Why should you design and use essential questions in your classroom? Essential questions (EQs) help target standards as you organize curriculum content into coherent units that yield focused and thoughtful learning. In the classroom, EQs are used to stimulate students' discussions and promote a deeper understanding of the content. Whether you are an Understanding by Design (UbD) devotee or are searching for ways to address standards—local or Common Core State Standards—in an engaging way, Jay McTighe and Grant Wiggins provide practical guidance on how to design, initiate, and embed inquiry-based teaching and learning in your classroom. Offering dozens of examples, the authors explore the usefulness of EQs in all K-12 content areas, including skill-based areas such as math, PE, language instruction, and arts education. As an important element of their backward design approach to designing curriculum, instruction, and assessment, the authors *Give a comprehensive explanation of why EQs are so important; *Explore seven defining characteristics of EQs; *Distinguish between topical and overarching questions and their uses; *Outline the rationale for using EQs as the focal point in creating units of study; and *Show how to create effective EQs, working from sources including standards, desired understandings, and student misconceptions. Using essential questions can be challenging—for both teachers and students—and this book provides guidance through practical and proven processes, as well as suggested response strategies to encourage student engagement. Finally, you will learn how to create a culture of inquiry so that all members of the educational community—students, teachers, and administrators—benefit from the increased rigor and deepened understanding that emerge when essential questions become a guiding force for learners of all ages.

2nd grade history questions: *New Directions in Assessing Historical Thinking* Kadriye Ercikan, Peter Seixas, 2015-02-20 New technologies have radically transformed our relationship to information in general and to little bits of information in particular. The assessment of history learning, which for a century has valued those little bits as the centerpiece of its practice, now faces not only an unprecedented glut but a disconnect with what is valued in history education. More complex processes—historical thinking, historical consciousness or historical sense making—demand more complex assessments. At the same time, advances in scholarship on assessment open up new possibilities. For this volume, Kadriye Ercikan and Peter Seixas have assembled an international array of experts who have, collectively, moved the fields of history education and assessment forward. Their various approaches negotiate the sometimes-conflicting demands of theoretical sophistication, empirically demonstrated validity and practical efficiency. Key issues include articulating the cognitive goals of history education, the relationship between content and procedural knowledge, the impact of students' language literacy on history assessments, and methods of validation in both large scale and classroom assessments. *New Directions in Assessing Historical Thinking* is a critical, research-oriented resource that will advance the conceptualization, design and validation of the next generation of history assessments.

2nd grade history questions: Reading, Writing, and Talk Mariana Souto-Manning, Jessica Martell, 2016 This book introduces a variety of inclusive strategies for teaching language and literacy in kindergarten through 2nd grade. Readers are invited into classrooms where racially, culturally, and linguistically diverse children's experiences, unique strengths, and expertise are supported and valued. Chapters focus on oral language, reading, and writing development and include diverse possibilities for culturally relevant and inclusive teaching. Featured teaching strategies foster academic success, cultural competence, and critical consciousness—leading students to read their worlds and question educational and societal inequities. Early childhood teachers will find this book invaluable as they consider effective ways to teach diverse children. The hands-on examples and strategies portrayed will help educators expand their thinking and repertoires regarding what is possible—and needed—in the language and literacy education curriculum. Unique in its focus on equitable, fully inclusive, and culturally relevant language and literacy teaching, this important book will help K-2 teachers (re)think and (re)conceptualize their own practices. "Offers us a great opportunity to explore pedagogical strategies that are diverse and inclusive." —From the Foreword by Gloria Ladson-Billings, University of Wisconsin-Madison "Readers will discover a treasure of teacher and student collaborative experiences to engage diverse learners." —Yetta and Ken Goodman, University of Arizona "The authors offer rich vignettes and pragmatic guidance for learning about, responding to, and respectfully building community among children. We readers are in their debt." —Anne Haas Dyson, University of Illinois "A beautifully written book filled with powerful examples. . . . I heartily recommend it for all teachers lucky enough to work on a daily basis with our brilliant early elementary students." —Ernest Morrell, Teachers College, Columbia University

2nd grade history questions: Making Connections in Elementary and Middle School Social Studies Andrew P. Johnson, 2006 Making Connections in Elementary and Middle School Social Studies is based on the idea that students learn more and are more motivated to learn when they are able to connect their own knowledge, observations, ideas, imagination, and emotions with the content at hand. This book demonstrates how personal connections can be incorporated into social studies education while meeting NCSS thematic, pedagogical, and disciplinary standards. It is written in a very direct, reader-friendly style. Each chapter describes a variety of practical strategies and creative activities that novice and experienced teachers can use to make social studies more interesting and to help students make meaningful personal and academic connections. Each chapter contains a wealth of classroom strategies, pedagogical techniques, activities, and lesson plan ideas that can be used to enhance learning and make lessons more interesting, active, and student-centered. The book covers the three types of standards that elementary and middle school teachers work with as they teach social studies. o Thinking Ahead questions invite the reader to reflect on his/her own experiences, as they relate to the material covered in the next chapter. These can be used as discussion points for a class or small group, or simply as pre-reading prompts to enhance comprehension. o Teachers in Action boxes contain real life narratives from practicing teachers. These cases are designed to expand upon key issues presented in each chapter. Every case is accompanied by the author's personal reflection on the case. These reflections are intended to give the reader an opinion against which he/she can measure his/her own reactions. After each case, the reader is prompted to think about the narrative presented and think about the way that his/her reactions compare with those presented by the author. o Go There boxes provide links to Web sites that offer additional resources for teachers, lesson plans, and other activities to enhance a social studies classroom. This text is accompanied by a dynamic Instructor's Resources CD. The CD includes classroom video footage that can be shown in class to illustrate the concepts presented in the book and stimulate class discussion.
