a different mirror ebook: A Different Mirror for Young People Ronald Takaki, 2012-10-30 A longtime professor of Ethnic Studies at the University of California at Berkeley, Ronald Takaki was recognized as one of the foremost scholars of American ethnic history and diversity. When the first edition of *A Different Mirror* was published in 1993, Publishers Weekly called it a brilliant revisionist history of America that is likely to become a classic of multicultural studies and named it one of the ten best books of the year. Now Rebecca Stefoff, who adapted Howard Zinn's best-selling *A People's History of the United States* for younger readers, turns the updated 2008 edition of Takaki's multicultural masterwork into *A Different Mirror for Young People*. Drawing on Takaki's vast array of primary sources, and staying true to his own words whenever possible, *A Different Mirror for Young People* brings ethnic history alive through the words of people, including teenagers, who recorded their experiences in letters, diaries, and poems. Like Zinn's *A People's History*, Takaki's *A Different Mirror* offers a rich and rewarding people's view perspective on the American story.

Takaki, 2012-11 In an extraordinary blend of narrative history, personal recollection, & oral testimony, the author presents a sweeping history of Asian Americans. He writes of the Chinese who laid tracks for the transcontinental railroad, of plantation laborers in the canefields of Hawaii, of picture brides marrying strangers in the hope of becoming part of the American dream. He tells stories of Japanese Americans behind the barbed wire of U.S. internment camps during World War II, Hmong refugees tragically unable to adjust to Wisconsin's alien climate & culture, & Asian American students stigmatized by the stereotype of the model minority. This is a powerful & moving work that will resonate for all Americans, who together make up a nation of immigrants from other shores.

a different mirror ebook: A Distant Mirror Barbara W. Tuchman, 1987-07-12 A "marvelous history"* of medieval Europe, from the bubonic plague and the Papal Schism to the Hundred Years' War, by the Pulitzer Prize-winning author of *The Guns of August* *Lawrence Wright, author of *The End of October*, in *The Wall Street Journal* The fourteenth century reflects two contradictory images: on the one hand, a glittering age of crusades, cathedrals, and chivalry; on the other, a world plunged into chaos and spiritual agony. In this revelatory work, Barbara W. Tuchman examines not only the great rhythms of history but the grain and texture of domestic life: what childhood was like; what marriage meant; how money, taxes, and war dominated the lives of serf, noble, and clergy alike. Granting her subjects their loyalties, treacheries, and guilty passions, Tuchman re-creates the lives of proud cardinals, university scholars, grocers and clerks, saints and mystics, lawyers and mercenaries, and, dominating all, the knight—in all his valor and "furious follies," a "terrible worm in an iron cocoon." Praise for *A Distant Mirror* "Beautifully written, careful and thorough in its scholarship . . . What Ms. Tuchman does superbly is to tell how it was. . . . No one has ever done this better."—*The New York Review of Books* "A beautiful, extraordinary book . . . Tuchman at the top of her powers . . . She has done nothing finer."—*The Wall Street Journal* "Wise, witty, and wonderful . . . a great book, in a great historical tradition."—*Commentary*

are rarely included in books for young people. A Young People's History of the United States is also a companion volume to *The People Speak*, the film adapted from *A People's History of the United States* and *Voices of a People's History of the United States*. Beginning with a look at Christopher Columbus's arrival through the eyes of the Arawak Indians, then leading the reader through the struggles for workers' rights, women's rights, and civil rights during the nineteenth and twentieth centuries, and ending with the current protests against continued American imperialism, Zinn in the volumes of *A Young People's History of the United States* presents a radical new way of understanding America's history. In so doing, he reminds readers that America's true greatness is shaped by our dissident voices, not our military generals.

a different mirror ebook: The Red Mirror Chihua Wen, 2018-02-12 These evocative stories bring to life the tragic personal impact of the Cultural Revolution on the families of China's intellectuals. Now adults, survivors recall their childhood during the tumultuous years between 1965 and 1976, when Mao's death finally drew a curtain on a bitterly failed social and political experiment. A series of first-person narratives eloquently describes the life-long influence of this seminal period on China's children. Those who were teenagers in the late 1960s joined the Red Guards and the revolutionary rebel groups, following Mao's directives to make revolution, often to their own undoing. Those who were too young to participate directly were even more vulnerable. Although they had little understanding of the political firestorm that engulfed their parents, they were old enough to understand and feel the terror it brought. Vividly capturing the emotional intensity of the time, these stories explore what it was like to be caught up in revolutionary fervor, to be sent to the countryside, to be separated, either ideologically or physically, from one's parents, often forever. By undermining families and family structure, the Cultural Revolution created a generation of Chinese who view politics, the Communist Party, and life itself with deep cynicism. Presenting a spectrum of individual stories of people who saw the Cultural Revolution through the eyes of a child, The Red Mirror offers rare insights for understanding the crippling legacy of the Cultural Revolution.

