123rd special tactics squadron: U.S. Air Force Special Tactics Combat Control School Heritage Foundation, 2022-11-08 The CCT - The Eye of the Storm-series chronicles the exploits of Air Force Special Warfare, Combat Control Teams (CCT). It is told in the form of short stories; many etched by a cocktail of blood, sweat and tears. The Combat Control story began in the de facto Volume I with the appearance of the first CCTs; i.e., command and control teams cobbled together by the WWII U.S. Army Air Force (USAAF) for Operation Varsity. The CCT story continued in Volume II, detailing the 21st Century fight in the Global War on Terrorism (GWOT). Included are two humanitarian missions; operations of epic proportion in Haiti and Japan. In this third volume subtitled - Medal of Honor (MOH) - the CCT story is expanded, incorporating the two previously self-published volumes and adding hundreds of new stories from around the globe. But, with a concentration on operations in southwest Asia; including Afghanistan; now America's longest war. This volume is an all-inclusive compilation presented as a single, premium publication. The diversity of feature stories, subjects and styles present a well-rounded, unbiased look at the CCT's view at "the eye of the storm." Each published PA reporter and volunteer contributor has a by-line in the book. Thanks to all for their remarkable journalistic work. The book is expected to engage a wider-ranging audience of American and allied military elements, families, historians and enthusiasts. More importantly, Medal of Honor celebrates the first-ever award of the Air Force Medal of Honor to a Combat Control patriot and hero. On April 20, 2018 after more than fifteen years technical review and Air Staff deliberation the Medal of Honor for TSgt John Chapman was approved by President Donald Trump. The MOH award ceremonies and associated events are covered in detail near the end of this book. In preparing CCT - The Eye of the Storm - Medal of Honor, the goal was to collect stories from hundreds of sources, written by an even larger band of vetted professionals selected to observe, record and report truths about military units in action. In my mind the U.S. Government Public Affairs Offices were the perfect choice. For that reason, you will find hundreds of PA-generated stories used herein. Through our collective efforts we have published a fair and accurate chronical of USAF Combat Control Team's stories; exploiting the public domain and declassified accounts. This is a documentary of Air Force Combat Control Teams operating at The Eye of the Storm. Subtitled Medal of Honor; it is the most in-depth CCT history ever published.

as soon as the second hijacked 767 struck the south tower of the world trade center, Air Force Combat Controllers began to report to their bases and pack their gear. Spread around the world in special tactics squadrons, these airmen would provide the lightly armed U.S. Army Special Forces teams with a number of capabilities that would turn them into world-class killing machines. John D. Mark Bowden Author, *Blackhawk Down* Somalia, 1999 Individually, they are specially selected, specially trained, and, in support of special operations, almost daily bring American airpower to bear on our nations enemies. Roche Secretary of the United States Air Force 2001 - 2005 if you asked what tool of the trade would be the very last they would leave behind, you might be surprised at the answer. You would likely hear that it is not a tool that makes one nervous when it isnt there, but rather a capability that is not organic to a troop of Delta Operators or Navy SEALs Just because you are the best of the best does not mean you are the best at everything. 123rd special tactics squadron: Air National Guard at sixty: A History, The Air National Guard's role within the Air Force has matured and changed enormously since its establishment as a separate reserve component September 18, 1947. Air National Guard members have served around the world and their military experience and civilian skills have proven invaluable as our nation prosecuted conflicts in Korea, Vietnam, the Persian Gulf, Kosovo, Afghanistan, and Iraq. They also served during several major contingencies including the Cuban Missile Crisis and the Berlin Crisis of 1961 and 1962. In addition, Air Guard members made major contributions in a host of other operations in Panama, the Balkans, Somalia, Rwanda, Haiti, and the Iraq no-fly zones instituted after Operation Desert Storm. In the United States, the Hurricane Katrina relief efforts brought into sharp focus the Air Guard's well-established role as America's hometown Air Force. 123rd special tactics squadron: Enduring Freedom, Enduring Voices Michael G. Walling, 2015-01-20 "Michael Walling has honored the American men and women who served in Operation Enduring Freedom by helping them tell their own stories. This is the war in Afghanistan as experienced by the people who fought it." - General Tommy R. Franks, Ret. The war in Afghanistan has seen men and women thrown into America's longest sustained combat operation. For over 13

