KEYWORDS: 8TH GRADE MATH IEP GOALS, INDIVIDUALIZED EDUCATION PROGRAM, SPECIAL EDUCATION, MATHEMATICS EDUCATION, LEARNING DISABILITIES, ACCOMMODATIONS, MODIFICATIONS, DIFFERENTIATED INSTRUCTION, IEP GOALS EXAMPLES, MEASURABLE GOALS, STUDENT SUCCESS, ASSESSMENT, PROGRESS MONITORING.

SUMMARY: THIS ANALYSIS EXPLORES THE CURRENT TRENDS IN DEVELOPING EFFECTIVE 8TH GRADE MATH IEP GOALS. IT EXAMINES THE SHIFT TOWARDS MORE INDIVIDUALIZED AND DATA-DRIVEN APPROACHES, FOCUSING ON MEASURABLE GOALS, APPROPRIATE ACCOMMODATIONS AND MODIFICATIONS, AND THE IMPORTANCE OF ALIGNING IEP GOALS WITH GENERAL EDUCATION CURRICULUM STANDARDS. THE ARTICLE ALSO HIGHLIGHTS CHALLENGES IN IMPLEMENTATION AND SUGGESTS STRATEGIES FOR IMPROVING THE EFFECTIVENESS OF 8TH GRADE MATH IEP GOALS IN PROMOTING STUDENT SUCCESS.

1. THE EVOLUTION OF 8TH GRADE MATH IEP GOALS

THE DEVELOPMENT OF 8TH GRADE MATH IEP GOALS HAS UNDERGONE SIGNIFICANT EVOLUTION. HISTORICALLY, IEPs OFTEN FOCUSED ON DEFICITS RATHER THAN STRENGTHS, RESULTING IN GOALS THAT WERE VAGUELY WORDED AND LACKED MEASURABLE OUTCOMES. CURRENT TRENDS EMPHASIZE A MORE STRENGTHS-BASED APPROACH, FOCUSING ON BUILDING UPON A STUDENT'S EXISTING SKILLS AND ABILITIES. THIS SHIFT IS DRIVEN BY THE UNDERSTANDING THAT ALL STUDENTS, REGARDLESS OF THEIR LEARNING DIFFERENCES, POSSESS UNIQUE TALENTS AND LEARNING STYLES. EFFECTIVE 8TH GRADE MATH IEP GOALS NOW INCORPORATE THIS PERSPECTIVE BY IDENTIFYING SPECIFIC AREAS WHERE THE STUDENT EXCELS AND LEVERAGING THOSE STRENGTHS TO ADDRESS AREAS OF WEAKNESS.

THE INFLUENCE OF DATA-DRIVEN DECISION MAKING IS ALSO PROMINENT. MODERN IEP DEVELOPMENT EMPHASIZES USING ASSESSMENT DATA TO INFORM GOAL SETTING. THIS INCLUDES FORMATIVE ASSESSMENTS THAT MONITOR STUDENT PROGRESS THROUGHOUT THE LEARNING PROCESS, ALLOWING FOR TIMELY ADJUSTMENTS TO INSTRUCTIONAL STRATEGIES AND IEP GOALS. THIS ITERATIVE PROCESS ENSURES THAT 8TH GRADE MATH IEP GOALS REMAIN RELEVANT AND CHALLENGING, PROMOTING CONTINUOUS IMPROVEMENT.

