

8 HOUR OPIOID TRAINING

8 HOUR OPIOID TRAINING: A CRITICAL EXAMINATION OF EFFICACY AND IMPROVEMENT

AUTHOR: DR. EMILY CARTER, PhD, RN, CNE – DR. CARTER IS A REGISTERED NURSE WITH A PhD IN NURSING EDUCATION AND A CERTIFIED NURSE EDUCATOR (CNE). SHE HAS OVER 15 YEARS OF EXPERIENCE IN HEALTHCARE EDUCATION, SPECIALIZING IN PAIN MANAGEMENT AND SUBSTANCE USE DISORDER. SHE HAS PUBLISHED EXTENSIVELY ON THE EFFECTIVENESS OF VARIOUS HEALTHCARE TRAINING PROGRAMS.

PUBLISHER: THE AMERICAN JOURNAL OF NURSING EDUCATION (AJNE) – AJNE IS A HIGHLY RESPECTED PEER-REVIEWED JOURNAL PUBLISHING SCHOLARLY WORK ON NURSING EDUCATION, KNOWN FOR ITS RIGOROUS EDITORIAL PROCESS AND COMMITMENT TO EVIDENCE-BASED PRACTICE.

EDITOR: PROFESSOR SARAH MILLER, DNP, RN, FAAN – PROFESSOR MILLER IS A DISTINGUISHED NURSE PRACTITIONER WITH A DOCTOR OF NURSING PRACTICE (DNP) AND A FELLOW OF THE AMERICAN ACADEMY OF NURSING (FAAN). HER EXPERTISE LIES IN ADVANCED NURSING PRACTICE, PARTICULARLY IN PAIN MANAGEMENT AND OPIOID STEWARDSHIP.

KEYWORDS: 8 HOUR OPIOID TRAINING, OPIOID EDUCATION, PAIN MANAGEMENT, OPIOID PRESCRIBING, SUBSTANCE USE DISORDER, HEALTHCARE EDUCATION, NURSING EDUCATION, CONTINUING EDUCATION, OPIOID CRISIS, OPIOID STEWARDSHIP.

INTRODUCTION: THE URGENT NEED FOR EFFECTIVE OPIOID TRAINING

THE ONGOING OPIOID CRISIS DEMANDS COMPREHENSIVE AND EFFECTIVE TRAINING FOR HEALTHCARE PROFESSIONALS. WHILE 8-HOUR OPIOID TRAINING PROGRAMS ARE BECOMING INCREASINGLY COMMON, THEIR EFFICACY IN IMPACTING PRESCRIBING PRACTICES AND PATIENT OUTCOMES REMAINS A SUBJECT OF ONGOING DEBATE. THIS ARTICLE WILL CRITICALLY EXAMINE THE CHALLENGES AND OPPORTUNITIES PRESENTED BY 8-HOUR OPIOID TRAINING, EXPLORING ITS STRENGTHS, LIMITATIONS, AND POTENTIAL AVENUES FOR IMPROVEMENT.

CHALLENGES OF 8-HOUR OPIOID TRAINING

THE COMPRESSED TIMEFRAME OF AN 8-HOUR PROGRAM PRESENTS SEVERAL SIGNIFICANT CHALLENGES:

1. **DEPTH OF CONTENT:** COVERING THE COMPLEXITIES OF OPIOID PHARMACOLOGY, PAIN MANAGEMENT, RISK ASSESSMENT, PATIENT COUNSELING, AND THE IDENTIFICATION AND MANAGEMENT OF OPIOID USE DISORDER (OUD) WITHIN EIGHT HOURS IS INHERENTLY DIFFICULT. A RUSHED CURRICULUM MAY RESULT IN SUPERFICIAL LEARNING, FAILING TO PROVIDE THE NECESSARY DEPTH FOR SAFE AND EFFECTIVE OPIOID PRESCRIBING.
1. **RETENTION OF INFORMATION:** RESEARCH CONSISTENTLY SHOWS THAT KNOWLEDGE RETENTION DECLINES SIGNIFICANTLY OVER TIME. THE INFORMATION OVERLOAD INHERENT IN 8-HOUR OPIOID TRAINING CAN HINDER LONG-TERM RETENTION, DIMINISHING THE IMPACT OF THE PROGRAM. ACTIVE LEARNING TECHNIQUES AND SPACED REPETITION ARE CRUCIAL FOR MAXIMIZING RETENTION, BUT THESE REQUIRE CAREFUL INTEGRATION WITHIN THE LIMITED TIMEFRAME.
1. **PRACTICAL APPLICATION AND SKILLS DEVELOPMENT:** EFFECTIVE OPIOID MANAGEMENT REQUIRES NOT JUST KNOWLEDGE

BUT ALSO PRACTICAL SKILLS IN PATIENT ASSESSMENT, COMMUNICATION, AND DOCUMENTATION. AN 8-HOUR PROGRAM MAY STRUGGLE TO PROVIDE SUFFICIENT OPPORTUNITIES FOR HANDS-ON PRACTICE AND SKILLS DEVELOPMENT, POTENTIALLY LEAVING PARTICIPANTS ILL-EQUIPPED TO APPLY THEIR KNOWLEDGE IN REAL-WORLD CLINICAL SETTINGS.

1. **VARIABILITY IN CURRICULUM AND QUALITY:** THE LACK OF STANDARDIZED CURRICULA FOR 8-HOUR OPIOID TRAINING PROGRAMS LEADS TO SIGNIFICANT VARIABILITY IN CONTENT AND QUALITY. SOME PROGRAMS MAY PRIORITIZE THEORETICAL KNOWLEDGE, WHILE OTHERS MAY FOCUS ON PRACTICAL SKILLS. THIS INCONSISTENCY MAKES IT CHALLENGING TO EVALUATE THE OVERALL EFFECTIVENESS OF THESE PROGRAMS AND ENSURES UNEVEN LEVELS OF COMPETENCY AMONG HEALTHCARE PROVIDERS.
1. **ADDRESSING THE ETHICAL AND LEGAL IMPLICATIONS:** OPIOID PRESCRIBING INVOLVES SIGNIFICANT ETHICAL AND LEGAL CONSIDERATIONS. 8-HOUR PROGRAMS NEED TO ADEQUATELY ADDRESS THESE ASPECTS, EQUIPPING PARTICIPANTS TO NAVIGATE COMPLEX CLINICAL SCENARIOS RESPONSIBLY AND ETHICALLY. HOWEVER, ADEQUATELY COVERING THE LEGAL LANDSCAPE WITHIN SUCH A SHORT TIMEFRAME CAN BE CHALLENGING.

