739 s business 13 lexington mo: *Crime, Shame and Reintegration* John Braithwaite, 1989-03-23 Crime, Shame and Reintegration is a contribution to general criminological theory. Its approach is as relevant to professional burglary as to episodic delinquency or white collar crime. Braithwaite argues that some societies have higher crime rates than others because of their different processes of shaming wrongdoing. Shaming can be counterproductive, making crime problems worse. But when shaming is done within a cultural context of respect for the offender, it can be an extraordinarily powerful, efficient and just form of social control. Braithwaite identifies the social conditions for such successful shaming. If his theory is right, radically different criminal justice policies are needed - a shift away from punitive social control toward greater emphasis on moralizing social control. This book will be of interest not only to criminologists and sociologists, but to those in law, public administration and politics who are concerned with social policy and social issues.

Like good students, they usually looked to their Ph.D. holding professor and chose the dissertations. Much to their surprise, I would respond that the theses would win without even taking time to ponder the issue. The issue is clearly one of often naïve and rarely eloquent theses full of good primary data versus sometimes more sophisticated and better written works full of irrelevant theory and meaningless statistics. Perhaps this is an overstatement of the situation, but it is not too far off the mark. The University Microfilms International efforts to make the titles of dissertations in North America and the English speaking portions of Europe available through Dissertation Abstracts is commendable. With only one minor exception, dissertations in historical and underwater archaeology in the United States are to be found listed in Dissertation Abstracts and thus are available for purchase.
