 **10 september in history: The Life of John André** D. A. B. Ronald, 2019-01-19 This biography of Britain's spy chief during the Revolutionary War sheds new light on his conspiracy with Benedict

Arnold—and his mysterious capture. John André was head of the British Army's Secret Service in North America as the Revolutionary War entered its most decisive phase. In 1780, he masterminded the defection of the high-ranking American general Benedict Arnold. As the commander of West Point, Arnold agreed to turn the strategically vital fort over to the British. André and Arnold also conspired to kidnap George Washington. The secret negotiations between Arnold and André were protracted and fraught with danger. Arnold's wife Peggy acted as go-between until September 21st, 1780, when the two men met face to face in no-man's-land. But then André was captured forty-eight hours later, having broken every condition set by his commanding officer: he was within American lines, wearing civilian clothes, and carrying maps of West Point in his boots. When he announced himself as a spy, the Americans had no recourse. Tried by a military tribunal, he was convicted and hanged. André's motives for his apparent sacrifice have baffled historians for generations. This biography provides a provocative answer to this mystery—explaining not only why he acted as he did, but how he wished others to see his actions.

10 september in history: *The Secret History of RDX* Colin F. Baxter, 2018-05-18 During the early years of World War II, American ships crossing the Atlantic with oil and supplies were virtually defenseless against German U-boats. Bombs and torpedoes fitted with TNT barely made a dent in the tough steel plating that covered the hulls of Axis submarines and ships. Then, seemingly overnight, a top-secret, \$100 million plant appeared near Kingsport, Tennessee, manufacturing a sugar-white substance called Research Department Explosive (code name RDX). Behind thirty-eight miles of fencing, thousands of men and women synthesized 23,000 tons of RDX each month. Twice as deadly as TNT and overshadowed only by the atomic bomb, this ordnance proved to be pivotal in the Battle of the Atlantic and directly contributed to the Allied victory in WWII. In *The Secret History of RDX*, Colin F. Baxter documents the journey of the super-explosive from conceptualization at Woolwich Arsenal in England to mass production at Holston Ordnance Works in east Tennessee. He examines the debates between RDX advocates and their opponents and explores the use of the explosive in the bomber war over Germany, in the naval war in the Atlantic, and as a key element in the trigger device of the atomic bomb. Drawing on archival records and interviews with individuals who worked at the Kingsport powder plant from 1942 to 1945, Baxter illuminates both the explosive's military significance and its impact on the lives of ordinary Americans involved in the war industry. Much more than a technical account, this study assesses the social and economic impact of the military-industrial complex on small communities on the home front.

10 september in history: Ghost Wars Steve Coll, 2005-03-03 The news-breaking book that has sent shockwaves through the White House, *Ghost Wars* is the most accurate and revealing account yet of the CIA's secret involvement in al-Qaeda's evolution. Prize-winning journalist Steve Coll has spent years reporting from the Middle East, accessed previously classified government files and interviewed senior US officials and foreign spymasters. Here he gives the full inside story of the CIA's covert funding of an Islamic jihad against Soviet forces in Afghanistan, explores how this sowed the seeds of bin Laden's rise, traces how he built his global network and brings to life the dramatic battles within the US government over national security. Above all, he lays bare American intelligence's continual failure to grasp the rising threat of terrorism in the years leading to 9/11 - and its devastating consequences.

10 september in history: Bye-bye Charlie Corinne Manning, 2008 Bye-Bye Charlie is the first publication to interweave a large collection of oral testimony with documentary evidence to record the history of an Australian institution for intellectually disabled people. Established in 1887, Kew Cottages (now Kew Residential Services) is Australia's largest and oldest institution for people with intellectual disability. Originally built to care for children, the institution always housed a range of people from babies to the elderly. 'Bye-Bye Charlie' includes the stories of residents, staff, policymakers, parents and family members. It is a moving and at times distressing portrait of the institution, which traces shifts in attitudes towards the intellectually disabled over time. It concludes with the upcoming closure of the institution next year.--Provided by publisher.

