7 figure business ideas: *Become an Idea Machine* Claudia Azula Altucher, 2014-12-27 HOW DO I TRANSFORM MY LIFE? The answer is simple: come up with ten ideas a day. It doesn't matter if they are good or bad the key is to exercise your 'idea muscle', to keep it toned, and in great shape. People say ideas are cheap and execution is everything but that is NOT true. Execution is a consequence, a subset of good, brilliant idea. And good ideas require daily work. Ideas may be easy if we are only coming up with one or two but if you open this book to any of the pages and try to produce more than three, you will feel a burn, scratch your head, and you will be sweating, and working hard. There is a turning point when you reach idea number 6 for the day, you still have four to go, and your mind muscle is getting a workout. By the time you list those last ideas to make it to ten you will see for yourself what sweating the idea muscle means. As you practice the daily idea generation you become an idea machine. When we become idea machines we are flooded with lots of bad ideas but also with some that are very good. This happens by the sheer force of the number, because we are coming up with 3,650 ideas per year (at ten a day). When you are inspired by an extraordinary idea, all of your thoughts break their chains, you go beyond limitations and your capacity to act expands in every direction. Forces and abilities you did not know you had come to the surface, and you realize you are capable of doing great things. As you practice with the suggested prompts in this book your ideas will get better, you will be a source of great insight for others, people will find you magnetic, and they will want to hang out with you because you have so much to offer. When you practice every day your life will transform, in no more than 180 days, because it has no other evolutionary choice. Life changes for the better when we become the source of positive, insightful, and helpful ideas. Don't believe a word I say. Instead, challenge yourself to try it for the

180 days and see your life transform, in magical ways, in front of your very eyes.

7 figure business ideas: How to Write a Great Business Plan William A. Sahlman, 2008-03-01

Judging by all the hoopla surrounding business plans, you'd think the only things standing between would-be entrepreneurs and spectacular success are glossy five-color charts, bundles of meticulous-looking spreadsheets, and decades of month-by-month financial projections. Yet nothing could be further from the truth. In fact, often the more elaborately crafted a business plan, the more likely the venture is to flop. Why? Most plans waste too much ink on numbers and devote too little to information that really matters to investors. The result? Investors discount them. In *How to Write a Great Business Plan*, William A. Sahlman shows how to avoid this all-too-common mistake by ensuring that your plan assesses the factors critical to every new venture: The people—the individuals launching and leading the venture and outside parties providing key services or important resources The opportunity—what the business will sell and to whom, and whether the venture can grow and how fast The context—the regulatory environment, interest rates, demographic trends, and other forces shaping the venture's fate Risk and reward—what can go wrong and right, and how the entrepreneurial team will respond Timely in this age of innovation, *How to Write a Great Business Plan* helps you give your new venture the best possible chances for success.

7 figure business ideas: Drawdown Paul Hawken, 2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, Vox "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

7 figure business ideas: Lemonade Stand Steve Glaveski, 2019-10-07 Once upon a time, we used to go to school to learn how to become something, an accountant, a lawyer, a doctor...but technology has been improving since the 1960s, creating a very uncertain world. Some estimate that 40% of today's jobs won't exist in 10 years! It's no longer enough to remember facts for a test, only to forget them shortly afterwards.If, as Stephen Hawking said, intelligence is the ability to adapt to change, then entrepreneurship is the perfect vehicle to teach children adaptability and resilience.Written by seasoned entrepreneur and author, Steve Glaveski, Lemonade Stand follows a young entrepreneur's journey, and provides kids with invaluable business and life lessons along the way.

7 figure business ideas: The Lean Startup Eric Ries, 2011-09-13 Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively.

Inspired by lessons from lean manufacturing, it relies on “validated learning,” rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it’s too late. Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.

7 figure business ideas: Built to Sell John Warrillow, 2012-12-24 Run your company. Don’t let it run you. Most business owners started their company because they wanted more freedom—to work on their own schedules, make the kind of money they deserve, and eventually retire on the fruits of their labor. Unfortunately, according to John Warrillow, most owners find that stepping out of the picture is extremely difficult because their business relies too heavily on their personal involvement. Without them, their company—no matter how big or profitable—is essentially worthless. But the good news is that entrepreneurs can take specific steps—no matter what stage a business is in—to create a valuable, sellable company. Warrillow shows exactly what it takes to create a solid business that can thrive long into the future.

7 figure business ideas: *The \$100 Startup* Chris Guillebeau, 2012-05-08 Lead a life of adventure, meaning and purpose—and earn a good living. “Thoughtful, funny, and compulsively readable, this guide shows how ordinary people can build solid livings, with independence and purpose, on their own terms.”—Gretchen Rubin, author of the #1 New York Times bestseller *The Happiness Project* Still in his early thirties, Chris Guillebeau completed a tour of every country on earth and yet he’s never held a “real job” or earned a regular paycheck. Rather, he has a special genius for turning ideas into income, and he uses what he earns both to support his life of adventure and to give back. Chris identified 1,500 individuals who have built businesses earning \$50,000 or more from a modest investment (in many cases, \$100 or less), and focused on the 50 most intriguing case studies. In nearly all cases, people with no special skills discovered aspects of their personal passions that could be monetized, and were able to restructure their lives in ways that gave them greater freedom and fulfillment. Here, finally, distilled into one easy-to-use guide, are the most valuable lessons from those who’ve learned how to turn what they do into a gateway to self-fulfillment. It’s all about finding the intersection between your “expertise”—even if you don’t consider it such—and what other people will pay for. You don’t need an MBA, a business plan or even employees. All you need is a product or service that springs from what you love to do anyway, people willing to pay, and a way to get paid. Not content to talk in generalities, Chris tells you exactly how many dollars his group of unexpected entrepreneurs required to get their projects up and running; what these individuals did in the first weeks and months to generate significant cash; some of the key mistakes they made along the way, and the crucial insights that made the business stick. Among Chris’s key principles: If you’re good at one thing, you’re probably good at something else; never teach a man to fish—sell him the fish instead; and in the battle between planning and action, action wins. In ancient times, people who were dissatisfied with their lives dreamed of finding magic lamps, buried treasure, or streets paved with gold. Today, we know that it’s up to us to change our lives. And the best part is, if we change our own life, we can help others change theirs. This remarkable book will start you on your way.