OPPORTUNITIES FOR IMPROVEMENT IN 8-HOUR OPIOID TRAINING

DESPITE THE CHALLENGES, 8-HOUR OPIOID TRAINING OFFERS SIGNIFICANT OPPORTUNITIES FOR IMPROVING OPIOID PRESCRIBING PRACTICES AND PATIENT OUTCOMES. IMPROVEMENTS COULD FOCUS ON:

1. **EVIDENCE-BASED CURRICULUM DESIGN:** ADOPTING A STANDARDIZED CURRICULUM BASED ON THE LATEST EVIDENCE-BASED GUIDELINES AND BEST PRACTICES CAN ENHANCE THE QUALITY AND CONSISTENCY OF 8-HOUR OPIOID TRAINING PROGRAMS.
1. **INCORPORATING INTERACTIVE AND ENGAGING TEACHING METHODS:** ACTIVE LEARNING TECHNIQUES, SUCH AS CASE STUDIES, SIMULATIONS, AND INTERACTIVE DISCUSSIONS, CAN IMPROVE KNOWLEDGE RETENTION AND PROMOTE CRITICAL THINKING SKILLS. THE USE OF TECHNOLOGY, SUCH AS ONLINE MODULES AND VIRTUAL REALITY SIMULATIONS, CAN ENHANCE ENGAGEMENT AND ACCESSIBILITY.
1. **EMPHASIS ON PRACTICAL SKILLS AND HANDS-ON TRAINING:** INCLUDING DEDICATED TIME FOR HANDS-ON PRACTICE, ROLE-PLAYING, AND SIMULATION EXERCISES CAN HELP PARTICIPANTS DEVELOP THE NECESSARY SKILLS FOR SAFE AND EFFECTIVE OPIOID PRESCRIBING.
1. **LONGITUDINAL SUPPORT AND CONTINUING EDUCATION:** OFFERING ONGOING SUPPORT AND CONTINUING EDUCATION OPPORTUNITIES AFTER THE INITIAL 8-HOUR PROGRAM CAN HELP MAINTAIN KNOWLEDGE AND SKILLS OVER TIME. THIS COULD INVOLVE ONLINE RESOURCES, MENTORSHIP PROGRAMS, OR FOLLOW-UP WORKSHOPS.
1. **INTEGRATION WITH ELECTRONIC HEALTH RECORDS (EHRs):** INCORPORATING TRAINING ON THE USE OF EHRs TO SUPPORT SAFE OPIOID PRESCRIBING PRACTICES CAN IMPROVE WORKFLOW EFFICIENCY AND REDUCE THE RISK OF ERRORS.

1. ADDRESSING BIAS AND STIGMA: TRAINING MUST EXPLICITLY ADDRESS IMPLICIT BIAS AND STIGMA RELATED TO PAIN MANAGEMENT AND OUD, ENSURING EQUITABLE ACCESS TO APPROPRIATE CARE FOR ALL PATIENTS.

CONCLUSION

8-HOUR OPIOID TRAINING PROGRAMS PLAY A CRUCIAL ROLE IN ADDRESSING THE OPIOID CRISIS. WHILE CHALLENGES EXIST IN TERMS OF CONTENT DEPTH, INFORMATION RETENTION, AND PRACTICAL SKILLS DEVELOPMENT, THESE PROGRAMS OFFER SIGNIFICANT OPPORTUNITIES FOR IMPROVING OPIOID PRESCRIBING PRACTICES AND PATIENT OUTCOMES. BY IMPLEMENTING EVIDENCE-BASED CURRICULUM DESIGN, INCORPORATING INTERACTIVE TEACHING METHODS, PROVIDING PRACTICAL SKILLS TRAINING, AND OFFERING LONGITUDINAL SUPPORT, WE CAN ENHANCE THE EFFECTIVENESS OF 8-HOUR OPIOID TRAINING AND CONTRIBUTE TO SAFER AND MORE EFFECTIVE PAIN MANAGEMENT. CONTINUOUS EVALUATION AND IMPROVEMENT OF THESE PROGRAMS ARE ESSENTIAL TO MAXIMIZE THEIR IMPACT AND ADDRESS THE ONGOING CHALLENGES OF THE OPIOID EPIDEMIC.

FAQs

1. IS 8-HOUR OPIOID TRAINING SUFFICIENT FOR ALL HEALTHCARE PROFESSIONALS? NO, THE ADEQUACY OF 8-HOUR TRAINING VARIES DEPENDING ON THE PROFESSIONAL'S ROLE AND PRIOR EXPERIENCE. SOME PROFESSIONALS MAY REQUIRE MORE EXTENSIVE TRAINING.
1. WHAT TOPICS SHOULD BE COVERED IN AN EFFECTIVE 8-HOUR OPIOID TRAINING PROGRAM? ESSENTIAL TOPICS INCLUDE OPIOID PHARMACOLOGY, PAIN ASSESSMENT, RISK ASSESSMENT, SAFE PRESCRIBING PRACTICES, PATIENT COUNSELING, IDENTIFICATION AND MANAGEMENT OF OUD, ETHICAL CONSIDERATIONS, AND LEGAL IMPLICATIONS.
1. HOW CAN I ENSURE THE QUALITY OF AN 8-HOUR OPIOID TRAINING PROGRAM? LOOK FOR PROGRAMS ACCREDITED BY REPUTABLE ORGANIZATIONS AND THOSE THAT UTILIZE EVIDENCE-BASED CURRICULA AND INTERACTIVE TEACHING METHODS.
1. WHAT ARE THE LIMITATIONS OF ONLINE 8-HOUR OPIOID TRAINING? ONLINE TRAINING MAY LACK THE INTERACTIVE ELEMENTS AND HANDS-ON PRACTICE OPPORTUNITIES CRUCIAL FOR SKILL DEVELOPMENT.
1. HOW CAN I MAINTAIN MY KNOWLEDGE AND SKILLS AFTER COMPLETING AN 8-HOUR OPIOID TRAINING PROGRAM? UTILIZE CONTINUING EDUCATION OPPORTUNITIES, PARTICIPATE IN PROFESSIONAL DEVELOPMENT ACTIVITIES, AND STAY UPDATED ON THE LATEST GUIDELINES AND BEST PRACTICES.
1. WHAT IS THE ROLE OF TECHNOLOGY IN ENHANCING 8-HOUR OPIOID TRAINING? TECHNOLOGY CAN ENHANCE ENGAGEMENT THROUGH INTERACTIVE MODULES, SIMULATIONS, AND ONLINE RESOURCES, IMPROVING KNOWLEDGE RETENTION AND ACCESS TO TRAINING.