10 september in history: Historical Dictionary of Israel Bernard Reich, David H. Goldberg, 2016-08-30 Since its creation, the State of Israel has been a magnet for attention. A country beset by conflict in its region and faced with the need to integrate mainly Jewish immigrants of disparate backgrounds into a modern and advanced democratic state and society, Israel has preoccupied observers, scholars and journalists since its independence in May 1948. Although a Jewish state Israel is also a democratic state that guarantees the rights of all of its citizens, including its large Arab and Moslem minority, in law and in practice. Israel and its modern history and politics have been the subject of substantial and often highly partisan literature, being hotly and vigorously debated both at home and abroad. This third edition of Historical Dictionary of Israel contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 1100 cross-referenced entries on significant persons, places, events, government institutions, political parties, and battles, as well as entries on Israel's economy, society, and culture. This book is an excellent access point for students, researchers, and anyone wanting to know more about the various diplomatic and political personalities, institutions, organizations, events, concepts, and documents that together define the political life of the Jewish state of Israel.

10 september in history: *The Myth of American Diplomacy* Walter L. Hixson, 2008-10-01 In this major reconceptualization of the history of U.S. foreign policy, Walter Hixson engages with the entire sweep of that history, from its Puritan beginnings to the twenty-first century's war on terror. He contends that a mythical national identity, which includes the notion of American moral superiority and the duty to protect all of humanity, has had remarkable continuity through the centuries, repeatedly propelling America into war against an endless series of external enemies. As this myth has supported violence, violence in turn has supported the myth. *The Myth of American Diplomacy* shows the deep connections between American foreign policy and the domestic culture from which it springs. Hixson investigates the national narratives that help to explain ethnic cleansing of Indians, nineteenth-century imperial thrusts in Mexico and the Philippines, the two World Wars, the Cold War, the Iraq War, and today's war on terror. He examines the discourses within America that have continuously inspired what he calls our "pathologically violent foreign policy." The presumption that, as an exceptionally virtuous nation, the United States possesses a special right to exert power only encourages violence, Hixson concludes, and he suggests some fruitful ways to redirect foreign policy toward a more just and peaceful world.

10 september in history: The 22nd Michigan Infantry and the Road to Chickamauga John Cohassey, 2019-01-14 Called upon to take a hill at the 1863 Battle of Chickamauga, the untested 22nd Michigan Infantry helped to save General George H. Thomas' right flank. Formed in 1862, the regiment witnessed slavery and encountered runaways in the border state of Kentucky, faced near starvation during the siege of Chattanooga and marched to Atlanta as General Thomas' provost guard. This history explores the 22nd's day-to-day experiences in Kentucky, Tennessee and Georgia. The author describes the challenges faced by volunteer farm boys, shopkeepers, school teachers and lawyers as they faced death, disease and starvation on battlefields and in Confederate prisons.

10 september in history: *Historical Dictionary of Nepal* Nanda R. Shrestha, 2017-02-10 Nepal

is a living example of contrasts and contradictions. It is a country that was born in medieval times, grew up in the 16th century, and now finds itself engulfed in the high-tech gadgets and material marvels of the 21st century. Nepal has its share of problems which include inadequate economic development and social infrastructure, poverty and corruption, plus worsening pollution, but now it finally has relative peace and quiet after a hasty Maoist uprising. Indeed, it has passed through several democratic elections, and finally seems to be getting on the right track. This second edition of *Historical Dictionary of Nepal* contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about Nepal.

10 september in history: *Oliver Cromwell: Commander in Chief* Ronald Hutton, 2024-10-29 The second volume in an acclaimed biography of Oliver Cromwell, from the capture of Charles I to the expulsion of the Long Parliament. In 1647, the Parliamentarians were divided. They had won the first civil war and the king was in custody, but disagreements over the way forward had led to a stalemate. As the leader of one party, Oliver Cromwell found himself again at the centre of events. In the second volume of his pioneering biography, Ronald Hutton traces Cromwell's career from 1647 through to his seizure of supreme power. These decisive years saw the execution of Charles I and the establishment of the Commonwealth of England, as well as notorious and savage campaigns in Ireland and Scotland. Cromwell's political and military leadership were well honed after years of practice, but this was also the period of his greatest ruthlessness and brutality. This groundbreaking account reveals a different kind of Cromwell, showing how he navigated the many forces ranged against him—and rose to the pinnacle of his power.

