32bj training courses 2022: *I Know What I'm Doing -- and Other Lies I Tell Myself* Jen Kirkman, 2017-04-25 Jen offers up all the gory details of a life permanently in progress. She reassures you that it's okay to not have life completely figured out, even when you reach middle age (and find your first gray pubic hair). She talks about making unusual or unpopular life decisions (such as cultivating a 'friend with benefits' or not going home for the holidays) because you don't necessarily want for yourself what everyone else seems to think you should. It's about renting when everyone says you should own, dating around when everyone thinks you should settle down, and traveling alone when everyone pities you for going to Paris without a man--Amazon.com.

32bj training courses 2022: Migration and Pandemics Anna Triandafyllidou, 2021-12-01 This open access book discusses the socio-political context of the COVID-19 crisis and questions the management of the pandemic emergency with special reference to how this affected the governance of migration and asylum. The book offers critical insights on the impact of the pandemic on migrant workers in different world regions including North America, Europe and Asia. The book addresses several categories of migrants including medical staff, farm labourers, construction workers, care and domestic workers and international students. It looks at border closures for non-citizens, disruption for temporary migrants as well as at special arrangements made for essential (migrant) workers such as doctors or nurses as well as farmworkers, 'shipped' to destination with special flights to make sure emergency wards are staffed, and harvests are picked up and the food processing chain continues to function. The book illustrates how the pandemic forces us to rethink notions like membership, citizenship, belonging, but also solidarity, human rights, community, essential services or 'essential' workers alongside an intersectional perspective including ethnicity, gender and race.

32bj training courses 2022: Divorce, American Style Suzanne Kahn, 2021-05-28 This book examines feminist divorce reformers, their relationship with the broader feminist movement, and their lasting effects on the American social welfare regime. It shows how the two distinctive qualities of the American welfare state-its gendered nature and its public/private nature-combined to encourage the breadwinner-homemaker model of marriage's use as policy tool. The linking of access to economic benefits to marriage, begun early in the development of the American social insurance system, shaped political identity and activism in the 1970s and has continued to do so into our current political moment. The result has not only affected policy questions directly relating to marriage but also limited the possibilities for expanding America's social welfare provisions. As a gateway to full economic citizenship, marriage has always served as an institution that protects and perpetuates class privilege--

32bj training courses 2022: Necessary Trouble Sarah Jaffe, 2016-08-23 *Necessary Trouble* is the definitive book on the movements that are poised to permanently remake American politics. We are witnessing a moment of unprecedented political turmoil and social activism. Over the last few years, we've seen the growth of the Tea Party, a twenty-first-century black freedom struggle with BlackLivesMatter, Occupy Wall Street, and the grassroots networks supporting presidential candidates in defiance of the traditional party elites. Sarah Jaffe leads readers into the heart of these movements, explaining what has made ordinary Americans become activists. As Jaffe argues, the financial crisis in 2008 was the spark, the moment that crystallized that something was wrong. For years, Jaffe crisscrossed the country, asking people what they were angry about, and what they were doing to take power back. She attended a people's assembly in a church gymnasium in Ferguson, Missouri; walked a picket line at an Atlanta Burger King; rode a bus from New York to Ohio with student organizers; and went door-to-door in Queens days after Hurricane Sandy. From the successful fight for a 15 minimum wage in Seattle and New York to the halting of Shell's Arctic drilling program, Americans are discovering the effectiveness of making good, necessary trouble. Regardless of political alignment, they are boldly challenging who wields power in this country.

32bj training courses 2022: Minds Online Michelle D. Miller, 2014-10-20 From wired campuses to smart classrooms to massive open online courses (MOOCs), digital technology is now firmly embedded in higher education. But the dizzying pace of innovation, combined with a dearth of evidence on the effectiveness of new tools and programs, challenges educators to articulate how technology can best fit into the learning experience. Minds Online is a concise, nontechnical guide for academic leaders and instructors who seek to advance learning in this changing environment, through a sound scientific understanding of how the human brain assimilates knowledge. Drawing on the latest findings from neuroscience and cognitive psychology, Michelle Miller explores how attention, memory, and higher thought processes such as critical thinking and analytical reasoning can be enhanced through technology-aided approaches. The techniques she describes promote retention of course material through frequent low-stakes testing and practice, and help prevent counterproductive cramming by encouraging better spacing of study. Online activities also help students become more adept with cognitive aids, such as analogies, that allow them to apply learning across situations and disciplines. Miller guides instructors through the process of creating a syllabus for a cognitively optimized, fully online course. She presents innovative ideas for how to use multimedia effectively, how to take advantage of learners' existing knowledge, and how to motivate students to do their best work and complete the course. For a generation born into the Internet age, educational technology designed with the brain in mind offers a natural pathway to the pleasures and rewards of deep learning.

