4238 business center drive charlotte north carolina 28214: The Mountains Within Ram Thakur, 2021-11-22 The story of 'The Mountains Within' is prototypical of the people who grew into first-ever consciousness of their own identities from the obscurity of innumerable socio-cultural microcosms that had existed at the subterranean level for centuries and millennia over the length and breadth of India before the Independence. The story moves from present to past to future with the main protagonist's grand-daughter setting out to reconstruct the life story of her grand-father she admires. The story is contemporary and relevant to a whole lot of Indians who finished their journeys of existence at the beginning of the new millennium. As they sit back, vacuous and dazed after the 'retirement', they cannot help ruminating over the past vis-à-vis their own lives. No matter how objective their self-appraisal, they cannot escape being dubbed a generation of ineffectual crusaders who fell from grace by succumbing to hypocrisies both personal and collective. They cannot exonerate themselves from the stigma of making a mess of a newly liberated country through moral turpitude and lack of individual will. They cannot face up to the younger generation of today and convince them they had no role to play in the fabrication of myths such 'Mera Bharat Mahaan'. There are no Nuremberg Trials for the crimes we commit within our minds and souls. However, if history is continuity between the past and the present, then 'The Mountains Within' does leave some doors open for Nuremberg Trials of the mind and the souls for these Indians.

4238 business center drive charlotte north carolina 28214: Resurrecting Church John Cleghorn, 2021-03-02 Resurrecting Church interweaves three strands. First, it is the remarkable turnaround story of Caldwell Presbyterian Church, which was on the edge of extinction when author John Cleghorn filled the role of pastor. Second, Cleghorn tells the story of his own growth and liberation from the myopia of privilege. Cleghorn traded his position as senior vice president of the nation's largest bank for ministry and the dusty and dated church office at Caldwell Presbyterian. The third strand includes the stories of several diverse congregations researched by the author. These congregations are examples of faith communities that have taken risks, deepening empathy and seeking justice. Through these stories, the book updates the same old conversation about church vitality in timely and surprising ways. Cleghorn raises these important questions: Can churches survive, even be resurrected, at the intersections of race, sexuality, class, and faith background? Can congregations be liberated by rebuilding around those on the margins who have been wounded by church? As more US cities become majority-minority, the mainline church remains stubbornly white and homogeneous. Church leaders and thinkers are seeking ways to build more racial diversity and radical welcome. This book provides hope and practical examples of how this can happen. Cleghorn declares, God is doing what Isaiah calls 'a new thing' in congregations where multiple types of diversity intersect, erecting spiritual hospitals for the wounded and marginalized. For the church, these intersections provide both a current lens of self-examination and avenues to growth in faith. With stories, people profiles, and insights from their leaders and members, this book breaks new ground with practical learning and lessons drawn from original research and the lived experience of intersectional churches across the US.

4238 business center drive charlotte north carolina 28214: Positive Psychiatry, Psychotherapy and Psychology Erick Messias, Hamid Peseschkian, Consuelo Cagande, 2020-01-24 For hundreds of years, psychology has looked into the dysfunctions and symptoms of the mind. It's only over the last few decades that the field has started to pay attention to what constitutes a functional and content life. Instead of using disease to understand health, positive psychology studies the components of a good life and helps people not only avoid mental health problems but develop happiness. The work done in positive psychology is now at a point where applications are being developed in positive psychotherapy and extended to those with psychiatric diagnoses in positive psychiatry. While these fields are a recent development they hold the promise of helping all of us live a fulfilled life. Medicine in general, and psychiatry in particular, suffers from a worldview that is symptom- and deficit-oriented. By adopting a positive approach, psychology, psychotherapy, and psychiatry add a more holistic, integrative, resource oriented, and preventive perspective. There is great urgency in developing resources and potentials in our patients, not only freeing them from their disorders. Psychiatrists and psychotherapists alike are incorporating these positive tools into their practices with positive clinical outcomes. Standing on the shoulders of pioneers like Nossrat Peseschkian, in positive psychotherapy, and Dilip Jeste, in positive psychiatry, this textbook is the first to bring together these innovations in one volume that will serve as an excellent resource for medical professionals looking to reap the benefits gained by the studies in these areas. Currently, the majority of texts that are available are targeting psychologists and researchers, whereas this book seeks to use positive psychology as the foundation on which the clinical applications are built. As such, this book will be of interest to psychiatrists, psychologists, social workers, and other mental health professionals. It may be used in educating a new generation of mental health professionals in these tenets that are expanding the reach of psychology, the practice of psychotherapy, and the scope of psychiatry.