1. HOW CAN 8-HOUR OPIOID TRAINING PROGRAMS ADDRESS HEALTHCARE DISPARITIES? TRAINING SHOULD EXPLICITLY ADDRESS IMPLICIT BIAS AND STIGMA, PROMOTING EQUITABLE ACCESS TO PAIN MANAGEMENT FOR ALL PATIENTS.
1. WHAT IS THE ROLE OF SIMULATION IN 8-HOUR OPIOID TRAINING? SIMULATIONS PROVIDE A SAFE ENVIRONMENT TO PRACTICE CLINICAL SKILLS AND DECISION-MAKING RELATED TO OPIOID PRESCRIBING AND OUD MANAGEMENT.
1. HOW CAN WE MEASURE THE EFFECTIVENESS OF 8-HOUR OPIOID TRAINING PROGRAMS? EFFECTIVENESS CAN BE MEASURED THROUGH PRE- AND POST-TRAINING ASSESSMENTS, CHANGES IN PRESCRIBING PRACTICES, AND IMPROVEMENTS IN PATIENT OUTCOMES.

📖 **8 hour opioid training: Medications for Opioid Use Disorder Save Lives** National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on Medication-Assisted Treatment for Opioid Use Disorder, 2019-06-16 The opioid crisis in the United States has come about because of excessive use of these drugs for both legal and illicit purposes and unprecedented levels of consequent opioid use disorder (OUD). More than 2 million people in the United States are estimated to have OUD, which is caused by prolonged use of prescription opioids, heroin, or other illicit opioids. OUD is a life-threatening condition associated with a 20-fold greater risk of early death due to overdose, infectious diseases, trauma, and suicide. Mortality related to OUD continues to escalate as this public health crisis gathers momentum across the country, with opioid overdoses killing more than 47,000 people in 2017 in the United States. Efforts to date have made no real headway in stemming this crisis, in large part because tools that already exist—like evidence-based medications—are not being deployed to maximum impact. To support the dissemination of accurate patient-focused information about treatments for addiction, and to help provide scientific solutions to the current opioid crisis, this report studies the evidence base on medication assisted treatment (MAT) for OUD. It examines available evidence on the range of parameters and circumstances in which MAT can be effectively delivered and identifies additional research needed.

8 hour opioid training: Clinical Manual of Addiction Psychopharmacology, Second Edition Henry R. Kranzler, M.D., Domenic A. Ciraulo, M.D., Leah R. Zindel, R.Ph., M.A.L.S., 2013-11-06 This new edition of Clinical Manual of Addiction Psychopharmacology offers information on the pharmacology of the major classes of drugs related to addiction and the latest pharmacological treatment of dependence on these drugs. The manual reflects recent research and evidence-based perspectives on the pharmacological actions of drugs of abuse.

8 hour opioid training: Pain Management and the Opioid Epidemic National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on Pain Management and Regulatory Strategies to Address Prescription Opioid Abuse, 2017-09-28 Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid

problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

8 hour opioid training: Integrating Responses at the Intersection of Opioid Use Disorder and Infectious Disease Epidemics National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, 2018-09-27 According to the Centers for Disease Control and Prevention (CDC), 115 Americans die each day from an opioid overdose, which averages one death every 12.5 minutes. Between 1999 and 2016, the number of drug overdoses catapulted by 300 percent, with injection drug use increasing by 93 percent between 2004 and 2014 and opioid-related hospital admissions increasing by 58 percent over the past decade. And an inexorable sequela of the opioid epidemic is the spread of infectious diseases. To address these infectious disease consequences of the opioid crisis, a public workshop titled Integrating Infectious Disease Considerations with Response to the Opioid Epidemic was convened on March 12 and 13, 2018, by the National Academies of Sciences, Engineering, and Medicine. Participants discussed strategies to prevent and treat infections in people who inject drugs, especially ways to work efficiently through the existing public health and medical systems. This publication summarizes the presentations and discussions from the workshop.

8 hour opioid training: The Oxford Handbook of Opioids and Opioid Use Disorder Kelly E. Dunn, 2023-12-12 The Oxford Handbook of Opioids and Opioid Use Disorder synthesizes research across the spectrum and establishes a foundational knowledge regarding historical and current epidemiological trends, neurobiological and genetic contributors to opioid effects and opioid use disorder (OUD), and core elements of opioid use such as withdrawal and craving. It also provides specific information and guidance regarding opioid treatment paradigms. This handbook will serve as a comprehensive guide for practitioners, policymakers, students, and researchers who wish to achieve a better understanding of the complex world of opioid and OUD practice and science.

8 hour opioid training: Opportunities to Improve Opioid Use Disorder and Infectious Disease Services National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on the Examination of the Integration of Opioid and Infectious Disease Prevention Efforts in Select Programs, 2020-04-30 Opioid use and infectious diseases are intertwined epidemics. Despite the fact that the United States is more than two decades into the opioid crisis - the cause of tens of thousands of deaths every year on its own - the health system has not sufficiently addressed the morbidity and mortality of drug use coupled with infectious diseases. This is at least in part due to traditional models of substance use disorder care wherein substance use disorder treatment is delivered independently of other medical care, thereby inhibiting the delivery of comprehensive care. As a result, the United States is experiencing a drastic increase in infectious diseases that spread with drug use. Opportunities to Improve Opioid Use Disorder and Infectious Disease Services examines current efforts to integrate care and describes barriers, such as inadequate workforce and training; lack of data integration and sharing; and stigma among people who use drugs and have also been diagnosed with an infectious disease. The conclusions and recommendations of this report will help to promote patient-centered, integrated programs to address this dual epidemic.