10 september in history: *Historical Dictionary of U.S. Diplomacy since the Cold War* Tom Lansford, 2007-09-10 The post-Cold War diplomacy of the United States evolved in stages that reflected changes in the international system. Through the 1990s, the nation's foreign affairs were marked by an evolution away from the post-World War II focus on security and superpower competition to a more multifaceted and nuanced series of policies that included economic concerns, social and cultural issues, and environmental matters. However, an escalating series of terrorist attacks that culminated in the 11 September 2001 strikes on New York and Washington, D.C. led to the reemergence of security as the main foreign policy issue for the United States. The subsequent American-led 'war on terror' mirrored the Cold War in its goals, and the administration of President George W. Bush endeavored to build a multinational counterterrorism coalition that paralleled the Western alliance of the bipolar era. The *Historical Dictionary of U.S. Diplomacy Since the Cold War* is a concise overview of the main figures, conflicts, events, and policies of the United States in the post-Cold War era. The study explores the main elements of U.S. foreign policy and the regional and international reaction to American policies from the presidency of George H. W. Bush to that of George W. Bush. Through its entries, the book analyzes the underlying themes of U.S. diplomacy and the new policies formulated and implemented in response to broad changes in global politics. The book includes a chronology of events from 1991 to 2007, an introduction that highlights important themes of the era, cross-referenced entries on significant topics, a detailed bibliography, and appendixes of major documents. The work is ideal for both public and academic libraries, the general public, or the specialist looking for a reference tool in this area.

10 september in history: *Austrian Foreign Policy in Historical Context* G  nter Bischof, Anton Pelinka, Michael Gehler, In 2005, Austria celebrated the sixtieth anniversary of its liberation from the Nazi regime and the fiftieth anniversary of the State Treaty that ended the occupation and returned full sovereignty to the country. This volume of *Contemporary Austrian Studies* covers

foreign policy in the twentieth century. It offers an up-to-date status report of Austria's foreign policy trajectories and diplomatic options. Eva Nowotny, the current Austrian ambassador to the United States, introduces the volume with an analysis of the art and practice of Austrian diplomacy in historical perspective. Ambassador Wolfgang Petritsch analyzes recent Balkans diplomacy as an EU emissary in the Bosnian and Kosovo crises. Historians Günther Kronenbitter, Alexander Lassner, Günter Bischof, Joanna Granville, and Martin Kofler provide historical case studies of pre-and post-World War I and World War II Austrian diplomacy, Austria's dealings with the Hungarian crisis of 1956, and its mediation between Kennedy and Khrushchev in the early 1960s. Political scientists Romain Kirt, Stefan Mayer, and Gunther Hauser analyze small states' foreign policymaking in a globalizing world, Austrian federal states' separate regional policy initiatives abroad and Austria's role vis-à-vis current European security initiatives. Michael Gehler periodizes post-World War II Austrian foreign policy regimes and provides a valuable summary of both the available archival and printed diplomatic source collections. A Historiography Roundtable is dedicated to the Austrian Occupation decade. Günter Bischof reports on the state of occupation historiography; Oliver Rathkolb on the historical memory of the occupation; Michael Gehler on the context of the German question; and Wolfgang Mueller and Norman Naimark on Stalin's Cold War and Soviet policies towards Austria during those years. Review essays and book reviews on art theft, anti-Semitism, the Hungarian crisis of 1956, among other topics, complete the volume.

