Updated as of May 29, 2018 This document responds to two petitions for reconsideration of a final rule amending the Federal motor vehicle safety standard for power-operated window, partition, and roof panel systems. The subject final rule, statutorily mandated and published in April 2006, established a new safety requirement for vehicle

power window switches, specifically that such switches have a pull-to-close design. That final rule set a compliance date of October 1, 2008, which was the same as the compliance date for a rule published in September 2004 that amended the standard to include a performance test to prevent inadvertent actuation of power window switches, particularly by children. Petitions for reconsideration were submitted by the Alliance of Automobile Manufacturers (Alliance) and DaimlerChrysler Corporation. The petitioners requested an extension of the compliance date by two years, as well as additional amendments to the standard. 2023 rav4 owners manual: Plug-in Hybrids Sherry Boschert, 2006 A politically polarized America is coming together over a new kind of car--the plug-in hybrid that will save drivers money, reduce pollution, and increase US security by reducing dependence on imported oil. Plug-in Hybrids points out that, where hydrogen fuel-cell cars won't be ready for decades, the technology for plug-in

hybrids exists today. Unlike conventional hybrid cars that can't run without gasoline, plug-in hybrids use gasoline or cheaper, cleaner, domestic electricity--or both. Although plug-in hybrids are not yet for sale, demand for them is widespread, coming from characters across the political spectrum, such as: * Chelsea Sexton, the automotive insider: working for General Motors, Sexton fought attempts to destroy the all-electric EV1 car and describes how car companies are resisting plug-in hybrids--and why they'll make them -anyway. * Felix Kramer and the tech squad: Kramer started a nonprofit organization using the Internet to tap into a small army of engineers who built the first plug-in Prius hybrids. * R. James Woolsey, former CIA director and national security hawk: seeing the end of oil supplies looming, Woolsey is demanding plug-in hybrids to wean us from petroleum. Cautioning that the oil and auto companies know how to undermine the success of plug-in car programs to protect their interests, the book gives readers tools to ensure that plug-in hybrids get to market--and stay here.
