Phase 1: Base Building (Weeks 1-4) – Building Your Foundation for a 12 Week Olympic Triathlon Training Plan

This phase focuses on establishing a solid aerobic base. The emphasis is on consistent training volume and building endurance across all three disciplines. Intensity remains relatively low, prioritizing time on your feet, bike, and in the water.

Swimming: 3-4 sessions per week, focusing on technique and building aerobic capacity. Include drills and steady-state swims.

Cycling: 3-4 sessions per week, incorporating long, easy rides to build endurance. Include some hill work for strength development.

Strength Training: 2 sessions per week, focusing on core strength and overall body strength.

Phase 2: Strength and Speed Development (Weeks 5-8) – Integrating Intensity into your 12 Week Olympic Triathlon Training Plan

This phase introduces higher intensity workouts to improve speed and power. Interval training, tempo runs, and hill repeats are incorporated to enhance performance. Brick workouts (back-to-back cycling and running) are introduced to improve transitions and endurance.

Cycling: Include race-pace efforts and simulate the bike leg of the race.

Running: Include race-pace runs and shorter, high-intensity intervals.

Simulate the run leg of the race.

Rest and Recovery: Adequate rest and recovery are crucial for preventing injury and maximizing performance. Include rest days and incorporate active recovery strategies like light cycling or walking.

12 week olympic triathlon training plan: 80/20 Triathlon Matt Fitzgerald, David Warden, 2018-09-18 A breakthrough program for triathletes -- beginner, intermediate, and advanced -- showing how to balance training intensity to maximize performance -- from a fitness expert and elite coach. Cutting-edge research has proven that triathletes and other endurance athletes experience their greatest performance when they do 80 percent of their training at low intensity and the remaining 20 percent at moderate to high intensity. But the vast majority of recreational triathletes are caught in the so-called moderate-intensity rut, spending almost half of their time training too hard--harder than the pros. Training harder isn't smarter; it actually results in low-grade chronic fatigue that prevents recreational athletes from getting the best results. In 80/20 Triathlon, Matt Fitzgerald and David Warden lay out the real-world and scientific evidence, offering concrete tips and strategies, along with complete training plans for every distance--Sprint, Olympic, Half-Ironman, and Ironman--to help athletes implement the 80/20 rule of intensity balance. Benefits include reduced fatigue and injury risk, improved fitness, increased motivation, and better race results.
