Over the last fifty years, job security has cratered as the institutions that insulated us from volatility have been swept aside by a fervent belief in the market. Now every working person in America today asks the same question: how secure is my job? In Temp, Louis Hyman explains how we got to this precarious position and

Although revenues from hydrocarbons account for more than 60% of GDP and 95% of exports, the country's low production costs and sizeable fiscal reserves mean it is well positioned to cope with lower oil prices in the short term. This is clear from the government's ongoing commitment to delivering projects outlined in the national development strategy, Kuwait Vision 2035. In the financial services sector, Kuwait continues to perform well, as a series of regulations put in place by the Central Bank of Kuwait in recent years have served to shore up the sector's recovery from the global economic downturn.
