10th grade english worksheets: The Oval Portrait Edgar Allan Poe, 2021-09-06 Perhaps fitting for a horror short story, the devil is in the details in Poe's The Oval Portrait (1842). Inside he gets absorbed by a stunning painting and decides to delve into its origins with the help from a book he finds on a pillow. As per usual Poe can't help himself to play with layers, and most of the story is told as an embedded narrative. The intense emotional and psychological depths of the narrator's infatuation with the portrait and the enticing volume that helps to shed a light on the painting make this short story another fascinating and haunting and Poesque tale which succinctly glorifies the immortality of

art. Edgar Allan Poe (1809-1849) was an American poet, author, and literary critic. Most famous for his poetry, short stories, and tales of the supernatural, mysterious, and macabre, he is also regarded as the inventor of the detective genre and a contributor to the emergence of science fiction, dark romanticism, and weird fiction. 10th grade english worksheets: My Freshman Year Rebekah Nathan, 2005 After more than fifteen years of teaching, Rebekah Nathan, a professor of anthropology at a large state university, realized that she no longer understood the behavior and attitudes of her students. Fewer and fewer participated in class discussion, tackled the assigned reading, or came to discuss problems during office hours. And she realized from conversations with her colleagues that they, too, were perplexed: Why were students today so different and so hard to teach? Were they, in fact, more likely to cheat, ruder, and less motivated? Did they care at all about their education, besides their grades? Nathan decided to put her wealth of experience in overseas ethnographic fieldwork to use closer to home and apply to her own university. Accepted on the strength of her high school transcript, she took a sabbatical and enrolled as a freshman for the academic year. She immersed herself in student life, moving into the dorms and taking on a full course load. She ate in the student cafeteria, joined student clubs, and played regular pick-up games of volleyball and tag football (sports at which the athletic fifty-something-year-old could hold her own). Nathan had resolved that, if asked, she would not lie about her identity; she found that her classmates, if they were curious about why she was attending college at her age, never questioned her about her personal life. Based on her interviews and conversations with fellow classmates, her interactions with professors and with other university employees and offices, and her careful day-to-day observations, My Freshman Year provides a compelling account of college life that should be read by students, parents, professors, university administrators, and anyone else concerned about the state of higher education in America today.

Placing her own experiences and those of her classmates into a broader context drawn from national surveys of college life, Nathan finds that today's students face new challenges to which academic institutions have not adapted. At the end of her freshman year, she has an affection and respect for students as a whole that she had previously reserved only for certain individuals. Being a student, she discovers, is hard work. But she also identifies fundamental misperceptions, misunderstandings, and mistakes on both sides of the educational divide that negatively affect the college experience. By focusing on the actual experiences of students, *My Freshman Year* offers a refreshing alternative to the frequently divisive debates surrounding the political, economic, and cultural significance of higher education--as well as a novel perspective from which to look at the achievements and difficulties confronting America's colleges and universities in the twenty-first century.

10th grade english worksheets: Translanguaging and English as a Lingua Franca in the Plurilingual Classroom Anna Mendoza, 2023-03-09 This book explores multilingual practices such as translanguaging, code-switching and stylization in secondary classrooms in Hawai'i. Using linguistic ethnography, it investigates how students in a linguistically diverse class, including those who speak less commonly taught languages, deal with learning tasks and the social life of the class when using these languages alongside English as a lingua franca. It discusses implications for teachers, from balancing student needs in lesson planning and instruction to classroom management, where the language use of one individual or group can create challenges of understanding, participation or deficit identity positionings for another. The book argues that students must not only be allowed to flex their whole language repertoires to learn and communicate but also be aware of how to build bridges across differences in individual repertoires. It offers suggestions for teachers to consider within their own contexts, highlighting the need for teacher autonomy to cultivate the classroom community's critical language awareness and create conducive environments for learning. This book will appeal to postgraduate students, researchers and academics working in the fields of sociolinguistics and linguistic ethnography as well as pre-service and in-service teachers in linguistically diverse secondary school contexts.

10th grade english worksheets: Policies and Pedagogies of Canadian Offshore Schools Fei Wang, André Elias Mazawi, 2024-07-08 This book critically examines the international, geopolitical, policy, institutional, and curricular challenges facing Canadian offshore school programs. Bringing together scholars and practitioners concerned with addressing the pedagogical, organizational, curriculum, and policy aspects of this transnational mode of schooling, it represents a ground-breaking exploration of K-12 offshore schools within the wider contexts of global geopolitics and forms of soft power. The book examines the vulnerability that arises from having to manoeuvre political, social, geopolitical, and economic policy simultaneously in both the host and home-licencing countries. It delves into conflicts within the context of neoliberal economic agendas, neocolonial and geopolitical interests, and social class reproduction within host countries. The book is the first scholarly space that questions how international educational initiatives are affected by emerging global threats, such as the recent Covid pandemic. Additionally, it unpacks the question of citizenship and its intersections with social class, immigration, and sociocultural dynamics. It explores how these intersections forge new paths not only to mobility but also to new configurations of power and new spaces of politics and identity. With a range of reflexive, empirical, and theoretical contributions that cover every aspect of offshore schools, the book reassesses the trope of globalization dominated by Eurocentric perspectives. It decompartmentalizes diverse perspectives and insights on the internationalisation of schooling opportunities, and provides an overview of the challenges and possibilities open to offshore schools in different cultural contexts, making it the first comprehensive body of research on this type of schooling. This book will be of great value to researchers, faculty, scholars, and postgraduate students working across international and comparative education. It will be particularly useful to those interested in the intersections between education and geopolitically situated forms of soft power.
