2829 technology forest blvd the woodlands tx 77381: Rapid Excavation and Tunneling

Conference 2021 Proceedings Jarrett E. Carlson, Gregg W. Davidson, 2021-06-06 Every two years, industry leaders and practitioners from around the world gather at the Rapid Excavation and Tunneling Conference (RETC), the authoritative program for the tunneling profession, to learn about the most recent advances and breakthroughs in this unique field. The information presented helps professionals keep pace with the ever-changing and growing tunneling industry. This book includes the full text of 106 papers presented at the 2021 conference. Though the tunneling industry continues to develop both technically and contractually, one notable adaptation of the last two years has been the onset and management of COVID-19. The hallmarks of tunneling professionals include adaptability, resiliency, optimism, and management of change. These are traits that have been recently put to an entirely new challenge over the last year or so. We have truly witnessed why what we do is deemed “essential” infrastructure. The COVID-19 pandemic has impacted each of us, personally and professionally, and while times have been hard, we are fortunate to work in a field that is able to meet the challenge and thrive thereafter. Congratulations are in order to everyone in

our industry for keeping the planning and development of projects moving forward and for maintaining safe and productive worksites in these challenging times.

These poems document Ian Wills' journey from biting poverty and an abusive childhood on the grimmest London council estates of the 70s to the top flight of British business, battles with politicians and his owndemons, and finally to his much-longed-for career as a writer and performer. They are visceral, raw, lived documents of someone who has always had to fight for everything he's achieved, most often, and most tellingly, with himself. It's a unique and brutally honest account of human weakness and strength, as told to Alex Ogg

2829 technology forest blvd the woodlands tx 77381: Women And Revolution In Iran

Guity Nashat, 2021-11-28 Iranian women acquired greater legal, social, and economic opportunities during the past three decades than in any other period of history, yet they participated in large numbers in the 1979 revolution to overthrow Shah Mohammad Reza Pahlavi. Ironically, they may have lost. more than any other group from the changes introduced and stand to lose even more from changes contemplated by leaders of the current regime. The role of women in the revolution, the reasons for their participation, and their subsequent fate are documented in this volume. The authors examine the status of women in pre-revolutionary society, the ways in which their lives were affected by Islamic principles, and the changes that occurred throughout the twentieth century as increasing numbers of women entered the labor force and public life. They then turn to recent political events, describing the participation of working-class, rural, and educated women and activists from both the right and left. Finally, they consider the implications of recent government politics aimed at limiting women's activities outside the home and encouraging a return to more traditional roles.
