a business proposal ep 1 eng sub: Business and Human Rights in Europe Angelica Bonfanti, 2018-09-13 Transnational business activities are important drivers of growth for developing and the least developed countries. However, they can also negatively impact the enjoyment of human rights. In some cases, multinational enterprises (MNEs) have even been accused of grave human rights abuses in the territory of the states where their subsidiaries operate. Since the parent companies of many MNEs are incorporated under the law of European states, those countries' domestic law and the European legal framework play a crucial role in establishing how their activities should be conducted – also throughout their supply chains – and which remedies will be available when corporate human rights violations occur. In recent years, the European Union, the Council of Europe and their Member States have been adopting policies and legislation to ensure respect for human rights by businesses and have developed a body of related case law. These legal instruments can be considered the European responses to the challenges posed at international-law level, and they constitute the focus of research of this book. Through its collected chapters – written by scholars and practitioners under the direction of the editor, Angelica Bonfanti – the book identifies the European solutions to the business and human rights international legal issues, provides an overall assessment of their effectiveness, and examines their potential evolution.

The International Labour Organisation (ILO) began to observe this day in 2003 to promote a safe and healthy work environment as a fundamental principle and right at work through collaboration and encouraging open social dialogue. We have learned from past and ongoing crises, such as the COVID-19 pandemic that workplaces can be of vital importance in the prevention and control of outbreaks. During this unprecedented period, it was demonstrated that effective participation and communication between governments, employers, and workers had an essential role in transforming occupational health and safety systems; through implementing effective health and safety measures in the workplace to contain the spread of disease, systems were built that not only safeguarded the health and safety of workers but protected and upheld the health of society at large. In addition, these measures allowed important services to continue in confidence, with health and safety being at the forefront.