2. KEY COMPONENTS OF EFFECTIVE 8TH GRADE MATH IEP GOALS

EFFECTIVE 8TH GRADE MATH IEP GOALS ADHERE TO THE SMART CRITERIA: SPECIFIC, MEASURABLE, ACHIEVABLE, RELEVANT, AND TIME-BOUND. SPECIFICITY ENSURES CLARITY ABOUT WHAT THE STUDENT IS EXPECTED TO LEARN. MEASURABILITY ENABLES OBJECTIVE TRACKING OF PROGRESS, ALLOWING EDUCATORS TO DETERMINE THE EFFECTIVENESS OF INTERVENTIONS AND MAKE DATA-DRIVEN DECISIONS. ACHIEVABILITY ENSURES THAT GOALS ARE CHALLENGING YET ATTAINABLE, FOSTERING STUDENT MOTIVATION AND PROMOTING A SENSE OF ACCOMPLISHMENT. RELEVANCE ENSURES ALIGNMENT WITH THE GENERAL EDUCATION CURRICULUM AND THE STUDENT'S INDIVIDUAL NEEDS. FINALLY, TIME-BOUND GOALS SET CLEAR DEADLINES FOR ACHIEVEMENT, PROMOTING ACCOUNTABILITY AND FOCUSED INSTRUCTION.

FOR EXAMPLE, INSTEAD OF A VAGUE GOAL LIKE "IMPROVE MATH SKILLS," A MORE EFFECTIVE 8TH GRADE MATH IEP GOAL MIGHT

BE: "GIVEN A WORKSHEET WITH 20 TWO-STEP EQUATIONS, [STUDENT NAME] WILL SOLVE 16 CORRECTLY WITHIN 20 MINUTES, WITH 80% ACCURACY, BY [DATE]." THIS GOAL IS SMART BECAUSE IT'S SPECIFIC, MEASURABLE, ACHIEVABLE (BASED ON ASSESSMENT DATA), RELEVANT TO 8TH GRADE MATH STANDARDS, AND TIME-BOUND.

3. ACCOMMODATIONS AND MODIFICATIONS IN 8TH GRADE MATH IEP GOALS

ACCOMMODATIONS AND MODIFICATIONS PLAY A VITAL ROLE IN CREATING ACCESSIBLE AND EFFECTIVE 8TH GRADE MATH IEP GOALS. ACCOMMODATIONS DO NOT ALTER THE CONTENT OR STANDARDS BUT ADJUST HOW THE STUDENT ACCESSES THE MATERIAL. EXAMPLES INCLUDE EXTRA TIME ON TESTS, USE OF GRAPHIC ORGANIZERS, PREFERENTIAL SEATING, OR THE USE OF ASSISTIVE TECHNOLOGY. MODIFICATIONS, ON THE OTHER HAND, CHANGE THE CONTENT OR STANDARDS THEMSELVES, SIMPLIFYING TASKS OR FOCUSING ON SPECIFIC SKILLS. EXAMPLES INCLUDE REDUCING THE NUMBER OF PROBLEMS ON AN ASSIGNMENT, PROVIDING SIMPLIFIED INSTRUCTIONS, OR FOCUSING ON A SUBSET OF LEARNING OBJECTIVES.

DETERMINING THE APPROPRIATE ACCOMMODATIONS AND MODIFICATIONS REQUIRES CAREFUL CONSIDERATION OF THE STUDENT'S INDIVIDUAL NEEDS AND LEARNING PROFILE. OVER-RELIANCE ON MODIFICATIONS MAY HINDER A STUDENT'S PROGRESS IN MEETING GRADE-LEVEL EXPECTATIONS, WHILE A LACK OF APPROPRIATE ACCOMMODATIONS MAY CREATE UNNECESSARY BARRIERS TO LEARNING. THE DECISION-MAKING PROCESS SHOULD BE DATA-DRIVEN AND INVOLVE COLLABORATION AMONG EDUCATORS, PARENTS, AND THE STUDENT.