32bj training courses 2022: Philosophizing Brecht , 2019-05-20 This anthology unites scholars from varied backgrounds with the notion that the theories and artistic productions of Bertolt Brecht are key missing links in bridging diverse discourses in social philosophy, theatre, consciousness studies, and aesthetics. It offers readers interdisciplinary perspectives that create unique dialogues between Brecht and important thinkers such as Althusser, Anders, Bakhtin, Benjamin, Godard, Marx, and Plato. While exploring salient topics such as consciousness, courage, ethics, political aesthetics, and representations of race and the body, it penetrates the philosophical Brecht seeing in him the never-ending dialectic—the idea, the theory, the narrative, the character that is never foreclosed. This book is an essential read for all those interested in Brecht as a

socio-cultural theorist and for theatre practitioners. Contributors: Kevin S. Amidon, José María Durán, Felix J. Fuch, Philip Glahn, Jim Grilli, Wolfgang Fritz Haug, Norman Roessler, Jeremy Spencer, Anthony Squiers, Peter Zazzali.

32bj training courses 2022: *Super Performing At Work and At Home* Robert J. Cerfolio, 2014-05-27 A book about how to become a super performer in everything you do—and how to find the real reason for wanting to super perform How do you handle a “no-win” situation? According to world-renowned cardiothoracic surgeon Robert J. Cerfolio—“the Michael Jordan of lung surgery”—there’s often no such thing. Sharing his own remarkable feats as a collegiate first-team academic all-American baseball player, his rise from a surgical resident at the Mayo Clinic to the recognized world authority in chest and robotic thoracic surgery, and anecdotes from his long career as a Little League coach and father, Cerfolio shows you how to think like a super performer in everything you do. Revealing the techniques, lessons, and strategies he himself learned through playing sports, he teaches you to attain what he calls “the athleticism of life”: the practice that elevates the mind and body of the good to the great and makes a star performer into a super performer. Yet, as Dr. Cerfolio learns when his wife tests positive for breast cancer, this isn’t the entire story—and what ultimately defines us is how well we can meet our obligations when placed under the most crushing pressure. In this provocative memoir/guidebook, Cerfolio sets you on your path to super performing—but teaches you, through his story, that your path is not complete without an honorable cause to steer toward and give your all.

32bj training courses 2022: *Solidarity for Sale* Robert Fitch, 2006-01-23 American labor unions have been, it turns out, shot through with corruption from their very inception. They never really had a Golden Age. From Big Jim Colosimo, the patron saint of Chicago's Mafia, to Brooklyn's Sammy The Bull Gravano a century later, organized crime has controlled huge swaths of the

mainline labor movement. It still does. Impassioned, revelatory, prodigiously researched and reported, and thoroughly convincing, *Solidarity for Sale* shows how the American labor movement's decent ends are continually undermined by its tawdry means — a diet of daily corruption longer than the menu at a Long Island diner. By telling the untold histories, uncovering the covered-up scandals, and even recommending a way forward, Robert Fitch builds a devastating indictment and goes beyond it to show that union corruption, stagnation, and decline are not our national destiny. Labor could regain its needed place in American life. But it would require a set of reforms deeper than anything now being proposed; nothing less than a revolutionary overthrow of its culture of corruption and its replacement by a civic culture of accountability and consent.

