300 airport business park dr shelbyville tn: Methland Nick Reding, 2009-07-01 A New York Times Bestseller Winner of the Chicago Tribune Heartland Prize Winner of the Hillman Prize for Book Journalism Named a best book of the year by: the Los Angeles Times the San Francisco Chronicle the Saint Louis Post-Dispatch the Chicago Tribune the Seattle Times A stunning look at a problem that has dire consequences for our country."-New York Post The dramatic story of Methamphetamine as it comes to the American Heartland-a timely, moving, account of one community's attempt to confront the epidemic and see their way to a brighter future. Crystal methamphetamine is widely considered to be the most dangerous drug in the world, and nowhere is that more true than in the small towns of the American heartland. Methland is the story of the drug as it infiltrates the community of Oelwein, Iowa (pop. 6,159), a once-thriving farming and railroad community. Tracing the connections between the lives touched by meth and the global forces that have set the stage for the epidemic, Methland offers a vital and unique perspective on a pressing contemporary tragedy. Oelwein, Iowa is like thousand of other small towns across the county. It has been left in the dust by the consolidation of the agricultural industry, a depressed local economy and an out-migration of people. If this wasn't enough to deal with, an incredibly cheap, long-lasting, and highly addictive drug has come to town, touching virtually everyone's lives. Journalist Nick Reding reported this story over a period of four years, and he brings us into the heart of the town through an ensemble cast of intimately drawn characters, including: Clay Hallburg, the town doctor, who fights meth even as he struggles with his own alcoholism; Nathan Lein, the town prosecutor, whose case load is filled almost exclusively with meth-related crime, and Jeff Rohrick, who is still trying to kick a meth habit after four years. Methland is a portrait of a community under siege, of the lives the drug has devastated, and of the heroes who continue to fight the war. It will appeal to readers of David Sheff's bestselling Beautiful Boy, and serve as inspiration for those who believe in the power of everyday people to change their world for the better.

300 airport business park dr shelbyville tn: Bioterrorism and Biocrimes W. Seth Carus, Center for Counterproliferation Research, 2002 The working paper is divided into two main parts. The first part is a descriptive analysis of the illicit use of biological agents by criminals and terrorists. It draws on a series of case studies documented in the second part. The case studies describe every instance identifiable in open source materials in which a perpetrator used, acquired, or threatened to use a biological agent. While the inventory of cases is clearly incomplete, it provides an empirical basis for addressing a number of important questions relating to both biocrimes and bioterrorism. This material should enable policymakers concerned with bioterrorism to make more informed decisions. In the course of this project, the author has researched over 270 alleged cases involving biological agents. This includes all incidents found in open sources that allegedly occurred during the 20th Century. While the list is certainly not complete, it provides the most comprehensive existing unclassified coverage of instances of illicit use of biological agents.
