**a history of world societies volume 2: *Crimes Unspoken*** Miriam Gebhardt, 2016-12-20 The soldiers who occupied Germany after the Second World War were not only liberators: they also brought with them a new threat, as women throughout the country became victims of sexual violence. In this disturbing and carefully researched book, the historian Miriam Gebhardt reveals for the first time the scale of this human tragedy, which continued long after the hostilities had ended. Discussion in recent years of the rape of German women committed at the end of the war has focused almost exclusively on the crimes committed by Soviet soldiers, but Gebhardt shows that this picture is misleading. Crimes were committed as much by the Western Allies - American, French and British - as by the members of the Red Army. Nor was the suffering limited to the immediate aftermath of the war. Gebhardt powerfully recounts how raped women continued to be the victims of doctors, who arbitrarily granted or refused abortions, welfare workers, who put pregnant women in homes, and wider society, which even today prefers to ignore these crimes. *Crimes Unspoken* is the first historical account to expose the true extent of sexual violence in Germany at the end of the war, offering valuable new insight into a key period of 20th century history.

**a history of world societies volume 2: The Dawn of Everything** David Graeber, David Wengrow, 2021-11-09 INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. *The Dawn of Everything* fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

**a history of world societies volume 2: The History of Cartography: Cartography in prehistoric, ancient, and medieval Europe and the Mediterranean** John Brian Harley, David Woodward, 1987 By developing the broadest and most inclusive definition of the term map ever adopted in the history of cartography, this inaugural volume of the *History of Cartography* series has helped redefine the way maps are studied and understood by scholars in a number of disciplines. Volume One addresses the prehistorical and historical mapping traditions of premodern Europe and the Mediterranean world. A substantial introductory essay surveys the historiography and theoretical development of the history of cartography and situates the work of the multi-volume series within this scholarly tradition. Cartographic themes include an emphasis on the spatial-cognitive abilities of Europe's prehistoric peoples and their transmission of cartographic concepts through media such as rock art; the emphasis on mensuration, land surveys, and architectural plans in the cartography of Ancient Egypt and the Near East; the emergence of both theoretical and practical cartographic knowledge in the Greco-Roman world; and the parallel existence of diverse mapping traditions (mappaemundi, portolan charts, local and regional cartography) in the Medieval period. Throughout the volume, a commitment to include cosmographical and celestial maps underscores the inclusive definition of map and sets the tone for the breadth of scholarship found in later volumes of the series.

**a history of world societies volume 2: *The Routledge History of the Second World War*** Paul R. Bartrop, 2021-11-08 The Routledge History of the Second World War sums up the latest trends in the scholarship of that conflict, covering a range of major themes and issues. The book delivers a thematic analysis of the many ways in which study of the Second World War can take place, considering international, transnational, and global approaches, and serves as a major jumping off point for further research into the specific fields covered by each of the expert authors. It demonstrates the global and total nature of the Second World War, giving due coverage to the conflict in all major theatres and through the lens of the key combatants and neutrals, examines issues of race, gender, ideology, and society during the war, and functions as a textbook to educate students as to the trends that have taken place in how the conflict has been (and can be) interpreted in the modern world. Divided into twelve parts that cover central themes of the conflict, including theatres of war, leadership, societies, occupation, secrecy and legacies, it enables those with no memory of war to approach it with a view to comprehending what it was all about and places the history of this conflict into a context that is international, transnational, and institutional. This is a comprehensive and accessible reference volume for anyone interested in the most up to date scholarship on this major conflict. Chapter 18 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license available at <http://www.taylorfrancis.com>

**a history of world societies volume 2: *Cold War Cultures*** Annette Vowinckel, Marcus M. Payk, Thomas Lindenberger, 2012-03-01 The Cold War was not only about the imperial ambitions of the super powers, their military strategies, and antagonistic ideologies. It was also about conflicting worldviews and their correlates in the daily life of the societies involved. The term "Cold War Culture" is often used in a broad sense to describe media influences, social practices, and symbolic representations as they shape, and are shaped by, international relations. Yet, it remains in question whether — or to what extent — the Cold War Culture model can be applied to European societies, both in the East and the West. While every European country had to adapt to the constraints imposed by the Cold War, individual development was affected by specific conditions as detailed in these chapters. This volume offers an important contribution to the international debate on this issue of the Cold War impact on everyday life by providing a better understanding of its history and legacy in Eastern and Western Europe.

