24 may in history: The Fourth Industrial Revolution Klaus Schwab, 2017-01-03

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Its distinctive culture stands as a pinnacle of the Deep South with a football team that has won more than 15 national championships, tasty local specialties like pulled pork and fried dill pickles, and a southern drawl that’s sweet as Sorghum molasses. But there’s more to Alabama than what meets the eye. Before Alabama became one of the shining stars on the American flag, its history had already begun. Alabama 200 years ago was a very different place. Before Alabama was even a speck in the eyes of white settlers, native populations thrived upon its rich red soil. But when Europeans landed in the New World, everything changed and the gears of modern history began to turn. While Alabama seems to be a place to sleepily lounge in the sun and watch the world rush by, its own history was anything but lethargic. Once the ball toward statehood began rolling in Alabama, little could stop it. Alabama seemingly had a hand in every major event in U.S. history, from the Revolutionary War to the Civil Rights movement to current events with history in the making, and everything in between. In “Events That Changed the Course of History: The Story of Alabama Becoming a State 200 Years Later”, you’ll learn how this underdog of a state that is often written off has a unique and ever-changing history that will surely leave you wanting to visit and see the history for yourself.

24 may in history: We Are Fighting the World Gary Kynoch, 2005-01-01 Since the late 1940s, a violent African criminal society known as the Marashea has operated in and around South Africa’s gold mining areas. With thousands of members involved in drug smuggling, extortion, and kidnapping, the Marashea was more influential in the day-to-day lives of many black South Africans under apartheid than were agents of the state. These gangs remain active in South Africa. In *We Are Fighting the World: A History of the Marashea Gangs in South Africa, 1947-1999*, Gary Kynoch points to the combination of coercive force and administrative weakness that characterized the apartheid state. As long as crime and violence were contained within black townships and did not

threaten adjacent white areas, township residents were largely left to fend for themselves. The Marashea's ability to prosper during the apartheid era and its involvement in political conflict led directly to the violent crime epidemic that today plagues South Africa. Highly readable and solidly researched, *We Are Fighting the World* is critical to an understanding of South African society, past and present. This pioneering study challenges previous social history research on resistance, ethnicity, urban spaces, and gender in South Africa. Kynoch's interviews with many current and former gang members give *We Are Fighting the World* an energy and a realism that are unparalleled in any other published work on gang violence in southern Africa.

24 may in history: Threshold of War : Franklin D. Roosevelt and American Entry into World War II Waldo Heinrichs Professor of History Temple University, 1988-09-01 For Franklin D. Roosevelt, the spring of 1941 was a time of uncertainty and fear. Hitler's armies were poised to strike, but no one was sure where the next attack would come. The United States had begun its military build-up, but as yet the Army and Navy were ill-prepared for war with Germany and Japan. And though the American public was not ready to support an unprovoked declaration of war, Churchill and members of Roosevelt's administration were urging him to intervene before it was too late. ___ In *Threshold of War*, the first comprehensive treatment of the American entry into World War II to appear in over thirty-five years, eminent historian Waldo Heinrichs places American policy in a global context, covering both the European and Asian diplomatic and military scene, with Roosevelt (the only figure with all the threads in his hands) at the center. In a tale of ever-broadening conflict, this vivid narrative weaves back and forth from the battlefields in the Soviet Union, to the intense policy debates within Roosevelt's administration, to the sinking of the

battleship Bismarck, to the precarious and delicate negotiations with Japan. Of particular interest is Heinrichs' portrait of Roosevelt. Roosevelt has often been portrayed as vacillating, impulsive, and disorganized in his decision-making during this period. But here he emerges as a leader who acted with extreme caution and deliberation, who always kept his options open, and who, once Hitler's invasion of the Soviet Union stalled in July, 1941, acted rapidly and with great determination, sending supplies to Stalin, placing an oil embargo on Japan, and ordering armed escorts of vital supplies to Europe. ___ A masterful account of a key moment in American history, *Threshold of War* is both a distinguished work of scholarship and a moving narrative that captures the tension as Roosevelt, Churchill, Stimson, Hull, and numerous others struggled to shape American policy in the climactic nine months before Pearl Harbor.

24 may in history: Music in The Girl's Own Paper: An Annotated Catalogue, 1880-1910 Judith Barger, 2016-09-13 Nineteenth-century British periodicals for girls and women offer a wealth of material to understand how girls and women fit into their social and cultural worlds, of which music making was an important part. The Girl's Own Paper, first published in 1880, stands out because of its rich musical content. Keeping practical usefulness as a research tool and as a guide to further reading in mind, Judith Barger has catalogued the musical content found in the weekly and later monthly issues during the magazine's first thirty years, in music scores, instalments of serialized fiction about musicians, music-related nonfiction, poetry with a musical title or theme, illustrations depicting music making and replies to musical correspondents. The book's introductory chapter reveals how content in The Girl's Own Paper changed over time to reflect a shift in women's music making from a female accomplishment to an increasingly professional role within the discipline, using 'the piano girl' as a case study. A comparison with musical content found in The Boy's Own Paper over the same time span offers additional insight into musical content chosen for the girls' magazine. A user's guide precedes the chronological annotated catalogue; the indexes that follow reveal the magazine's diversity of approach to the subject of music.