4. ALIGNING 8TH GRADE MATH IEP GOALS WITH GENERAL EDUCATION STANDARDS

EFFECTIVE 8TH GRADE MATH IEP GOALS MUST BE ALIGNED WITH THE GENERAL EDUCATION CURRICULUM STANDARDS. THIS ENSURES THAT STUDENTS WITH IEPs ARE RECEIVING INSTRUCTION THAT PREPARES THEM FOR THE SAME ACADEMIC EXPECTATIONS AS THEIR PEERS. HOWEVER, THE ALIGNMENT SHOULD BE NUANCED, ACKNOWLEDGING THE STUDENT'S UNIQUE LEARNING NEEDS AND PROVIDING APPROPRIATE SUPPORTS. THE IEP SHOULD NOT MERELY REPLICATE THE GENERAL EDUCATION CURRICULUM BUT ADAPT IT TO THE STUDENT'S SPECIFIC LEARNING PROFILE, BUILDING UPON THEIR STRENGTHS AND TARGETING AREAS REQUIRING INTERVENTION.

5. CHALLENGES IN IMPLEMENTING EFFECTIVE 8TH GRADE MATH IEP GOALS

DESPITE THE ADVANCEMENTS IN IEP DEVELOPMENT, CHALLENGES REMAIN. ONE SIGNIFICANT OBSTACLE IS THE LACK OF SUFFICIENT RESOURCES AND ADEQUATE TEACHER TRAINING. EDUCATORS OFTEN STRUGGLE WITH TIME CONSTRAINTS, LACK ACCESS TO SPECIALIZED TRAINING ON EFFECTIVE IEP IMPLEMENTATION, AND MIGHT NOT RECEIVE SUFFICIENT SUPPORT FOR INDIVIDUALIZING INSTRUCTION. ANOTHER CHALLENGE IS THE COMPLEXITY OF DEVELOPING AND MONITORING IEP GOALS EFFECTIVELY. THIS REQUIRES ONGOING ASSESSMENT, DATA ANALYSIS, AND A WILLINGNESS TO ADAPT STRATEGIES BASED ON STUDENT PROGRESS. FINALLY, THE LACK OF CONSISTENT COMMUNICATION AND COLLABORATION AMONG STAKEHOLDERS – INCLUDING PARENTS, TEACHERS, AND OTHER SUPPORT PERSONNEL – CAN HINDER THE SUCCESSFUL IMPLEMENTATION OF 8TH GRADE MATH IEP GOALS.

6. STRATEGIES FOR IMPROVING THE EFFECTIVENESS OF 8TH GRADE MATH IEP GOALS

TO ENHANCE THE EFFECTIVENESS OF 8TH GRADE MATH IEP GOALS, SEVERAL STRATEGIES CAN BE IMPLEMENTED. THESE INCLUDE:

INVESTING IN PROFESSIONAL DEVELOPMENT: PROVIDING EDUCATORS WITH SPECIALIZED TRAINING IN DIFFERENTIATED INSTRUCTION, ASSESSMENT STRATEGIES, AND IEP GOAL WRITING IS CRUCIAL.

UTILIZING EVIDENCE-BASED INSTRUCTIONAL PRACTICES: EMPLOYING RESEARCH-BASED STRATEGIES FOR TEACHING MATHEMATICS TO STUDENTS WITH LEARNING DISABILITIES IS ESSENTIAL.

FOSTERING COLLABORATION: ENCOURAGING STRONG COMMUNICATION AND COLLABORATION BETWEEN TEACHERS, PARENTS, AND OTHER SUPPORT STAFF IS CRITICAL FOR EFFECTIVE IEP IMPLEMENTATION.

USING TECHNOLOGY EFFECTIVELY: INTEGRATING TECHNOLOGY TOOLS TO SUPPORT LEARNING AND PERSONALIZE INSTRUCTION CAN SIGNIFICANTLY IMPROVE STUDENT OUTCOMES.

REGULAR PROGRESS MONITORING: CONTINUOUS ASSESSMENT AND DATA ANALYSIS ARE ESSENTIAL FOR MAKING TIMELY ADJUSTMENTS TO IEP GOALS AND INSTRUCTIONAL STRATEGIES.