**a history of world societies volume 2: *What is Gender History?*** Sonya O. Rose, 2013-04-22 This book provides a short and accessible introduction to the field of gender history, one that has vastly expanded in scope and substance since the mid 1970s. Paying close attention to both classic texts in the field and the latest literature, the author examines the origins and development of the field and elucidates current debates and controversies. She highlights the significance of race, class and ethnicity for how gender affects society, culture and politics as well as delving into histories of masculinity. The author discusses in a clear and straightforward manner the various methods and approaches used by gender historians. Consideration is given to how the study of gender illuminates the histories of revolution, war and nationalism, industrialization and labor relations, politics and

citizenship, colonialism and imperialism using as examples research dealing with the histories of a number of areas across the globe. Written by one of the leading scholars in this vibrant field, *What is Gender History?* will be the ideal introduction for students of all levels.

**a history of world societies volume 2: *Disasters and History*** Bas van Bavel, Daniel R. Curtis, Jessica Dijkman, Matthew Hannaford, Maïka de Keyzer, Eline van Onacker, Tim Soens, 2020-10-22 *Disasters and History* offers the first comprehensive historical overview of hazards and disasters. Drawing on a range of case studies, including the Black Death, the Lisbon earthquake of 1755 and the Fukushima disaster, the authors examine how societies dealt with shocks and hazards and their potentially disastrous outcomes. They reveal the ways in which the consequences and outcomes of these disasters varied widely not only between societies but also within the same societies according to social groups, ethnicity and gender. They also demonstrate how studying past disasters, including earthquakes, droughts, floods and epidemics, can provide a lens through which to understand the social, economic and political functioning of past societies and reveal features of a society which may otherwise remain hidden from view. **a history of world societies volume 2: *The Cambridge World History: Volume 2, A World with Agriculture, 12,000 BCE-500 CE*** Graeme Barker, Candice Goucher, 2015-04-16 The development of agriculture has often been described as the most important change in all of human history. Volume 2 of the Cambridge World History series explores the origins and impact of agriculture and agricultural communities, and also discusses issues associated with pastoralism and hunter-fisher-gatherer economies. To capture the patterns of this key change across the globe, the volume uses an expanded timeframe from 12,000 BCE-500 CE, beginning with the Neolithic and continuing into later periods. Scholars from a range of disciplines, including archaeology, historical linguistics, biology, anthropology, and history, trace common developments in the more complex social structures and cultural forms that agriculture enabled, such as sedentary villages and more elaborate foodways, and then present a series of regional overviews accompanied by detailed case studies from many different parts of the world, including Southwest Asia, South Asia, China, Japan, Southeast Asia and the Pacific, sub-Saharan Africa, the Americas, and Europe.

**a history of world societies volume 2: *The World*** Simon Sebag Montefiore, 2023-05-16 NEW YORK TIMES BESTSELLER • A magisterial world history unlike any other that tells the story of humanity through the one thing we all have in common: families • From the author of *The Romanovs* "Succession meets Game of Thrones." —*The Spectator* • "The author brings his cast of dynastic titans, rogues and psychopaths to life...An epic that both entertains and informs." —*The Economist*, Best Books of the Year Around 950,000 years ago, a family of five walked along the beach and left behind the oldest family footprints ever discovered. For award-winning historian Simon Sebag Montefiore, these poignant, familiar fossils serve as an inspiration for a new kind of world history, one that is genuinely global, spans all eras and all continents, and focuses on the family ties that connect every one of us. In this epic, ever-surprising book, Montefiore chronicles the world's great dynasties across human history through palace intrigues, love affairs, and family lives, linking grand themes of war, migration, plague, religion, and technology to the people at the heart of the human drama. It features a cast of extraordinary diversity: in addition to rulers and conquerors, there are priests, charlatans, artists, scientists, tycoons, gangsters, lovers, husbands, wives, and children. There is Hongwu, the beggar who founded the Ming dynasty; Ewuare, the Leopard-King of Benin; Henry Christophe, King of Haiti; Kamehameha, the conqueror of Hawaii; Zenobia, the Arab empress who defied Rome; Lady Murasaki, the first female novelist; Sayyida al-Hurra, the Moroccan pirate-queen. Here too are moderns such as Indira Gandhi, Margaret Thatcher, Barack Obama, Vladimir Putin, and Volodymyr Zelensky. Here are the Caesars, Medicis and Incas, Ottomans and Mughals, Bonapartes, Habsburgs and Zulus, Rothschilds, Rockefellers and Krupps, Churchills, Kennedys, Castros, Nehrus, Pahlavis and Kenyattas, Saudis, Kims and Assads. These powerful families represent the breadth of human endeavor, with bloody succession battles, treacherous conspiracies, and shocking megalomania alongside flourishing culture, moving romances, and

enlightened benevolence. A dazzling achievement as spellbinding as fiction, *The World* captures the whole human story in a single, masterful narrative.

