1199 union handbook 2022: Multilateral Cooperation in Tax Law Martin Klokár, Katharina Moldaschl, 2023-10-03 An in-depth analysis of various aspects of multilateral cooperation in tax law Tax evasion and aggressive tax planning causing base erosion and profit shifting (BEPS) has been a widely discussed topic among academics and tax policy makers over the past decades. Increasing globalization and digitalization have contributed to the intensification of this issue in recent years. At the same time, states continue to largely insist on their sovereignty in the area of tax law. However, due to their cross-border nature, issues related to BEPS are shared problems among the states and can typically not be solved by a single nation. Therefore, multilateral cooperation represents an option to build a bridge between the states' demand for sovereignty and the problems caused by BEPS. In this regard, the OECD, the UN, and the EU play an important role in introducing international tax standards in an attempt to effectively address tax evasion and aggressive tax planning in many ways. The interaction and cooperation between different international, supranational (EU), and regional organizations is an ongoing process. In this context, the topic Multilateral Cooperation in Tax Law was selected as the general topic for the master's theses of the part-time 2021-23 class of the postgraduate LL.M. programme in International Tax Law at WU (Vienna University of Economics and Business). This volume aims to develop academic insights,

provide practical guidance, and enable an in-depth analysis of various aspects of this topic. The book is divided into four parts. The first part deals with a general overview of the understanding of multilateral cooperation, the background that led to the need for multilateral cooperation and the different stakeholders that play a relevant role in it. While the chapters included in the second part focus on the most important developments on an international level (OECD and UN), the chapters encompassed in the third part analyse the multilateral cooperation initiatives of the EU. Finally, the chapters included in part four deal with selected issues related to multilateral cooperation in tax law, including mutual assistance and exchange of information, dispute resolution mechanisms, and measures in digitalized businesses.

1199 union handbook 2022: The New Laws of Outer Space Ugo Pagallo, 2024-11-14 This book maps out the moral, legal and societal issues brought forth by the use of autonomous systems such as AI and smart robots in outer space. Humanity is on the brink of a new space era in which projects for permanent human colonies on the Moon and space missions with autonomous AI systems will soon become a reality. Principles and provisions of international space law fall increasingly short in tackling this scenario. Experts and institutions have recommended improvements to the legal framework, such as new international agreements, or policies that would not require any amendment to conventional law. Most of the time, such proposals and recommendations overlook the challenges posed by technology and how autonomous and intelligent systems in outer space require moral and legal standards of their own. This book argues that the traditional focus on satellite communications, space-related services, and the appropriability of celestial resources needs to be integrated by new laws of outer space regulating cybersecurity law and environmental law, data governance and consumer protection. The new laws of outer space will increasingly concern the development of new standards for the behaviour and decision-making of AI systems and smart robots, with and without humans aboard deep space missions and in next-generation colonies. What laws shall govern us out there, in a new terra incognita? This is the question that the book sets out to answer.

1199 union handbook 2022: Observing Conflict Escalation in World Society Richard Bösch, 2023-09-30 How do conflicts escalate? This is one of the major questions in conflict research. To offer further answers, Richard Bösch follows a tripartite agenda: First, he develops a constructivist methodology for the study of conflict escalation embedded in a Luhmannian systems theoretical world society perspective. Bösch argues that conflicts can be observed as social systems and he looks at the process of conflict escalation by analysing communication. Second, this analysis offers two case studies: the Maidan protests in Ukraine 2013-2014 and Mali's crisis 2010-2012. Third, it gives insights on how systems theoretical research can be beneficial for Peace and Conflict Studies.

1199 union handbook 2022: *Sustainable Peace in Northeast Asia* Yong-Shik Lee, 2023-09-05 Sustainable Peace in Northeast Asia examines the causes of lasting and complex tensions in the region from underlying political, historical, military and economic perspectives; discusses their historical development and political-economic implications for the world; and explores possible solutions to build lasting peace. The book is unique in that it approaches the topic from the historical perspective of each constituent country in the region. Major global powers such as the United States and Russia have also closely engaged in the political and economic affairs of this region through a network of alliances, diplomacy, trade and investment. The book also discusses the influence of these external powers over the crisis, their political and economic objectives in the region, their strategies and the dynamics that their engagement has created. Both South Korea and North Korea have sought reunification of the Korean peninsula, which will have a substantial impact on the region. The book examines its justification, feasibility and effects for the region. The book discusses the role of Mongolia in the context of the power dynamics in Northeast Asia. A relatively small country, in terms of its population, Mongolia has rarely been examined in this context; Sustainable Peace in Northeast Asia makes a fresh assessment of its potential role.