a different mirror ebook: Mirror Worlds David Gelernter, 1993-01-28 Technology doesn't flow smoothly; it's the big surprises that matter, and Yale computer expert David Gelernter sees one such giant leap right on the horizon. Today's small scale software programs are about to be joined by vast public software works that will revolutionize computing and transform society as a whole. One such vast program is the Mirror World. Imagine looking at your computer screen and seeing reality--an image of your city, for instance, complete with moving traffic patterns, or a picture that sketches the state of an entire far-flung corporation at this second. These representations are called Mirror Worlds, and according to Gelernter they will soon be available to everyone. Mirror Worlds are high-tech voodoo dolls: by interacting with the images, you interact with reality. Indeed, Mirror Worlds will revolutionize the use of computers, transforming them from (mere) handy tools to crystal

balls which will allow us to see the world more vividly and see into it more deeply. Reality will be replaced gradually, piece-by-piece, by a software imitation; we will live inside the imitation; and the surprising thing is--this will be a great humanistic advance. We gain control over our world, plus a huge new measure of insight and vision. In this fascinating book--part speculation, part explanation--Gelernter takes us on a tour of the computer technology of the near future. Mirror Worlds, he contends, will allow us to explore the world in unprecedented depth and detail without ever changing out of our pajamas. A hospital administrator might wander through an entire medical complex via a desktop computer. Any citizen might explore the performance of the local schools, chat electronically with teachers and other Mirror World visitors, plant software agents to report back on interesting topics; decide to run for the local school board, hire a campaign manager, and conduct the better part of the campaign itself--all by interacting with the Mirror World. Gelernter doesn't just speculate about how this amazing new software will be used--he shows us how it will be made, explaining carefully and in detail how to build a Mirror World using technology already available. We learn about disembodied machines, trellises, ensembles, and other computer components which sound obscure, but which Gelernter explains using familiar metaphors and terms. (He tells us that a Mirror World is a microcosm just like a Japanese garden or a Gothic cathedral, and that a computer program is translated by the computer in the same way a symphony is translated by a violinist into music.) Mirror Worlds offers a lucid and humanistic account of the coming software revolution, told by a computer scientist at the cutting edge of his field.

Pendergrast spins tales of the 2,500-year mystery of whether Archimedes and his burning mirror really set faraway Roman ships on fire; the medieval Venetian glassmakers, who perfected the technique of making large, flat mirrors from clear glass and for whom any attempt to leave their cloistered island was punishable by death; Isaac Newton, whose experiments with sunlight on mirrors once left him blinded for three days; the artist David Hockney, who holds controversial ideas about Renaissance artists and their use of optical devices; and George Ellery Hale, the manic-depressive astronomer and telescope enthusiast who inspired (and gave his name to) the twentieth century's largest ground-based telescope. a different mirror ebook: *Psychotherapy and Personal Change* Ahron Friedberg, Sandra Sherman, 2020-12-23 *Psychotherapy and Personal Change: Two Minds in a Mirror* offers unique day-to-day accounts of patients undergoing psychotherapy and what happens during talk therapy to startle the complacent, conscious mind and expose the unconscious. It is a candid, moment-by-moment revelation of how the therapist's own memories, feelings, and doubts are often as much a factor in the process as those of the patient. In the process of healing, both the therapist and the patient reflect on each other and on themselves. As the therapist develops empathy for the patient, and the patient develops trust in the therapist, their shared memories, feelings, and associations interact and entwine - almost kaleidoscopically - causing each to ask questions of the other and themselves. In this book, Dr. Friedberg reveals personal insights that arose as he recalled memories to share with patients. These insights might not have arisen but for the therapy, which operates in multiple directions as patient and therapist explore the present, the past, and the

unknown. Readers will see the therapist – like the patient – as a complex, vulnerable human being influenced by parents, colleagues, and friends, whose conscious and unconscious minds ramify through each other. It is a truism of psychotherapy that in order to commit to the process, whatever the reservations or misconceptions, one must understand that therapy is not passive. The patient must expect to become personally involved with the therapist. The patient learns about the therapist even as the therapist helps the patient to gain insight into him- or herself. Psychotherapy and Personal Change shows how this exchange develops and how each actor is affected. Through specific examples, the book raises the reader's understanding of what to expect from psychotherapy and enhances his/her insight into therapy that he or she may have had already.