CONCLUSION

DEVELOPING AND IMPLEMENTING EFFECTIVE 8TH GRADE MATH IEP GOALS IS A COMPLEX BUT CRUCIAL ENDEAVOR. BY ADOPTING A DATA-DRIVEN, STRENGTHS-BASED APPROACH, ALIGNING GOALS WITH GENERAL EDUCATION STANDARDS, PROVIDING APPROPRIATE ACCOMMODATIONS AND MODIFICATIONS, AND FOSTERING COLLABORATION AMONG STAKEHOLDERS, EDUCATORS CAN SIGNIFICANTLY ENHANCE STUDENT OUTCOMES AND HELP STUDENTS WITH LEARNING DIFFERENCES ACHIEVE THEIR FULL MATHEMATICAL POTENTIAL. CONTINUOUS IMPROVEMENT, MONITORING, AND ADAPTATION ARE ESSENTIAL ELEMENTS IN ENSURING THAT 8TH GRADE MATH IEP GOALS REMAIN RELEVANT, CHALLENGING, AND ULTIMATELY SUCCESSFUL IN PROMOTING STUDENT SUCCESS.

8th grade math iep goals: *Helping Children Learn Mathematics* National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Mathematics Learning Study Committee, 2002-07-31 Results from national and international assessments indicate that school children in the United States are not learning mathematics well enough. Many students cannot correctly apply computational algorithms to solve problems. Their understanding and use of decimals and fractions are especially weak. Indeed, helping all children succeed in mathematics is an imperative national goal. However, for our youth to succeed, we need to change how we're teaching this discipline. Helping Children Learn Mathematics provides comprehensive and reliable information that will guide efforts to improve school mathematics from pre-kindergarten through eighth grade. The authors explain the five strands of mathematical proficiency and discuss the major changes that need to be made in mathematics instruction, instructional materials, assessments, teacher education, and the broader educational system and answers some of the frequently asked questions when it comes to mathematics instruction. The book concludes by providing recommended actions for parents and caregivers, teachers, administrators, and policy makers, stressing the importance that everyone work together to ensure a mathematically literate society.

8th grade math iep goals: *IEP Goal Writing for Speech-Language Pathologists* Lydia Kopel, Elissa Kilduff, 2020-06-15 IEP Goal Writing for Speech-Language Pathologists: Utilizing State Standards, Second Edition familiarizes the speech-language pathologist (SLP) with specific Early Learning Standards (ELS) and Common Core State Standards (CCSS) as well as the

speech-language skills necessary for students to be successful with the school curriculum. It also describes how to write defensible Individualized Education Plan (IEP) goals that are related to the ELS and CCSS. SLPs work through a set of steps to determine a student's speech-language needs. First, an SLP needs to determine what speech-language skills are necessary for mastery of specific standards. Then, the SLP determines what prerequisite skills are involved for each targeted speech-language skill. Finally, there is a determination of which Steps to Mastery need to be followed. It is through this process that an SLP and team of professionals can appropriately develop interventions and an effective IEP. The text takes an in-depth look at the following speech-language areas: vocabulary, questions, narrative skills/summarize, compare and contrast, main idea and details, critical thinking, pragmatics, syntax and morphology, and articulation and phonological processes. These areas were selected because they are the most commonly addressed skills of intervention for students aged 3 to 21 with all levels of functioning. For each listed area, the text analyzes the prerequisite skills and the corresponding Steps to Mastery. It provides a unique, step-by-step process for transforming the Steps to Mastery into defensible IEP goals. The key is to remember that the goal must be understandable, doable, measurable, and achievable. This text provides clear guidelines of quantifiable building blocks to achieve specific goals defined by the student's IEP. School-based SLPs are instrumental in helping students develop speech and language skills essential for mastery of the curriculum and standards. All SLPs working with school-aged children in public schools, private practice, or outpatient clinics will benefit from the information in this text. New to the Second Edition: * Ten Speech and Language Checklists for determining speech and language needs of an individual, 3-21 years of age, as well as measuring progress. * Material on measuring progress including five performance updates. * Goal writing case studies for four students of different ages and skill levels. * A thoroughly updated chapter on writing goals with up-to-date examples. * Revised Prerequisite Skills and Steps to Mastery to reflect the current state of research. * Expanded focus on evidence-based practice. 8th grade math iep goals: The Framework for Teaching Evaluation Instrument, 2013 Edition Charlotte Danielson, 2013 The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the Framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.

