21 july in history: *A Shot in the Dark: A History of the U.S. Army Asymmetric Warfare Group* Paul J. Cook, 2024-05-14 This book presents the U.S. Army Asymmetric Warfare Group (AWG) as an example of successful change by the Army in wartime. It argues that creating the AWG required senior leaders to create a vision differing from the Army's self-conceptualization, change bureaucratic processes to turn the vision into an actual unit, and then place the new unit in the hands of uniquely qualified leaders to build and sustain it. In doing this, it considers the forces influencing change within the Army and argues the two most significant are its self-conceptualization and institutional bureaucracy. The work explores three major subject areas that provide historical context. The first is the Army's institutional history from the early 1950s through 2001. This period begins with the Army seeking to validate its place in America's national security strategy and ends with the Army trying to chart a path into the post-Cold War future. The Army's history is largely one of asymmetric warfare. The work thus examines several campaigns that offered lessons for subsequent wars. Some lessons the Army took to heart, others it ignored. As the AWG was a direct outgrowth of the failures and frustrations the Army experienced in Afghanistan and Iraq, the book examines these campaigns and identifies the specific problems that led senior Army leaders to create the AWG. Finally, the work chronicles the AWG's creation in 2006, growth, and re-assignment from the Army staff to a fully-fledged organization subordinate to the U.S. Army Training and Doctrine Command in 2011 to its deactivation. This action resulted not from the unit's failure to adapt to a post-insurgency Army focusing on modernization. Rather, it resulted from the Army failing to realize that while the AWG was a product of counterinsurgency, it provided the capability to support the Army during a period of great strategic and institutional uncertainty.

21 july in history: *An Ethic of Mutual Respect* Bruce Morito, 2012-08-30 Over the course of a century, until the late 1700s, the British Crown, the Iroquois, and other Aboriginal groups of eastern North America developed an alliance and treaty system known as the Covenant Chain. Bruce Morito offers a philosophical re-reading of the historical record of negotiations, showing that the parties developed an ethic of mutually recognized respect. This ethic, Morito argues, remains relevant to current debates over Aboriginal and treaty rights, because it is neither culturally nor historically bound. Real change is possible, if efforts can be shifted from piecemeal legal and political disputes to the development of an intercultural ethic based on trust, respect, and solidarity.

21 july in history: *Trumping Truth* Salvador Jiménez Murguía, 2019-07-02 When Kellyanne Conway, counselor to President Trump, coined the phrase alternative facts in January 2017, objectivity in public discourse--the long-held belief in a more or less agreed-upon set of verifiable

truths--went into a tailspin. The use of alternative facts and narratives quickly became the go-to rhetorical strategy, especially among Trump's administration and base. Rebuttals based on fact-checking and hard data were demoted to mere choices in a media bazaar where consumers are free to source their own versions of reality. This volume explores the social and political disruption accompanying the loss of faith in objectivity, along with reflections on the disregard for truth and honesty, both within the Trump Administration and in contemporary popular culture.

21 july in history: *Clear, Hold, and Destroy* Robert J. Thompson, 2021-05-06 By the end of the American War in Vietnam, the coastal province of Phú Yên was one of the least-secure provinces in the Republic of Vietnam. It was also a prominent target of the American strategy of pacification—an effort, purportedly separate and distinct from conventional warfare, to win the “hearts and minds” of the Vietnamese. In Robert J. Thompson III’s analysis, the consistent, and consistently unsuccessful, struggle to place Phú Yên under Saigon’s banner makes the province particularly fertile ground for studying how the Americans advanced pacification and why this effort ultimately failed. In March 1970 a disastrous military engagement began in Phú Yên, revealing the enemy’s continued presence after more than three years of pacification. *Clear, Hold, and Destroy* provides a fresh perspective on the war across multiple levels, from those making and implementing policy to those affected by it. Most pointedly, Thompson contends that pacification, far from existing apart from conventional warfare, actually depended on conventional military forces for its application. His study reaches back into Phú Yên’s storied history with pacification before and during the French colonial period, then focuses on the province from the onset of the American war in 1965 to its conclusion in 1975. A sharply focused, fine-grained analysis of one critical province during the Vietnam War, Thompson’s work demonstrates how pacification is better understood as the foundation of U.S. fighting in Vietnam.

