History and Political Systems: Questions covering key historical events and the evolution of the American political system help contextualize current civic processes. Again, culturally relevant framing is crucial.

State and Local Government: Understanding the structure and functions of state and local governments is essential for active participation at the community level.

Current Events and Issues: Including questions about relevant contemporary issues fosters informed civic engagement.

100 civics questions spanish: Why Learn History (When It's Already on Your Phone)

Sam Wineburg, 2018-09-17 A look at how to teach history in the age of easily accessible—but not always reliable—information. Let's start with two truths about our era that are so inescapable as to have become clichés: We are surrounded by more readily available information than ever before. And a huge percent of it is inaccurate. Some of the bad info is well-meaning but ignorant. Some of it is deliberately deceptive. All of it is pernicious. With the Internet at our fingertips, what's a teacher of history to do? In *Why Learn History (When It's Already on Your Phone)*, professor Sam Wineburg has the answers, beginning with this: We can't stick to the same old read-the-chapter-answer-the-question snoozefest. If we want to educate citizens who can separate fact from fake, we have to equip them with new tools. Historical thinking, Wineburg shows, has nothing to do with the ability to memorize facts. Instead, it's an orientation to the world that cultivates reasoned skepticism and counters our tendency to confirm our biases. Wineburg lays out a mine-filled landscape, but one that with care, attention, and awareness, we can learn to navigate. The future of the past may rest on our screens. But its fate rests in our hands. Praise for *Why Learn History (When It's Already on Your Phone)* "If every K-12 teacher of history and social studies read just three chapters of this book—"Crazy for History," "Changing History . . . One Classroom at a Time," and "Why Google Can't Save Us"—the ensuing transformation of our populace would save our democracy." —James W. Lowen, author of *Lies My Teacher Told Me* and *Teaching What Really Happened* "A sobering and urgent report from the leading expert on how American history is taught in the nation's schools. . . . A bracing, edifying, and vital book." —Jill Lepore, *New Yorker* staff writer and author of *These Truths* "Wineburg is a true innovator who has thought more deeply about the relevance of history to the Internet—and vice versa—than any other scholar I know. Anyone interested in the uses and abuses of history today has a duty to read this book." —Niall Ferguson, senior fellow, Hoover Institution, and author of *The Ascent of Money* and *Civilization*

100 civics questions spanish: *I Survived the Great Molasses Flood, 1919 (I Survived #19)*

Lauren Tarshis, 2019-09-03 One hundred years ago, a killer wave of molasses struck a crowded Boston neighborhood. Discover the story of this strange disaster in the next book in the New York Times bestselling *I Survived* series. There were warning signs that the molasses tank would break. The steel sides moaned and groaned. Molasses oozed from its seams. But the people of Boston's North End -- mostly poor immigrants -- were powerless to complain to the big molasses company. On a bright January day in 1919, the tank finally broke and almost three million gallons of molasses rushed the neighborhood. At 15 feet tall, 160 feet wide, and traveling at 35 miles per hour, the gooey wave was more destructive than any flood of water would have been. 100 civics questions spanish: *Teach Yourself How to Learn* Sandra Yancy McGuire, 2023-07-03 Following up on her acclaimed *Teach Students How to Learn*, that describes teaching strategies to facilitate dramatic improvements in student learning and success, Sandra McGuire here presents these secrets direct to students. Her message is that Any student can use simple, straightforward strategies to start making A's in their courses and enjoy a lifetime of deep, effective learning. Beginning with explaining how expectations about learning, and the study efforts required, differ between college and secondary school, the author introduces her readers, through the concept of metacognition, to the importance and powerful consequences of understanding themselves as learners. This framework and the recommended strategies that support it are useful for anyone moving on to a more advanced stage of education, so this book also has an intended audience of students preparing to go to high school, graduate school, or professional school. In a conversational tone, and liberally illustrated by anecdotes of past students, the author combines introducing readers to concepts like Bloom's Taxonomy (to illuminate the difference between studying and

learning), fixed and growth mindsets, as well as to what brain science has to tell us about rest, nutrition and exercise, together with such highly specific learning strategies as how to read a textbook, manage their time and take tests. With engaging exercises and thought-provoking reflections, this book is an ideal motivational and practical text for study skills and first year experience courses.
