In this vibrantly written biography, Katherine Charron demonstrates Clark's crucial role--and the role of many black women teachers--in making education a cornerstone of the twentieth-century freedom struggle. Using Clark's life as a lens, Charron sheds valuable new light on southern black women's activism in national, state, and judicial politics, from the Progressive Era to the civil rights movement and beyond.

63 society street charleston sc: Freedom's Teacher, Enhanced Ebook Katherine Mellen Charron, 2012-03-15 Civil rights activist Septima Poinsette Clark (1898-1987) developed a citizenship education program that enabled tens of thousands of African Americans to register to

vote and to link the power of the ballot to concrete strategies for individual and communal empowerment. Clark, who began her own teaching career in 1916, grounded her approach in the philosophy and practice of southern black activist educators in the decades leading up to the 1950s and 1960s, and then trained a committed cadre of grassroots black women to lead this literacy revolution in community stores, beauty shops, and churches throughout the South. In this engaging biography, Katherine Charron tells the story of Clark, from her coming of age in the South Carolina lowcountry to her activism with the Southern Christian Leadership Conference in the movement's heyday. The enhanced electronic version of the book draws from archives, libraries, and the author's personal collection and includes nearly 100 letters, documents, photographs, newspaper articles, and interview excerpts, embedding each in the text where it will be most meaningful. 63 society street charleston sc: *A DuBose Heyward Reader* DuBose Heyward, 2003 DuBose Heyward (1885-1940) was a central figure in both the Charleston and the Southern Renaissance. His influence extended to the Harlem Renaissance as well. However, Heyward is often remembered simply as the author of *Porgy*, the 1925 novel about the poorest black residents of Charleston, South Carolina. *Porgy*--the novel and its stage versions--has probably done more to shape views worldwide of African American life in the South than any twentieth-century work besides *Gone with the Wind*. This volume acquaints readers with writings by Heyward that have been overshadowed by *Porgy*, and it also plumbs the complex sensibilities of the man behind that popular and enduring creation. James M. Hutchisson's introduction relates aspects of Heyward's life to his creative growth and his gradual shift from staunch social conservatism to a liberal (though never revolutionary) advocacy of black rights. The reader collects ten essays by Heyward on topics ranging from an aesthetics of African American art to the history of Charleston. Heyward's poetry is represented by eighteen pieces from the collections *Carolina Chansons*, *Skylines and Horizons*, and *Jasbo Brown and Selected Poems*. Also included are three song lyrics Heyward wrote for the opera *Porgy and Bess*. The sampling of Heyward's fiction includes the stories *The Brute* and *The Half Pint Flask* and excerpts from the novels *Porgy*, *Mamba's Daughters*, and *Peter Ashley*. Here is an ideal introduction to a figure whose inner conflicts were closely tied to those of his beloved South: struggles between privilege and poverty, black and white, and art for the few versus art for the masses.

63 society street charleston sc: The Edge of the Swamp Louis D. Rubin, Jr., 1999-03-01 The flowering of literary imagination known as the American Renaissance had few roots in the South. While Hawthorne, Emerson, Melville, Thoreau, and Whitman were creating a body of work that would endure, the only southern writer making a lasting contribution was Edgar Allan Poe. This failure on the part of antebellum southern writers has long been a subject of debate among students of southern history and literature. Now one of the region's most distinguished men of letters offers a cogently argued and gracefully written account of the circumstances that prevented early southern writers from creating transcendent works of art. Louis D. Rubin, Jr., brings forty years of critical integrity and imaginative involvement with the history and literature of the South to his informal inquiry into the foundations of the southern literary imagination. His exploration centers on the lives and works of three of the most important writers of the pre-Civil War South: Poe, William Gilmore Simms, and Henry Timrod. In a close and highly original reading of Poe's poetry and fiction, Rubin shows just how profoundly growing up in Richmond, Virginia, influenced that writer. The sole author of the Old South whose work has endured did not use southern settings or concern himself with his region's history or politics. Poe was, according to Rubin, in active rebellion against the middle-class community of Richmond and its materialistic values. Simms, on the other hand, aspired to the plantation society ideal of his native Charleston, South Carolina. He was not the most devoted and energetic of southern writers and one of the country's best-known and most respected literary figures before the Civil War. Rubin finds an explanation for much of the lost promise of antebellum southern literature in Simms's career. Here was a talented man who got caught up in the politically obsessed plantation community of Charleston, becoming an apologist for the system and an ardent defender of slavery. Timrod, also a Charlestonian native, was a highly gifted poet whose work attained the stature of literature when the Civil War gave him a theme. He was known as the poet laureate of the Confederacy. Only when his region was locked in a desperate military struggle for the right to exist did he suddenly find his enduring voice. Anyone interested in southern life and literature will welcome his provocative and engaging new look at southern writing from one of the region's most perceptive critics.