10 september in history: Debating New Approaches to History Marek Tamm, Peter Burke, 2018-10-04 With its innovative format, *Debating New Approaches to History* addresses issues currently at the top of the discipline's theoretical and methodological agenda. In its chapters, leading historians of both older and younger generations from across the Western world and beyond discuss and debate the main problems and challenges that historians are facing today. Each chapter is followed by a critical commentary from another key scholar in the field and the author's response. The volume looks at topics such as the importance and consequences of the 'digital turn' in history (what will history writing be like in a digital age?), the challenge of posthumanist theory for history writing (how do we write the history of non-humans?) and the possibilities of moving beyond traditional sources in history and establishing a dialogue with genetics and neurosciences (what are the perspectives and limits of the so-called 'neurohistory'?). It also revisits older debates in history which remain crucial, such as what the gender approach can offer to historical research or how to write history on a global scale. *Debating New Approaches to History* does not just provide a useful overview of the new approaches to history it covers, but also offers insights into current historical debates and the process of historical method in the making. It demonstrates how the discipline of history has responded to challenges in society – such as digitalization, globalization and environmental concerns – as well as in humanities and social sciences, such as the 'material turn', 'visual turn' or 'affective turn'. This is a key volume for all students of historiography wanting to keep their finger on the pulse of contemporary thinking in historical research.

10 september in history: The History of Bethlem Jonathan Andrews, Asa Briggs, Roy Porter, Penny Tucker, Keir Waddington, 2013-06-17 Bethlem Hospital, popularly known as Bedlam, is a unique institution. Now seven hundred and fifty years old, it has been continuously involved in the care of the mentally ill in London since at least the 1400s. As such it has a strong claim to be the oldest foundation in Europe with an unbroken history of sheltering and treating the mentally disturbed. During this time, Bethlem has transcended locality to become not only a national and international institution, but in many ways, a cultural and literary myth. *The History of Bethlem* is a scholarly history of this key establishment by distinguished authors, including Asa Briggs and Roy Porter. Based upon extensive research of the hospital's archives, the book looks at Bethlem's role within the caring institutions of London and Britain, and provides a long overdue re-evaluation of its place in the history of psychiatry.

10 september in history: 80 Old Testament Characters of World History: Chronological, Historical and Archaeological Evidence Gerard Gertoux, 2016-02-27 Despite the fact that the name of many characters mentioned in the Old Testament, like David, King of Israel, have been

recently confirmed by archaeology as well as their epoch and the events in which they were involved, most archaeologists continue to deny the historicity of the Bible they view as pious fiction or a mythical account. They argue that the major events in the Bible such as the victory of Abraham against Chedorlaomer, an unknown king of Elam around 2000 BCE, the victory of Moses against an unknown Pharaoh around 1500 BCE or the victory of Esther, an unknown Persian Queen, against an unknown vizier of Xerxes, never existed because they left absolutely no evidence. They also explain that according to what we know today, these events could not have occurred. These logical arguments are impressive but a precise chronological analysis based on absolute dates, coupled with a rigorous historical investigation, shows that all those major events really took place at the dates and places indicated.

10 september in history: *Still Here* Bunty Avieson, Fiona Giles, Sue Joseph, 2019-04-12 *Still Here: Memoirs of Trauma, Illness and Loss* explores the history, ethics, and cross-cultural range of memoirs focusing on illness, death, loss, displacement, and other experiences of trauma. From Walt Whitman's Civil War diaries to kitchen table survivor-to-survivor storytelling following Hurricane Katrina, from social media posts from a refugee detention centre, to poetry by exiles fleeing war zones, the collection investigates trauma memoir writing as healing, as documentation of suffering and disability, and as political activism. Editors Bunty Avieson, Fiona Giles and Sue Joseph have brought together this scholarly collection as a sequel to their earlier *Mediating Memory* (Routledge 2018), providing a closer look at the specific concerns of trauma memoir, including conflict and intergenerational trauma; the therapeutic potential and risks of trauma life writing; its ethical challenges; and trauma memoir giving voice to minority experiences.

