25 march in history: Together We March Leah Henderson, 2021-01-19 March through history and discover twenty-five groundbreaking protest movements that have shaped the way we fight for equality and justice today in this stunningly illustrated and sweeping book! For generations, marches have been an invaluable tool for bringing about social change. People have used their voices, the words on their signs, and the strength in their numbers to combat inequality, oppression, and discrimination. They march to call attention to these wrongs and demand change and action, from a local to a global scale. Whether demanding protective laws or advocating for equal access to things like voting rights, public spaces, and jobs, the twenty-five marches in this book show us that even when a fight seems impossible, marching can be the push needed to tip the scales and create a movement. This gorgeous collection celebrates this rich and diverse history, the often-overlooked stories, and the courageous people who continue to teach us the importance of coming together to march today.

Tolkien's Middle-Earth and back again with this new companion journal and devotional by Tea with Tolkien. Chapter by chapter, grow in Hobbit-ness and Holiness as you reflect on major themes, quotes, and characters from *The Lord of the Rings*. This workbook journal explores Tolkien's Catholic faith and the influence it had on his writings, inspiring you to reflection and action as we seek to carry the spirit of Middle-Earth into our own daily lives through journaling prompts, discussion topics, and tangible action items. Journey alongside Frodo, Samwise, and the other members of the Fellowship of the Ring as they each play their parts in the War of the Ring; and as they come to the final chapters of their tale, you may find yourself altogether changed as well. For each chapter of *The Lord of the Rings*, this workbook includes: a chapter summary; space for note-taking; a short reflection on a theme, quote, or character; and discussion and/or reflection prompts. This workbook also features several On the Road bonus sections concerning certain characters and events, such as Tom Bombadil and the Gifts of Galadriel, where we can take the time to dig deeper into Tolkien's legendarium.

25 march in history: *A Shot in the Dark: A History of the U.S. Army Asymmetric Warfare Group* Paul J. Cook, 2024-05-14 This book presents the U.S. Army Asymmetric Warfare Group (AWG) as an example of successful change by the Army in wartime. It argues that creating the AWG required senior leaders to create a vision differing from the Army's self-conceptualization, change bureaucratic processes to turn the vision into an actual unit, and then place the new unit in the

hands of uniquely qualified leaders to build and sustain it. In doing this, it considers the forces influencing change within the Army and argues the two most significant are its self-conceptualization and institutional bureaucracy. The work explores three major subject areas that provide historical context. The first is the Army's institutional history from the early 1950s through 2001. This period begins with the Army seeking to validate its place in America's national security strategy and ends with the Army trying to chart a path into the post-Cold War future. The Army's history is largely one of asymmetric warfare. The work thus examines several campaigns that offered lessons for subsequent wars. Some lessons the Army took to heart, others it ignored. As the AWG was a direct outgrowth of the failures and frustrations the Army experienced in Afghanistan and Iraq, the book examines these campaigns and identifies the specific problems that led senior Army leaders to create the AWG. Finally, the work chronicles the AWG's creation in 2006, growth, and re-assignment from the Army staff to a fully-fledged organization subordinate to the U.S. Army Training and Doctrine Command in 2011 to its deactivation. This action resulted not from the unit's failure to adapt to a post-insurgency Army focusing on modernization. Rather, it resulted from the Army failing to realize that while the AWG was a product of counterinsurgency, it provided the capability to support the Army during a period of great strategic and institutional uncertainty.

25 march in history: The Federalist Papers Alexander Hamilton, John Jay, James Madison, 2018-08-20 Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

25 march in history: The Vedic Core of Human History M. K. Agarwal, 2013-12-23 The origin of world civilization can be traced to the Indus Valley cradle, where brilliant and original thinkers made groundbreaking discoveries. The history of these discoveries is recorded in the vast Sanskrit literature. In this study, author M. K. Agarwal explores the cultural and historical significance of the region. He explores Indus Valley culture, which encouraged creative thoughts opposed to the Abrahamic faiths, which herded followers into dogmatic thinking. He holds that these religions prospered because of their unfettered hatred of the Vedic-Hindu-Buddhist peoples, who were demonized as pagans to be murdered, tortured, raped, enslaved, and robbed. He also considers the achievements of that culture, such as the creation of the most affluent, most scientifically advanced, and most spiritual of all societies, with archeological moorings that can be traced back to 8000 BC. No other region can even come close to transforming people and culture like the Indus Valley, but the world's Vedic roots have been ignored, shunned, and covered up. Uncover the history that has been lost and develop a deeper appreciation for the true cradle of human civilization with The Vedic Core of Human History.