years, US military personnel have been embroiled in a conflict unlike any other, in a hostile country where danger and death lurk at every turn. The nature of the fighting has transformed not only the entire structure of the US military, but the lives of every soldier, sailor, marine, coast guardsman, and airman who served there. There have been many tales told of this most recent Afghan war, but until now no single work has combined the strategic view of high-level commanders with the perspective of soldiers on the ground. This book places the first-hand accounts of serving men and women into the context of the military operations. Drawing on gripping oral histories from theater commanders, Special Forces troops, reconstruction teams, and everyday soldiers, Michael G. Walling analyzes operations as they were experienced by individuals, from those immediately following 9/11 through to those in 2014 as US troops prepared to withdraw. He also charts the evolution of US military structure as it was forced to adapt to cope with the non-conventional, but nonetheless deadly threats of asymmetric warfare, as well as detailing covert ops, infrastructure rebuilding, and the training of Afghan forces. Resonating across gender, age, nationality, and ethnicity, this book is not just a document of US fortunes in a far-flung conflict. It is a tribute to the determination, heroism, sacrifice, and the strength of the human spirit.

123rd special tactics squadron: *Guardian Angel* William F. Sine, 2013-04-02 “A fabulous read, filled with heroism, history, and hi-jinks, as author William F. Sine recounts his life as an Air Force Pararescue Jumper” (Readers’ Favorite). US Air Force Pararescue is the most skillful and capable rescue force in the world, taking on some of the most dangerous rescue missions imaginable. PJs (short for para-jumpers), are members of an elite unit whose commando skills are so wide-reaching they often seem like something out of science fiction. They routinely tackle perilous operations that are beyond the capabilities of other rescue organizations, and sometimes dare the seemingly impossible. Since their inception in 1947, PJs have saved more than thirty thousand lives. They can pluck near-frozen climbers off jagged mountaintops and recover shot-down jet pilots stranded deep in hostile territory. In the dead of night, the PJs parachute into ominous, black, twenty-foot-tall waves to save distressed seamen, and they brave the cruelest and most desolate deserts to recover victims. US Air Force pararescuemen have played a prominent role in every armed conflict since the Korean War, rescuing thousands of soldiers from behind enemy lines. *Guardian Angel* provides a rare glimpse at a PJ’s mind-blowing adventures. You follow Sgt. Sine’s trek across exotic lands and share his encounters with mysterious cultures. Learn what it takes to lower from a helicopter onto the slippery decks of storm-tossed ships to rescue dying sailors. Feel what it’s like to be caught in the middle of a bomb blast so powerful that it tears high-rise buildings in half, and flattens armored vehicles hundreds of yards away. Soar high above towering jungle trees and experience the danger of swinging on a slim cable below a helicopter, while performing a mid-air rescue of a pilot, dangling from his chute a hundred feet above a mountain slope. Go to war in Afghanistan and parachute onto a nocturnal battlefield, surrounded by land mines, to help a mortally wounded soldier. This is a

deadly serious business: When things go wrong, they can go terribly wrong. Aircraft crash into mountainsides, killing all onboard, while some PJs live through horrendous helicopter crashes only to struggle with freezing temperatures, snapped limbs and torn flesh in a desperate fight for survival. This book presents true stories of uncommon courage told from the perspective of the actual men in the arena. PJs belong to an exclusive brotherhood and forge unbreakable bonds of loyalty, commitment, and sacrifice. They do these things for their country, to protect their brothers in arms, and to honor their motto: "That Others May Live."

123rd special tactics squadron: Special Forces in the War on Terror Leigh Neville, 2015-05-20 A fascinating insight into US and Coalition Special Forces operating in Iraq, Afghanistan, Somalia and Mali. Within weeks of 9/11, United States Special Operations Forces were dropping into Afghanistan to lead the war against Al Qaeda and the Taliban. For over a decade, special forces have been fighting a hidden war in Iraq, Pakistan, Syria, Somalia, Mali and Afghanistan, facing off against a range of insurgents from organisations like al Qaeda, al Shabaab, Boko Haram and the Taliban. Leigh Neville draws on recently declassified material and first-hand-accounts from his SOF contacts to lift the veil of secrecy from these operations, giving an unprecedented blow-by-blow description of major Special Forces operations, culminating in SEAL Team 6's Operation Neptune Spear and the killing of Osama bin Laden. Detailing the special equipment, tactics, machinery and training that these Special Operatives received and used this impressive volume shows how the world's elite soldiers fought against overwhelming odds around the world.