**a history of world societies volume 2: *The Legacies of Two World Wars*** Lothar Kettenacker, Torsten Riotte, 2011-08-01 The US invasion of Iraq in 2003 was done mainly, if one is to believe US policy at the time, to liberate the people of Iraq from an oppressive dictator. However, the many protests in London, New York, and other cities imply that the policy of "making the world safe for democracy" was not shared by millions of people in many Western countries. Thinking about this controversy inspired the present volume, which takes a closer look at how society responded to the outbreaks and conclusions of the First and Second World Wars. In order to examine this relationship between the conduct of wars and public opinion, leading scholars trace the moods and attitudes of the people of four Western countries (Great Britain, France, Germany and Italy) before, during and after the crucial moments of the two major conflicts of the twentieth century. Focusing less on politics and more on how people experienced the wars, this volume shows how the distinction between enthusiasm for war and concern about its consequences is rarely clear-cut.

**a history of world societies volume 2: *Environmentalism and Global International Society*** Robert Falkner, 2021-07-15 Explains how environmentalism became a fundamental norm in international relations and explores the impact of the greening of international society.

**a history of world societies volume 2: *Cetacean Societies*** Janet Mann, 2000-06 Part review, part testament to extraordinary dedication, and part call to get involved, *Cetacean Societies* highlights the achievements of behavioral ecologists inspired by the challenges of cetaceans and committed to the exploration of a new world.—from the preface by Richard Wrangham Long-lived, slow to reproduce, and often hidden beneath the water's surface, whales and dolphins (cetaceans) have remained elusive subjects for scientific study even though they have fascinated humans for centuries. Until recently, much of what we knew about cetaceans came from commercial sources such as whalers and trainers for dolphin acts. Innovative research methods and persistent efforts, however, have begun to penetrate the depths to reveal tantalizing glimpses of the lives of these mammals in their natural habitats. *Cetacean Societies* presents the first comprehensive synthesis and review of these new studies. Groups of chapters focus on the history of cetacean behavioral research and methodology; state-of-the-art reviews of information on four of the most-studied species: bottlenose dolphins, killer whales, sperm whales, and humpback whales; and summaries of major topics, including group living, male and female reproductive strategies, communication, and conservation drawn from comparative research on a wide range of species. Written by some of the world's leading cetacean scientists, this landmark volume will benefit not just students of cetology but also researchers in other areas of behavioral and conservation ecology as well as anyone with a serious interest in the world of whales and dolphins. Contributors are Robin Baird, Phillip Clapham, Jenny Christal, Richard Connor, Janet Mann, Andrew Read, Randall Reeves, Amy Samuels, Peter Tyack, Linda Weilgart, Hal Whitehead, Randall S. Wells, and Richard Wrangham.

**a history of world societies volume 2: *Muslim Societies in African History*** David Robinson, 2004-01-12 Examining a series of processes (Islamization, Arabization, Africanization) and case studies from North, West and East Africa, this book gives snapshots of Muslim societies in Africa over the last millennium. In contrast to traditions which suggest that Islam did not take root in Africa, author David Robinson shows the complex struggles of Muslims in the Muslim state of Morocco and in the Hausaland region of Nigeria. He portrays the ways in which Islam was practiced in the 'pagan' societies of Ashanti (Ghana) and Buganda (Uganda) and in the ostensibly Christian state of Ethiopia - beginning with the first emigration of Muslims from Mecca in 615 CE, well before the foundational hijra to Medina in 622. He concludes with chapters on the Mahdi and Khalifa of the Sudan and the Murid Sufi movement that originated in Senegal, and reflections in the wake of the events of September 11, 2001.