32bj training courses 2022: No Shortcuts Jane McAlevey, 2016 An examination of strategies for effective organizing--

32bj training courses 2022: *Raising Expectations (and Raising Hell)* Jane McAlevey, Bob Ostertag, 2014-05-06 This “breath-taking trip through the union-organizing scene of America in the 21st century” reveals the victories and unconventional strategies of a renowned—and notorious—militant union organizer (Barbara Ehrenreich, author of *Nickel and Dimed*) In 1995, in the first contested election in the history of the AFL-CIO, John Sweeney won the presidency of the nation’s largest labor federation, promising renewal and resurgence. Today, less than 7 percent of American private-sector workers belong to a union, the lowest percentage since the beginning of the twentieth century, and public employee collective bargaining has been dealt devastating blows in Wisconsin and elsewhere. What happened? Jane McAlevey is famous—and notorious—in the American labor movement as the hard-charging organizer who racked up a string of victories at a time when union leaders said winning wasn’t possible. Then she was bounced from the movement, a victim of the high-level internecine warfare that has torn apart organized labor. In this engrossing and funny narrative—that reflects the personality of its charismatic, wisecracking author—McAlevey tells the story of a number of dramatic organizing and contract victories, and the unconventional strategies that helped achieve them. *Raising Expectations (and Raising Hell)* argues that labor can be revived, but only if the movement acknowledges its mistakes and fully commits to deep organizing, participatory education, militancy, and an approach to workers and their communities that more resembles the campaigns of the 1930s—in short, social movement unionism that involves raising workers’ expectations (while raising hell).

32bj training courses 2022: *Healthy at Last* Eric Adams, 2020-10-13 New York mayor Eric Adams is on a mission to tackle one of the most stubborn health problems in the country: chronic disease in the African American community. African Americans are heavier and sicker than any other group in the U.S., with nearly half of all Black adults suffering from some form of

cardiovascular disease. After Adams woke up with severe vision loss one day in 2016, he learned that he was one of the nearly 5 million Black people living with diabetes-and, according to his doctor, he would have it for the rest of his life. A police officer for more than two decades, Adams was a connoisseur of the fast-food dollar menu. Like so many Americans with stressful jobs, the last thing he wanted to think about was eating healthfully. Fast food was easy, cheap, and comfortable. His diet followed him from the squad car to the state senate, and then to Brooklyn Borough Hall, where it finally caught up with him. But Adams was not ready to become a statistic. There was a better option besides medication and shots of insulin: food. Within three months of adopting a plant-based diet, he lost 35 pounds, lowered his cholesterol by 30 points, restored his vision, and reversed his diabetes. Now he is on a mission to revolutionize the health of not just the borough of Brooklyn, but of African Americans across the country. Armed with the hard science and real-life stories of those who have transformed their bodies by changing their diet, Adams shares the key steps for a healthy, active life. With this book, he shows readers how to avoid processed foods, cut down on salt, get more fiber, and substitute beef, chicken, pork, and dairy with delicious plant-based alternatives. In the process he explores the origins of soul food-a cuisine deeply important to the Black community, but also one rooted in the horrors of slavery-and how it can be reimagined with healthy alternatives. Features more than 50 recipes from celebrities and health experts, including Paul McCartney, Queen Afua, Jenné Claiborne, Bryant Jennings, Charity Morgan, Moby, and more! The journey to good health begins in the kitchen-not the hospital bed!

32bj training courses 2022: The Quest for Community Robert Nisbet, 2023-03-28 One of the leading thinkers to emerge in the postwar conservative intellectual revival was the sociologist Robert Nisbet. His book *The Quest for Community*, published in 1953, stands as one of the most persuasive accounts of the dilemmas confronting modern society. Nearly a half century before Robert Putnam documented the atomization of society in *Bowling Alone*, Nisbet argued that the rise of the powerful modern state had eroded the sources of community—the family, the neighborhood, the church, the guild. Alienation and loneliness inevitably resulted. But as the traditional ties that bind fell away, the human impulse toward community led people to turn even more to the government itself, allowing statism—even totalitarianism—to flourish. This edition of Nisbet's magnum opus features a brilliant introduction by New York Times columnist Ross Douthat and three critical essays. Published at a time when our communal life has only grown weaker and when many Americans display cultish enthusiasm for a charismatic president, this new edition of *The Quest for Community* shows that Nisbet's insights are as relevant today as ever.

