24 June in history: The Complete History of the Black Death Ole Jørgen Benedictow, 2021

Completely revised and updated for this new edition, Benedictow's acclaimed study remains the definitive account of the Black Death and its impact on history. The first edition of *The Black Death* collected and analysed the many local studies on the disease published in a variety of languages and examined a range of scholarly papers. The medical and epidemiological characteristics of the disease, its geographical origin, its spread across Asia Minor, the Middle East, North Africa and Europe, and the mortality in the countries and regions for which there are satisfactory studies, are clearly presented and thoroughly discussed. The pattern, pace and seasonality of spread revealed through close scrutiny of these studies exactly reflect current medical work and standard studies on the epidemiology of bubonic plague. Benedictow's findings made it clear that the true mortality rate was far higher than had been previously thought. In the light of those findings, the discussion in the last part of the book showing the Black Death as a turning point in history takes on a new significance. OLE J. BENEDICTOW is Professor of History at the University of Oslo.

24 june in history: Exploring Cultural History Melissa Calaresu, Joan-Pau Rubies, Filippo de Vivo, 2016-12-05 Over the past 30 years, cultural history has moved from the periphery to the centre of historical studies, profoundly influencing the way we look at and analyze all aspects of the past. In this volume, a distinguished group of international historians has come together to consider the rise of cultural history in general, and to highlight the particular role played in this rise by Peter Burke, the first professor of Cultural History at the University of Cambridge and one of the most prolific and influential authors in the field. Reflecting the many and varied interests of Peter Burke, the essays in this volume cover a broad range of topics, geographies and chronologies. Grouped into four sections, 'Historical Anthropology', 'Politics and Communication', 'Images' and 'Cultural Encounters', the collection explores the boundaries and possibilities of cultural history; each essay presenting an opportunity to engage with the wider issues of the methods and problems of cultural history, and with Peter Burke's contributions to each chosen theme. Taken as a whole the collection shows how cultural history has enriched the ways in which we understand the traditional fields of political, economic, literary and military history, and permeates much of what we now understand as social history. It also demonstrates how cultural history is now at the heart of the coming together of traditional disciplines, providing a meeting ground for a variety of interests and methodologies. Offering a wide international perspective, this volume complements another Ashgate publication, *Popular Culture in Early Modern England*, which focuses on Peter Burke's influence on the study of popular culture in English history.

Some of its articles were written by the best-known scholars of the time and it is considered to be a landmark encyclopaedia for scholarship and literary style.

24 june in history: *Historical Perspectives on Social Identities* Alyson Brown, 2009-01-14 This collection of work on the theme of identities was the result of a conference held in the spring of 2005 at Edge Hill under the auspices of The Centre for Liverpool and Merseyside Studies. Whilst a significant proportion of the research focused on Liverpool and the North West, the theme of identities was sufficiently broad to entice scholars from diverse and varied fields. This collection, therefore, reflects the range of work presented and discussed at the conference and the multi-layered and multi-faceted nature of identity. Contributors to this edited collection examined the concept of identity in Britain through a range of historical perspectives, concerning themselves primarily with the later modern period. They reflect the extent to which nineteenth and twentieth century British social, cultural and political change has given rise to pluralist, fragmented and fractured identities and highlight the extent to which class, gender, religious and institutional frameworks have shifted continually. This publication will therefore be of interest to those working in diverse fields but who share an interest in the importance of identity as a decisive cultural, social, economic and political determinant. Questions of identity have centred a good deal of debate in the social sciences, especially since the reception of Foucault's work in the English-speaking world in the last couple of decades. This has often taken a theoretical form. Attempts to link theory with analytical practice have been strongest in the field that might be characterised as the 'politics of identity'. At any rate this has provided an important instance of theoretical and practical conflict. Herethe focus of the debate has been around questions of gender, nation, language, economy, security and race. It has tried toto clarify crucial divisions in the analysis of identity as between explanatory and constitutive models, and between positivist and post-positivist procedures. For the most part these intense and extensive concerns have passed by largely unnoticed among historians practising in Britain in the well-found but conventional idioms of political and social history. What this conference volume seeks to do is to help redress thedeficit, to domesticate some of the theoretical and polemical exchanges around 'identity' into a world of practical,yet conceptually aware historical work. This is a difficult but surely worthwhile task: to broach various imaginaries of identity, issues of identitarian politics, and questions of identity formation on a series of relatively familiar historical contexts. Of course, no selection of subjects for practical research in this way can