25 march in history: Canada's Residential Schools: The History, Part 2, 1939 to 2000 Commission de vérité et réconciliation du Canada, 2016-01-01 Between 1867 and 2000, the Canadian government sent over 150,000 Aboriginal children to residential schools across the

country. Government officials and missionaries agreed that in order to “civilize and Christianize” Aboriginal children, it was necessary to separate them from their parents and their home communities. For children, life in these schools was lonely and alien. Discipline was harsh, and daily life was highly regimented. Aboriginal languages and cultures were denigrated and suppressed. Education and technical training too often gave way to the drudgery of doing the chores necessary to make the schools self-sustaining. Child neglect was institutionalized, and the lack of supervision created situations where students were prey to sexual and physical abusers. Legal action by the schools’ former students led to the creation of the Truth and Reconciliation Commission of Canada in 2008. The product of over six years of research, the Commission’s final report outlines the history and legacy of the schools, and charts a pathway towards reconciliation. Canada’s Residential Schools: The History, Part 2, 1939 to 2000 carries the story of the residential school system from the end of the Great Depression to the closing of the last remaining schools in the late 1990s. It demonstrates that the underfunding and unsafe living conditions that characterized the early history of the schools continued into an era of unprecedented growth and prosperity for most Canadians. A miserly funding formula meant that into the late 1950s school meals fell short of the Canada Food Rules. Overcrowding, poor sanitation, and a failure to adhere to fire safety rules were common problems throughout this period. While government officials had come to view the schools as costly and inefficient, the churches were reluctant to countenance their closure. It was not until the late 1960s that the federal government finally wrested control of the system away from the churches. Government plans to turn First Nations education over to the provinces met with opposition from Aboriginal organizations that were seeking “Indian Control of Indian Education.” Following parent-led occupation of a school in Alberta, many of the remaining schools came under Aboriginal administration. The closing of the schools coincided with a growing number of convictions of former staff members on charges of sexually abusing students. These trials revealed the degree to which sexual abuse at the schools had been covered up in the past. Former students, who came to refer to themselves as Survivors, established regional and national organizations and provided much of the leadership for the campaign that led to the federal government issuing in 2008 an apology to the former students and their families.

25 march in history: History of Construction Cultures Volume 1 João Mascarenhas-Mateus, Ana Paula Pires, 2021-08-01 History of Construction Cultures Volume 1 contains papers presented at the 7ICCH – Seventh International Congress on Construction History, held at the Lisbon School of Architecture, Portugal, from 12 to 16 July, 2021. The conference has been organized by the Lisbon School of Architecture (FAUL), NOVA School of Social Sciences and Humanities, the Portuguese Society for Construction History Studies and the University of the Azores. The contributions cover the wide interdisciplinary spectrum of Construction History and consist on the most recent advances in theory and practical case studies analysis, following themes such as: - epistemological issues; - building actors; - building materials; - building machines, tools and equipment; - construction processes; - building services and techniques ; -structural theory and analysis ; - political, social and economic aspects; - knowledge transfer and cultural translation of construction cultures. Furthermore, papers presented at thematic sessions aim at covering important problematics, historical periods and different regions of the globe, opening new directions for Construction History research. We are what we build and how we build; thus, the study of Construction History is now more than ever at the centre of current debates as to the shape of a sustainable future for humankind. Therefore, History of Construction Cultures is a critical and indispensable work to expand our understanding of the ways in which everyday building activities have been perceived and experienced in different cultures, from ancient times to our century and all over the world.

