11064 business center drive: Communities in Action National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-04-27 In the United States, some populations suffer from far greater disparities in

health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

11064 business center drive: *Empathy in Health Professions Education and Patient Care* Mohammadreza Hojat, 2016-04-21 In this thorough revision, updating, and expansion of his great 2007 book, *Empathy in Patient Care*, Professor Hojat offers all of us in healthcare education an uplifting magnum opus that is sure to greatly enhance how we conceptualize, measure, and teach the central professional virtue of empathy. Hojat's new *Empathy in Health Professions Education and Patient Care* provides students and professionals across healthcare with the most scientifically rigorous, conceptually vivid, and comprehensive statement ever produced proving once and for all what we all know intuitively – empathy is healing both for those who receive it and for those who give it. This book is filled with great science, great philosophizing, and great 'how to' approaches to education. Every student and practitioner in healthcare today should read this and keep it by the bedside in a permanent place of honor. Stephen G Post, Ph.D., Professor of Preventive Medicine, and Founding Director of the Center for Medical Humanities, Compassionate Care, and Bioethics, School of Medicine, Stony Brook University Dr. Hojat has provided, in this new edition, a definitive resource for the evolving area of empathy research and education. For those engaged in medical student or resident education and especially for those dedicated to efforts to improve the patient experience, this book is a treasure trove of primary work in the field of empathy. Leonard H. Calabrese, D.O., Professor of Medicine, Cleveland Clinic Lerner College of Medicine of Case Western Reserve University The latest edition of *Empathy in Health Professions Education and Patient Care* grounds the clinical art of empathic caring in the newly recognized contributions of brain imagery and social cognitive neuroscience. Furthermore, it updates the accumulating empirical evidence for the clinical effects of empathy that has been facilitated by the widespread use of the Jefferson Scale of Empathy, a generative contribution to clinical research by this book's author. In addition, the book is so coherently structured that each chapter contributes to an overall understanding of empathy, while also covering its subject so well that it could stand alone. This makes *Empathy in Health Professions Education and Patient Care* an excellent choice for clinicians, students, educators and researchers. Herbert Adler, M.D., Ph.D. Clinical Professor of Psychiatry and Human Behavior, Sidney Kimmel Medical College at Thomas Jefferson University It is my firm belief that empathy as defined and assessed by Dr. Hojat in his seminal book has far reaching implications for other areas of human interaction including business, management, government, economics, and international relations.
