28 may in history: Five Days in London, May 1940 John Lukacs, 1999-09-10 A "gripping [and] splendidly readable" portrait of the battle within the British War Cabinet—and Churchill's eventual victory—as Hitler's shadow loomed (The Boston Globe). From May 24 to May 28, 1940, members of Britain's War Cabinet debated whether to negotiate with Hitler or to continue what became known as the Second World War. In this magisterial work, John Lukacs takes us hour by hour into the critical events at 10 Downing Street, where Winston Churchill and his cabinet painfully considered their responsibilities. With the unfolding of the disaster at Dunkirk, and Churchill being in office for just two weeks and treated with derision by many, he did not have an easy time making his case—but the people of Britain were increasingly on his side, and he would prevail. This compelling narrative, a Washington Post bestseller, is the first to convey the drama and world-changing importance of those days. "[A] fascinating work of historical reconstruction."—The Wall Street Journal "Eminent historian Lukacs delivers the crown jewel to his long and distinguished career."—Publishers Weekly (starred review) "A must for every World War II buff."—Cleveland Plain Dealer "Superb...can be compared to such classics as Hugh Trevor-Roper's The Last Days of Hitler and Barbara Tuchman's The Guns of August."—Harper's Magazine

28 may in history: National History and New Nationalism in the Twenty-First Century Niels F. May, Thomas Maissen, 2021-06-17 National history has once again become a battlefield. In internal political conflicts, which are fought on the terrain of popular culture, museums, schoolbooks, and memorial politics, it has taken on a newly important and contested role. Irrespective of national specifics, the narratives of new nationalism are quite similar everywhere. National history is said to stretch back many centuries, expressing the historical continuity of a homogeneous people and its

timeless character. This people struggles for independence, guided by towering leaders and inspired by the sacrifice of martyrs. Unlike earlier forms of nationalism, the main enemies are no longer neighbouring states, but international and supranational institutions. To use national history as an integrative tool, new nationalists claim that the media and school history curricula should not contest or question the nation and its great historical deeds, as doubts threaten to weaken and dishonour the nation. This book offers a broad international overview of the rhetoric, contents, and contexts of the rise of these renewed national historical narratives, and of how professional historians have reacted to these phenomena. The contributions focus on a wide range of representative nations from around all over the globe.

28 may in history: The Federalist Papers Alexander Hamilton, John Jay, James Madison, 2018-08-20 Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

28 may in history: The History of Bethlem Jonathan Andrews, Asa Briggs, Roy Porter, Penny Tucker, Keir Waddington, 2013-06-17 Bethlem Hospital, popularly known as Bedlam, is a unique institution. Now seven hundred and fifty years old, it has been continuously involved in the care of the mentally ill in London since at least the 1400s. As such it has a strong claim to be the oldest foundation in Europe with an unbroken history of sheltering and treating the mentally disturbed. During this time, Bethlem has transcended locality to become not only a national and international institution, but in many ways, a cultural and literary myth. The History of Bethlem is a scholarly history of this key establishment by distinguished authors, including Asa Briggs and Roy Porter. Based upon extensive research of the hospital's archives, the book looks at Bethlem's role within the caring institutions of London and Britain, and provides a long overdue re-evaluation of its place in the history of psychiatry.

28 may in history: Trade Unions in Canada 1812-1902 Eugene A. Forsey, 1982-12-15 We are apt to think of labour unions as a feature of a relatively advanced industrial society. It comes as a surprise to many to learn how long ago in Canadian history they actually appeared. Unions already existed in the predominantly rural British North America of the early nineteenth century. There were towns and cities with construction workers, foundry workers, tailors, shoemakers, and printers; there were employers and employees - and their interests were not the same. From this beginning Dr Forsey traces the evolutions of trade unions in the early years and presents an important archival foundation for the study of Canadian labour. He presents profiles of all unions of the period - craft, industrial, local, regional, national, and international - as well as of the Knights of Labor and the local and national central organizations. He provides a complete account of unions and organizations in every province including their formation and function, time and place of operation, what they did or attempted to do (including their political activity), and their particular philosophies. This volume will be of interest and value to those concerned with labour and union history, and those with a

general interest in the history of Canada.

28 may in history: mmm... Manitoba Kimberley Moore, Janis Thiessen, 2024-04-05 A tasty oral history In 2018, Janis Thiessen, Kimberley Moore, and collaborator Kent Davies refashioned a used food truck into a mobile oral history lab. Together they embarked on a journey around Manitoba, gathering stories about the province's food and the people who make, sell, and eat it. Along the way, they visited restaurant owners, beer brewers, grocers, farmers, scholars, and chefs in their kitchens and businesses, online, and on board the food truck. The team conducted nearly seventy interviews and indulged in a bounty of prairie delicacies, from Winnipeg's "Fat Boys" to Steinbach's perogies to Churchill's cloudberry jam. Thiessen and Moore serve up the results of this research in mmm... Manitoba. Mixing recipes, maps, archival records, biographies, and full-colour photographs with fascinating stories, they showcase the province's diverse food histories. Through the sharing and preparing of food, the authors investigate food security and regulation, Indigenous foodways and agriculture, capitalism's impact on the agri-food industry, and the networks between Manitoban food producers and retailers. The book also explores the roles of gender, ethnicity, migration, and colonialism in Manitoba's food history. Hop on the Manitoba Food History Truck and journey into the province's past with engaging essays and easy-to-follow recipes for kjielkje and schmauntfat, snow goose tidbits, chicken karaage, the Salisbury House flapper pie, duck fat smashed potatoes, Ichi Ban cocktails, pork inihaw, and more. mmm... Manitoba offers a thoughtfully nuanced, deliciously digestible, and wholly unique regional history that is sure to satisfy.