63 society street charleston sc: Visual Art and the Urban Evolution of the New South

Deborah C. Pollack, 2015-01-18 Visual Art and the Urban Evolution of the New South recounts the enormous influence of artists in the evolution of six southern cities—Atlanta, Charleston, New Orleans, Louisville, Austin, and Miami—from 1865 to 1950. In the decades following the Civil War, painters, sculptors, photographers, and illustrators in these municipalities employed their talents to articulate concepts of the New South, aestheticism, and Gilded Age opulence and to construct a visual culture far beyond providing pretty pictures in public buildings and statues in city squares. As Deborah C. Pollack investigates New South proponents such as Henry W. Grady of Atlanta and other regional leaders, she identifies cultural strivers—philanthropists, women's organizations, entrepreneurs, writers, architects, politicians, and dreamers—who united with visual artists to champion the arts both as a means of cultural preservation and as mechanisms of civic progress. Aestheticism, made popular by Oscar Wilde's southern tours during the Gilded Age, was another driving force in art creation and urban improvement. Specific art works occasionally precipitated controversy and incited public anger, yet for the most part artists of all kinds were recognized as providing inspirational incentives for self-improvement, civic enhancement and tourism, art appreciation, and personal fulfillment through the love of beauty. Each of the six New South cities entered the late nineteenth century with fractured artistic heritages. Charleston and Atlanta had to recover from wartime devastation. The infrastructures of New Orleans and Louisville were barely

damaged by war, but their social underpinnings were shattered by the end of slavery and postwar economic depression. Austin was not vitalized until after the Civil War and Miami was a post-Civil War creation. Pollack surveys these New South cities with an eye to understanding how each locale shaped its artistic and aesthetic self-perception across a spectrum of economic, political, gender, and race issues. She also discusses Lost Cause imagery, present in all the studied municipalities. While many art history volumes concerning the South focus on sultry landscapes outside the urban grid, *Visual Art and the Urban Evolution of the New South* explores the art belonging to its cities, whether exhibited in its museums, expositions, and galleries, or reflective of its parks, plazas, marketplaces, industrial areas, gardens, and universities. It also identifies and celebrates the creative urban humanity who helped build the cultural and social framework for the modern southern city.

63 society street charleston sc: Science, Race, and Religion in the American South Lester D. Stephens, 2003-07-11 In the decades before the Civil War, Charleston, South Carolina, enjoyed recognition as the center of scientific activity in the South. By 1850, only three other cities in the United States--Philadelphia, Boston, and New York--exceeded Charleston in natural history studies, and the city boasted an excellent museum of natural history. Examining the scientific activities and contributions of John Bachman, Edmund Ravenel, John Edwards Holbrook, Lewis R. Gibbes, Francis S. Holmes, and John McCrady, Lester Stephens uncovers the important achievements of Charleston's circle of naturalists in a region that has conventionally been dismissed as largely devoid of scientific interests. Stephens devotes particular attention to the special problems faced by the Charleston naturalists and to the ways in which their religious and racial beliefs interacted with and shaped their scientific pursuits. In the end, he shows, cultural commitments proved stronger than scientific principles. When the South seceded from the Union in 1861, the members of the Charleston circle placed regional patriotism above science and union and supported the Confederate cause. The ensuing war had a devastating impact on the Charleston naturalists--and on science in the South. The Charleston circle never fully recovered from the blow, and a century would elapse before the South took an equal role in the pursuit of mainstream scientific research.

Hartnett, 2002-03-28 Although it isn't the official national anthem, America may be the most important and interesting patriotic song in our national repertoire. Sweet Freedom's Song: My Country 'Tis of Thee and Democracy in America is a celebration and critical exploration of the complicated musical, cultural and political roles played by the song America over the past 250 years. Popularly known as My Country 'Tis of Thee and as God Save the King/Queen before that this tune has a history as rich as the country it extols. In Sweet Freedom's Song, Robert Branham and Stephen Hartnett chronicle this song's many incarnations over the centuries. Colonial Americans, Southern slaveowners, abolitionists, temperance campaigners and labor leaders, among others, appropriated and adapted the tune to create anthems for their own struggles. Because the song has been invoked by nearly every grassroots movement in American history, the story of America offers important insights on the story of democracy in the United States. An examination of America as a historical artifact and cultural text, Sweet Freedom's Song is a reflection of the rebellious spirit of Americans throughout our nations history. The late Robert James Branham and his collaborator, Stephen Hartnett, have produced a thoroughly-researched, delightfully written book that will appeal to scholars and patriots of all stripes.