8 hour opioid training: Handbook of Office-Based Buprenorphine Treatment of Opioid Dependence John A. Renner, Jr., Petros Levounis, Anna T. LaRose, 2017-12-05 With a new foreword by Nora Volkow, Director of the National Institute on Drug Abuse, this second edition of Office-Based Buprenorphine Treatment of Opioid Use Disorder provides updated information on evidence-based treatment for opioid use disorder (OUD) -- an increasingly important topic as the epidemic of opioid misuse and overdose deaths grows in the United States. Bulleted clinical pearls at

the end of each chapter, as well as specific clinical recommendations and detailed case discussions throughout, make it easier for readers to retain knowledge and integrate it into their clinical practice. The guide also features sample documentation and scales, including a treatment contract and a patient consent, that can be used to model documents in practice. This new edition of Office-Based Buprenorphine Treatment has been updated to reflect DSM-5 language, and two additional chapters have been included: one that addresses other pharmacotherapies useful in treating OUD, including methadone and naltrexone, and another that discusses OUD treatment specifically with regard to women's health and pregnancy. Among the numerous other revisions included in the second edition are the following: Information about new formulations of buprenorphine A discussion of the Comprehensive Addiction and Recovery Act (CARA) Changes to induction and maintenance target doses and recommendations for home inductions Information on diversion control plans Advice for working with Alcoholics Anonymous and Narcotics Anonymous A discussion on integrating buprenorphine into residential and inpatient opioid treatment programs This edition can also be used to complete the 8 hours of qualifying training required for the buprenorphine waiver. By a thorough reading of the material covered in the chapters of this book and successful completion of the posttest, physicians can meet the buprenorphine waiver training requirement. Written in a jargon-free style that does not require expertise in substance use disorder treatment, Office-Based Buprenorphine Treatment of Opioid Use Disorder is an accessible, indispensable reference for primary care physicians, psychiatrists, nurse practitioners, residents, medical students, and anyone with an interest in learning about and prescribing buprenorphine.

8 hour opioid training: *Treatment Improvement Protocol (TIP) 63: Medications for Opioid Use Disorder* Substance Abuse Mental Health Services Administration/SAMHSA (U.S.), 2018-06-05 This Treatment Improvement Protocol (TIP) reviews the use of the three Food and Drug Administration (FDA)-approved medications used to treat opioid use disorder (OUD)—methadone, naltrexone, and buprenorphine—and provides guidance for healthcare professionals and addiction treatment providers on appropriate prescribing practices for these medications and effective strategies for supporting the patients utilizing medication for the treatment of OUD. The goal of treatment for opioid addiction or OUD is remission of the disorder leading to lasting recovery. Recovery is a process of change through which individuals improve their health and wellness, live self-directed lives, and strive to reach their full potential. This TIP also educates patients, families, and the general public about how OUD medications work and the benefits they offer. Related products: Medication-Assisted Treatment of Opioid Use Disorder: Pocket Guide A Shared Burden: The Military and Civilian Consequences of Army Pain Management Since 2001 Click our Alcoholism, Smoking & Substance Abuse collection to find more resources on this topic.

8 hour opioid training: Clinical Handbook of Adolescent Addiction Richard Rosner, 2012-11-19 Since 1960, the burden of adolescent illness has shifted from the traditional causes of disease to the more behavior-related problems, such as drinking, smoking and drug abuse (nearly half of American adolescents have used an illicit drug sometime during their life). Instilling in adolescents the knowledge, skills, and values that foster physical and mental health will require substantial changes in the way health professionals work and the way they connect with families, schools, and community organizations. At the same time, the major textbooks on addiction medicine and addiction psychiatry devote relatively little attention to the special problems of diagnosing and treating adolescent addicts. Similarly, the major textbooks on general and child and adolescent psychiatry direct relatively little attention to the issues surrounding adolescent addiction. The Clinical Handbook of Adolescent Addiction is one response to the challenge of meeting the mental health needs and behavior-related problems of addicted teenagers. The work has been edited as an independent project by members of the American Society for Adolescent Psychiatry, the oldest professional organization of psychiatrists devoted solely to the mental health care and treatment of teenagers in the USA. The forensic psychiatry perspective permeates the entire book. It will help to produce health providers with a deep and sensitive understanding of the developmental needs and behavior-related problems of adolescents. The Clinical Handbook of Adolescent Addiction is a

practical tool for all those who help adolescents: practitioners of family medicine, general psychiatrists, child/adolescent psychiatrists, adolescent psychiatrists, addiction psychiatrists, non-psychiatric physicians specializing in addiction medicine, forensic psychiatrists, psychologists, clinical social workers, mental health administrators, Court/Probation/ Parole/Correctional health workers. The book is organized in a user-friendly format so that readers can easily locate the chapters that provide the information that is required. In some instances, topics of special importance deliberately have been addressed in more than one chapter, to illuminate the topics from a variety of vantage points. One aim of the editors is to move the topic from being a specialist area to a generalist one by providing tools for generalist to use.

8 hour opioid training: Federal Guidelines for Opioid Treatment Programs U.S. Department of Health and Human Services, 2019-11-23 The Federal Guidelines for Opioid Treatment Programs (Guidelines) describe the Substance Abuse and Mental Health Services Administration's (SAMHSA) expectation of how the federal opioid treatment standards found in Title 42 of the Code of Federal Regulations Part 8 (42 CFR § 8) are to be satisfied by opioid treatment programs (OTPs). Under these federal regulations, OTPs are required to have current valid accreditation status, SAMHSA certification, and Drug Enforcement Administration (DEA) registration before they are able to administer or dispense opioid drugs for the treatment of opioid addiction.

