2023 hyundai santa cruz owners manual: *What We Say Matters* Ike K. Lasater, Judith Hanson Lasater, 2022-08-09 Drawing from Buddhist and yogic precepts, this practical guide offers tools for becoming a better, more compassionate communicator at home, at work, and in the world. Have you ever tried to tell someone what you want only to feel misunderstood and frustrated? Or hesitated to ask for what you needed because you didn't want to burden the other person? Or been stuck in blame or anger that wouldn't go away? Judith and Ike Lasater, long-term students of yoga and Buddhism, experienced dilemmas like these, too. Even though they had studied the yoga principle of satya (truth) and the Buddhist precept of right speech, it was not until they began practicing Marshall Rosenberg's techniques of Nonviolent Communication (NVC) that they understood how to live satya and right speech. In *What We Say Matters*, Judith and Ike describe their journey through NVC and how speech becomes a spiritual practice based on giving and receiving with compassion—everywhere, all the time—whether at home, at work, or in the world. Their writing is deeply personal, punctuated by their recounts of trial and error, success and failure, laughter and challenge—even in writing this book! They guide you through an introduction to NVC with clear explanations, poignant examples, suggested exercises, and helpful resources. With practice, you'll learn new ways to: • Extend empathy to yourself and others • Distinguish between feelings and needs • Make requests rather than demands • Choose connection over conflict • Create mutually satisfying outcomes

2023 hyundai santa cruz owners manual: Homo Deus Yuval Noah Harari, 2017-02-21 Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon Sapiens, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from bingeing at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.

2023 hyundai santa cruz owners manual: UNESCO science report UNESCO, 2015-11-09 There are fewer grounds today than in the past to deplore a North-South divide in research and innovation. This is one of the key findings of the UNESCO Science Report: towards 2030. A large number of countries are now incorporating science, technology and innovation in their national development agenda, in order to make their economies less reliant on raw materials and more rooted in knowledge. Most research and development (R&D) is taking place in high-income countries, but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report. For many lower-income countries, sustainable development has become an integral part of their national development plans for the next 10-20 years. Among higher-income countries, a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards 'green' technologies. The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries. Written by more than 50 experts who are each covering the country or region from which they hail, the UNESCO Science Report: towards 2030 provides more country-level information than ever before. The trends and developments in science, technology and innovation policy and governance between 2009 and mid-2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come.

2023 hyundai santa cruz owners manual: Maritime Networks, Port Efficiency, and Hinterland Connectivity in the Mediterranean Jean-François Arvis, Vincent Vesin, Robin Carruthers, César Ducruet, 2018-11-29 For millennia, the Mediterranean has been one of the most active trading areas, supported by a transport network connecting riparian cities and beyond to their hinterland. The Mediterranean has complex trade patterns and routes--but with key differences from the past. It is no longer an isolated world economy: it is both a trading area and a transit area linking Europe and North Africa with the rest of the world through the hub-and-spoke structure of maritime networks. Understanding how trade connectivity works in the Mediterranean, and elsewhere, is important to policy makers, especially those in developing countries in the Mediterranean, concerned with the economic benefits of large investment in infrastructure. Better connectivity is expected to increase trade with distant markets and stimulate activities in the hinterland. This book is a practical exploration of the three interdependent dimensions of trade connectivity: maritime networks, port efficiency, and hinterland connectivity. Because of the complexity and richness of maritime and trade patterns in the Mediterranean, the research book combines both a regional focus and globally scalable lessons. This book is intended for a wide readership of policy makers in maritime affairs, trade, or industry; professionals from the world of finance or development institutions; and academics. It combines empirical analysis of microeconomic shipping and port data with three case studies of choice of port (focusing on Spain, Egypt, and Morocco) and five case studies on hinterland development (Barcelona; Malta; Marseilles; Port Said East, Egypt; and Tanger Med, Morocco).

Hobbs, 2014-11-04 Los Angeles transportation's epic scale--its iconic freeways, Union Station, Los Angeles International Airport and the giant ports of its shores--has obscured many offbeat transit stories of moxie and eccentricity. Triumphs such as the Vincent Thomas Bridge and Mac Barnes's Ground Link buspool have existed alongside such flops as the Santa Monica Freeway Diamond Lane and the Oxnard-Los Angeles Caltrain commuter rail. The City of Angels lacks a propeller-driven monorail and a freeway in the paved bed of the Los Angeles River, but not for a lack of public promoters. Horace Dobbins built the elevated California Cycleway in Pasadena, and Mike Kadletz deployed the Pink Buses for Orange County kids hitchhiking to the beach. Join Charles P. Hobbs as he recalls these and other lost episodes of LA-area transportation lore.

2023 hyundai santa cruz owners manual: Clearly Indigenous Letitia Chambers, 2020-10 The expertise of Native glass artists, in combination with the stories of their cultures, has produced a remarkable new artistic genre. This flowering of glass art in Indian Country is the result of the coming together of two movements that began in the 1960s--the contemporary Native arts movement, championed by Lloyd Kiva New, and the studio glass art movement, founded by American glass artists such as Dale Chihuly, who started several early teaching programs. Taken together, these two movements created a new dimension of cultural and artistic expression. The glass art created by American Indian artists is not only a personal expression but also imbued with cultural heritage. Whether reinterpreting traditional iconography or expressing current issues, Native glass artists have created a rich body of work. These artists have melded the aesthetics and properties inherent in glass art with their respective cultural knowledge. The result is the stunning
