5000 to start a business: *The Customer-Funded Business* John Mullins, 2014-07-21 Who

needs investors? More than two generations ago, the venture capital community – VCs, business angels, incubators and others – convinced the entrepreneurial world that writing business plans and raising venture capital constituted the twin centerpieces of entrepreneurial endeavor. They did so for good reasons: the sometimes astonishing returns they've delivered to their investors and the astonishingly large companies that their ecosystem has created. But the vast majority of fast-growing companies never take any venture capital. So where does the money come from to start and grow their companies? From a much more agreeable and hospitable source, their customers. That's exactly what Michael Dell, Bill Gates and Banana Republic's Mel and Patricia Ziegler did to get their companies up and running and turn them into iconic brands. In *The Customer Funded Business*, best-selling author John Mullins uncovers five novel approaches that scrappy and innovative 21st century entrepreneurs working in companies large and small have ingeniously adapted from their predecessors like Dell, Gates, and the Zieglers: Matchmaker models (Airbnb) Pay-in-advance models (Threadless) Subscription models (TutorVista) Scarcity models (Vente Privee) Service-to-product models (GoViral) Through the captivating stories of these and other inspiring companies from around the world, Mullins brings to life the five models and identifies the questions that angel or other investors will – and should! – ask of entrepreneurs or corporate innovators seeking to apply them. Drawing on in-depth interviews with entrepreneurs and investors who have actually put these models to use, Mullins goes on to address the key implementation issues that characterize each of the models: when to apply them, how best to apply them, and the pitfalls to watch out for. Whether you're an aspiring entrepreneur lacking the start-up capital you need, an early-stage entrepreneur trying to get your cash-starved venture into take-off mode, an intrapreneur seeking funding within an established company, or an angel investor or mentor who supports high-potential ventures, this book offers the most sure-footed path to starting, financing, or growing your venture. John Mullins is the author of *The New Business Road Test* and, with Randy Komisar, the widely acclaimed *Getting to Plan B*.

5000 to start a business: General Explanations of the Administration's Fiscal Year 2014 Revenue Proposals Treasury Department, 2013-05-07 Each February when the President releases his proposed Federal Budget for the following year, Treasury releases the General Explanations of the Administration's Revenue Proposals. Known as the "Green Book" (or Greenbook), the document provides a concise explanation of each of the Administration's Fiscal Year 2014 tax proposals for raising revenue for the Government. This annual document clearly recaps each proposed change, reviewing the provisions in the Current Law, outlining the Administration's Reasons for Change to the law, and explaining the Proposal for the new law. Ideal for anyone wanting a clear summary of the Administration's policies and proposed tax law changes. While many of the proposals included in the FY 2014 budget are either the same or modified versions of proposals included in the Administration's FY 2013 budget, there are nearly 50 new revenue proposals in the 2014 budget, including closing loopholes and changing tax credits and incentives. Following are a few of the President's new revenue proposals that are explained in the Treasury FY2014 Green Book: Extending employment tax credits for hiring veterans; Requiring derivatives contracts to be marked to market and taxed as ordinary income on an annual basis; Repealing the domestic manufacturing deduction for oil and natural gas production; Establishing multiple incentives for investment in infrastructure, including "America Fast Forward" Bonds and increasing caps on other bonds; Taxing carried interest as ordinary income; Returning the estate tax to 2009 levels, modifying the recent estate tax exclusions and rates signed into law earlier this year under the American Taxpayer Relief Act; Prohibiting individuals from accumulating more than \$3 million in tax-preferred retirement accounts; and Capping the benefit of certain deductions (such as a charitable contribution deduction) to 28 percent for taxpayers at or above the 33% marginal tax rate.

5000 to start a business: Consensusland: A Cryptocurrency Utopia Mark Helfman, 2018-11-20
Entertaining and fascinating. The prose is crisp and engaging, the voice confident, and the plot skillfully imagined. -- Readers' Favorite Book Review
In this blockchain version of Gulliver's Travels, a businessman gets the offer of a lifetime from the tiny, island country of Consensusland, but the catch is troubling: give up everything he knows about business and finance on a leap of faith in cryptocurrency and the power of blockchain. Will he take that leap? Possibly the first fiction book about blockchain, Consensusland infuses a strong narrative with dramatic realism to show readers how the world changes when it uses cryptocurrency, not cash. This book answers, in a very clever and engaging way, the question of what a society running on the blockchain could look like. But really, it goes deeper than that, intertwining allegory to capture a lot of the current debate amidst the naysayers that are resistant to change. -- Misha Yurchenko, author, Bullish on Bitcoin

