2022 atv buyers guide: *Riding with Evil* Ken Croke, Dave Wedge, 2022-03-15 Sons of Anarchy meets The Departed in this fast-paced, high-wire act memoir from former ATF agent Ken Croke, the first federal agent in history to go undercover and successfully infiltrate the infamous—and infamously violent—Pagan Motorcycle Club, a white supremacist biker gang. Longtime ATF agent Ken Croke had earned the right to coast to the end of a storied career, having routinely gone undercover to apprehend white supremacists, gun runners, and gang members. But after a chance encounter with an associate of the Pagan Motorcycle Gang created an opening, he transformed himself into “Slam,” a monstrous, axe-handle wielding enforcer whose duty was to protect the leadership “mother club” at all costs. He befriended the club’s most violent and criminally insane members and lived among them for two years, covertly building a case that would eventually take down the top members of the gang in a massive federal prosecution, even as he risked his marriage, his sanity, and his life. With today’s law enforcement largely moving toward the comparative safety of cyber operations, it became one of the last of its kind, a masterclass in old school tactics that marked Croke as a dying breed of undercover agent and became legendary in law enforcement. Now for the first time, Croke tells the story of his terrifying undercover life in the Pagans—the unspeakable violence, extremism, drugs, and disgusting rituals. Written with bestselling crime writer Dave Wedge and utilizing the exclusive cooperation of those who lived the case with him, as well as thousands of pages of court files and hours of surveillance tapes and photos, Croke delivers a frightening, nail-biting account of the secretive and brutal biker underworld.

2022 atv buyers guide: Dirt to Soil Gabe Brown, 2018-10-11 A regenerative no-till pioneer.—NBC News We need to reintegrate livestock and crops on our farms and ranches, and Gabe Brown shows us how to do it well.—Temple Grandin, author of *Animals in Translation* See Gabe Brown—author and farmer—in the Netflix documentary *Kiss the Ground* Gabe Brown didn't set out to change the world when he first started working alongside his father-in-law on the family farm in North Dakota. But as a series of weather-related crop disasters put Brown and his wife, Shelly, in desperate financial straits, they started making bold changes to their farm. Brown—in an effort to simply survive—began experimenting with new practices he'd learned about from reading and talking with innovative researchers and ranchers. As he and his family struggled to keep the farm viable, they found themselves on an amazing journey into a new type of farming: regenerative agriculture. Brown dropped the use of most of the herbicides, insecticides, and synthetic fertilizers that are a standard part of conventional agriculture. He switched to no-till planting, started planting diverse cover crops mixes, and changed his grazing practices. In so doing Brown transformed a degraded farm ecosystem into one full of life—starting with the soil and working his way up, one plant and one animal at a time. In *Dirt to Soil* Gabe Brown tells the story of that amazing journey and offers a wealth of innovative solutions to restoring the soil by laying out and explaining his five principles of soil health, which are: Limited Disturbance Armor Diversity Living Roots Integrated Animals The Brown's Ranch model, developed over twenty years of experimentation and refinement, focuses on regenerating resources by continuously enhancing the living biology in the soil. Using regenerative agricultural principles, Brown's Ranch has grown several inches of new topsoil in only twenty years! The 5,000-acre ranch profitably produces a wide variety of cash crops and cover crops as well as grass-finished beef and lamb, pastured laying hens, broilers, and pastured pork, all marketed directly to consumers. The key is how we think, Brown says. In the industrial agricultural model, all thoughts are focused on killing things. But that mindset was also killing diversity, soil, and profit, Brown realized. Now he channels his creative thinking toward how he can get more life on the land—more plants, animals, and beneficial insects. "The greatest roadblock to solving a problem," Brown says, "is the human mind."