21 july in history: *The Battle of Carthage, Missouri* Kenneth E. Burchett, 2012-12-13 The Battle of Carthage, Missouri, was the first full-scale land battle of the Civil War. Governor Claiborne Jackson's rebel Missouri State Guard made its way toward southwest Missouri near where Confederate volunteers collected in Arkansas, while Colonel Franz Sigel's Union force occupied Springfield with orders to intercept and block the rebels from reaching the Confederates. The two armies collided near Carthage on July 5, 1861. The battle lasted for ten hours, spread over several miles, and included six separate engagements before the Union army withdrew under the cover of darkness. The New York Times called it the first serious conflict between the United States troops and the rebels. This book describes the events leading up to the battle, the battle itself, and the aftermath.

21 july in history: *The Big Red One* James Scott Wheeler, 2017-06-16 “No mission too difficult, no sacrifice too great—Duty First!” For a century, from the Western Front of World War I to the wars of the 21st century, this motto has spurred the soldiers who wear the shoulder patch bearing the Big Red One. In this comprehensive history of America’s 1st Infantry Division, James Scott Wheeler chronicles its major combat engagements and peacetime duties during its legendary service to the nation. The Centennial Edition adds new chapters on peacekeeping missions in the Balkans (1995 - 2004) and the wars in Iraq and Afghanistan (2001 - 2017), along with a new introduction and conclusion. The oldest continuously serving division in the U.S. Army, the “Fighting First” has consistently played a crucial role in America’s foreign wars. It was the first American division to see combat and achieve victory in World War I. One of the few intact divisions between the wars, it was the first army unit to train for amphibious warfare. During World War II, the First Division spearheaded the invasions of North Africa and Sicily before leading the Normandy invasion at Omaha Beach and fighting on deep into Germany. By war’s end, it had developed successful combined-arms, regimental combat teams and made advances in night operations. Wheeler describes the First Division’s critical role in postwar Germany and as the only combat division in Europe during the early Cold War. The division fought valiantly in Vietnam for five trying years while pioneering “air-mobile” operations. It led the liberation of Kuwait in Desert Storm. Along the way,

Wheeler illuminates the division's organizational evolution, its consistently remarkable commanders and leaders, and its equally remarkable soldiers. Meticulously detailed and engagingly written, *The Big Red One* nimbly combines historical narrative with astute analysis of the unit's successes and failures, so that its story reflects the larger chronicle of America's military experience over the past century. Published in collaboration with the Cantigny First Division Foundation and the Cantigny Military History Series, edited by Paul H. Herbert.

21 july in history: Car Tourism Waldemar Cudny, 2017-07-05 This book examines the role of cars and the space connected with their production and presentation in tourism development. It describes the role played by experiences and experience societies formed in the 20th c. in the development of contemporary tourism, including tourism related to cars. The book explores the influence of experiencing unusual events, such as car races, car fairs, visits to car industry museums or multifunctional spaces connected with producing and exhibiting cars (e.g. Autostadt or Audi Forum) on the development of a new type of tourism, i.e. car tourism. This kind of tourism is novel in two ways: firstly, it is a new phenomenon in science, as so far it has not been thoroughly studied or described, apart from various short articles. Secondly, this type of tourism has developed on a large scale only in recent years, mainly due to the huge investments made by powerful European car manufacturers (e.g. Autostadt, Audi Forums, Porsche Museum, Lamborghini Museum etc.). The book presents cars and the spaces related to them as tourist assets (sites, events) and as tourist products that satisfy tourists' needs. Moreover, it connects the issue of car tourism to the marketing strategies of large car manufacturers and discusses the theory of tourism space, highlighting the main tourism spaces in which car tourism develops. It presents multifunctional spaces (factories, adventure centres – Autostadt in Wolfsburg), museums, car exhibitions, and race tracks. In the next chapter, following an introduction to the problem of events, the author describes events related to car tourism, including races, rallies, driving schools and car fairs. The book ends with a summarizing chapter, which includes a model of the function of car tourism as a separate type of tourism, as well as a discussion presenting the main features, advantages and disadvantages of car tourism in the context of the tourism space theory.

21 july in history: **Striking a Light** Louise Raw, 2011-03-10 In July 1888, fourteen hundred women and girls employed by the matchmakers Bryant and May walked out of their East End factory and into the history books. Louise Raw gives us a challenging new interpretation of events proving that the women themselves, not celebrity socialists like Annie Besant, began it. She provides unequivocal evidence to show that the matchwomen greatly influenced the Dock Strike of 1889, which until now was thought to be the key event of new unionism, and repositions them as the mothers of the modern labour movement. Returning to the stories of the women themselves, and by interviewing their relatives today, Raw is able to construct a new history which challenges existing accounts of the strike itself and radically alters the accepted history of the labour movement in Britain.

