But around the world, more than three-quarters of a billion people can't do any of that—because they have no clean water source near their homes. And 1.7 billion don't have access to a toilet. This crisis affects a third of the people on the planet. It keeps kids out of school and women out of work. It traps people in extreme poverty. It spreads disease. It's also solvable. That conviction is what brought together movie actor Matt Damon and water expert and engineer Gary White. They spent years getting the answer wrong, then halfway right, then almost right. Over time, they and their organization, Water.org, have found an approach that works. Working with partners across East Africa, Latin America, South Asia, and Southeast Asia, they've helped over 40 million people access water and/or sanitation. In *The Worth of Water*, Gary and Matt take us along on the journey—telling stories as they uncover insights, try out new ideas, and travel between the communities they serve and the halls of power where decisions get made. With humor and humility, they illuminate the challenges of launching a brand-new model with extremely high stakes: better health and greater prosperity for people all over the world. *The Worth of Water* invites us to become a part of this effort—to match hope with resources, to empower families and communities, and to end the global water crisis for good. All the authors' proceeds from the sale of this book will be donated to Water.org.

a long walk to water questions and answers: How to Walk on Water and Climb up Walls David Hu, 2018-11-13 Discovering the secrets of animal movement and what they can teach us Insects walk on water, snakes slither, and fish swim. Animals move with astounding grace, speed, and versatility: how do they do it, and what can we learn from them? In *How to Walk on Water and Climb up Walls*, David Hu takes readers on an accessible, wondrous journey into the world of animal motion. From basement labs at MIT to the rain forests of Panama, Hu shows how animals have adapted and evolved to traverse their environments, taking advantage of physical laws with results that are startling and ingenious. In turn, the latest discoveries about animal mechanics are inspiring scientists to invent robots and devices that move with similar elegance and efficiency. Hu follows scientists as they investigate a multitude of animal movements, from the undulations of sandfish and

the way that dogs shake off water in fractions of a second to the seemingly crash-resistant characteristics of insect flight. Not limiting his exploration to individual organisms, Hu describes the ways animals enact swarm intelligence, such as when army ants cooperate and link their bodies to create bridges that span ravines. He also looks at what scientists learn from nature's unexpected feats—such as snakes that fly, mosquitoes that survive rainstorms, and dead fish that swim upstream. As researchers better understand such issues as energy, flexibility, and water repellency in animal movement, they are applying this knowledge to the development of cutting-edge technology. Integrating biology, engineering, physics, and robotics, *How to Walk on Water and Climb up Walls* demystifies the remarkable mechanics behind animal locomotion.

a long walk to water questions and answers: *The Buried Giant* Kazuo Ishiguro, 2015-03-03 NATIONAL BESTSELLER • From the winner of the Nobel Prize in Literature and author of *Never Let Me Go* and the Booker Prize-winning novel *The Remains of the Day* comes a luminous meditation on the act of forgetting and the power of memory. In post-Arthurian Britain, the wars that once raged between the Saxons and the Britons have finally ceased. Axl and Beatrice, an elderly British couple, set off to visit their son, whom they haven't seen in years. And, because a strange mist has caused mass amnesia throughout the land, they can scarcely remember anything about him. As they are joined on their journey by a Saxon warrior, his orphan charge, and an illustrious knight, Axl and Beatrice slowly begin to remember the dark and troubled past they all share. By turns savage, suspenseful, and intensely moving, *The Buried Giant* is a luminous meditation on the act of forgetting and the power of memory.

a long walk to water questions and answers: *Walking on Water* Derrick Jensen, 2005 This is a hard-hitting and sometimes scathing critique of the current educational system that not only gives a hands-on method for learning how to write, but also a lesson on how to connect to the core of our creative selves.

