515 s financial place: Financial Services Law and Compliance in Australia Gail Pearson, 2009-03-30 Up until the global credit crisis in 2008, 'Financial Services' was the fastest growing sector of the Australian economy. This growth has had profound implications for individuals, corporations and government. Following extensive review in the last part of the twentieth century, Australia put in place an overarching system for regulating all financial services, replacing a system that was based on separate regulation of products in individual industries. Focusing on the implications of the new system for retail clients - 'financial citizens' - Financial Services Law and Compliance in Australia provides a comprehensive account of the regulatory structure and a detailed analysis of the legislative framework, including discussion of the new regulatory bodies, the new licensing requirements for those wishing to enter the financial services market and the new obligations for those marketing or offering financial services to the public. This is an essential resource for those working in, and advising on, financial services, for students of financial services law, and for anyone needing to understand this new regime in Australia.

515 s financial place: **New South Wales Legislative Council Practice** Lynn Lovelock, John Evans, 2008 This first edition of New South Wales Legislative Council Practice brings together the history, practice and procedure of the New South Wales Legislative Council - the Upper House of the New South Wales Parliament, and the first and oldest legislative body in Australia. Since the advent of responsible government in New South Wales in 1856, the New South Wales Legislative Council has been the focus of continuous struggle regarding its composition, powers, role and very existence. However, from its tumultuous history, the Council has in recent years emerged as a democratically elected, powerful and effective upper house, in many ways mirroring the development of the Australian Senate. Today the Council performs key functions within the New South Wales system of government including representing the people and scrutinising the executive government as a 'House of Review'. The rich history of the New South Wales Legislative Council has brought with it a wealth of parliamentary precedent with which to guide modern practice and procedures in the House. While practitioners of parliamentary law and practice in New South Wales have long had access to authorities such as Erskine May's Parliamentary Practice and Odgers' Australian Senate Practice, the publication of New South Wales Legislative Council Practice will provide an essential reference book to understanding parliamentary privilege, practice and procedure in the New South Wales Upper House.

515 s financial place: Panic in the Loop Raymond B. Vickers, 2011-11-16 Relying on a broad array of records used together for the first time, *Panic in the Loop* reveals widespread fraud and insider abuse by bankers—and the complicity of corrupt politicians—that caused the Chicago banking debacle of 1932. It provides a fresh interpretation of the role played by bankers who turned the nation's financial crisis of the early 1930s into the decade-long Great Depression. It also calls for the abolition of secrecy that still permeates the bank regulatory system, which would have prevented the Enron fiasco and the financial meltdown of 2008. This book focuses on the recurrent failures of the financial system—the savings and loan crisis of the 1980s, the Enron debacle of the early 2000s, and finally the financial collapse of 2008. Because of regulatory secrecy, knowing what happened in Chicago in 1932 is critical to understanding the glaring problems in the regulation of American finance, in particular the lack of transparency, the abuse of financial institutions by insiders, and the capture of public institutions by insiders going through the revolving door between the private and public sectors. Eight decades later little has changed. The regulatory failures of the 1930s—especially the pervasive system of secrecy that allowed the fraud and insider abuse to flourish—were repeated during the collapse of 2008. Transparency would strike at the alliance between the executives of financial institutions and public officials, who caused the worst economic upheaval since the Great Depression.
