And by telling us what goes on when the microphone is silent, she has taken the voice on the radio and given it heart. Michael Perry, author of *Population 485* and *Truck: A Love Story* A witty, gritty look at life on the receiving end of our cries for help. Reader's Digest (Editor's Choice) You answer a call from a fourteen-year-old boy asking for someone to arrest his mother, who is smoking crack in their bathroom. You talk with him until the cops arrive, making sure there are no weapons around and learning that his favorite subject in school is lunch. Five minutes later, you have to deal with someone complaining about his neighbor's clarinet practice. What is it like to be on the receiving end of desperate calls for help . . . every day? Caroline Bureau, a former newspaper reporter and nursing student who couldn't stand the sight of blood, takes a job as an emergency dispatcher because she likes helping people. But on-the-job training at the comm center proves to be more than she bargained for. As she adjusts to a daily life of catastrophe and comedy, domestics and drunks, cops and robbers, junk food and sarcasm, lost cats and suicides, she discovers that crisis can become routine, that coworkers can be mean--that she must continue to care and, at times, learn how to let go. The day may come when I have to dial 911. I hope to God that the person who answers is Caroline Bureau or someone like her. Funny, honest, and elegantly simple, this book left me with a sense of grace and hope.--Alison McGhee, author of *Shadow Baby*, *Rainlight*, *Was It Beautiful?* and *Falling Boy* Caroline Bureau is a 911 dispatch operator for the police and fire departments in White Bear Lake, Minnesota.

911 dispatcher online training: Strategies to Improve Cardiac Arrest Survival Institute of Medicine, Board on Health Sciences Policy, Committee on the Treatment of Cardiac Arrest: Current Status and Future Directions, 2015-09-29 Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

Potty Training Jamie Glowacki, 2015-06-16 From potty-training expert and social worker Jamie Glowacki, who's already helped over half a million families successfully toilet train their preschoolers, comes a newly revised and updated guide that's "straight-up, parent-tested, and funny to boot" (Amber Dusick, author of *Parenting: Illustrated with Crappy Pictures*). Worried about potty training? Let Jamie Glowacki, potty-training expert, show you how it's done. Her six-step, proven process to get your toddler out of diapers and onto the toilet has already worked for tens of thousands of kids and their parents. Here's the good news: your child is probably ready to be potty trained EARLIER than you think (ideally, between 20-30 months), and it can be done FASTER than you expect (most kids get the basics in a few days—but Jamie's got you covered even if it takes a little longer). If you've ever said to yourself: -How do I know if my kid is ready? -Why won't my child poop in the potty? -How do I avoid "potty power struggles"? -How can I get their daycare provider on board? -My kid was doing so well—why is he regressing? -And what about nighttime?! Oh Crap! Potty Training can solve all of these (and other) common issues. This isn't theory, you're not bribing with candy, and there are no gimmicks. This is real-world, from-the-trenches potty training information—all the questions and all the answers you need to do it once and be done with diapers for good.