10 september in history: *Strangers & Pilgrims* Catherine A. Brekus, 1998 Margaret Meuse Clay, who barely escaped a public whipping in the 1760s for preaching without a license; Old Elizabeth, an ex-slave who courageously traveled to the South to preach against slavery in the early nineteenth century; Harriet Livermore, who spoke in front of Congress four times between 1827 and 1844—these are just a few of the extraordinary women profiled in this, the first comprehensive history of female preaching in early America. Drawing on a wide range of sources, Catherine Brekus examines the lives of more than a hundred female preachers—both white and African American—who crisscrossed the country between 1740 and 1845. Outspoken, visionary, and sometimes contentious, these women stepped into the pulpit long before twentieth-century battles over female ordination began. They were charismatic, popular preachers, who spoke to hundreds and even thousands of people at camp and revival meetings, and yet with but a few notable exceptions—such as Sojourner Truth—these women have essentially vanished from our history. Recovering their stories, Brekus shows, forces us to rethink many of our common assumptions about eighteenth- and nineteenth-century American culture.

10 september in history: *Jesus and the Chaos of History* James G. Crossley, 2015 In *Jesus and the Chaos of History*, James Crossley looks at the way the earliest traditions about Jesus interacted with a context of social upheaval and the ways in which this historical chaos of the early first century led to a range of ideas which were taken up, modified, ignored, and reinterpreted in the movement that followed. Crossley examines how the earliest Palestinian tradition intersected with social upheaval and historical change and how accidental, purposeful, discontinuous, contradictory, and implicit meanings in the developments of ideas appeared in the movement that followed. He

considers the ways seemingly egalitarian and countercultural ideas co-exist with ideas of dominance and power and how human reactions to socio-economic inequalities can end up mimicking dominant power. In this case, the book analyzes how a Galilean protest movement laid the foundations for its own brand of imperial rule. This evaluation is carried out in detailed studies on the kingdom of God and Christology, sinners and purity, and gender and revolution.

10 september in history: Barcelona: An Urban History of Science and Modernity, 1888-1929 Oliver Hochadel, Agustí Nieto-Galan, 2016-04-14 The four decades between the two Universal Exhibitions of 1888 and 1929 were formative in the creation of modern Barcelona. Architecture and art blossomed in the work of Antoni Gaudi and many others. At the same time, social unrest tore the city apart. Topics such as art nouveau and anarchism have attracted the attention of numerous historians. Yet the crucial role of science, technology and medicine in the cultural makeup of the city has been largely ignored. The ten articles of this book recover the richness and complexity of the scientific culture of end of the century Barcelona. The authors explore a broad range of topics: zoological gardens, natural history museums, amusement parks, new medical specialties, the scientific practices of anarchists and spiritists, the medical geography of the urban underworld, early mass media, domestic electricity and astronomical observatories. They pay attention to the agenda of the bourgeois elites but also to hitherto neglected actors: users of electric technologies and radio amateurs, patients in clinics and dispensaries, collectors and visitors of museums, working class audiences of public talks and female mediums. Science, technology and medicine served to exert social control but also to voice social critique. *Barcelona: An urban history of science and modernity (1888-1929)* shows that the city around 1900 was both a creator and facilitator of knowledge but also a space substantially transformed by the appropriation of this knowledge by its unruly citizens.

10 september in history: Blind over Cuba David M. Barrett, Max Holland, 2012-09-01 In the aftermath of the Cuban Missile Crisis, questions persisted about how the potential cataclysm had been allowed to develop. A subsequent congressional investigation focused on what came to be known as the "photo gap": five weeks during which intelligence-gathering flights over Cuba had been attenuated. In *Blind over Cuba*, David M. Barrett and Max Holland challenge the popular perception of the Kennedy administration's handling of the Soviet Union's surreptitious deployment of missiles in the Western Hemisphere. Rather than epitomizing it as a masterpiece of crisis management by policy makers and the administration, Barrett and Holland make the case that the affair was, in fact, a close call stemming directly from decisions made in a climate of deep distrust between key administration officials and the intelligence community. Because of White House and State Department fears of "another U-2 incident" (the infamous 1960 Soviet downing of an American U-2 spy plane), the CIA was not permitted to send surveillance aircraft on prolonged flights over Cuban airspace for many weeks, from late August through early October. Events proved that this was precisely the time when the Soviets were secretly deploying missiles in Cuba. When Director of Central Intelligence John McCone forcefully pointed out that this decision had led to a dangerous

