1236 northgate business parkway: Augie's Quest Augie Nieto, T.R. Pearson, 2011-01-15 What happens to orphan diseases that aren't big enough profit centers for the pharmaceutical industry or

get caught in the web of government funding and academic research? Augie Nieto found out in the spring of 2005: At forty-seven years old he was diagnosed with ALS. Devastated, Augie struggled with depression and attempted suicide. When he awoke from a coma, with friends and family surrounding him, his sense of faith and mission were renewed. Fast-forward one year: Augie and his wife, Lynne, were profiled as Real Heroes on the Today show. Their determination to beat the disease had already led to major overhauls in the way ALS research was conducted. In partnership with the Muscular Dystrophy Association, Augie had set up a foundation and lab to coordinate and oversee ALS research and testing across the globe. By centralizing operations and championing an entrepreneurial approach to medical research, Augie and his team accomplished remarkable results in less than two years. Part inspiration, part business innovation, Augie's Quest illustrates how one person can make a meaningful difference. Praise for Augie Nieto: George H. W. Bush, former U.S. president: Your contributions to the fitness industry are well known, and your dedication an inspiration. Lance Armstrong, seven-time Le Tour de France champion: I think it says a lot about Augie, the fact that everybody came together regardless of whether or not it's for competing gyms or competing companies that make equipment. They all say, this is one of our own; this is a guy who's committed his life to our industry and has been dealt a serious blow. We're going to be there for him, we're going to say, we're here for you and we're part of the Quest. Arnold Schwarzenegger, governor of California: Your success has been incredible. But you are so much more than just a successful businessman. You are the greatest husband, a great father, and a terrific friend. So,

1236 northgate business parkway: Reinventing Food Banks and Pantries Katie S. Martin, 2021-03-09 In the US, there is a wide-ranging network of at least 370 food banks, and more than 60,000 hunger-relief organizations such as food pantries and meal programs. These groups provide billions of meals a year to people in need. And yet hunger still affects one in nine Americans. What

are we doing wrong? In *Reinventing Food Banks and Pantries*, Katie Martin argues that if handing out more and more food was the answer, we would have solved the problem of hunger decades ago. Martin instead presents a new model for charitable food, one where success is measured not by pounds of food distributed but by lives changed. The key is to focus on the root causes of hunger. When we shift our attention to strategies that build empathy, equity, and political will, we can implement real solutions. Martin shares those solutions in a warm, engaging style, with simple steps that anyone working or volunteering at a food bank or pantry can take today. Some are short-term strategies to create a more dignified experience for food pantry clients: providing client choice, where individuals select their own food, or redesigning a waiting room with better seating and a designated greeter. Some are longer-term: increasing the supply of healthy food, offering job training programs, or connecting clients to other social services. And some are big picture: joining the fight for living wages and a stronger social safety net. These strategies are illustrated through inspiring success stories and backed up by scientific research. Throughout, readers will find a wealth of proven ideas to make their charitable food organizations more empathetic and more effective. As Martin writes, it takes more than food to end hunger. Picking up this insightful, lively book is a great first step.
