The 1984 Grace Commission uncovered that the Department of Defense spent \$640 for a toilet seat and \$436 for a hammer. Twenty years later things weren't much better. In 2004, Congress spent a record-breaking \$22.9 billion dollars of your money on 10,656 of their pork-barrel projects. The war on terror has a lot to do with the record \$413 billion in deficit spending, but it's also the result of pork over the last 18 years the likes of: - \$50 million for an indoor rain forest in Iowa - \$102 million to study screwworms which were long ago eradicated from American soil - \$273,000 to combat goth culture in Missouri - \$2.2 million to renovate the North Pole (Lucky for Santa!) - \$50,000 for a tattoo removal program in California - \$1 million for ornamental fish research Funny in some instances and jaw-droppingly stupid and wasteful in others, The Pig Book proves one thing about Capitol Hill: pork is king!

6 hour driver education course texas: *What Every Driver Must Know (Michigan, June 2021)* State of State of Michigan, 2021-09-26 Driving is a privilege and not a right. Drivers must drive responsibly and safely, obey traffic laws, and never drink and drive. Finally, make sure that you and your passengers are properly buckled up - it's the law! Today's vehicles are loaded with technology that was unheard of even a decade ago. Systems that warn when you are drifting from your lane, assist you in parallel parking, automatically brake in emergency situations and provide 360 degrees of vision around the vehicle via a camera are becoming standard, even on moderately priced vehicles. As remarkable as these leaps in automotive technology are, the truth is that the most important safety feature in any vehicle remains you as the driver. Therefore, it is to your benefit to continue improving and expanding your knowledge of traffic laws and safe driving practices. Driving is a privilege. Once you have been issued a driver's license, you have the responsibility to continually demonstrate the skill and knowledge to drive safely. Whether you have been behind the wheel for decades or are just starting to venture out, driving is a discipline that requires judgment, knowledge, physical and mental self-awareness, and practice. What Every Driver Must Know is an excellent resource for assisting you on this lifelong journey.

The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain

and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

6 hour driver education course texas: *Driver Education for Safety in Adverse Driving Conditions* Jonathan Skolnik, 2008 Under certain adverse driving conditions, often times the driver of a vehicle has inadequate training or education and ends up taking wrongful action leading to severe crashes. The purpose of this research was to determine the state-of-the-art practices in educating drivers for safety in certain adverse driving conditions and to develop a realistic module of a driver education program addressing that topic. In addition, the research sought to determine whether any relevant laws and regulations related to driving in the State of Arizona need to be changed in order to properly address safety under adverse driving conditions. The study consisted of four main tasks, which included a literature review, statistical analysis of Arizona crash data, a survey of other states regarding their driver education programs, and targeted case studies of selected states and other private or semi-government agencies involved in driver education curriculum development and implementation. It is the recommendation of this report that Arizona continue its on-going efforts to convene a driver education task force consisting of both Arizona Department of Education and Motor Vehicle Department representatives with the goal of developing uniform standards for both driver education curriculum and training for driver education instructors to apply to both the public school driver education program and the professional driver training schools. In addition, because Arizona does not have an existing state-level driver education curriculum, the state should adopt a complete driver education curriculum as opposed to a module geared towards adverse driving conditions. That said, should that effort not be possible, it is the recommendation of this report that one of the two adverse conditions related modules (Montana or Texas/Virginia). Both of these modules are well designed and thorough and both would serve Arizona well. They are similar in their coverage of adverse driving conditions. The choice between the two would come down to Arizona's preference between the NIDB model with which the Montana curriculum is more closely aligned, and the ADTSEA model with which the Virginia/Texas module is more closely aligned.

6 hour driver education course texas: What Every Teen Should Know about Texas Law L. Jean Wallace, Christopher F. Cypert, 2018-05-01 From reviews of earlier editions: "Young people get into legal trouble for two reasons: they do not know what the law is, and they do not stop to think about the consequences of their actions. This book would make a good text for a preparation for life class. . . . The book is written in plain language, unencumbered by a lot of legal citations, and with no expectation that the reader will have any working knowledge of the law." —Texas Bar Journal "A book any parent should consider giving their child. . . . But before you do, take a look at it yourself. No matter the title, Wallace's book . . . contains information everyone . . . should know." —Austin American-Statesman What Every Teen Should Know about Texas Law is the only single-source guide for accurate, easy-to-understand information about most areas of civil law in Texas. L. Jean Wallace drew on years of experience as a students' attorney at Texas Tech University to inform young adults about the areas of law that affect them most: driving and car ownership, pranks and crimes (including alcohol and drug offenses), personal relationships, employment and consumer concerns, and living on their own. She illustrated her points with true, sometimes humorous, stories of young adults' encounters with the law. For this new edition, municipal judge Christopher F. Cypert has completely updated the book to reflect the current state of the law. He covers specific topics that are now mandated to be taught in schools, including the proper way to interact with peace officers during traffic stops and other in-person encounters, as well as internet-era misbehaviors such as sexting and cyberbullying. Like Wallace, Cypert has helped many young people navigate the sometimes confusing processes of the legal world, often loaning earlier editions of this book to young offenders in his court. Both authors' real-world experience and legal expertise ensure that What Every Teen Should Know about Texas Law is indeed a complete and practical guide for assuming the responsibilities of adulthood—as well as a good refresher course for all legal-age Texans.
