But changing economic, political, and social conditions have often provoked sharp debate within the church about the obligation to give, priorities in giving, appropriate organization of religious charity, and the locus of authority over philanthropic resources. This first history of Catholic philanthropy in the United States chronicles the rich tradition of the church's charitable activities and the increasing tension between centralized control of giving and democratic participation.

57 society street charleston sc: **James Louis Petigru** William H. Pease, Jane H. Pease, 2002 A biography of one of South Carolina's leading antebellum lawyers and major political thinkers In the three decades before the Civil War, James Louis Petigru became the dean of the South Carolina bar and Charleston's leading exponent of the constitutional conservatism that placed federal union above state rights, the economic views that underlay Whig politics, and the liberal vision of individual rights enshrined in the Bill of Rights. In the only modern biography of Petigru, William H. and Jane H. Pease trace the rise to social and professional preeminence that not only placed him

among South Carolina's elite but also gave him national visibility. In doing so, they explore the workings of the extended family he headed, the politics of the state he loved, and the intricacies of the legal system he mastered. Central to Petigru's life was the ambiguity into which his competing loyalties plunged him. Loyal to his native state, he was a vocal opponent of its political values. Despite his dissent on the critical issues of nullification and secession, Petigru was elected attorney general, served as a state representative, and codified the state's laws. Born in South Carolina's upcountry to a family of Scots-Irish and Huguenot ancestry, Petigru achieved such high distinction as an attorney and politician that both Confederates and Yankees eulogized him when he died in Charleston in 1863. Throughout his career, his espousal of private property, individual liberty, the rule of law, and the United States Constitution remained unflinching and gave Petigru the wisdom and assurance to be the state's most notable dissenter.

57 society street charleston sc: *The Edge of the Swamp* Louis D. Rubin, Jr., 1999-03-01 The flowering of literary imagination known as the American Renaissance had few roots in the South. While Hawthorne, Emerson, Melville, Thoreau, and Whitman were creating a body of work that would endure, the only southern writer making a lasting contribution was Edgar Allan Poe. This failure on the part of antebellum southern writers has long been a subject of debate among students of southern history and literature. Now one of the region's most distinguished men of letters offers a cogently argued and gracefully written account of the circumstances that prevented early southern writers from creating transcendent works of art. Louis D. Rubin, Jr., brings forty years of critical integrity and imaginative involvement with the history and literature of the South to his informal inquiry into the foundations of the southern literary imagination. His exploration centers on the lives and works of three of the most important writers of the pre-Civil War South: Poe, William Gilmore Simms, and Henry Timrod. In a close and highly original reading of Poe's poetry and fiction, Rubin shows just how profoundly growing up in Richmond, Virginia, influenced that writer. The sole author of the Old South whose work has endured did not use southern settings or concern himself with his region's history or politics. Poe was, according to Rubin, in active rebellion against the middle-class community of Richmond and its materialistic values. Simms, on the other hand, aspired to the plantation society ideal of his native Charleston, South Carolina. He was not the most devoted and energetic of southern writers and one of the country's best-known and most respected literary figures before the Civil War. Rubin finds an explanation for much of the lost promise of antebellum southern literature in Simms's career. Here was a talented man who got caught up in the politically obsessed plantation community of Charleston, becoming an apologist for the system and an ardent defender of slavery. Timrod, also a Charlestonian native, was a highly gifted poet whose work attained the stature of literature when the Civil War gave him a theme. He was known as the poet laureate of the Confederacy. Only when his region was locked in a desperate military struggle for the right to exist did he suddenly find his enduring voice. Anyone interested in southern life and literature will welcome his provocative and engaging new look at southern writing from one of the region's most perceptive critics.

57 society street charleston sc: **This Bright Era of Happy Revolutions** Robert J. Alderson, 2008 As French consul to the Carolinas and Georgia, Citizen Mangourit was dispatched in 1792 to capitalize on the fledgling alliance between the young republics as opportunity to spread the French Revolution into Spanish holdings in the Floridas and Louisiana. In his analysis of the public and clandestine activities of Mangourit during his short tenure in Charleston, Alderson presents a case study of the challenge given to U.S. republicanism by its French counterpart. Mangourit tapped into a wide range of support for the French Revolution and its implications for South Carolina, drawing support for his cause from well-off planters and disenfranchised groups of backcountrymen, slaves, and women..In the end he was recalled before the invasion projects could be carried out. French and American republicanism quickly diverged, and the French lost their best opportunity to reclaim their

empire in North America. Aldersons study shows that the tension between republicanism and self-interest could be resolved at the local level, but republicanism could not be the only basis for national relations.

