**99 property management fresno ca: Searching for Paradise** Douglas E. Booth, 2002 The signs of economic change loom large in the mountain West as shuttered mines and lumber mills are overshadowed by luxurious homes sprouting on valley bottoms and ridge lines. This perceptive book explains these changes, assesses their effects on the natural environment, and gauges the reactions of local communities. Drawing on concepts from economics, environmental ethics, and conservation biology, Booth suggests that the ultimate solution lies in re-directing population growth away from rural areas to reinvigorated and environmentally attractive ecological cities and to increase the density of development within rural areas themselves. Policymakers, activists, and local citizens concerned with rural sprawl will find this book an invaluable resource. Visit our website for sample chapters!