1199 union handbook 2022: *Bank Politics* David Howarth, Scott James, 2022-11-03 The problem of banks being 'too big to fail' was the defining regulatory issue of the global financial crisis. However, attempts to tackle the problem by separating retail banking from higher risk trading activities - known as structural reform - proved to be highly divisive and contributed to significant regulatory divergence. In this book, David Howarth and Scott James explain this variation by examining the politics of bank structural reform across six key jurisdictions: the United States, the European Union, the United Kingdom, France, Germany, and the Netherlands. Integrating political economy and public policy approaches, they develop a novel 'comparative financial power' framework to analyse how financial industry influence is mediated by two factors: first, whether bank lobbying is unified and centralized (cooperative financial power) or divided and fragmented (competitive financial power); and second, policy makers' use of venue shifting to depoliticize contentious policy issues. The book explains that the US and UK governments implemented major reforms because the banking industry was divided and faced significant opposition. However, venue shifting to an independent committee led to durable reform in the UK, while political polarization in the US contributed to contested reform. By contrast, the French and German governments balanced unified bank lobbying and political pressures to act by pursuing limited symbolic reforms; the Dutch government deflected the issue through delegation to multiple commissions (no reform); while political stalemate at the EU level resulted from early venue shifting and concerted pan-European bank lobbying. The book makes a major contribution to scholarship on the political economy of finance and business power.

1199 union handbook 2022: The Vision Zero Handbook Karin Edvardsson Björnberg, Sven Ove Hansson, Matts-Åke Belin, Claes Tingvall, 2022-11-30 This open access handbook provides a comprehensive treatment of Vision Zero, an innovative policy on public road safety developed in Sweden. Covering all the major topics of the subject, the book starts out with a thorough examination of the philosophy, ideas and principles behind Vision Zero. It looks at conditions for the effectiveness of the policy, principles of safety and responsibility as well as critique on the policy. Next, the handbook focuses on how the Vision Zero ideas have been received and implemented in various legislations and countries worldwide. It takes into account the way Vision Zero is looked at in the context of international organizations such as the WHO, the UN, and the OECD. This allows for a comparison of systems, models and effects. The third part of the handbook discusses the management and leadership aspects, including ISO standards, equity issues, other goals for traffic and transportation, and opportunities for the car industry. Part four delves into tools, technologies and organizational measures that contribute to the implementation of Vision Zero in road traffic. Examples of specific elements discussed are urban and rural road designs, human factor designs, and avoiding drunk and distracted driving. The final part of the handbook offers perspectives on the transfer of Vision Zero policy to other areas, ranging from air traffic to suicide prevention and nuclear energy. Vision Zero is a public road safety policy including both a long-term goal that no one shall be killed or seriously injured as a consequence of accidents in road traffic and a safety principle stating that the design and function of the road transport system shall be adapted to meet the requirements that follow from that goal. It is a new road safety paradigm which has resulted in new types of responsibilities among stakeholders, technological innovations, and new strategies and organizational measures to achieve a safe system. The road safety work based on Vision Zero has shown promising results, and although Sweden has not yet reached a safe system, the number of fatalities and severe injuries has decreased substantially. This is an open access book.

1199 union handbook 2022: European Capital Markets Law Rüdiger Veil, 2022-03-24 “The richness, clarity and nuances of the structure and methodology followed by the contributors make the book a very valuable tool for students... seeking to obtain a general understanding of the market and how it is regulated.” – Ligia Catherine Arias Barrera, Banking & Finance Law Review The fully updated edition of this user-friendly textbook continues to systematise the European law governing capital markets and examines the underlying concepts from a broadly interdisciplinary perspective. The 3rd edition deals with 3 central developments: the project of the capital markets union; sustainable finance; and the further digitalisation of financial instruments and securities markets. The 1st chapter deals with the foundations of capital markets law in Europe, the 2nd explains the basics, and the 3rd examines the regime on market abuse. Chapter 4 explores the disclosure system and chapter 5 short-selling and high-frequency trading. The role of intermediaries, such as financial analysts, rating agencies, and proxy advisers, is described in chapter 6. Chapter 7 explains compliance and corporate governance in investment firms and chapter 8 illustrates the regulation of benchmarks. Finally, chapter 9 deals with public takeovers. Throughout the book emphasis is placed on legal practice, and frequent reference is made to the key decisions of supervisory authorities and courts. This is essential reading for students involved in the study of capital markets law and financial law.

1199 union handbook 2022: Exploring Politics Gaspare M. Genna, Taeko Hiroi, 2022-11-04

Exploring Politics: A Concise Introduction addresses the challenges of teaching and learning introductory concepts in political science. Its concise, accessible writing style brings a no-frills approach to the curriculum, allowing instructors to pepper in activities, current events, and their own lectures where they want while leaning on the text for foundational material required in the course. The book is organized topically to reflect how politics spreads from the individual and group level, to the national, and eventually the international level, taking the emphasis off the typically American-focused course of yesterday and building up informed national and global citizens. Gaspare M. Genna and Taeko Hiroi provide students with brief content modules broken up by critical thinking questions, class exercises, and activities, moving students beyond memorization and into the realm of application and discovery. This title is accompanied by a complete teaching and learning package in SAGE Vantage, an intuitive learning platform that instructors and students actually love.
