Shepherd: It is the ragged end of the Vietnam war. With the debacle of a failing South Vietnamese invasion of Northern Laos as background, A Shepherd to Fools tells the harrowing tale of a covert Hatchet Team of US soldiers and Montagnard mercenaries. They are ordered to find and capture or kill a band of American deserters, called Longshadows, before the world learns of their paralyzing rebellion. An earlier attempt to capture them failed disastrously, the facts of it buried. Captain Hugh Englander commands the Hatchet Team. He is a humorless bastard, sneering and discourteous to every regular army soldier. He cares little for the welfare of his own men and nothing for the lives of the deserters. The conflict between him and Captain David Weisman, the artillery officer assigned to the mission for artillery support, threatens to tear the team apart. Deep in the Laotian jungle, the team is caught in a final, horrific battle facing an enemy armed with Sarin nerve gas, the "worst of the worst" of the war's clandestine weapons.

11334 business park circle: Looking for Love in the Legal Discourse of Marriage Renata Grossi, 2014-09-01 This book examines the (in)visibility of romantic love in the legal discourse surrounding modern Australian marriage. It looks at how romantic love has become a core part of modernity, and a dominant part of the Western marriage discourse, and considers how the ideologies of romantic love are (or are not) replicated in the legal meaning of marriage. This examination raises two key issues. If love has become central to people's understanding of marriage, then it is important for the legitimacy of law that love is reflected in both the content and application of the law. More fundamentally, it requires us to reconsider how we understand law, and to ask whether it is engaged with emotions, or separate from them. Along the way this book also considers the meaning of love itself in contemporary society, and asks whether love is a radical force capable of breaking down conservative meanings embedded in institutions like marriage, or whether it simply mirrors them. This book will be of interest to everyone working on love, marriage and sexuality in the disciplines of law, sociology and philosophy.

11334 business park circle: Molecular Therapies of Cancer Georg F. Weber, 2015-07-22 *Molecular Therapies of Cancer* comprehensively covers the molecular mechanisms of anti-cancer drug actions in a comparably systematic fashion. While there is currently available a great deal of literature on anti-cancer drugs, books on the subject are often concoctions of invited review articles superficially connected to one another. There is a lack of comprehensive and systematic text on the topic of molecular therapies in cancer. A further deficit in the relevant literature is a progressive sub-specialization that typically limits textbooks on cancer drugs to cover either pharmacology or medicinal chemistry or signal transduction, rather than explaining molecular drug actions across all those areas; *Molecular Therapies of Cancer* fills this void. The book is divided into five sections: 1. Molecular Targeting of Cancer Cells; 2. Emerging and Alternative Treatment Modalities; 3. Molecular Targeting of Tumor-Host Interactions; 4. Anti-Cancer Drug Pharmacokinetics; and 5. Supportive Therapies.