25 march in history: Our Unfinished March Eric Holder, Sam Koppelman, 2023-06-06 A brutal, bloody, and at times hopeful history of the vote; a primer on the opponents fighting to take it away; and a playbook for how we can save our democracy before it's too late—from the former U.S. Attorney General on the front lines of this fight Voting is our most important right as Americans—"the right that protects all the others," as Lyndon Johnson famously said when he signed the Voting Rights Act—but it's also the one most violently contested throughout U.S. history. Since the gutting of the act in the landmark Shelby County v. Holder case in 2013, many states have passed laws restricting the vote. After the 2020 election, President Trump's effort to overturn the vote has evolved into a slow-motion coup, with many Republicans launching an all-out assault on our democracy. The vote seems to be in unprecedented peril. But the peril is not at all unprecedented. America is a fragile democracy, Eric Holder argues, whose citizens have only had unfettered access to the ballot since the 1960s. He takes readers through three dramatic stories of how the vote was won: first by white men, through violence and insurrection; then by white women, through protests and mass imprisonments; and finally by African Americans, in the face of lynchings and terrorism. Next, he dives into how the vote has been stripped away since Shelby—a case in which Holder was one of the parties. He ends with visionary chapters on how we can reverse this tide of voter suppression and become a true democracy where every voice is heard and every vote is counted. Full of surprising history, intensive analysis, and actionable plans for the future, this is a powerful primer on our most urgent political struggle from one of the country's leading advocates.

25 march in history: *Culture, Heritage and Representation* Steve Watson, 2016-12-05 The 'visual' has long played a crucial role in forming experiences, associations, expectations and understandings of heritage. Images convey meaning within a range of practices, including tourism, identity construction, the popularization of the past through a variety of media, and the memorialization of events. However, despite the central role of 'the visual' in these contexts, it has been largely neglected in heritage literature. This edited collection is the first to explore the production, use and consumption of visual imagery as an integral part of heritage. Drawing on case studies from around the world, it provides a multidisciplinary analysis of heritage representations, combining complex understandings of the 'visual' from a wide range of disciplines, including heritage studies, sociology and cultural studies perspectives. In doing so, the book provides a comprehensive overview of the theoretical and methodological tools necessary for understanding visual imagery within its cultural context.

25 march in history: *The History of the Black Watch (Royal Highland Regiment) of Canada* Roman Johann Jarymowycz, 2023-05-15 In three volumes spanning centuries, Lieutenant Colonel Roman Jarymowycz recounts the story of the Black Watch (Royal Highland Regiment) of Canada, the oldest Highland regiment in the country. He traces its history from the roots, when soldiers, settlers, and militia volunteers rallied to defend the southern borders of their adopted country against invasion from the United States. Drawing on diaries, letters, classified documents, and the regimental archive, Jarymowycz weaves the strands of a complex story into an epic narrative of a resolute collective of officers and men. Since its birth in 1862 as the 5th Battalion, Volunteer Militia Rifles of Canada, thousands of citizens have served in the unit. In addition to securing Canada's borders, Black Watch soldiers have fought in the South African War, both world wars, and the Korean War. They have bolstered NATO operations and United Nations peacekeeping missions, and they provided aid to the civil power during the 1997 Quebec and Eastern Ontario ice storm disaster and the COVID-19 pandemic. The Montreal-based battalion continues to serve Canada in its traditional role as a reserve infantry unit, and to this day, Black Watch soldiers frequently deploy on dangerous missions abroad. In volume 1, readers will learn of the Black Watch's origins; its first foreign enterprise, the South African War; and a detailed account of the Great War, where the regiment evolved from the 5th Royal Highlanders to become the Canadian Black Watch, as they were known throughout the empire. The Montreal regiment trained four battalions for overseas duty, three of which participated in the greatest battles of the First World War, an unprecedented accomplishment. This volume not only offers a critical analysis of campaigns, key actions, and tactical evolution, but also includes an intimate and compelling account of the sacrifices that forged this extraordinary regiment. This monumental history of Canada's oldest Highland regiment is at once a record of Scottish heritage, a portrait of Montreal rising as an industrial giant, and an examination of the emergence of a military culture from the Western Front.

