Unboxing your new 8 in 1 dual display heat press machine is exciting! But before you start pressing, careful setup is crucial. Refer to the manufacturer's manual (which should accompany your machine) for precise specifications. However, the general steps are usually as follows:

1. **Inspect the Machine:** Thoroughly check for any damage during shipping. Report any issues to the supplier immediately.
2. **Placement:** Find a stable, level surface. Adequate workspace around the machine is essential for smooth operation.

Heat Transfer Vinyl (HTV): Applying HTV involves pressing pre-cut vinyl onto fabric. Temperature and pressure vary depending on the type of vinyl used. Always consult the vinyl manufacturer's instructions.

Mug Pressing: Requires specialized mugs and consistent pressure to avoid cracks or uneven heating.

Plate Pressing: Perfect for creating personalized plates and other flat items.

Cap Pressing: Requires a specialized cap press attachment, not all machines include it.