**a history of world societies volume 2: *Work's Intimacy*** Melissa Gregg, 2013-04-23 This book provides a long-overdue account of online technology and its impact on the work and lifestyles of professional employees. It moves between the offices and homes of workers in the new knowledge

economy to provide intimate insight into the personal, family, and wider social tensions emerging in today's rapidly changing work environment. Drawing on her extensive research, Gregg shows that new media technologies encourage and exacerbate an older tendency among salaried professionals to put work at the heart of daily concerns, often at the expense of other sources of intimacy and fulfillment. New media technologies from mobile phones to laptops and tablet computers, have been marketed as devices that give us the freedom to work where we want, when we want, but little attention has been paid to the consequences of this shift, which has seen work move out of the office and into cafés, trains, living rooms, dining rooms, and bedrooms. This professional presence bleed leads to work concerns impinging on the personal lives of employees in new and unforeseen ways. This groundbreaking book explores how aspiring and established professionals each try to cope with the unprecedented intimacy of technologically-mediated work, and how its seductions seem poised to triumph over the few remaining relationships that may stand in its way.

**a history of world societies volume 2: The Decline of the West** Oswald Spengler, Arthur Helps, Charles Francis Atkinson, 1991 Spengler's work describes how we have entered into a centuries-long world-historical phase comparable to late antiquity, and his controversial ideas spark debate over the meaning of historiography.

**a history of world societies volume 2: Times of History, Times of Nature** Anders Ekström, Staffan Bergwik, 2022-02-11 As climate change becomes an increasingly important part of public discourse, the relationship between time in nature and history is changing. Nature can no longer be considered a slow and immobile background to human history, and the future can no longer be viewed as open and detached from the past. *Times of History, Times of Nature* engages with this historical shift in temporal sensibilities through a combination of detailed case studies and synthesizing efforts. Focusing on the history of knowledge, media theory, and environmental humanities, this volume explores the rich and nuanced notions of time and temporality that have emerged in response to climate change.

**a history of world societies volume 2: *Climate Change and Society*** John Urry, 2011-06-20 This book explores the significance of human behaviour to understanding the causes and impacts of changing climates and to assessing varied ways of responding to such changes. So far the discipline that has represented and modelled such human behaviour is economics. By contrast *Climate Change and Society* tries to place the 'social' at the heart of both the analysis of climates and of the assessment of alternative futures. It demonstrates the importance of social practices organised into systems. In the fateful twentieth century various interlocking high carbon systems were established. This sedimented high carbon social practices, engendering huge population growth, increasing greenhouse gas emissions and the potentially declining availability of oil that made this world go round. Especially important in stabilising this pattern was the 'carbon military-industrial complex' around the world. The book goes on to examine how in this new century it is systems that have to change, to move from growing high carbon systems to those that are low carbon. Many suggestions are made as to how to innovate such low carbon systems. It is shown that such a transition has to happen fast so as to create positive feedbacks of each low carbon system upon each other. Various scenarios are elaborated of differing futures for the middle of this century, futures that all contain significant costs for the scale, extent and richness of social life. *Climate Change and Society* thus attempts to replace economics with sociology as the dominant discipline in climate change analysis. Sociology has spent much time examining the nature of modern societies, of modernity, but mostly failed to analyse the carbon resource base of such societies. This book seeks to remedy that failing. It should appeal to teachers and students in sociology, economics, environmental studies, geography, planning, politics and science studies, as well as to the public concerned with the long term future of carbon and society.

**a history of world societies volume 2: *History Education and Conflict Transformation*** Charis Psaltis, Mario Carretero, Sabina Čehajić-Clancy, 2017-08-29 This book is open access under a CC BY 4.0 license. This volume discusses the effects, models and implications of history teaching in relation to conflict transformation and reconciliation from a social-psychological perspective. Bringing

together a mix of established and young researchers and academics, from the fields of psychology, education, and history, the book provides an in-depth exploration of the role of historical narratives, history teaching, history textbooks and the work of civil society organizations in post-conflict societies undergoing reconciliation processes, and reflects on the state of the art at both the international and regional level. As well as dealing with the question of the 'perpetrator-victim' dynamic, the book also focuses on the particular context of transition in and out of cold war in Eastern Europe and the post-conflict settings of Northern Ireland, Israel and Palestine and Cyprus. It is also exploring the pedagogical classroom practices of history teaching and a critical comparison of various possible approaches taken in educational praxis. The book will make compelling reading for students and researchers of education, history, sociology, peace and conflict studies and psychology.
