The recent increase in the number of vaccinations recommended and the concurrent controversies about whether vaccinations are safe or even effective have left many parents confused and concerned. Midwife, herbalist, and mother of four, Aviva Jill Romm sifts through the spate of current research on vaccine safety and efficacy and offers a sensible, balanced discussion of the pros and cons of each routine childhood vaccination. She presents the full spectrum of options available to parents: full vaccination on a standardized or individualized schedule, selective vaccination, or no vaccinations at all. Negotiating daycare and school requirements, dealing with other parents, and traveling with an unvaccinated child are covered in detail. The book also suggests ways to strengthen children's immune systems and maintain optimal health and offers herbal and homeopathic remedies for childhood ailments. Emphasizing that no single approach is appropriate for every child, the author guides parents as they make the choices that are right for their child.

10 minutes gone parents guide: Before We Were Strangers Renée Carlino, 2015-08-18 From the USA TODAY bestselling author of Sweet Thing and Nowhere But Here comes a love story about a Craigslist “missed connection” post that gives two people a second chance at love fifteen years after they were separated in New York City. To the Green-eyed Lovebird: We met fifteen years ago,

almost to the day, when I moved my stuff into the NYU dorm room next to yours at Senior House. You called us fast friends. I like to think it was more. We lived on nothing but the excitement of finding ourselves through music (you were obsessed with Jeff Buckley), photography (I couldn't stop taking pictures of you), hanging out in Washington Square Park, and all the weird things we did to make money. I learned more about myself that year than any other. Yet, somehow, it all fell apart. We lost touch the summer after graduation when I went to South America to work for National Geographic. When I came back, you were gone. A part of me still wonders if I pushed you too hard after the wedding... I didn't see you again until a month ago. It was a Wednesday. You were rocking back on your heels, balancing on that thick yellow line that runs along the subway platform, waiting for the F train. I didn't know it was you until it was too late, and then you were gone. Again. You said my name; I saw it on your lips. I tried to will the train to stop, just so I could say hello. After seeing you, all of the youthful feelings and memories came flooding back to me, and now I've spent the better part of a month wondering what your life is like. I might be totally out of my mind, but would you like to get a drink with me and catch up on the last decade and a half? M

10 minutes gone parents guide: Dyslexia Dr Helen Likerian, Dr Valerie Muter, 2012-08-31 Many children spend their entire school lives struggling with their school work. Research has shown that at least 10-15 per cent of children with apparently normal learning ability will have a significant problem with school learning. They may feel that whatever they do it is not good enough - either for their parents, their teachers or indeed themselves. This can often result in feelings of demoralisation, and even alienation from learning and school. This book aims to address these issues and to help parents understand and deal with them. Dyslexia: A Parents' Guide starts by correcting common misconceptions of learning difficulties that are rife in the press and popular literature, and addresses the conflicting approaches and advice from 'experts'. This authoritative guide then moves through diagnosis - with information on dyslexia, dyspraxia, ADHD, discalculia and more - to offering practical and easy tips to enable parents to help their child overcome their learning difficulty. Both authors are practising psychologists with extensive knowledge and experience of children's learning difficulties. They will show parents how to develop a successful approach to assessing and subsequently managing their child's difficulties.

10 minutes gone parents guide: Lone Survivor Marcus Luttrell, 2007-06-12 Follow along a Navy SEAL's firsthand account of American heroism during a secret military operation in Afghanistan in this true story of survival and difficult choices. On a clear night in late June 2005, four U.S. Navy SEALs left their base in northern Afghanistan for the mountainous Pakistani border. Their mission was to capture or kill a notorious al Qaeda leader known to be ensconced in a Taliban stronghold surrounded by a small but heavily armed force. Less than twenty-four hours later, only one of those Navy SEALs remained alive. This is the story of fire team leader Marcus Luttrell, the sole survivor of Operation Redwing, and the desperate battle in the mountains that led, ultimately, to the largest loss of life in Navy SEAL history. But it is also, more than anything, the story of his teammates, who fought ferociously beside him until he was the last one left-blasted unconscious by a rocket grenade, blown over a cliff, but still armed and still breathing. Over the next four days, badly injured and presumed dead, Luttrell fought off six al Qaeda assassins who were sent to finish him, then crawled for seven miles through the mountains before he was taken in by a Pashtun tribe, who risked everything to protect him from the encircling Taliban killers. A six-foot-five-inch Texan, Leading Petty Officer Luttrell takes us, blow by blow, through the brutal training of America's warrior elite and the relentless rites of passage required by the Navy SEALs. He transports us to a monstrous battle fought in the desolate peaks of Afghanistan, where the beleaguered American team plummeted headlong a thousand feet down a mountain as they fought back through flying shale and rocks. In this rich, moving chronicle of courage, honor, and patriotism, Marcus Luttrell delivers one of the most powerful narratives ever written about modern warfare -- and a tribute to his teammates, who made the ultimate sacrifice for their country.

These are real violators engaged in compulsive criminally violent behavior including abduction, serial rape, sexual homicide, necrophilia, and other grotesque acts visited upon a vulnerable American population whose justice system fails to control. That is, this work departs from an antiseptic world of fiction for a frightening glimpse through the eyes of men, women, children who like cross-eyed creatures lurking on a different plane of existence see their wickedness through a mask of sanity. This work contains a full disclosure of three generations of incarcerated sexual offenders, from grandparents to their grandchildren, who committed the most horrendous acts towards others. In fact, there is no way of knowing how many victims this family assaulted, but in the final analysis there are specifics that you will come to understand about them that may change your point of view about that ultimate punishment available to us. The chapter on predatory pedophiles is a case study of three predators ranging in age from 17 to 52. It reveals the realities of pedophiles and explains why most pedophiles are rarely apprehended, and if they are, why they are eventually released from custody.