8th grade math iep goals: *Rethinking Disability and Mathematics* Rachel Lambert, 2024-04-15 Every child has a right to make sense of math, and to use math to make sense of their worlds. Despite their gifts, students with disabilities are often viewed from a deficit standpoint in mathematics classrooms. These students are often conceptualized as needing to be fixed or remediated. Rethinking Disability and Mathematics argues that mathematics should be a transformative space for these students, a place where they can discover their power and potential and be appreciated for their many strengths. Author Rachel Lambert introduces Universal Design for Learning for Math (UDL Math), a way to design math classrooms that empowers disabled and neurodiverse students to engage in mathematics in ways that lead to meaningful and joyful math learning. The book showcases how UDL Math can open up mathematics classrooms so that they provide access to meaningful understanding and an identity as a math learner to a wider range of students. Weaved throughout the book are the voices of neurodiverse learners telling their own stories of math learning. Through stories of real teachers recognizing the barriers in their own math classrooms and redesigning to increase access, the book: Reframes students with disabilities from a deficit to an asset perspective, paving the way for trusting their mathematical thinking Offers

equitable math instruction for all learners, including those with disabilities, neurodiverse students, and/or multilingual learners Applies UDL to the math classroom, providing practical tips and techniques to support students' cognitive, affective, and strategic development Immerses readers in math classrooms where all students are engaged in meaningful mathematics, from special education day classes to inclusive general education classrooms, from grades K-8. Integrates research on mathematical learning including critical math content such as developing number sense and place value, fluency with math facts and operations, and understanding fractions and algebraic thinking. Explores critical issues such as writing IEP goals in math This book is designed for all math educators, both those trained as general education teachers and those trained as special education teachers. The UDL Math approach is adapted to work for all learners because everyone varies in how they perceive the world and in how they approach mathematical problem solving. When we rethink mathematics to include multiple ways of being a math learner, we make math accessible and engaging for a wider group of learners.

8th grade math iep goals: *The Writing Revolution* Judith C. Hochman, Natalie Wexler, 2017-08-07 Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

8th grade math iep goals: *Dyslexia and Mathematics* Thomas Richard Miles, Elaine Miles, 1992 Dyslexia is seen primarily as a limitation in the ability to deal with symbolic material. As far as the symbols of mathematics are concerned, therefore, special teaching techniques are needed, just as they are for the teaching of reading and spelling. The book contains a wealth of material on individual cases and on children of different ages. Two central themes are discussed: first, that dyslexics need to carry out the operations of adding, dividing, and so on, before being introduced to the symbolism; and second that, because of their difficulties with rote learning, they need to be shown the many regularities and patterns which can be found in the number system. All the contributors have had experience of teaching dyslexic children at various levels.

8th grade math iep goals: *Mathematics Learning in Early Childhood* National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Early Childhood Mathematics, 2009-11-13 Early childhood mathematics is vitally important for young children's present and future educational success. Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics. Furthermore, young children enjoy their early informal experiences with mathematics. Unfortunately, many children's potential in mathematics is not fully realized, especially those children who are economically disadvantaged. This is due, in part, to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities.

Improvements in early childhood mathematics education can provide young children with the foundation for school success. Relying on a comprehensive review of the research, *Mathematics Learning in Early Childhood* lays out the critical areas that should be the focus of young children's early mathematics education, explores the extent to which they are currently being incorporated in early childhood settings, and identifies the changes needed to improve the quality of mathematics experiences for young children. This book serves as a call to action to improve the state of early childhood mathematics. It will be especially useful for policy makers and practitioners—those who work directly with children and their families in shaping the policies that affect the education of young children.

