4 week 10 mile training plan: 80/20 Triathlon Matt Fitzgerald, David Warden, 2018-09-18 A breakthrough program for triathletes -- beginner, intermediate, and advanced -- showing how to balance training intensity to maximize performance -- from a fitness expert and elite coach. Cutting-edge research has proven that triathletes and other endurance athletes experience their greatest performance when they do 80 percent of their training at low intensity and the remaining 20 percent at moderate to high intensity. But the vast majority of recreational triathletes are caught in the so-called moderate-intensity rut, spending almost half of their time training too hard--harder than the pros. Training harder isn't smarter; it actually results in low-grade chronic fatigue that prevents recreational athletes from getting the best results. In *80/20 Triathlon*, Matt Fitzgerald and David Warden lay out the real-world and scientific evidence, offering concrete tips and strategies, along with complete training plans for every distance--Sprint, Olympic, Half-Ironman, and Ironman--to help athletes implement the 80/20 rule of intensity balance. Benefits include reduced fatigue and injury risk, improved fitness, increased motivation, and better race results.

4 week 10 mile training plan: RUN Fitzgerald Matt, 2010-05-24 Most serious runners don't realize their potential. They simply stop getting faster and don't understand why. The reason is simple: most runners are unable to run by feel. The best elite runners have learned that the key to faster running is to hear what their bodies are telling them. Drawing on new research on endurance sports, best-selling author Matt Fitzgerald explores the practices of elite runners to explain why their techniques can be effective for all runners. *RUN: The Mind-Body Method of Running by Feel* will help runners reach their full potential by teaching them how to train in the most personalized and adaptable way. Fitzgerald's mind-body method will revolutionize how runners think about training, their personal limits, and their potential. *RUN* explains how to interpret emotional and physical messages like confidence, enjoyment, fatigue, suffering, and aches and pains. *RUN* guides readers toward the optimal balance of intensity and enjoyment, volume and recovery, repetition and variation. As the miles add up, runners will become increasingly confident that they are doing the right training on the right day, from one season to the next. *RUN* marks the start of a better way to train. The culmination of science and personal experience, the mind-body method of running by feel will lead runners to faster, more enjoyable training and racing.

4 week 10 mile training plan: Smart Marathon Training Jeff Horowitz, 2011-10-01 Old-school marathon training plans ask runners to crank out 70 to 100 miles a week. It's no wonder those who make it to the start line are running ragged. *Smart Marathon Training* maps out a

healthier, more economical approach to training that emphasizes quality over quantity. With more than 75 detailed exercises plus six easy-to-follow training plans for half and full marathons, Smart Marathon Training will get you to the starting line feeling refreshed and ready to run your best race yet. This innovative program eliminates junk miles, paring down training to three essential runs per week and adding a dynamic strength and cross-training program to build overall fitness. Runners will train for their best performance in less time and avoid the injuries, overtraining, and burnout that come from running too much. Smart Marathon Training builds up a runner's body to resist injury. Runners gain the strength they need to run long using functional exercises that target the hips, glutes, and quads. Running is a full-body sport, so this training program also builds a strong core and upper body to avoid injuries that begin above the waist. No one fakes a marathon or half-marathon--everyone has to do the work. But Smart Marathon Training replaces long, grinding miles with low-impact cross-training. Horowitz outlines a cycling plan to complement run workouts, boosting base fitness while saving runners' bodies for their best runs.