57 society street charleston sc: Hurricanes and Society in the British Greater Caribbean, 1624-1783 Matthew Mulcahy, 2008-08-11 Hurricanes created unique challenges for the colonists in the British Greater Caribbean during the seventeenth and eighteenth centuries. These storms were entirely new to European settlers and quickly became the most feared part of their physical environment, destroying staple crops and provisions, leveling plantations and towns, disrupting shipping and trade, and resulting in major economic losses for planters and widespread privation for slaves. In this study, Matthew Mulcahy examines how colonists made sense of hurricanes, how they recovered from them, and the role of the storms in shaping the development of the region's colonial settlements. *Hurricanes and Society in the British Greater Caribbean, 1624-1783* provides a useful new perspective on several topics including colonial science, the plantation economy, slavery, and public and private charity. By integrating the West Indies into the larger story of British Atlantic colonization, Mulcahy's work contributes to early American history, Atlantic history, environmental history, and the growing field of disaster studies.

Doyle, 2003-03-27 *Irish Immigrants in the Land of Canaan* is a monumental and pathbreaking study of early Irish Protestant and Catholic migration to America. Through exhaustive research and sensitive analyses of the letters, memoirs, and other writings, the authors describe the variety and vitality of early Irish immigrant experiences, ranging from those of frontier farmers and seaport workers to revolutionaries and loyalists. Largely through the migrants own words, it brings to life the networks, work, and experiences of these immigrants who shaped the formative stages of American society and its Irish communities. The authors explore why Irishmen and women left home and how they adapted to colonial and revolutionary America, in the process creating modern Irish and Irish-American identities on the two sides of the Atlantic Ocean. *Irish Immigrants in the Land of Canaan* was the winner of the James S. 57 society street charleston sc: Thoroughbred Nation Natalie A. Zacek, 2024-09-09 From the colonial era to the beginning of the twentieth century, horse racing was by far the most popular sport in America. Great numbers of Americans and overseas visitors flocked to the nation's tracks, and others avidly followed the sport in both general-interest newspapers and specialized periodicals. *Thoroughbred Nation* offers a detailed yet panoramic view of thoroughbred racing in the United States, following the sport from its origins in colonial Virginia and South Carolina to its boom in the Lower Mississippi Valley, and then from its post-Civil War rebirth in New York City and Saratoga Springs to its opulent mythologization of the "Old South" at Louisville's Churchill Downs, home of the Kentucky Derby. Natalie A. Zacek introduces readers to an unforgettable cast of characters, from "plungers" such as Virginia plantation owner William Ransom Johnson (known as the "Napoleon of the Turf") and Wall Street financier James R. Keene (who would wager a fortune on the outcome of a single competition) to the jockeys, trainers, and grooms, most of whom were African American. While their names are no longer known, their work was essential to the sport. Zacek also details the careers of remarkable, though scarcely remembered, horses, whose achievements made

them as famous in their day as more recent equine celebrities such as Seabiscuit or Secretariat. Based upon exhaustive research in print and visual sources from libraries, archives, and museums across the United States, Thoroughbred Nation will be of interest both to those who love the sport of horse racing for its own sake and to those who are fascinated by how this pastime reflects and influences American identities.

57 society street charleston sc: New Men, New Cities, New South Don H. Doyle, 2014-03-24 Cities were the core of a changing economy and culture that penetrated the rural hinterland and remade the South in the decades following the Civil War. In *New Men, New Cities, New South*, Don Doyle argues that if the plantation was the world the slaveholders made, the urban centers of the New South formed the world made by merchants, manufacturers, and financiers. The book's title evokes the exuberant rhetoric of New South boosterism, which continually extolled the new men who dominated the city-building process, but Doyle also explores the key role of women in defining the urban upper class. Doyle uses four cities as case studies to represent the diversity of the region and to illuminate the responses businessmen made to the challenges and opportunities of the postbellum South. Two interior railroad centers, Atlanta and Nashville, displayed the most vibrant commercial and industrial energy of the region, and both cities fostered a dynamic class of entrepreneurs. These business leaders' collective efforts to develop their cities and to establish formal associations that served their common interests forged them into a coherent and durable urban upper class by the late nineteenth century. The rising business class also helped establish a new pattern of race relations shaped by a commitment to economic progress through the development of the South's human resources, including the black labor force. But the new men of the cities then used legal segregation to control competition between the races. Charleston and Mobile, old seaports that had served the antebellum plantation economy with great success, stagnated when their status as trade centers declined after the war. Although individual entrepreneurs thrived in both cities, their efforts at community enterprise were unsuccessful, and in many instances they remained outside the social elite. As a result, conservative ways became more firmly entrenched, including a system of race relations based on the antebellum combination of paternalism and neglect rather than segregation. Talent, energy, and investment capital tended to drain away to more vital cities. In many respects, as Doyle shows, the business class of the New

South failed in its quest for economic development and social reform. Nevertheless, its legacy of railroads, factories, urban growth, and changes in the character of race relations shaped the world most southerners live in today.