The Montreal regiment trained four battalions for overseas duty, three of which participated in the greatest battles of the First World War, an unprecedented accomplishment. This volume not only offers a critical analysis of campaigns, key actions, and tactical evolution, but also includes an intimate and compelling account of the sacrifices that forged this extraordinary regiment. In volume 2 we are offered the story of the bloody battlefields of the Second World War, when the Black Watch joined Commonwealth regiments to defeat the Axis Powers. After a quick mobilization in 1939 and a long wait in England, the Black Watch experienced a baptism by fire at Dieppe. Landing in Normandy after D-Day, the regiment fought in France, Belgium, the Netherlands, and Germany, its distinguished service earning numerous honours. As well as discussing these military engagements, Jarymowycz reveals the many difficulties with recruiting, training, recovering from devastating battles, communicating with higher command, and the quality and scarcity of reinforcements. Volume 3 relates the regiment's post-Second World War story. Canada's commitments to NATO and the United Nations led to the creation of two regular battalions of the Black Watch, while retaining the reserve battalion in Montreal. From 1953 to 1970, in Korea, Germany, Cyprus, and Canada, the regular battalions served with devotion and courage. The thousands of men who were based at Camp Aldershot, Nova Scotia, and the Regimental Depot in Sussex, New Brunswick, then moved to establish a Regular Force Home Station in the newly constructed Camp Gagetown, NB. These units earned a reputation second to none in efficiency, training, fighting ability, readiness, and strength. This monumental history of Canada's oldest Highland regiment is at once a record of Scottish heritage, a portrait of Montreal rising as an industrial giant, and an examination of the emergence of a military culture from the Western Front.

25 march in history: Queenship and Revolution in Early Modern Europe Carolyn Harris, 2016-01-26 Queen Marie Antoinette, wife of King Louis XVI of France and Queen Henrietta Maria, wife of King Charles I of England were two of the most notorious queens in European history. They both faced accusations that they had transgressed social, gender and regional norms, and attempted to defend themselves against negative reactions to their behavior. Each queen engaged with the debates of her time concerning the place of women within their families, religion, politics, the public sphere and court culture and attempted to counter criticism of her foreign origins and political influence. The impeachment of Henrietta Maria in 1643 and trial and execution of Marie Antoinette in 1793 were also trials of monarchical government that shaped the English Civil Wars and French Revolution.

25 march in history: Flight Risk Forrest L. Marion, 2018-10-15 From the 1920s Afghanistan maintained a small air arm that depended heavily upon outside assistance. Starting in 2005, the United States led an air advisory campaign to rebuild the Afghan Air Force (AAF). In 2007 a formal joint/combined entity, led by a U.S. Air Force brigadier general, began air advisor work with Afghan airmen. Between 2007 and 2011, these efforts made modest progress in terms of infrastructures, personnel and aircraft accessions, and various training courses. But by 2010, advisors increasingly viewed AAF command and control (C2) as a problem area that required significant improvement if a professional air force was to be built. In the spring of 2011, major institutional changes to AAF C2 procedures were being introduced when nine U.S. air advisors were killed. The attack was the worst single-incident loss of U.S. Air Force personnel in a deployed location since 1996 and the worst insider-attack since 2001. From the day of that tragic event, the cultural chasm between Afghanistan and the West became more apparent. This dilemma continues with no end in sight to an air advisory mission of uncertain long-term value.

This book is ideal for graduate students across philosophy, cultural studies, art, music, performance studies and more.

25 march in history: Histories of HIV/AIDS in Western Europe Janet Weston, Hannah J. Elizabeth, 2022-08-09 The early 2020s marked the fortieth anniversary of the first confirmed cases of AIDS and a new wave of historical interest in the ongoing epidemic. This edited collection showcases some of this exciting new work, with a particular focus on less well-known histories from western Europe. Featuring research from social, cultural and public historians, sociologists and area studies scholars, its eight chapters address experiences, events and memories across regions and nations including Scotland, Wales, Italy, Norway and the Netherlands, paying careful attention to often-overlooked groups including drug users, sex workers, nurses, mothers and people in prison. Offering new perspectives on the development and implementation of policy, the nature of activism and expertise and which (or whose) histories are remembered, it is essential reading not only for historians of health but also for all those working in HIV/AIDS studies.