a long walk to water questions and answers: *Wandering Home* Bill McKibben, 2005 The acclaimed author of *The End of Nature* takes a three-week walk from his current home in Vermont to his former home in the Adirondacks and reflects on the deep hope he finds in the two landscapes. Bill McKibben begins his journey atop Vermont's Mt. Abraham, with a stunning view to the west that introduces us to the broad Champlain Valley of Vermont, the expanse of Lake Champlain, and behind it the towering wall of the Adirondacks. "In my experience," McKibben tells us, "the world contains no finer blend of soil and rock and water and forest than that found in this scene laid out before me—a few just as fine, perhaps, but none finer. And no place where the essential human skills—cooperation, husbandry, restraint—offer more possibility for competent and graceful inhabitation, for working out the answers that the planet is posing in this age of ecological pinch and social fray." The region he traverses offers a fine contrast between diverse forms of human habitation and pure wilderness. On the Vermont side, he visits with old friends who are trying to sustain traditional ways of living on the land and to invent new ones, from wineries to biodiesel. After crossing the lake in a rowboat, he backpacks south for ten days through the vast Adirondack woods. As he walks, he contemplates the questions that he first began to raise in his groundbreaking meditation on climate change, *The End of Nature*: What constitutes the natural? How much human intervention can a place stand before it loses its essence? What does it mean for a place to be truly wild? *Wandering Home* is a wise and hopeful book that enables us to better understand these questions and our place in the natural world. It also represents some of the best nature writing McKibben has ever done.

a long walk to water questions and answers: *The Art of Asking* Amanda Palmer, 2014-11-11 Rock star, crowdfunding pioneer, and TED speaker Amanda Palmer knows all about asking. Performing as a living statue in a wedding dress, she wordlessly asked thousands of passersby for their dollars. When she became a singer, songwriter, and musician, she was not afraid to ask her audience to support her as she surfed the crowd (and slept on their couches while touring). And when she left her record label to strike out on her own, she asked her fans to support her in making an album, leading to the world's most successful music Kickstarter. Even while Amanda is both celebrated and attacked for her fearlessness in asking for help, she finds that there are important things she cannot ask for—as a musician, as a friend, and as a wife. She learns that she isn't alone in this, that so many people are afraid to ask for help, and it paralyzes their lives and relationships. In this groundbreaking book, she explores these barriers in her own life and in the lives of those around her, and discovers the emotional, philosophical, and practical aspects of *The Art of Asking*.

Part manifesto, part revelation, this is the story of an artist struggling with the new rules of exchange in the twenty-first century, both on and off the Internet. *The Art of Asking* will inspire readers to rethink their own ideas about asking, giving, art, and love.

a long walk to water questions and answers: *The Color of Water* James McBride, 2012-03-01 From the New York Times bestselling author of *Deacon King Kong* and *The Good Lord Bird*, winner of the National Book Award for Fiction: The modern classic that Oprah.com calls one of the best memoirs of a generation and that launched James McBride's literary career. More than two years on The New York Times bestseller list. As a boy in Brooklyn's Red Hook projects, James McBride knew his mother was different. But when he asked her about it, she'd simply say 'I'm light-skinned.' Later he wondered if he was different too, and asked his mother if he was black or white. 'You're a human being! Educate yourself or you'll be a nobody!' she snapped back. And when James asked about God, she told him 'God is the color of water.' This is the remarkable story of an eccentric and determined woman: a rabbi's daughter, born in Poland and raised in the Deep South who fled to Harlem, married a black preacher, founded a Baptist church and put twelve children through college. A celebration of resilience, faith and forgiveness, *The Color of Water* is an eloquent exploration of what family really means.

A masterpiece that has inspired generations of writers in Nigeria, across Africa, and around the world." —Barack Obama "African literature is incomplete and unthinkable without the works of Chinua Achebe." —Toni Morrison Nominated as one of America's best-loved novels by PBS's *The Great American Read* *Things Fall Apart* is the first of three novels in Chinua Achebe's critically acclaimed African Trilogy. It is a classic narrative about Africa's cataclysmic encounter with Europe as it establishes a colonial presence on the continent. Told through the fictional experiences of Okonkwo, a wealthy and fearless Igbo warrior of Umuofia in the late 1800s, *Things Fall Apart* explores one man's futile resistance to the devaluing of his Igbo traditions by British political and religious forces and his despair as his community capitulates to the powerful new order. With more than 20 million copies sold and translated into fifty-seven languages, *Things Fall Apart* provides one of the most illuminating and permanent monuments to African experience. Achebe does not only capture life in a pre-colonial African village, he conveys the tragedy of the loss of that world while broadening our understanding of our contemporary realities.
