100th day of school worksheets: Dare to Lead Brené Brown, 2018-10-11 In her #1 NYT bestsellers, Brené Brown taught us what it means to dare greatly, rise strong and brave the wilderness. Now, based on new research conducted with leaders, change makers and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Leadership is not about titles, status and power over people. Leaders are people who hold themselves accountable for recognising the potential in people and ideas, and developing that potential. This is a book for everyone who is ready to choose courage over comfort, make a difference and lead. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it and work to align authority and accountability. We don't avoid difficult conversations and situations; we lean into the vulnerability that's necessary to do good work. But daring leadership in a culture that's defined by scarcity, fear and uncertainty requires building courage skills, which are uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the same time we're scrambling to figure out what we have to offer that machines can't do better and faster. What can we do better? Empathy, connection and courage to start. Brené Brown spent the past two decades researching the emotions that give meaning to our lives. Over the past seven years, she found that leaders in organisations ranging from small entrepreneurial start-ups and family-owned businesses to non-profits, civic organisations and Fortune 50 companies, are asking the same questions: How do you cultivate braver, more daring leaders? And, how do you embed the value of courage in your culture? *Dare to Lead* answers these questions and gives us actionable strategies and real examples from her new research-based,

courage-building programme. Brené writes, 'One of the most important findings of my career is that courage can be taught, developed and measured. Courage is a collection of four skill sets supported by twenty-eight behaviours. All it requires is a commitment to doing bold work, having tough conversations and showing up with our whole hearts. Easy? No. Choosing courage over comfort is not easy. Worth it? Always. We want to be brave with our lives and work. It's why we're here.'

100th day of school worksheets: The First 100 Days in the Main Office Alan Jones, 2017-12-01 This book presents a series of cultural situations that could occur within the first one-hundred days of a school year: responding to entrenched vocabularies and behaviors, addressing professional and instructional bad habits, enacting alternative teaching scripts, leveraging a policy blindside, redefining the goals and practices of teams, and implementing outside-the-box programs. Each cultural situation offers a new school leader the opportunity to redefine the goals, values, and practices of an entrenched school culture—the Central High way. Administrators reading the title of this book may view one hundred days as an arbitrary number picked out of administrative thin air. I argue that disrupting and replacing organizational and instructional routines is a race against time. Every school day that goes by without some sign of creative destruction is one more day that

comfortable organizational and instructional routines live on in main offices and classrooms. The idea for this book originated from a question I asked a former student of mine who had just signed a contract to become the principal of a high school. We were discussing the complexities of changing a school culture when I asked the following question: "What would you do on the first day in your new office to change your school's culture?" The response to that question described a series of managerial routines that all new administrators have learned to perform as they move from the classroom to the main office: organize the office, meet staff, tour the building, write a newsletter, examine data, and visit community venues. Nothing in this conversation described strategies for redefining the beliefs and values of an entrenched school culture. With this conversation in mind, I made it a point in my formal and informal contacts with school administrators to always ask the question: "What would you do in the first day in your new office to change your school's culture?" The most common responses involved reviewing district documents, touring facilities, meeting staff, listening to stakeholders and managing systems. In each conversation, school leaders populated their responses with the current jargon of school reform: learning communities, data mining, standards-based curriculum, differentiated learning, common core standards, formative assessment, race to the top, continuous improvement, etc. While these responses encompass reasonable behaviors on the first day in the main office, not one of these actions possesses the capacity to connect educational values expressed in school mission statements—why are we here—to daily organizational and instructional routines. Each activity gives the appearance of leading, but produces no connections between beliefs, values, and practices. Although none of these responses would make or break a school culture, they do represent a pattern of thinking and behaving that holds out little possibility of fundamentally changing a school's culture.
