32 worksheet part 1: *"We, Too, are Americans"* Megan Taylor Shockley, 2004 During World War II, factories across America retooled for wartime production, and unprecedented labor opportunities opened up for women and minorities. In *We, Too, Are Americans*, Megan Taylor Shockley examines the experiences of the African American women who worked in two capitol of industry--Detroit, Michigan, and Richmond, Virginia--during the war and the decade that followed it, making a compelling case for viewing World War II as the crucible of the civil rights movement. As demands on them intensified, the women working to provide American troops with clothing, medical supplies, and other services became increasingly aware of their key role in the war effort. A considerable number of the African Americans among them began to use their indispensability to leverage demands for equal employment, welfare and citizenship benefits, fair treatment, good working conditions, and other considerations previously denied them. Shockley shows that as these women strove to redefine citizenship, backing up their claims to equality with lawsuits, sit-ins, and other forms of activism, they were forging tools that civil rights activists would continue to use in the years to come.

32 worksheet part 1: The Power of Teacher Teams Vivian Troen, Katherine Boles, 2012

While most educators believe working in teams is valuable, not all team efforts lead to instructional improvement. Through richly detailed case studies The Power of Teacher Teams demonstrates how schools can transform their teams into more effective learning communities that foster teacher leadership. The benefits of successful teacher teams include: improved performance for both teachers and students; meaningful professional development; group adoption of a new curriculum; shared insights into student work; better classroom management; support for new teachers; new roles for teacher leaders; and opportunities for mentor support. School leaders will find guidelines, methods, and concrete steps for building and sustaining effective teacher teams. Also included is a DVD with video case studies and one CD with reproducibles. The most important reason for building teacher teams is to enhance student learning through improved instruction, and that story is at the heart of this book.