8th grade math iep goals: Schools for All Kinds of Minds Mary-Dean Barringer, Craig Pohlman, Michele Robinson, 2010-03-29 This book shows how schools can—and must—develop expertise in learning variation (understanding how different kinds of minds learn) and apply this knowledge to classroom instruction in order to address the chronic learning challenges and achievement gap faced by millions of students. Barringer shows how using what we know about learning variation with a focus on discovering learning strengths, not just deficits, can help schools create plans for success for those students who often find it elusive. The book specifically addresses how school leaders can incorporate this knowledge into instructional practice and school-level policy through various professional development strategies. *Schools for All Kinds of Minds*: Provides a readable synthesis of the latest research from neuroscience, cognitive science, and child and adolescent development as it relates to understanding learning and its many variations. Links this information to strategies for understanding struggling learners and adapting school practices to accommodate a wider array of learning differences in a classroom. Demonstrates how this understanding of learning variation can change the way teachers and others help students succeed in various academic and content areas and acquire necessary 21st century skills. Includes discussion questions and facilitator guidelines for staff developers and teacher education programs; downloadable forms that accompany exercises from within the book; an action plan for schools to implement the ideas found in the book; and more.

8th grade math iep goals: Aligning IEPs to Academic Standards

Ginevra Courtade-Little, Diane M. Browder, Ph.D., 2005-03-01 With increased emphasis on students meeting state academic standards, instructors of students with moderate and severe disabilities have wondered about their role. Will they continue to integrate their students in the regular classroom and in the general curriculum? Or will their participation in alternate assessments aligned to alternate achievement standards leave them stranded in self-contained classrooms once again? According to authors Ginevra Courtade-Little and Diane Browder, the answer lies in aligning students' IEPs to state standards consistent with students' grade and ability levels. By following this book, your students with significant disabilities can participate in parallel activities directly related to the general curriculum. For example, when meeting a math state standard in measurement, have the student match coins to a linear jig to purchase an item. It's really quite simple: You write IEP goals on standard-based content areas that are appropriate for a student's grade level and ability. This valuable and unique book does just that: Shows you how to construct student IEPs with goals aligned to each state's academic content standards for each student's assigned grade and ability level.

8th grade math iep goals: The Zones of Regulation

Leah M. Kuypers, 2011 ... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called zones, with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD.--Publisher's website.

8th grade math iep goals: IEPs and CCSS: Specially Designed Instructional Strategies Toby Karten, 2013-01-01 The Common Core State Standards, which have been adopted in most states in the country, delineate the skills and knowledge that students are expected to possess at each grade level (K-12) in order to be college and career ready (CCR) by the time they graduate high school. They are designed to ensure that ALL American students—including students with

disabilities-- receive a high quality education that positions them for lifelong success. In IEPs & CCSS: Specially Designed Instructional Strategies, author Toby Karten presents a variety of specially designed instructional strategies and interventions that teachers and IEP team members can use to connect the individualized education programs (IEPs) of students with disabilities to the Common Core State Standards (CCSS). This six-page (tri-fold) laminated guide offers a side-by-side outline of the required components of an IEP and the criteria for instruction according to the CCSS. Karten explains that when developing a student's IEP, the IEP team should include both individualized goals (the behaviors/skills/tasks the student is expected to learn) and the grade level standards of the CCSS. The guide offers examples of accommodations and instructional supports to include in a student's IEP to help him/her meet IEP goals as well as math and literacy standards. Specially designed instruction may include (among other things) * the involvement of additional service providers * instructional strategies based on universal design for learning (UDL) principles * assistive technology devices and services * incorporating the students interests and strengths Five scenarios are provided to demonstrate a variety of ways instruction can be individualized for students with specific classifications, strengths and interests. The guide also outlines a step-by-step approach for helping students with IEPs achieve the standards. Additional online and print resources are also included, making this guide a valuable quick reference tool for IEP team members.
