121211 practice questions: *Inclusive Aims* Heather Brook Adams, Nancy Myers, 2024-03-02
Inclusive Aims: Rhetoric's Role in Reproductive Justice engages with fraught reproductive realities—past, present, and future—and offers analysis and advice for coalitional alliance and strategy building. For those who legitimately value the needs, desires, and safety of reproducing people, recent years have demonstrated that in the United States especially, reproductive matters represent not only contestation but extreme precarity. Considering such pressing exigencies, those pursuing just reproductive politics can benefit from thinking about such events and actions rhetorically, and not in isolation but as interconnected and connected to larger webs of action. The collection features a range of activist-scholars and scholar-activists, each of whom shares and/or interrogates stories of reproductive in/justice. Its topics range from discourse practices related to telehealth, birthing doula care, and negligence due to systemic racism and transphobia to representations of vasectomy, strategies for political solidarity, and considerations for navigating the challenges of activist interventions. The project mindfully infuses insights from thought-traditions of reproductive justice activists and scholars outside of rhetoric. Through its varied chapters, the collection demonstrates how rhetorics of reproductive politics function as a means by which various injustices are illuminated and addressed. Contributors include Zachary Beare, Fabiola Carrión, Hannah Dudley-Shotwell, Natalie Fixmer-Oraiz, Meta Henty, Adele N. Nichols, Sheri Rysdam, Shui-yin Sharon Yam, Michelle C. Smith, Melissa Stone, Jill Swiencicki, Jenna Vinson, and James D. Warwood.

121211 practice questions: Community Ecology Alan Hastings, 2013-11-11 This book presents the proceedings of a workshop on community ecology organized at Davis, in April, 1986, sponsored by the Sloan Foundation. There have been several recent symposia on community ecology (Strong et. al., 1984, Diamond and Case, 1987) which have covered a wide range of topics. The goal of the workshop at Davis was more narrow: to explore the role of scale in developing a theoretical approach to understanding communities. There are a number of aspects of scale that enter into attempts to understand ecological communities. One of the most basic is organizational scale. Should community ecology proceed by building up from population biology? This question and its ramifications are stressed throughout the book and explored in the first chapter by Simon Levin. Notions of scale have long been important in understanding physical systems. Thus, in understanding the interactions of organisms with their physical environment, questions of scale become paramount. These more physical questions illustrate the role scale plays in understanding ecology, and are discussed in chapter two by Akira Okubo.