24 may in history: *Social Transformations in India, Myanmar, and Thailand: Volume II* Chosein Yamahata, 2022-03-02 This book explores the multifaceted obstacles to social change that India, Myanmar and Thailand face, and ways to overcome them. With a collection of essays that identify common challenges and salient features affecting diverse communities, this volume examines topics from subnational and local perspectives across the peripheries. The book argues that identity-based divisions have created a system of oppression and political contention that have led to conflicts of

different kinds, and hence serving as the common cause of different social issues. At the same time, such issues have created space for marginalized groups around the world to call for change. The volume recognizes that social transformation comes into being through an active process of deconstructing and reconstructing shared norms and ideas. The contents in this book are thus centered around two focuses: the impacts of identities and grassroots. Both of these aspects are at the heart of each country's transformations towards democracy, peace, justice, and freedom. Under this framework, the chapters cover a diverse range of common issues, such as, minority grievances, gender inequality, ethnic identity, grassroots power in alliance-making towards community peace, recovery and resilience, digital freedom, democracy assistance and communication, and bridging multiple divides. As identity-based cleavages are daily lived experiences for individuals and communities, it requires grassroots initiatives and alliances as well as democratic communication to tackle obstacles at the root. Ultimately, the book convinces readers that social transformations must begin at the individual to communal level and local to national level.

24 may in history: *Making Minorities History* Matthew James Frank, 2017 *Making Minorities History* examines the various attempts made by European states over the course of the first half of the twentieth century, under the umbrella of international law and in the name of international peace and reconciliation, to rid the Continent of its ethnographic misfits and problem populations. It is principally a study of the concept of 'population transfer' - the idea that, in order to construct stable and homogeneous nation-states and a peaceful international order out of them, national minorities could be relocated en masse in an orderly way with minimal economic and political disruption as long as there was sufficient planning, bureaucratic oversight, and international support in place. Tracing the rise and fall of the concept from its emergence in the late 1890s through its 1940s zenith, and its geopolitical and historiographical afterlife during the Cold War, *Making Minorities History* explores the historical context and intellectual milieu in which population transfer developed from being initially regarded as a marginal idea propagated by a handful of political fantasists and extreme nationalists into an acceptable and a 'progressive' instrument of state policy, as amenable to bourgeois democracies and Nobel Peace Prize winners as it was to authoritarian regimes and fascist dictators. In addition to examining the planning and implementation of population transfers, and in particular the diplomatic negotiations surrounding them, *Making Minorities History* looks at a selection of different proposals for the resettlement of minorities that came from individuals, organizations, and states during this era of population transfer.

24 may in history: *Women and Gender in International History* Karen Garner, 2018-06-28 Most governments and global political organizations have been dominated by male leaders and structures that institutionalize male privilege. As *Women and Gender in International History* reveals, however, women have participated in and influenced the traditional concerns of international history even as they have expanded those concerns in new directions. Karen Garner provides a timely synthesis of key scholarship and establishes the influential roles that women and gender power relations have wielded in determining the course of international history. From the early-20th century onward, women have participated in state-to-state relations and decisions about when to pursue diplomacy or when to go to war to settle international conflicts. Particular women, as well as masculine and feminine gender role constructs, have also influenced the establishment and evolution of intergovernmental organizations and their political, social and economic policy making regimes and agencies. Additionally, feminists have critiqued male-dominated diplomatic establishment and intergovernmental organizations and have proposed alternative theories and practices. This text integrates women, and gender and feminist analyses, into the study of international history in order to produce a broader understanding of processes of international change during the 20th and 21st centuries.

24 may in history: Leadership and Responsibility in the Second World War Robert Vogel, 2004 Leadership is crucial in every conflict and the willingness to accept responsibility is a vital

dimension of leadership. *Leadership and Responsibility in the Second World War* examines of how well political, diplomatic, and military leaders, particularly in Great Britain, handled the daunting challenge of a worldwide conflagration. It seeks to determine if a connection can be delineated between leadership, responsibility, success, and failure -specifically if any connection can be found between reluctance to shoulder responsibility and failure to produce results. In so doing, the authors challenge widely accepted views on major wartime controversies, such as the role of Neville Chamberlain and his Conservative Party at the outbreak of the war, the reasons why the British failed to reach an alliance with the Soviet Union in 1939, and the motives that drove Claus von Stauffenberg to attempt to assassinate Adolf Hitler. *Leadership and Responsibility in the Second World War* provokes reflection about questions of character, context, and circumstances in wartime leadership.

24 may in history: Churchill's Third World War Jonathan Walker, 2017-05-04 As the war in Europe entered its final months, the world teetered on the edge of a Third World War. While Soviet forces hammered their way into Berlin, Churchill ordered British military planners to prepare the top secret Operation Unthinkable - the plan for an Allied attack on the Soviet Union - on 1 July 1945. Using US, British and Polish forces, the invasion would reclaim Eastern Europe. The controversial plan called for the use of Nazi troops, and there was the spectre of the atomic bomb. Would yet another army make the fatal mistake of heading East? In *Churchill's Third World War* Jonathan Walker presents a haunting study of the war that so nearly was. He outlines the motivations behind Churchill's plan, the logistics of launching a vast assault against an enemy who had bested Hitler, potential sabotage by Polish communists, and he speculates whether the Allies would have succeeded had the operation gone forward. Well supported by a wide range of primary sources from the Churchill Archives Centre, Sikorski Institute, National Archives and Imperial War Museum, this is a fascinating insight into the upheaval as the Second World War drew to a close and former alliances were shattered. Operation Unthinkable became the blueprint for the Cold War.