28 may in history: The Press on Trial Lloyd E. Chiasson, 1997-08-28 Perhaps no drama catches the interest of the American public more than a spectacular trial. Even though the reporting of a crime may quickly diminish in news value, the trial lingers while drama builds. Although this has become seemingly more pronounced in recent years with the popularity of televised trials, public interest in criminal trials was just as high in 1735 when John Peter Zenger defended his right to free speech, or in 1893 when Lizzie Borden was tried for the murder of her father and stepmother. This book tells the stories of sixteen significant trials in American history and their media coverage, from the Zenger trial in 1735 to the O. J. Simpson trial in 1995. Each chapter relates the history of events leading up to the trial, the people involved, and how the crimes and subsequent trials were reported.

28 may in history: Blockbusters and the Ancient World Chris Davies, 2019-03-21 Following the release of Ridley Scott's *Gladiator* in 2000 the ancient world epic has experienced a revival in studio and audience interest. Building on existing scholarship on the Cold War epics of the 1950s-60s, including *Ben-Hur*, *Spartacus* and *The Robe*, this original study explores the current cycle of ancient world epics in cinema within the social and political climate created by September 11th 2001. Examining films produced against the backdrop of the War on Terror and subsequent invasions of

Iraq and Afghanistan, this book assesses the relationship between mainstream cinema and American society through depictions of the ancient world, conflict and faith. Davies explores how these films evoke depictions of the Second World War, the Vietnam War and the Western in portraying warfare in the ancient world, as well as discussing the influence of genre hybridisation, narration and reception theory. He questions the extent to which ancient world epics utilise allegory, analogy and allusion to parallel past and present in an industry often dictated by market forces. Featuring analysis of *Alexander*, *Troy*, *300*, *Centurion*, *The Eagle*, *The Passion of the Christ* and more, this book offers new insight on the continued evolution of the ancient world epic in cinema.

28 may in history: American Sports and the Great War Peter C. Stewart, 2021-02-26 Drawing on newspaper accounts, college yearbooks and the recollections of veterans, this book examines the impact of World War I on sports in the U.S. As young men entered the military in large numbers, many colleges initially considered suspending athletics but soon turned to the idea of using sports to build morale and physical readiness. Recruits, mostly in their twenties, ended up playing more baseball and football than they would have in peacetime. Though most college athletes volunteered for military duty, others replaced them so that the reduction of competition was not severe. Pugilism gained participants as several million men learned how to box.

Lund, Todd Pfannestiel, Sylvie Waskiewicz, Paul Vickery, 2024-09-10 U.S. History is designed to meet the scope and sequence requirements of most introductory courses. U.S. History covers key forces that form the American experience, with particular attention to issues of race, class, and gender.

28 may in history: Hitler's Blitzkrieg Enemies 1940 Nigel Thomas, 2014-02-20 The armies of Denmark, Norway, the Netherlands and Belgium bore the first crushing impact of Hitler's mighty Blitzkrieg war machine in Western Europe, in a campaign that astonished and terrified the world. The German Wehrmacht was millions strong, equipped with the latest guns, tanks and aircraft, and had the priceless advantage of having learned the realities of modern warfare in Poland the previous September. The defenders of Scandinavia and the Low Countries were raised from small populations, and were inadequately funded, trained, equipped and armed. Their modest numbers, inexperience, and largely indefensible borders condemned them to rapid defeat. For this reason they have tended to be neglected by history – in many cases, unjustly. Vastly outnumbered – and, in the case of the neutral Low Countries, with their potential French and British allies reeling under simultaneous attacks – thousands of soldiers fought heroically in the hopeless defence of their homelands against the Nazi juggernaut.

28 may in history: *How To Read World History in Art* Flavio Febbraro, Burkhard Shwetje, 2010-10-01 How does an artist's interpretation of historical events alter our understanding of them? Kings, queens, presidents, and generals from Alexander the Great to Theodore Roosevelt have commissioned paintings, drawings, sculptures, and photographs of major events, and artists have responded to important moments with works that forever shape historical memory. The book deals with specific episodes, from the proclamation of the Code of Hammurabi to more recent events such as the fall of the Berlin Wall and the terrorist attacks of September 11, 2001. It also deals with broader themes, such as the founding of states (Persia, Rome, the Chinese Empire, the United States) and war (Delacroix's *Liberty Leading the People*, Picasso's *Guernica*). Here too are the great voyages of exploration, the industrial revolution, and much more. World history is vividly elucidated in these works of art.

28 may in history: *Cultural Visions: Essays in the History of Culture* , 2022-03-07 This collection opens with an inquiry into the assumptions and methods of the historical study of culture, comparing the new cultural history with the old. Thirteen essays follow, each defining a problem within a particular culture. In the first section, Biography and Autobiography, three scholars explore historically changing types of self-conception, each reflecting larger cultural meanings; essays included examine Italian Renaissance biographers and the autobiographies of Benjamin Franklin and Mohandas Gandhi. A second group of contributors explore problems raised by the writing of history itself, especially as it relates to a notion of culture. Here examples are drawn from the writings of Thucydides, Jacob Burckhardt, and the art historians Alois Riegl and Josef Strzygowski. In the third section, Politics, Nationalism, and Culture, the essays explore relationships between cultural creativity and national identity, with case studies focusing on the Holy Roman Emperor Maximilian I, the place of Castile within the national history of Spain, and the impact of World War I on work of Thomas Mann. The final section, Cultural Translation, raises the complex questions of cultural influence and the transmission of traditions over time through studies of Philo of Alexandria's interpretation of the Hebrew Bible, Erasmus' use of Socrates, Jean Bodin's conception of Roman law, and adaptations of the Hebrew Bible for American children.
