether while some beginning data analysts employ data mining tools as a "black box", without a comprehensive view of the foundational differences between traditional and modern methods (e.g., dichotomous thinking vs. pattern recognition, confirmation vs. exploration, single method vs. triangulation, single sample vs. cross-validation etc.). This book delineates the transition between classical methods and data science (e.g. from p value to Log Worth, from resampling to ensemble methods, from content analysis to text mining etc.). Second, this book aims to widen the learner's horizon by covering a plethora of software tools. When a technician has a hammer, every problem seems to be a nail. By the same token, many textbooks focus on a single software package only, and consequently the learner tends to fit the problem with the tool, but not the other way around. To rectify the situation, a competent analyst should be equipped with a tool set, rather than a single tool. For example, when

the analyst works with crucial data in a highly regulated industry, such as pharmaceutical and banking, commercial software modules (e.g., SAS) are indispensable. For a mid-size and small company, open-source packages such as Python would come in handy. If the research goal is to create an executive summary quickly, the logical choice is rapid model comparison. If the analyst would like to explore the data by asking what-if questions, then dynamic graphing in JMP Pro is a better option. This book uses concrete examples to explain the pros and cons of various software applications.

2021 o l history paper: COVID-19, Tourist Destinations and Prospects for Recovery

Kaitano Dube, Olga L. Kupika, David Chikodzi, 2023-05-12 There has been a segmented approach to documenting the impact of COVID-19 and recovery prospects for global tourism destinations. Until this volume, though, there has not been comprehensive, concentrated efforts to take a deep-dive look into two countries' tourism destinations in order to provide a comparative perspective. This book fills this gap by analyzing tourism impacts and recovery prospects in both Zimbabwe and South Africa. The volume opens with an introductory chapter from the editors that provide context and background. Part I of the volume looks at the impacts of COVID-19 on Zimbabwe and South Africa, Part II focuses on tourism operations during the pandemic, and Part III focuses on tourism recovery initiatives and prospects. The concluding chapter from the editors provides practical and policy implementation. This book is the third and final component of a three-volume set on the impact of COVID-19 on destination tourism around the world.