123rd special tactics squadron: *Mons 1914* David Lomas, 2012-09-20 Alongside maps and carefully-chosen archive photography, David Lomas explores The British Expeditionary Force's presence during the battle of Mons and thereafter. When the First World War broke out in August 1914 the Imperial German Army mistakenly assumed that the BEF - 'that contemptible little army' - would be easily defeated. They were stopped in their tracks by the numerically inferior British force, whose excellent marksmanship cost the closed packed German ranks dear. Eventually forced to fall back by overwhelming German numbers, the British carried out a masterful fighting retreat across Belgium and northern France. At Mons, nine and a half British battalions held four German divisions

at bay for an entire day. This book examines not just the battle of Mons itself but also the ensuing British retreat including the actions at Le Cateau and Villers-Cotterêts.

Hardison, Brian Gifford, Alexis Bailey, Aimee Bower, 2007-10-16 Air Force members who do not routinely cross a defended perimeter when deployed may not have received sufficient training for doing so when they need to. The authors conducted surveys and interviews to determine the kinds of experiences airmen have had outside the wire, worked with subject-matter experts to categorize them and suggest training levels, and developed a series of recommendations for course content and further areas for study.

123rd special tactics squadron: *The Lessons of Afghanistan* Anthony H. Cordesman, 2002 Asymmetric wars tend to be highly adaptive, and this war is both regional and global in scope. It is also a struggle fought in a context where it may come to interact with other conflicts such as the ongoing Israeli-Palestinian struggle and a possible U.S. effort to drive Saddam Hussein from power. So, while it is easier to draw lessons than to validate them, this study begins that process.--BOOK JACKET.

123rd special tactics squadron: *Examination of the U.S. Air Force's Aircraft Sustainment Needs in the Future and Its Strategy to Meet Those Needs* National Research Council, Division on Engineering and Physical Sciences, Air Force Studies Board, Committee on Examination of the U.S. Air Force's Aircraft Sustainment Needs in the Future and Its Strategy to Meet Those Needs, 2011-11-17 The ability of the United States Air Force (USAF) to keep its aircraft operating at an acceptable operational tempo, in wartime and in peacetime, has been important to the Air Force since its inception. This is a much larger issue for the Air Force today, having effectively been at war for 20 years, with its aircraft becoming increasingly more expensive to operate and maintain and with military budgets certain to further decrease. The enormously complex Air Force weapon system sustainment enterprise is currently constrained on many sides by laws, policies, regulations and procedures, relationships, and organizational issues emanating from Congress, the Department of Defense (DoD), and the Air Force itself. Against the back-drop of these stark realities, the Air Force requested the National Research Council (NRC) of the National Academies, under the auspices of the Air Force Studies Board to conduct an in-depth assessment of current and future Air Force weapon system sustainment initiatives and recommended future courses of action for consideration by the Air Force. *Examination of the U.S. Air Force's Aircraft Sustainment Needs in the Future and Its Strategy to Meet Those Needs* addresses the following topics: Assess current sustainment investments, infrastructure, and processes for adequacy in sustaining aging legacy systems and their support equipment. Determine if any modifications in policy are required and, if so, identify them and make recommendations for changes in Air Force regulations, policies, and strategies to accomplish the sustainment goals of the Air Force. Determine if any modifications in technology efforts are required and, if so, identify them and make recommendations regarding the technology efforts that should be pursued because they could make positive impacts on the sustainment of the current and future systems and equipment of the Air Force. Determine if the Air Logistics Centers have the necessary resources (funding, manpower, skill sets, and technologies) and are equipped and organized to sustain legacy systems and equipment and the Air Force of tomorrow. Identify and make recommendations regarding incorporating sustainability into future aircraft designs.

123rd special tactics squadron: *AU-18 Space Primer* Air Command Staff College, 2012-08-01 The US National Space Policy released by the president in 2006 states that the US government should develop space professionals. As an integral part of that endeavor, AU-18, Space

Primer, provides to the joint war fighter an unclassified resource for understanding the capabilities, organizations, and operations of space forces. This primer is a useful tool both for individuals who are not space aware-unacquainted with space capabilities, organizations, and operations-and for those who are space aware, especially individuals associated with the space community, but not familiar with space capabilities, organizations, and operations outside their particular areas of expertise. It is your guide and your invitation to all the excitement and opportunity of space. Last published in 1993, this updated version of the Space Primer has been made possible by combined efforts of the Air Command and Staff College's academic year 2008 Jointspacemindedness and Operational Space research seminars, as well as select members of the academic year 2009 Advanced Space research seminar.