a different mirror ebook: We Yevgeny Zamyatin, 2023-03-06 We is a dystopian novel written by Russian writer Yevgeny Zamyatin. Originally drafted in Russian, the book could be published only abroad. It was translated into English in 1924. Even as the book won a wide readership overseas, the author's satiric depiction led to his banishment under Joseph Stalin's regime in the then USSR. The book's depiction of life under a totalitarian state influenced the other novels of the 20th century. Like Aldous Huxley's Brave New World and George Orwell's Nineteen Eighty-four, We describes a future socialist society that has turned out to be not perfect but inhuman. Orwell claimed that Brave New World must be partly derived from We, but Huxley denied this. The novel is set in the future. D-503, a spacecraft engineer, lives in the One State which assists mass surveillance. Here life is scientifically managed. There is no way of referring to people except by their given numbers. The society is run strictly by reason as the primary justification for the construct of the society. By way of formulae and equations outlined by the One State, the individual's behaviour is based on logic.

a different mirror ebook: The Empty Mirror Janwillem van de Wetering, 2014-07-01 Seen by many as a contemporary classic, Janwillem van de Wetering's small and admirable memoir records the experiences of a young Dutch student—later a widely celebrated mystery writer—who spent a year and a half as a novice monk in a Japanese Zen Buddhist monastery. As Chogyam Trungpa Rinpoche, author of *Cutting Through Spiritual Materialism*, has written, *The Empty Mirror* should be very encouraging for other Western seekers. It is the first book in a trilogy that continues with *A Glimpse of Nothingness* and *Afterzen*.

a different mirror ebook: **The Mirror Empire** Kameron Hurley, 2014-08-26 An ambitious tale of magic, war, and parallel worlds that pushes the boundaries of epic fantasy—from a two-time Hugo Award winner On the eve of a recurring catastrophic event known to extinguish nations and reshape continents, a troubled orphan evades death and slavery to uncover her own bloody past . . . while a world goes to war with itself. In the frozen kingdom of Saiduan, invaders from another realm are decimating whole cities, leaving behind nothing but ash and ruin. At the heart of this war lie the pacifistic Dhai people, once enslaved by the Saiduan and now courted by their former masters to provide aid against the encroaching enemy. As the dark star of the cataclysm rises, an illegitimate ruler is tasked with holding together a country fractured by civil war; a precocious young fighter is asked to betray his family to save his skin; and a half-Dhai general must choose between the eradication of her father's people or loyalty to her alien Empress. Through tense alliances and devastating betrayal, the Dhai and their allies attempt to hold against a seemingly unstoppable force as enemy nations prepare for a coming together of worlds as old as the universe itself. In the end, one world will rise—and many will perish. Stretching from desolate tundras to steamy, semi-tropical climes seething with sentient plant life, this is an epic tale of blood mages and mercenaries, emperors and priestly assassins, who must unite to save a world on the brink of ruin. a different mirror ebook: *Mirror of the World* Julian Bell, 2010-05-25 "Exuberant, astute, and splendidly illustrated history of world art . . . draws fascinating parallels between artistic developments in Western and non-Western art."—Publishers Weekly In this beautifully written story of art, Julian Bell tells a vivid and compelling history of human artistic achievements, from prehistoric stone carvings to the latest video installations. Bell, himself a painter, uses a variety of objects to reveal how art is a product of our shared experience and how, like a mirror, it can reflect the human condition. With hundreds of illustrations and a uniquely global perspective, Bell juxtaposes examples that challenge and enlighten the reader: dancing bronze figures from southern India, Romanesque sculptures, Baroque ceilings, and jewel-like Persian manuscripts are discussed

side by side. With an insider's knowledge and an unerring touch, Bell weaves these diverse strands into an invaluable introduction to the wider history of world art.

a different mirror ebook: *The Mirror Book* Charlotte Grimshaw, 2021-03-30 Brave, explosive, and thought-provoking, this is a powerful memoir. 'It's material, make a story out of it,' was the mantra Charlotte Grimshaw grew up with in her literary family. But when her life suddenly turned upside-down, she needed to re-examine the reality of that material. The more she delved into her memories, the more the real characters in her life seemed to object. So what was the truth of 'a whole life lived in fiction'? This is a vivid account of a New Zealand upbringing, where rebellion was encouraged, where trouble and tragedy lay ahead. It looks beyond the public face to the 'messy reality of family life - and much more'.--Back cover.