21 july in history: *Dryden's Second Hundred Years: a Central New York Town in the 20Th Century* Elizabeth Denver Gutchess, 2020-11-18 Dryden's Second Hundred Years (Part II) does two exceptional things. First, its tight focus on local participation in World War II paradoxically chronicles the entire war, a conflict which drew its combatants from small rural townships like Dryden NY, assigned and scattered them throughout the world, and then delivered the survivors back home again, creating in every small American community a microcosm of the entire conflict, an eye-witnessing of the whole story. Second, that story is told here largely in local participants' own words, in letters from camps, troopships, carriers, cruisers, foxholes, and hospitals, their voices a quiet backdrop to the horrific war they had been asked to fight. The resulting narrative suggests that those who don't know history - while not always doomed to repeat it - are very likely doomed to live their lives without perspective, to mistake inconvenience for hardship, and hardship for catastrophe, and to be blind to the miracle of everyday normal life.

21 july in history: Circulation of Power Michael M. Widdersheim, 2023-05-22 What is the public sphere, how is it best described, and what role does it play in modern life? These questions have attracted considerable attention within library and information science circles over several decades, especially regarding public libraries. *Circulation of Power* contributes to this discussion by proposing a new research framework and new methods for analyzing public sphere communication. Using extensive data gathered from an urban public library infrastructure, this historical case study demonstrates how public sphere communication shaped the infrastructure's development over time, producing both changes and continuities across the case's nine periods. Two new conceptual tools—circuits and decisions cycles—form the study's research framework, and a new explanatory theory—RLCr, or Releaser, theory—accounts for why the infrastructure developed as it did. Consideration of competing theories reveals that public sphere communication remains the best explanation for infrastructural development. This book's meticulous historical narrative of the greater Pittsburgh case, supplemented by its groundbreaking theory and innovative mixed methods design, is of interest to practitioners, academics, and general readers alike.

21 july in history: Black 1919 Jacqueline Jenkinson, 2009-05-01 The riots that broke out in various British port cities in 1919 were a dramatic manifestation of a wave of global unrest that affected Britain, parts of its empire, continental Europe and North America during and in the wake of the First World War. During the riots, crowds of white working-class people targeted black workers, their families and black-owned businesses and property. One of the chief sources of violent confrontation in the run-down port areas was the 'colour' bar implemented by the sailors' trades unions campaigning to keep black, Arab and Asian sailors off British ships in a time of increasing job competition. *Black 1919* sets out the economic and social causes of the riots and their impact on Britain's relationship with its empire and its colonial subjects. The riots are also considered within the wider context of rioting elsewhere on the fringes of the Atlantic world as black people came in increased numbers into urban and metropolitan settings where they competed with working-class white people for jobs and housing during and after the First World War. The book details the events of the port riots in Britain, with chapters devoted to assessing the motivations and make-up of the rioting crowds, examining police procedures during the riots, considering the court cases that followed, and looking at the longer-term consequences for the black British workers and their families. *Black 1919* is a stark and timely reminder of the violent racist conflict that emerged after the First World War and the shockwaves that reverberated around the Empire.

21 july in history: Restaging the Past Angela Bartie, Linda Fleming, Mark Freeman, Alexander Hutton, Paul Readman, 2020-08-17 *Restaging the Past* is the first edited collection devoted to the study of historical pageants in Britain, ranging from their Edwardian origins to the present day. Across Britain in the twentieth century, people succumbed to 'pageant fever'. Thousands dressed up in historical costumes and performed scenes from the history of the places where they lived, and hundreds of thousands more watched them. These pageants were one of the most significant aspects of popular engagement with the past between the 1900s and the 1970s: they took place in large cities, small towns and tiny villages, and engaged a whole range of different organised groups, including Women's Institutes, political parties, schools, churches and youth organisations. Pageants were community events, bringing large numbers of people together in a shared celebration and performance of the past; they also involved many prominent novelists, professional historians and other writers, as well as featuring repeatedly in popular and highbrow literature. Although the pageant tradition has largely died out, it deserves to be acknowledged as a key aspect of community history during a period of great social and political change. Indeed, as this book shows, some traces of 'pageant fever' remain in evidence today.