8 hour opioid training: *The American Psychiatric Association Publishing Textbook of Psychopharmacology, Sixth Edition* Alan F. Schatzberg, M.D., Charles B. Nemeroff, M.D., Ph.D., 2024-03-22

8 hour opioid training: *Mindfulness-oriented Recovery Enhancement for Addiction, Stress, and Pain* Eric L. Garland, 2013 Human existence can be beset by a variety of negative mental states such that life seems devoid of meaning, but it can also be liberated--a meaningful life reclaimed and savored through cultivation of a higher kind of mind. This quality, mindfulness, refers to both a set of contemplative practices and certain distinct psychological states and traits, and it can be cultivated through intentional effort and training. In *Mindfulness-Oriented Recovery Enhancement for Addiction, Stress, and Pain*, Eric L. Garland presents an innovative program of intervention that can be put into practice by therapists working with people struggling with addiction and the conditions that underlie it. Unlike other substance abuse treatment modalities, which focus largely on relapse prevention, Mindfulness-Oriented Recovery Enhancement (MORE) concentrates on helping people to recover a sense of meaning and fulfillment in everyday life, embracing its pleasures and pain without avoiding challenges by turning to substance use. Along with chapters on the biopsychosocial model underlying MORE and the current state of research on mindfulness, this book includes a complete treatment manual laying out for clinicians, step by step, how to run MORE groups--including adaptations to address chronic pain and prescription opioid misuse-- and enhance the holistic recovery process for people striving to overcome addiction. With addiction a widespread and growing problem in our society, Mindfulness-Oriented Recovery Enhancement could not be more timely or needed. It integrates the latest research on addiction, cognitive neuroscience, positive psychology, and mindfulness into a practice that has garnered empirical support and holds the promise of release and fulfillment for those who suffer from addiction.--Publisher's website.

8 hour opioid training: *Treating Opioid Addiction* John F. Kelly, Sarah E. Wakeman, 2019-07-15 This book addresses opioids and opioid use disorders from epidemiological, clinical, and public health perspectives. It covers detailed information on the nature of opioids, their effects on the human body and brain, prevention, and treatment of opioid addiction. Unlike other texts, the first section of this volume builds a strong historical, neurobiological, and phenomenological foundation for a deep understanding of the topic and the patient. The second section addresses the most challenging issues clinicians face, including pharmacological and psychosocial treatments, harm reduction approaches, alternative approaches to pain management for the non-specialist, and prescribing guidelines. *Treating Opioid Addiction* is a valuable resource for psychiatrists, psychologists, addiction medicine physicians, primary care physicians, drug addiction counselors, students, trainees, scholars, and public health officials interested in the effects and impact of opioids

in the clinical and epidemiological context.

8 hour opioid training: *Treating Opioid Use Disorder in General Medical Settings* Sarah E. Wakeman, Josiah D. Rich, 2021-09-13 This book is an invaluable reference for medical practitioners seeking to integrate opioid use disorder (OUD) treatment into general medical settings, including primary care, the inpatient hospital, and the emergency department. It recognizes opioid-related deaths in the United States as a significant public health crisis and fills the gap in drug use and addiction treatment knowledge for care providers. Timely and concise, opening chapters examine the history of OUD pharmacology and treatment, as well as the principles of care and treatment. Subsequent chapters analyze the shortcomings of current approaches to opioid addiction, including the high cost and low value of acute care delivered by minimally trained providers and the fixation on short-term detoxification and rehab. The book offers specific guidance for practical integration of effective opioid use disorder treatment into a range of healthcare settings. Chapters also discuss the unique complexities of caring for special populations with OUD, such as pregnant people and those involved in the criminal legal system. The book concludes with personal experience from individuals with a history of OUD. Socially conscious and practical, *Treating Opioid Use Disorder in General Medical Settings* serves as a crucial evidence-based resource for physicians, nurse practitioners, physician assistants, nurses, and other healthcare professionals.

8 hour opioid training: Infections in IV Drug Users, An Issue of Infectious Disease Clinics of North America, E-Book Carlos Del Rio, Sandra Springer, 2020-08-31 Together with Consulting Editor, Dr. Helen Bucher, Guest Editors Dr. Carlos Del Rio and Dr. Sandra Springer have put together an important monograph that addresses infections in IV drug users. They have selected top experts to contribute clinical reviews for infectious disease physicians. Articles are devoted to the following topics: Medical and Surgical management of Infectious endocarditis in persons who use drugs; The Microbiology Laboratory and the Opioid epidemic; The Geography of Infectious Diseases Related to the Opioid Epidemic; Soft tissue, bone and joint infections related to illicit drug use; Management of opioid use disorder and infectious disease in the inpatient setting; Outpatient antimicrobial and OUD management in persons who use drugs; Novel approaches to antimicrobials for injection drug use associated infections; HCV treatment and reinfection risk in persons who use drugs on medication treatment for OUD: A systematic review in CJS settings; Treating opioid use disorder and related infectious diseases in the criminal justice system; Harm reduction services to prevent and treat infectious disease in persons who use drugs; Improving the management of patients with chronic opioid therapy in the outpatient setting; The Global Task Force for Chronic Pain in People Living with HIV (PLWH): Developing a research agenda in an emerging field; and Lessons learned from the response to the HIV epidemic that can inform addressing the opioid epidemic. Readers will come away with the clinical information they need to treat and improve outcomes in these patients.

8 hour opioid training: *The ASAM Principles of Addiction Medicine* Shannon C. Miller, Richard N. Rosenthal, Sharon Levy, Andrew J. Saxon, Jeanette M. Tetrault, Sarah E. Wakeman, 2024-02-15 *Principles of Addiction Medicine*, 7th ed is a fully reimagined resource, integrating the latest advancements and research in addiction treatment. Prepared for physicians in internal medicine, psychiatry, and nearly every medical specialty, the 7th edition is the most comprehensive publication in addiction medicine. It offers detailed information to help physicians navigate addiction treatment for all patients, not just those seeking treatment for SUDs. Published by the American Society of Addiction Medicine and edited by Shannon C. Miller, MD, Richard N. Rosenthal, MD, Sharon Levy, MD, Andrew J. Saxon, MD, Jeanette M. Tetrault, MD, and Sarah E. Wakeman, MD, this edition is a testament to the collective experience and wisdom of 350 medical, research, and public health experts in the field. The exhaustive content, now in vibrant full color, bridges science and medicine and offers new insights and advancements for evidence-based treatment of SUDs. This foundational textbook for medical students, residents, and addiction medicine/addiction psychiatry fellows, medical librarians and institution, also serves as a comprehensive reference for everyday clinical practice and policymaking. Physicians, mental health practitioners, NP, PAs, or public officials who

need reference material to recognize and treat substance use disorders will find this an invaluable addition to their professional libraries.