void in intelligence collection, the president authorized one U-2 flight directly over western Cuba—thereby averting disaster, as the surveillance detected the Soviet missiles shortly before they became operational. The Kennedy administration recognized that their failure to gather intelligence was politically explosive, and their subsequent efforts to influence the perception of events form the focus for this study. Using recently declassified documents, secondary materials, and interviews with several key participants, Barrett and Holland weave a story of intra-agency conflict, suspicion, and discord that undermined intelligence-gathering, adversely affected internal postmortems conducted after the crisis peaked, and resulted in keeping Congress and the public in the dark about what really happened. Fifty years after the crisis that brought the superpowers to the brink, *Blind over Cuba: The Photo Gap and the Missile Crisis* offers a new chapter in our understanding of that pivotal event, the tensions inside the US government during the cold war, and the obstacles Congress faces when conducting an investigation of the executive branch.

10 september in history: *Containing the Atom* J. Samuel Walker, 1992-01-01 The late 1960s saw an extraordinary growth in the American nuclear industry: dozens of plants of unprecedented size were ordered throughout the country. Yet at the same time, public concern about the natural environment and suspicion of both government and industry increased dramatically. *Containing the Atom* is the first scholarly history of nuclear power regulation during those tumultuous years. J. Samuel Walker focuses on the activities of the U.S. Atomic Energy Commission, the agency entrusted with the primary responsibility for the safety of nuclear power, and shows that from the beginning the AEC faced a paradox: it was charged with both promoting and controlling the nuclear power industry. Out of this paradox grew severe tensions, which Walker discusses in detail. His balanced evaluation of the issues and the positions taken by the AEC and others makes this study an invaluable resource for all those interested in the continuing controversies that surround nuclear energy. 10 september in history: *Talk of the Town* Fredrick Marcel Spletstoser, 2005 As the sleepy courthouse town of Alexandria, Louisiana, began to recover from the devastation and trauma of the

Civil War and Reconstruction, the Daily Town Talk appeared. Nicknamed Alexandria's postage stamp paper by a rival publication, the Town Talk aimed to be the best daily outside of New Orleans and became one of the most successful regional newspapers of its kind. Fredrick M. Spletstoser tells the story of the paper's first sixty years and of the town's triumphs and setbacks during that same time. An unpretentious country journal, the Town Talk would become in the second half of the twentieth century a pioneer in newspaper technology under the leadership of Joe D. Smith, one of the most respected names in American journalism. The Town Talk was inextricably bound up with - and often directly behind - transformations in Alexandria's urban landscape, the development of municipal services and education, efforts to attract industry and cultivate trade, and the stimulation of surrounding agribusiness. occurred across the turn of the century, the large and enduring military presence in central Louisiana, and the impact of Huey P. Long's political career. Along the way, he narrates colorful stories culled from the Town Talk's pages and describes the fascinating family members who published the paper during this entire period. Talk of the Town illustrates the role provincial journalism played in the planning and expansion of towns throughout the country as it relates the engrossing history of one southern place and the people who lived there.

10 september in history: American Zouaves, 1859-1959 Daniel J. Miller, 2020-01-09 The elite French Zouaves, with their distinctive, colorful uniforms, set an influential example for volunteer soldiers during the Civil War and continued to inspire American military units for a century. Hundreds of militia companies adopted the flamboyant uniform to emulate the gallantry and martial tradition of the Zouaves. Drawing on fifty years of research, this volume provides a comprehensive state-by-state catalog of American Zouave units, richly illustrated with rare and previously unpublished photographs and drawings. The author dispels many misconceptions and errors that have persisted over the last 150 years.
