It is the responsibility of the school, instructor, to know the laws relating to security guard activities for the State, County or City in which they train, and for which they train. This Armed Security Guard Training Manual was developed to meet the most stringent standard. It represents 40 hours of study materials,. It also includes 10 hours legal section that discusses Weapons and Firearms and the use of deadly force. These 10 hours of the curriculum are modeled after Florida laws, which regulates heavily security guard activities. 40 hour security training: Developing a Security Training Program Joseph McDonald, 2024-07-22 Developing a Security Training Program focuses on how to establish a comprehensive training program for a security department from the ground up. This book highlights formal curriculum development, consistent and continual training, and the organizational benefits including how such security training will be a value-add. It's long overdue for the industry to revisit old security training models from the past — to both general staff as well as to the dedicated security staff and professionals within organizations — and examine and revamp such with a fresh perspective. Given the current, dynamic environment for businesses — and the threats businesses face — it is important that any such training consider all procedures and policies, and be fully integrated into the company culture. This includes maintaining an eye on budgetary and financial

costs while recognizing the need to budget for more training resources to maintain resilience and adaptability to current challenges and future changes to the environment. There is only one way to prepare your staff and that is through comprehensive and consistent training. Developing a Security Training Program provides the blueprint and tools for professionals to provide ongoing, targeted, and comprehensive security training at a low, budget-friendly cost.