Scott, 1986 The New School was a center for adult education established in 1918 in New York and was always open to and supported by Jews. Ch. 5 (pp. 84-106) describes the creation of a graduate faculty in 1933 by president Alvin Johnson. He brought twelve leading Jewish scholars from Germany, assisted by private Jewish contributions and by the Rockefeller Foundation which, however, disapproved of the Jewish and socialist background of these scholars and feared the disruption of the quota system. Ch.

6 (pp. 107-127) describes the refugees' studies on the nature of fascism and their gradual abandonment of socialism. Hans Staudinger, in particular, emphasized the crucial role of racism in the evolution of the Nazi state. With the outbreak of World War II, the New School tried to save more refugees but was obstructed by State Department officials. Also mentions the work of Hannah Arendt at the New School in the 1950s-60s.

32bj training courses 2022: Unbought and Unbossed Shirley Chisholm, 2022-11-08 A tremendously impressive book.--Washington Post Her motto and title of her autobiography--Unbossed and Unbought--illustrates her outspoken advocacy for women and minorities during her seven terms in the U.S. House of Representatives.--National Women's History Museum In this classic work--a blend of memoir social criticism, and political analysis that remains relevant today--the first Black Congresswoman to serve in American history, New York's dynamic representative Shirley Chisholm, traces her extensive political struggle and examines the problems that have long plagued the American system of government. I want to be remembered as a woman . . . who dared to be a catalyst of change. Political pioneer Shirley Chisholm--activist, member of the House of Representatives and former presidential candidate--was a woman who consistently broke barriers and inspired generations of American women, and especially women of color. Unbossed and Unbought is her story, told in her own words--a thoughtful and informed look at her rise from the streets of Brooklyn to the halls of Congress. Chisholm speaks out on her life in politics while illuminating the events, personalities, and issues of her time, including the schism in the Democratic party in the 1960s and '70s--all which speak to us today. In this frank assessment, Fighting Shirley recalls how she took on an entrenched system, gave a public voice to millions, and embarked on a trailblazing bid to be the first woman and first African American President of the United States. By daring to be herself, Shirley Chisholm shows how one person forever changed the status quo.

32bj training courses 2022: The Profession Bill Bratton, Peter Knobler, 2022-06-21

"Engaging. . . a remarkably candid account. . . Succeeding as a centrist in public life these days can be an almost impossible task. But centrism in law enforcement may be the most delicate challenge of all. Bratton's ability to practice it was a startling phenomenon." -New York Times Book Review

The epic, transformative career of Bill Bratton, legendary police commissioner and police reformer, in Boston, Los Angeles, and New York When Bill Bratton became a Boston street cop after his return from serving in Vietnam, he was dismayed by the corrupt old guard, and it is fair to say the old guard was dismayed by him, too. But his success fighting crime could not be denied. Propelled by extraordinary results, Bratton had a dazzling rise, and ultimately a dazzling career, becoming the most famous police commissioner of modern times. The Profession is the story of that career in full. Everywhere he went, Bratton slashed crime rates and professionalized the vocation of the cop. He and his team created the revolutionary program CompStat, the Big Bang of modern data-driven policing. But his career has not been without controversy, and central to the reckoning of The Profession is the fundamental crisis of relations between the Black community and law enforcement; a crisis he now believes has been inflamed by the unforeseen consequences of some well-intentioned policies. Building trust between a police force and the community it is sworn to protect is in many ways, Bratton argues, the first task--without genuine trust in law enforcement to do what is right, little else is possible. The Profession is both a searching examination of the path of policing over the past fifty years, for good and also for ill, and a master class in transformative leadership. Bill Bratton was never brought into a police department to maintain the status quo; wherever he went--from Boston in the '80s to the New York Police Department in the '90s to Los Angeles after the beating of Rodney King to New York again in the era of unchecked stop-and-frisk--root-and-branch reinvention was the order of the day and he met the challenge. There are few other positions on Earth in which life-and-death stakes combine with intense public scrutiny and turbulent political crosswinds as they do for the police chief of a major American city, even more so after counterterrorism entered the mix in the twenty-first century. Now more than ever, when the role of the police in society is under a microscope like never before, Bill Bratton's authority on the subject of improving law enforcement is profoundly useful. A riveting combination of cop stories and community involvement, The Profession presents not only a fascinating and colorful life at the heights of law-enforcement leadership, but the vision for the future of American policing that we sorely need.