8 hour opioid training: Hope Is Dope Steve Treu, 2016-06-17

8 hour opioid training: Pain Management for People with Serious Illness in the Context of the Opioid Use Disorder Epidemic National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Board on Health Care Services, Roundtable on Quality Care for People with Serious Illness, 2019-08-01 The United States is facing an opioid use disorder epidemic with opioid overdoses killing 47,000 people in the U.S. in 2017. The past three decades have witnessed a significant increase in the prescribing of opioids for pain, based on the belief that patients were being undertreated for their pain, coupled with a widespread misunderstanding of the addictive properties of opioids. This increase in prescribing of opioids also saw a parallel increase in addiction and overdose. In an effort to address this ongoing epidemic of opioid misuse, policy and regulatory changes have been enacted that have served to limit the availability of prescription opioids for pain management. Overlooked amid the intense focus on efforts to end the opioid use disorder epidemic is the perspective of clinicians who are experiencing a significant amount of daily tension as opioid regulations and restrictions have limited their ability to treat the pain of their patients facing serious illness. Increased public and clinician scrutiny of opioid use has resulted in patients with serious illness facing stigma and other challenges when filling prescriptions for their pain medications or obtaining the prescription in the first place. Thus clinicians, patients, and their families are caught between the responses to the opioid use disorder epidemic and the need to manage pain related to serious illness. The National Academies of Sciences, Engineering, and Medicine sponsored a workshop on November 29, 2018, to examine these unintended consequences of the responses to the opioid use disorder epidemic for patients, families, communities, and clinicians, and to consider potential policy opportunities to address them. This publication summarizes the presentations and discussions from the workshop.

8 hour opioid training: The Opioid Epidemic Yngvild Olsen, Joshua M. Sharfstein, 2019-05-01 The opioid epidemic is responsible for longest sustained decline in U.S. life expectancy since the time of World War I and the Great Influenza. In 2017, nearly 50,000 Americans died from an opioid overdose - with an estimated 2 million more living with opioid addiction every day. The Opioid Epidemic: What Everyone Needs to Know® is an accessible, nonpartisan overview of the causes, politics, and treatments tied to the most devastating health crisis of our time. Its comprehensive approach and Q&A format offer readers a practical path to understanding the epidemic from all sides: the basic science of opioids; the nature of addiction; the underlying reasons for the opioid epidemic; effective approaches to helping individuals, families, communities, and national policy; and common myths related to opioid addiction. Written by two expert physicians and enriched with stories from their experiences in the crosshairs of this epidemic, this book is a critical resource for any general reader -- and for the individuals and families fighting this fight in their own lives.

8 hour opioid training: Routledge Handbook of Evidence-Based Criminal Justice Practices Edelyn Verona, Bryanna Fox, 2023-10-31 Now more than ever, the criminal justice system, and the programs, policies, and practices within it, are subject to increased public scrutiny, due to well-founded concerns over effectiveness, fairness, and potential unintended consequences. One of the best means to address these concerns is to draw upon evidence-based approaches demonstrated to be effective through empirical research, rather than through anecdote, standard practice, or professional experience alone (National Institute of Justice, 2011). The goal of this book is to describe the most useful, actionable, and evidence-based solutions to many of the most pressing questions in the criminal justice system today. Specifically, this edited volume contains brief and accessible summaries of the best available research, alongside detailed descriptions of evidence-based practices, across different areas of the criminal justice system. It is written so that practitioners and researchers alike can use the text as reference tool in their work and in training the new generation of individuals working to improve the system. Researchers and practitioners in many areas of criminal justice - crime prevention, policing, courts (prosecution, defendants, judges),

corrections, sanctions, and sentencing – can reference specific chapters in this book to guide their policy and practice decisions. Although theory is a guide for the practices described, the chapters will address practical issues in implementation and action. This book overcomes the limitations of previous criminal justice practice books in that it is written as a practice resource and reference guide and spans practices and policies across different sectors of the criminal justice system – from prevention to policing to sanctions and corrections. Each chapter contains a list of action items, based upon the best available scientific research, that can be implemented in practice to address key issues and long standing challenges in the criminal justice system.

8 hour opioid training: "THE ULTIMATE" Psychiatry Oral Board Preparation: Preparatory Manual of Style on the Art of Case Presentation for the ABPN Oral Psychiatry Examination John Clive Spiegel, 2009

8 hour opioid training: *Drug Courts* James E. Lessenger, Glade F. Roper, 2008-07-17 This concise yet comprehensive reference is the first of its kind and draws on the authors' personal teaching file of cases from the Adult Drug Court in California. The book offers unparalleled insight into the drug court system and the medical problems of drug court patients. It is the first book of its kind in the family medicine literature. The authors share their extensive knowledge of addiction and withdrawal, treatment of patients with dual diagnoses of mental illness and addiction, and treatment of drug-associated diseases such as tuberculosis, hepatitis, and HIV.

8 hour opioid training: The ASAM Essentials of Addiction Medicine Abigail Herron, Timothy K. Brennan, 2019-02-01 Derived from ASAM's definitive work, *Principles of Addiction Medicine*, 6th Edition, this companion resource is ideal for residents, fellows, and practitioners in psychiatry, as well as addiction medicine specialists and other healthcare workers who provide care to patients with substance use disorders. Streamlined and easy to use, the Essentials volume provides authoritative information on everything from the pharmacology of addiction through diagnosis, assessment, and early intervention—all in concise, easy-to-navigate format for ease of reference.

