1175 n business ih 35: Understanding the British Empire Ronald Hyam, 2010-05-20

Understanding the British Empire draws on a lifetime's research and reflection on the history of the

British Empire by one of the senior figures in the field. Essays cover six key themes: the geopolitical and economic dynamics of empire, religion and ethics, imperial bureaucracy, the contribution of political leaders, the significance of sexuality, and the shaping of imperial historiography. A major new introductory chapter draws together the wider framework of Dr Hyam's studies and several new chapters focus on lesser known figures. Other chapters are revised versions of earlier papers, reflecting some of the debates and controversies raised by the author's work, including the issue of sexual exploitation, the European intrusion into Africa, including the African response to missionaries, trusteeship, and Winston Churchill's imperial attitudes. Combining traditional archival research with newer forms of cultural exploration, this is an unusually wide-ranging approach to key aspects of empire.

1175 n business ih 35: Enterprising Africa Stephen Dobson, Paul Jones, Daniel Agyapong, Gideon Maas, 2020-12-30 Enterprising Africa explores the future opportunities, challenges, growth areas and key themes that will shape entrepreneurship in the African continent over the next decade. Entrepreneurship can be the key to unlock resilient growth, but only if it is driven by both socially productive and growth-oriented new businesses. The book considers entrepreneurship as an enabler for socio-economic growth and development in Africa, especially in the context of youth unemployment and increasing youth population for which the traditional, and indeed emerging, industrial sectors will not be able to produce sufficient jobs to meet demand. Organised around three thematic parts, Part I covers the notion of inclusive growth and the role that entrepreneurs can play supporting this. Part II considers the dynamic between entrepreneurs and the environment since social, economic and environmental concerns need to build upon each other rather than vie for recognition. Finally, Part III offers chapters exploring policy contexts and the wider institutional ecosystems that need to be developed and enhanced to ensure a strong and vibrant environment for the future entrepreneurs of Africa to thrive. Edited and authored by leading experts in the field, this fascinating text will be of interest to academics as well as students of International, Transformational and Social Entrepreneurship, and International and African Business.

1175 n business ih 35: Complexity in Economic and Social Systems Stanisław Drożdż, Jarosław Kwapien, Paweł Oświęcimka, 2021-05-11 There is no term that better describes the essential features of human society than complexity. On various levels, from the decision-making processes of individuals, through to the interactions between individuals leading to the spontaneous formation of groups and social hierarchies, up to the collective, herding processes that reshape whole societies, all these features share the property of irreducibility, i.e., they require a holistic, multi-level approach formed by researchers from different disciplines. This Special Issue aims to collect research studies that, by exploiting the latest advances in physics, economics, complex networks, and data science, make a step towards understanding these economic and social systems. The majority of submissions are devoted to financial market analysis and modeling, including the stock and cryptocurrency markets in the COVID-19 pandemic, systemic risk quantification and control, wealth condensation, the innovation-related performance of companies, and more. Looking more at societies, there are papers that deal with regional development, land speculation, and the-fake news-fighting strategies, the issues which are of central interest in contemporary society. On top of this, one of the contributions proposes a new, improved complexity measure.

1175 n business ih 35: *Integrated Broadband Networks* M.C.J. Elton, 2014-06-28 Integrated broadband networks (IBNs), when compared to high definition television, are seen by many as probably being more important to the future industrial competitiveness of the United States in the telecommunications field, and as certainly raising far more complex issues of economics, law, regulation, and social impact. The first concerted attempt to identify and investigate these issues was started in 1987 by a leading US telecommunications policy research center. This book presents key contributions to that study, each written by a leading authority in his field. Its breadth of coverage does justice to the multifaceted nature of the core policy issues; its scholarly standards make it a valuable resource for future researchers; and its relevance to immediate policy concerns

makes it required reading for those who need to understand what will continue to be a highly controversial public debate for a long time to come.

1175 n business ih 35: Philosophy and Business Ethics Guglielmo Faldetta, Edoardo Mollona, Massimiliano Matteo Pellegrini, 2022-06-06 This book explores the relationship between philosophy and business ethics. Academics and practitioners often muse about the ethical and moral aspect of management and business actions, but these studies can lack a deeper philosophical grounding. Contributors to this volume challenge this gap by applying different philosophical paradigms and theories to business management issues. The territory covered by the contributions collected in this book spans from the foundations of business management literature itself, to the role of philosophy in new business models and technology; from the way philosophical theory can explain - and encourage - ethical firm behaviour, to the political stance that an organization takes. Contributors take a holistic approach to business and management, bringing together real-world examples and rich academic theory, creating an interdisciplinary volume, with international authors. Covering important topics such as corporate social responsibility, sustainability, leadership, and stakeholder relations, this book will be of interest to academics working in the field of business ethics, philosophy and management studies.