25 march in history: Noah and the Deluge: Chronological, Historical and Archaeological Evidence Gerard Gertoux, 2015-10-19 Historians consider the biblical account of Noah and the Deluge as a myth. However, this famous event occurred at the earliest times of recorded history (Sumerian King List). Today scientists believe in the last ice age called Pleistocene ending in 10,000 BCE, but there is no witness of this planetary cataclysmic event and its existence is based solely on the controversial interpretation of its consequences and their dating. The existence of erratic blocks and the disappearance of mammoths are presented as evidence of the last glaciation. However, despite dating obtained by 14C (calibrated by dendrochronology) is considered absolute by most experts its confrontation with the Egyptian chronology, in which some dates are fixed by astronomy, reverses this widespread belief and shows that dates obtained by 14C increase exponentially before -2200. Thus the rate of 14C tends gradually to 0 around -3500, which implies an important consequence: before -3500, 14C dating is no longer possible.

25 march in history: *The Fruits of Fatima* Joseph Pronechen, 2019-08-08 This riveting account of true-life Fatima events of the past hundred years demonstrates that Our Lady's messages are more vital today than ever before. Here, author Joseph Pronechen reports on scores of post-Fatima incidents that reveal the wide-reaching influence the apparitions have had throughout this past century on the lives of ordinary people, popes, saints — and even unbelievers! You'll learn of amazing but little-known Fatima-related occurrences, including the role of the apparitions in . . . The declaration of the dogma of the Assumption of Mary The 1981 attempt to assassinate Pope St. John Paul II — and his miraculous survival St. Padre Pio's astounding recovery from a long-term illness The Church's struggle against Communism St. Faustina's Divine Mercy visions And many more incidents related to Fatima! It's time to discover all of Fatima — not simply the isolated incidents of the early twentieth century, but the ongoing heavenly interventions that are impacting modern history and bearing extraordinary spiritual fruit along the way. Armed with this knowledge and perspective, you'll be inspired again by the messages of Fatima and will devote yourself once more — or perhaps for the first time — to Mother Mary, whose love for you and concern for your salvation know no bounds.

International in scope, the set looks at security and military history covering several battles, particularly the first and second world wars. Highlighting the difference between theory and practice, it also explores the people involved in the policy making and strategy of war, and the leaders tasked with carrying those decisions out.

25 march in history: *The Linguistic Heritage of Colonial Practice* Brigitte Weber, 2019-01-14 The contributions of this volume offer both a diachronic and synchronic approach to aspects relating to different areas of colonial life as for example colonial place-naming in a comparative perspective. They comprise topics of diverse interests within the field of language and colonialism and represent the linguistic fields of sociolinguistics, onomastics, historical linguistics, language contact, obsolescence convergence and divergence, (colonial) discourse, lexicography and creolistics.

25 march in history: *Remembrance - Responsibility - Reconciliation* Lothar Wigger, Marie Dirnberger, 2022-04-15 Germany and Japan have taken different ways of dealing with the past of the traumatic events of World War II and their own role. Even after 75 years, the battles for remembrance are not over in both countries. Questions about responsibility, about the educational consequences of history and about possibilities for reconciliation with former enemies are constantly being asked anew and require new answers. The contributions in the book address these questions from a Japanese and German perspective on the basis of empirical and historical research, combining historical, educational, and philosophical approaches and opening up new perspectives for academic research as well as for practical educational work by comparing the cultures of remembrance.

25 march in history: *Not for Filthy Lucre's Sake* Daniel J. Weeks, 2001 The late seventeenth and early eighteenth centuries were tumultuous times for New Jersey. The settlers in East New Jersey rose in violent opposition to the proprietary government of the province. Antiproprietary agitators, including Richard Saltar, defied the authority of the province courts, often forcibly breaking up the proceedings and physically assaulting the judges. Daniel J. Weeks reveals that the antiproprietary movement was more than a spontaneous outburst against the perceived oppressions of the proprietors. It was, in fact, a concerted and well-planned effort to overthrow proprietary power in New Jersey and establish a government based on the consent of the majority of the freeholders. The troubles had their roots in the very first days of settlement, after the proprietors, private owners of the land and government, refused to recognize the land patents of the settlers.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