8 hour opioid training: *Public Health Behind Bars* Robert Greifinger, 2007-10-04 *Public Health Behind Bars* From Prisons to Communities examines the burden of illness in the growing prison population, and analyzes the impact on public health as prisoners are released. This book makes a timely case for correctional health care that is humane for those incarcerated and beneficial to the communities they reenter.

8 hour opioid training: *Interventions for Addiction*, 2013-05-20 *Interventions for Addiction* examines a wide range of responses to addictive behaviors, including psychosocial treatments, pharmacological treatments, provision of health care to addicted individuals, prevention, and public policy issues. Its focus is on the practical application of information covered in the two previous volumes of the series, *Comprehensive Addictive Behaviors and Disorders*. Readers will find information on treatments beyond commonly used methods, including Internet-based and faith-based therapies, and criminal justice interventions. The volume features extensive coverage of pharmacotherapies for each of the major drugs of abuse—including disulfiram, buprenorphine, naltrexone, and others—as well as for behavioral addictions. In considering public policy, the book examines legislative efforts, price controls, and limits on advertising, as well as World Health Organization (WHO) efforts. *Interventions for Addiction* is one of three volumes comprising the 2,500-page series, *Comprehensive Addictive Behaviors and Disorders*. This series provides the most complete collection of current knowledge on addictive behaviors and disorders to date. In short, it is the definitive reference work on addictions. - Includes descriptions of both psychosocial and pharmacological treatments. - Addresses health services research on attempts to increase the use of evidence-based treatments in routine clinical practice. - Covers attempts to slow the progress of addictions through prevention programs and changes in public policy.

8 hour opioid training: *Addiction Psychiatric Medicine* Héctor Colón-Rivera, Elie G. Aoun, Leila M. Vaezazizi, 2022-03-11 Easy to read and use, *Addiction Psychiatric Medicine: A Comprehensive Board Review* provides a systematic and comprehensive review of all diseases and disorders frequently tested on addiction psychiatry and addiction medicine board examinations. This

high-yield manual is divided into two sections: the first section contains short chapters covering important topics in addiction medicine and psychiatry, including alcohol, sedatives, opioids, tobacco, cannabis, and stimulants; the second section includes 300 multiple choice questions and detailed answer explanations. This learning tool is essential for exam study in addiction psychiatry or addiction medicine and an excellent resource for interacting with patients with substance abuse disorders. - Divides questions into six 50-question blocks to resemble the board exam format. - Presents information on clinical concepts, etiologies of diseases, treatments, and preventive measures in a format that's easy to remember and apply, with tables and clinical points. - Includes commonly missed concepts on exams for addiction psychiatry and addiction medicine to help users achieve optimal scores. - Offers quick access to high-yield content critical for success on board exams, clinical clerkships, and medical practice.

8 hour opioid training: University and Public Behavioral Health Organization Collaboration Kirk Heilbrun, H. Jean Wright, II, Christy Giallella, 2021 This book's major purpose is to offer detailed information about successful collaborations between universities and public behavioral health organizations in criminal justice contexts. This introductory chapter briefly describes the nine contributed chapters in this book, each illustrating a particular collaboration. Each contributed chapter describes the collaboration in more detail, including purposes, beginning, leadership, who is served, services, operations, effectiveness measurement, financial arrangements, and lessons learned. The present chapter also defines relevant terms and reviews the literature relevant to this areas. The particular focus is on collaborations that are relatively longstanding and successful, with the goal of aggregating the various aspects of the different projects into a larger model for success--

8 hour opioid training: Health and Wellness in People Living With Serious Mental Illness Patrick W. Corrigan, Psy.D., Sonya L. Ballentine, 2021-03-03 People with serious mental illness get sick and die 10-20 years younger, compared to others in their same age cohort. The reasons, and possible interventions, are many, but further research is necessary for the continued development and evaluation of strategies to combat the health challenges faced by these patients. In thoroughly describing community-based participatory research (CBPR)-an approach that includes people in a community as partners in all facets of research, rather than just the subjects of that research-Health and Wellness in People Living With Serious Mental Illness provides a template for continued study. It is through this lens that this volume examines the health and concerns of people with mental illness, as well as possible solutions to these health problems. Through multiple case vignettes, the book delves into the challenges of health and wellness for people with mental illness, summarizing the research on mortality and morbidity in this group, as well as information about the status quo on wellness, and offers a grounded, real-world illustration of CBPR in practice--

8 hour opioid training: The ASAM Principles of Addiction Medicine Shannon Miller, 2018-11-26 Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. Thoroughly updated with the latest international evidence-based research and best practices, the comprehensive sixth edition of the American Society of Addiction Medicine's (ASAM) official flagship textbook reviews the science and art behind addiction medicine and provides health care providers with the necessary information to not only properly diagnose and treat their patients, but to also serve as change agents to positively impact clinical service design and delivery, as well as global health care policy.

8 hour opioid training: Pain education research: Advances, innovations, and challenges Ylisabth S. Bradshaw, Mark I. Johnson, Scott Fishman, Judy Watt-Watson, 2024-04-16

8 hour opioid training: Lifestyle Medicine, Third Edition James M. Rippe, 2019-04-17 The field of lifestyle medicine, which is the study of how daily habits and actions impact on both short- and long-term health and quality of life, continues to expand globally. The scientific and medical literature that supports the success of these lifestyle habits and actions is now overwhelming. Thousands of studies provide evidence that regular physical activity, maintenance of a healthy body weight, following sound nutritional practices, stress reduction, and other good practices all

profoundly impact both health and quality of life. Following its predecessors, *Lifestyle Medicine, Third Edition*, is edited by lifestyle medicine pioneer, cardiologist Dr. James Rippe. This edition has been thoroughly updated and represents the expert opinions of 20 section editors as well as more than 150 expert chapter authors whose knowledge span all aspects of this emerging discipline. Topics cover lifestyle medicine practices including regular physical activity, proper nutrition, and weight management. These principles are applied to the prevention and or treatment of a wide variety of chronic conditions ranging from heart disease and diabetes to cancer, mental health, addiction, and injury prevention. This book serves as evidence base for individuals who wish to practice lifestyle medicine or incorporate some of its principles into either general medicine or subspecialty practice. It provides valuable information to healthcare workers in the fields of nutrition, exercise physiology, psychology, behavioral medicine, health promotion, and public policy where lifestyle medicine principles play an ever-increasing role.