be exhaustive. The group of essays offered here is sufficiently wide, and occasionally gratifyingly unexpected, at least to begin the job, to stimulate others and, most importantly, to interject theoretical concern into historical fields sometimes lacking it. Ten essays are included, together with the editor's introduction. The pieces are bound together by a common strategy not a shared empirical territory. They range from studies of gendered identity formation, to regional identities formed around seaside resorts, to empirical questions of class and capitalism and their identitarian politics, to historical analysis of mourning, and on to language, nationality, deafness, motherhood and their inflection in identity in past time. This well-edited combination of shared conceptual purpose and variety of empirical form seems to me to work well. The book will be widely used in a variety of historical fields, not least in those which have been the most resistant to recent theoretical innovations in the social sciences. Keith Nield Editor SOCIAL HISTORY 'This is a fascinating and wide-ranging collection of essays linked by the over-riding theme of identity. While primarily historical in their focus, the essays will be of interest to more than just historians. They raise a variety of interesting conceptual and theoretical issues, from, for instance, the significance of the staymaker in the formation of eighteenth-century female identity, to the relationship between regional identity and late-nineteenth and early twentieth century Lancashire seaside resorts.' Sam Davies, Professor of History, School of Social Science, Liverpool John Moores University

24 june in history: A History of the Internet and the Digital Future Johnny Ryan, 2010-09-15 A History of the Internet and the Digital Future tells the story of the development of the Internet from the 1950s to the present and examines how the balance of power has shifted between the individual and the state in the areas of censorship, copyright infringement, intellectual freedom, and terrorism and warfare. Johnny Ryan explains how the Internet has revolutionized political campaigns; how the development of the World Wide Web enfranchised a new online population of assertive, niche consumers; and how the dot-com bust taught smarter firms to capitalize on the power of digital artisans. From the government-controlled systems of the Cold War to today's move towards cloud computing, user-driven content, and the new global commons, this book reveals the trends that are shaping the businesses, politics, and media of the digital future.

24 june in history: Interpreting Historical Keyboard Music Andrew Woolley, John Kitchen, 2016-05-23 Research in the field of keyboard studies, especially when intimately connected with issues of performance, is often concerned with the immediate working environments and practices of musicians of the past. An important pedagogical tool, the keyboard has served as the 'workbench' of countless musicians over the centuries. In the process it has shaped the ways in which many historical musicians achieved their aspirations and went about meeting creative challenges. In recent decades interest has turned towards a contextualized understanding of creative processes in music, and keyboard studies appears well placed to contribute to the exploration of this wider concern. The nineteen essays collected here encompass the range of research in the field, bringing together contributions from performers, organologists and music historians. Questions relevant to issues of creative practice in various historical contexts, and of interpretative issues faced today, form a guiding thread. Its scope is wide-ranging, with contributions covering the mid-sixteenth to early twentieth century. It is also inclusive, encompassing the diverse range of approaches to the

field of contemporary keyboard studies. Collectively the essays form a survey of the ways in which the study of keyboard performance can enrich our understanding of musical life in a given period.

24 june in history: John Hume in America Maurice Fitzpatrick, 2017-11-08 John Hume, Ireland's greatest peace-maker, is widely recognised as the architect of the Northern Ireland peace process. In *John Hume in America*, Maurice Fitzpatrick explores how Hume created this framework for peace through the cultivation of an unprecedented and bountiful relationship with the White House and the US Congress. John Hume's political vision and innate sense of diplomacy persuaded key players in US politics to merge their concerns with his own. Ted Kennedy, Tip O'Neill, Daniel Patrick Moynihan and Hugh Carey – together known as the 'Four Horsemen' – were won over to his cause, lending the campaign for equality in Northern Ireland worldwide credibility and putting considerable pressure on the British and Irish governments to strive for peace. Through his work with the 'Four Horsemen', Hume engaged every American president from Jimmy Carter to Bill Clinton. *John Hume in America*, a towering achievement, supported by the Hume family, explores the intricate negotiations that made this possible and highlights Hume's paramount role in leveraging Irish-America. Maurice Fitzpatrick's seminal work is the missing piece in the jigsaw of Hume's political life, tracing his philosophy of non-violence during the Civil Rights Movement through to his indispensable work with friends in the US towards the creation of a new political framework in Northern Ireland.

24 june in history: Emerging China Sudhir T. Devare, Swaran Singh, Reena Marwah, 2014-03-21 This volume seeks to examine the evolving contours of Asian multilateralism through emerging China and how it is likely to impact on the growth trajectories of Asian countries. From this perspective, it explores the prospects for 'partnership' in Asia, especially in terms of China's engagement with its principal Asian neighbours, especially India. A substantial part of the volume is devoted to debating China-India relations, highlighting their mutual stakes through their economic and security cooperation as well as their engagement with other countries and regional forums. The book furthers the understanding of the rise of China from an Indian perspective while simultaneously locating China's rise in the economic dynamics of an emerging Asia. The volume offers illuminating viewpoints, analyses and insights from multiple perspectives, mixed with academic rigour and up-to-date information. It will be of interest to those engaged in economics, politics, trade relations, Indo-China relations, foreign policy, area studies, public policy, and strategic studies.

