successful 90-day vegan challenge can be the stepping stone to a lifelong healthier and more compassionate way of life.

H1: Understanding the 90-Day Vegan Challenge

The 90-day vegan challenge is more than just a diet; it's a journey of exploration and self-discovery. It provides a structured timeframe to experience the benefits of a plant-based lifestyle while learning to navigate its challenges. Many find that this timeframe allows for sufficient adaptation and habit formation, increasing the likelihood of long-term adherence. This challenge isn't about deprivation but about abundance – the abundance of delicious plant-based foods and the abundance of positive impacts on your health and the planet.

H2: Potential Health Benefits of a 90-Day Vegan Challenge

Numerous studies highlight the potential health benefits associated with a well-planned vegan diet. A 90-day vegan challenge offers an opportunity to experience these benefits firsthand. These include:

90 day vegan challenge: Fiber Fueled Will Bulsiewicz, MD, 2020-05-12 The instant New York Times, USA Today, and Publisher's Weekly bestseller A bold new plant-based plan that challenges popular keto and paleo diets, from an award-winning gastroenterologist. The benefits of restrictive diets like paleo and keto have been touted for more than a decade, but as renowned gastroenterologist Dr. Will Bulsiewicz, or Dr. B, illuminates in this groundbreaking book, the explosion of studies on the microbiome makes it abundantly clear that elimination diets are in fact hazardous to our health. What studies clearly now show--and what Dr. B preaches with his patients--is that gut health is the key to boosting our metabolism, balancing our hormones, and taming the inflammation that causes a host of diseases. And the scientifically proven way to fuel our guts is with dietary fiber from an abundant variety of colorful plants. Forget about the fiber your grandmother used to take--the cutting-edge science on fiber is incredibly exciting. As Dr. B explains, fiber energizes our gut microbes to create powerhouse postbiotics called short-chain fatty acids (SCFAs) that are essential to our health. SCFAs are scientifically proven to promote weight loss, repair leaky gut, strengthen the microbiome, optimize the immune system, reduce food sensitivities, lower cholesterol, reverse type 2 diabetes, improve brain function, and even prevent cancer. Restrictive fad diets starve the gut of the critical fiber we need, weaken the microbes, and make our system vulnerable. As a former junk-food junkie, Dr. B knows firsthand the power of fiber to dramatically transform our health. The good news is that our guts can be trained. Fiber-rich, real foods--with fruits, vegetables, whole grains, seeds, nuts, and legumes--start working quickly and maintain your long-term health, promote weight loss, and allow you to thrive and feel great from the inside out. With a 28-day jumpstart program with menus and more than 65 recipes, along with essential advice on food sensitivities, Fiber Fueled offers the blueprint to start turbocharging your gut for lifelong health today.

The secrets to a long and healthy life have been released as a result of the China Diet Study. We know now that eating a plant-based diet is a way that we can regain control over our health and prevent and reverse disease. We can bring energy back into our lives with a simple diet switch, by returning to nature. Food should not be processed or engineered, it should not be full of chemicals or produced in factories. Food should be natural, it should be grown, it should be honest. The recipes we have included within this book are all based around the findings of the Chinese Diet Study. The evidence is clear and the switch is simple. If we have an easy and effective way to promote health, wellbeing, boost energy, increase life expectancy and lose weight, why wouldn't we do it? We would be silly to ignore the facts on this one and a lifestyle change means an immune system boost, increase in your ability to focus and a reduction of hunger pains as well as the risk reduction when it comes to major illnesses and diseases. Recipes for a whole month When you read the China Diet Study it can seem obvious that diet changes should be made but where should you start? That is where this book comes in, you can change your diet and your life with no stress or confusion. Start at the beginning and enjoy 30 days of meals. Each day you will have breakfast, lunch and dinner and you will be enjoying a diet that is not only tastes amazing but is also promoting good health. Being healthy has never been so easy! 90 day vegan challenge: *How Not to Die* Michael Greger, M.D., FACLM, Gene Stone,

2015-12-08 From the physician behind the wildly popular NutritionFacts website, *How Not to Die* reveals the groundbreaking scientific evidence behind the only diet that can prevent and reverse many of the causes of disease-related death. The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In *How Not to Die*, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America—heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more—and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug—and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, *How Not to Die* includes Dr. Greger's Daily Dozen—a checklist of the twelve foods we should consume every day. Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor's orders are just what we need to live longer, healthier lives.