5000 to start a business: Write It Off! Deduct It! Bernard B. Kamoroff, 2015-01-12
Are you paying more taxes than you have to? There are more than nineteen million home-based businesses in the United States—56 percent of all businesses—and they generate \$102 billion in annual revenue. As far as the IRS is concerned, a home business is no different than any other business. But there is a difference: not only can you deduct the business expenses that every business is entitled to, you can turn personal, nondeductible expenses into tax-deductible business expenses—if you are careful to follow the rules. No tax software or accountant knows the details of your home-based business like you do, and the IRS is certainly not going to tell you about a deduction you failed to take. This invaluable book not only lists the individual items that are deductible in your home-based business—from utilities to that part of the home where you work—but also explains where to list them on your income tax forms.

5000 to start a business: The \$100 Startup Chris Guillebeau, 2012-05-08 Lead a life of adventure, meaning and purpose—and earn a good living. “Thoughtful, funny, and compulsively readable, this guide shows how ordinary people can build solid livings, with independence and purpose, on their own terms.”—Gretchen Rubin, author of the #1 New York Times bestseller *The Happiness Project* Still in his early thirties, Chris Guillebeau completed a tour of every country on earth and yet he's never held a “real job” or earned a regular paycheck. Rather, he has a special genius for turning ideas into income, and he uses what he earns both to support his life of adventure and to give back. Chris identified 1,500 individuals who have built businesses earning \$50,000 or more from a modest investment (in many cases, \$100 or less), and focused on the 50 most intriguing case studies. In nearly all cases, people with no special skills discovered aspects of their personal passions that could be monetized, and were able to restructure their lives in ways that gave them greater freedom and fulfillment. Here, finally, distilled into one easy-to-use guide, are the most valuable lessons from those who've learned how to turn what they do into a gateway to self-fulfillment. It's all about finding the intersection between your “expertise”—even if you don't consider it such—and what other people will pay for. You don't need an MBA, a business plan or even employees. All you need is a product or service that springs from what you love to do anyway, people willing to pay, and a way to get paid. Not content to talk in generalities, Chris tells you exactly how many dollars his group of unexpected entrepreneurs required to get their projects up and running; what these individuals did in the first weeks and months to generate significant cash; some of the key mistakes they made along the way, and the crucial insights that made the business stick. Among Chris's key principles: If you're good at one thing, you're probably good at something else; never teach a man to fish—sell him the fish instead; and in the battle between planning and action, action wins. In ancient times, people who were dissatisfied with their lives dreamed of finding magic lamps, buried treasure, or streets paved with gold. Today, we know that it's up to us to change our lives. And the best part is, if we change our own life, we can help others change theirs. This remarkable book will start you on your way.

5000 to start a business: *Four Thousand Weeks* Oliver Burkeman, 2021-08-10 AN INSTANT NEW YORK TIMES BESTSELLER Provocative and appealing . . . well worth your extremely limited time. —Barbara Spindel, *The Wall Street Journal* The average human lifespan is absurdly, insultingly brief. Assuming you live to be eighty, you have just over four thousand weeks. Nobody needs telling there isn't enough time. We're obsessed with our lengthening to-do lists, our overfilled inboxes, work-life balance, and the ceaseless battle against distraction; and we're deluged with advice on becoming more productive and efficient, and “life hacks” to optimize our days. But such techniques often end up making things worse. The sense of anxious hurry grows more intense, and still the most meaningful parts of life seem to lie just beyond the horizon. Still, we rarely make the connection between our daily struggles with time and the ultimate time management problem: the challenge of how best to use our four thousand weeks. Drawing on the insights of both ancient and contemporary philosophers, psychologists, and spiritual teachers, Oliver Burkeman delivers an entertaining, humorous, practical, and ultimately profound guide to time and time management. Rejecting the futile modern fixation on “getting everything done,” *Four Thousand Weeks* introduces readers to tools for constructing a meaningful life by embracing finitude, showing how many of the unhelpful ways we've come to think about time aren't inescapable, unchanging truths, but choices we've made as individuals and as a society—and that we could do things differently.
