Knowledge is not merely everything we have come to know, but also ideas we have pondered long enough to know in which way they are related, and how these ideas can be put to practical use. Modern aviation has been made possible as a result of much scientific search. However, the very first useful results of this research became available a considerable length of time after the aviation pioneers had made their first flights. Apparently, researchers were not able to find an adequate explanation for the occurrence of lift until the beginning of the 21st century. Also, for the fundamentals of stability and control, there was no theory available that the pioneers could rely on. Only after the first motorized flights had been successfully made did researchers become more interested in the science of aviation, which from then on began to take shape. In modern day life, many millions of passengers are transported every year by air. People in the western societies take to the skies, on average, several times a year. Especially in areas surrounding busy airports, travel by plane has been on the rise since the end of the Second World War. Despite becoming familiar with the sight of a jumbo jet commencing its flight once or twice a day, many find it astonishing that such a colossus with a mass of several hundred thousands of kilograms can actually lift off from the ground.

11157 lindbergh business court: How Change Happens Cass R. Sunstein, 2019-04-09 An “illuminating” study that reveals the different ways social change occurs—for readers of Freakonomics and Thinking, Fast and Slow (The New York Times) How does social change happen? When do social movements take off? Sexual harassment was once something that women had to endure; now a movement has risen up against it. White nationalist sentiments, on the other hand, were largely kept out of mainstream discourse; now there is no shortage of media outlets for them. In this book, with the help of behavioral economics, psychology, and other fields, Cass Sunstein casts a bright new light on how change happens. Sunstein focuses on the crucial role of social norms—and on their frequent collapse. When norms lead people to silence themselves, even an unpopular status quo can persist. Then one day, someone challenges the norm—a child who exclaims that the emperor has no clothes; a woman who says “me too.” Sometimes suppressed outrage is unleashed, and long-standing practices fall. Sometimes change is more gradual, as “nudges” help produce new and different decisions—apps that count calories; texted reminders of deadlines; automatic enrollment in green energy or pension plans. Sunstein explores what kinds of nudges are effective and shows why nudges sometimes give way to bans and mandates. Finally, he considers social divisions, social cascades, and “partyism,” when identification with a political party creates a strong bias against all members of an opposing party—which can both fuel and block social change.

In 2010, eight writers came together to contribute stories to an anthology on fictional / futuristic takes on the city of Lagos via a workshop tagged LAGOS_2060, conceived to commemorate Nigeria's golden jubilee. The anthology that grew out of the workshop is telling in the different versions of the future it foretells. In LAGOS_2060 - an unusual scenario planning exercise achieved through the power and magic of a creative writing programme - there are climate change induced natural disasters actively plugged by doomsday preachers of the day, there are serious government institutions involved in first rate science and more often than not, these institutions tackle and solve the energy crisis to various degrees of success. There are wars and near wars as Lagos threatens to secede from the Nigerian state to have full control of its own economy. There are robots, amphibious speed trains, psychedelic drugs and highly trained security operatives with conflicts of interest, but more importantly, there are the ubiquitous Lagos people, whose industry and inventiveness seems largely unchanged, despite how much their city has travailed in the intervening half century.