These remarkably versatile vessels--called CVEs, baby flattops, and even jeeps--hunted submarines, escorted convoys, provided air support, and performed dozens of other tasks that are vividly described in this book. Based on interviews with the CVE crewmen and on war diaries, ship histories, and other documents, it tells a moving story of escort carrier operations, from the work of the first CVEs to their final assignment transporting GIs home after the war. Seldom-seen photographs add to this fascinating portrait of the little giants.

These aforementioned exploits are among the notable events contained in *Nine from Aberdeen*, the first academic history solely devoted to the US Army's Ordnance Bomb Disposal Branch from World War II. Shortly after Pearl Harbor, nine US Army officers and sergeants were sent from Aberdeen Proving Ground to war-torn England in order to learn the invaluable technical skills pioneered by the British Royal Engineers. Led by the colorful Thomas J. Kane, these nine men inaugurated the new Ordnance Bomb Disposal School. Conceived initially for homeland defense, Col. Kane's branch eventually fielded over two hundred Army and Air Force bomb squads for overseas service. These courageous officers and men were forerunners of today's Explosive Ordnance Disposal (EOD) specialists, responsible for supporting the US military during combat operations and for preserving the lives of noncombatants at all other times. Using documents and photographs - many from personal collections - as well as oral interviews, this work presents a cross-section of US Army and Air Force operations spanning three major theaters: Mediterranean, European, and the Pacific. Special emphasis is given to the European Theater, where Col. Kane served as Gen. Eisenhower's chief ETO bomb disposal officer. *Nine from Aberdeen* also contains charts detailing campaign participations, ordnance statistics, and other significant data. Command Sergeant Major James H. Clifford (Retired), military consultant for the award-winning film, *The Hurt Locker*, provides an afterword on the continuity of modern EOD.

Treese, 2018-05-17 This book discusses how and why historical measurement units developed, and reviews useful methods for making conversions as well as situations in which dimensional analysis can be used. It starts from the history of length measurement, which is one of the oldest measures used by humans. It highlights the importance of area measurement, briefly discussing the methods for determining areas mathematically and by measurement. The book continues on to detail the development of measures for volume, mass, weight, time, temperature, angle, electrical units, amounts of substances, and light intensity. The seven SI/metric base units are highlighted, as well as a number of other units that have historically been used as base units. Providing a comprehensive reference for interconversion among the commonly measured quantities in the different measurement systems with engineering accuracy, it also examines the relationships among base units in fields such as mechanical/thermal, electromagnetic and physical flow rates and fluxes using diagrams.

24 june in history: Madison: 1856-1931 Stuart D. Levitan, 2006 We are just beginning to understand the power of local history to enhance our understanding of ourselves, our cities, and our culture. It is, after all, that stratum of history that touches our lives most closely. Madison answers the basic questions of when, where, why, how, and by whom Madison, Wisconsin was developed. The book is richly detailed, fully documented, inclusive in coverage, and delightfully readable. More than 300 illustrations provide a vivid feeling for what life was like in Madison during the formative years. David Mollenhoff's unique interpretive framework emphasizing public policies and community values, gives the book a consistent interpretive quality and reveals major themes that flow through time. This combination will allow you to see the city's growth and development with unusual clarity and coherence--almost as if you were watching time-lapse photography. When Mollenhoff began to study Madison's history, he was delighted by his early discoveries but frustrated because no one had written a book-length history of Madison since 1876. Finally, in 1972 he decided to write that book. His research required him to read five miles of microfilm, piles of theses and dissertations, shelves of reports, boxes of manuscripts and letters, and to study thousands of photographs. Soon after the first edition was published in 1982, readers declared it to be a classic. For this second edition Madison has been extensively revised and updated with new maps and photos. If you want to know the fascinating story of how Madison got to be the way it is, this book belongs on your bookshelf. It will change the way you see the city and your role in it.

24 june in history: The First American Frontier Wilma A. Dunaway, 2000-11-09 In *The First American Frontier*, Wilma Dunaway challenges many assumptions about the development of preindustrial Southern Appalachia's society and economy. Drawing on data from 215 counties in nine states from 1700 to 1860, she argues that capitalist exchange and production came to the region much earlier than has been previously thought. Her innovative book is the first regional history of antebellum Southern Appalachia and the first study to apply world-systems theory to the development of the American frontier. Dunaway demonstrates that Europeans established significant trade relations with Native Americans in the southern mountains and thereby incorporated the region into the world economy as early as the seventeenth century. In addition to the much-studied fur trade, she explores various other forces of change, including government policy, absentee speculation in the region's natural resources, the emergence of towns, and the influence of local elites. Contrary to the myth of a homogeneous society composed mainly of subsistence homesteaders, Dunaway finds that many Appalachian landowners generated market surpluses by exploiting a large landless labor force, including slaves. In delineating these complexities of economy and labor in the region, Dunaway provides a perceptive critique of Appalachian exceptionalism and development.