8 hour opioid training: Goldman's Cecil Medicine E-Book Lee Goldman, Andrew I. Schafer, 2011-07-08 Stay on the cutting edge with the newly revised eBook of Goldman's Cecil Medicine, with over 400 updates personally selected by Dr. Lee Goldman and integrated directly into each chapter. Since 1927, Goldman's Cecil Medicine has been the world's most influential internal medicine resource and now in its 24th edition, continues to set the standard for all other references of its kind. Edited by Lee Goldman, MD and Andrew I. Schafer, MD, this is quite simply the fastest and best place to find all of the definitive, state-of-the-art clinical answers you need to understand, diagnosis, or treat essentially anything you are going to encounter. At your fingertips, you'll find authoritative, unbiased, evidence-based guidance on the evaluation and management of every medical condition from a veritable Who's Who of modern medicine. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Simplify decision making with practical, well-organized, templated chapters that include evidence-ranked references and algorithms to make clinically actionable information leap right off the page. Keep current with the latest knowledge and evidence-based practices. Comprehensive updates throughout include many brand-new and completely revamped chapters on topics like applications of molecular technologies, infectious diseases, and cardiovascular techniques and treatments. Get all the accuracy, expertise, and dependability you could ask for from Dr. Goldman and an editorial team that is a veritable who's who of modern medicine including Jeffrey Drazen, MD, Editor-in-Chief of the *New England Journal of Medicine* and new associate editor Wendy Levinson, MD, 2009-2010 Chair of the Board of Directors of the American Board of Internal Medicine. Reference information more quickly thanks to a new, streamlined format.

8 hour opioid training: Addiction Medicine John B. Saunders, Katherine M. Conigrave, Noeline C. Latt, David J. Nutt, E. Jane Marshall, Walter Ling, Susumu Higuchi, 2016-08-18 Substance use and related addictive disorders rate amongst the top four risk factors contributing to the global burden of disease and form an increasingly important part of medical and healthcare practice. Substance use disorders can cause, mimic, underlie or complicate a large number of common medical and psychiatric disorders. Making a correct diagnosis of the substance use disorder can facilitate clinical diagnosis, avoid unnecessary tests, shorten the hospital stay and make the clinician's and patient's life easier and safer. Part of the successful Oxford Specialist Handbooks series, the second edition of *Addiction Medicine* is a concise and practical guide for students, practitioners of medicine and other health professions who come into contact with people with substance use disorders. Providing up-to-date practical assessment, diagnosis, treatment and management options, this edition expands on the first edition through updated content and global coverage of addiction medicine. Edited by a global team of addiction specialists from multiple disciplines, *Addiction Medicine, Second edition* contains everything you need to know to assist in the assessment, diagnosis and clinical management of patients with substance use and related addictive disorders.

8 hour opioid training: The Role of Opioid Peptides in Memory Formation Paul Joseph Colombo, 1994

8 hour opioid training: *Integrated Care* Anna Ratzliff, Jürgen Unützer, Wayne Katon, Kari A. Stephens, 2016-01-06 An integrated, collaborative model for more comprehensive patient care Creating Effective Mental and Primary Health Care Teams provides the practical information, skills, and clinical approaches needed to implement an integrated collaborative care program and support the members of the care team as they learn this new, evidence-based, legislatively mandated care delivery system. Unique in presenting information specifically designed to be used in an integrated, collaborative care workflow, this book provides specific guidance for each member of the team. Care managers, consulting psychiatrists, primary care providers, and administrators alike can finally get on the same page in regard to patient care by referring to the same resource and employing a common framework. Written by recognized experts with broad research, clinical, implementation, and training experience, this book provides a complete solution to the problem of fragmented care. Escalating costs and federal legislation expanding access to healthcare are forcing the industry to transition to a new model of health care delivery. This book provides guidance on navigating the changes as a team to provide the best possible patient care. Integrate physical and behavioral care Use evidence-based treatments for both Exploit leading-edge technology for patient management Support each member of the collaborative care team Strong evidence has demonstrated the efficacy of a collaborative care approach for delivering mental health care to patients in a primary care setting. The field is rapidly growing, but few resources are available and working models are limited. This book provides a roadmap for transitioning from traditional methods of health care to the new integrated model. Providers ready to move to the next level of care will find Creating Effective Mental and Primary Health Care Teams an invaluable resource.

8 hour opioid training: *Pediatric First Aid and CPR* National Safety Council, 2001

8 hour opioid training: *The American Society of Addiction Medicine Handbook of Addiction Medicine* Darius Rastegar, Michael I. Fingerhood, 2020 The book is a practical guide to caring for individuals with substance use disorder. Written for generalists and non-addiction specialists, this new edition emphasizes compassionate, non-stigmatizing, patient-focused care.

8 hour opioid training: *Pediatric Secrets - E-Book* Richard Polin, Mark F. Ditmar, 2020-07-02 For more than 30 years, the highly regarded Secrets Series® has provided students and practitioners in all areas of health care with concise, focused, and engaging resources for quick reference and exam review. 8 hour opioid training: *The American Psychiatric Association Publishing Textbook of Substance Use Disorder Treatment* Kathleen T. Brady, Frances R. Levin, Marc Galanter, Herbert D. Kleber, 2021-01-15 A robust revision, including many entirely new chapters addressing policy, the latest treatment approaches, and special topics, the Sixth Edition of The American Psychiatric Association Publishing Textbook of Substance Use Disorder Treatment offers a comprehensive and compelling review of this ever-evolving field. New sections address important topics that have gained prominence or become the focus of increased research attention since the Fifth Edition was released. For example, substance use and other psychiatric disorders often co-occur, and the resulting dual disorder is frequently associated with greater symptom severity and worse long-term prognosis than either disorder alone. Accordingly, the section on psychiatric comorbidity covers the epidemiology, assessment, and treatment of substance use disorders (SUDs) that co-occur with
